

Washington State Medicaid Transformation Project demonstration Section 1115 Waiver Quarterly Health IT Operational Report Demonstration Year 3: (January 1, 2019 to December 31, 2019) Federal Fiscal Quarter: First Quarter (January 1, 2019 to March 31, 2019) Demonstration Year 3 – Quarter 1 January 1, 2019 – March 31, 2019

The Health IT Operational Plan is composed of actionable deliverables to advance the health IT goals and vision articulated in the Health IT Strategic Roadmap (https://www.hca.wa.gov/assets/program/health-information-technology-strategic-roadmap.pdf). This work supports the Healthier Washington Medicaid Transformation (Transformation) in Washington State. The Health IT Roadmap and Operational Plan focuses on three phases of Transformation work: design, implementation and operations, and assessment. In the 3<sup>rd</sup> and 4<sup>th</sup> quarter of 2018, the Washington State Health Care Authority (HCA) led months of conversations that resulted in identifying tasks for the 2019 Health IT Operational Plan. These activities include 64 deliverables and tasks in areas including:

- SUD IMD Waiver
- Data and Governance
- Master Person Index
- Provider Directory
- Payment Models and Sources
- Enhancing Health Information Exchange functionality, including enhancing the CDR
- Registries
- Tribal Engagement
- EHRs
- Behavioral Health Integration

Beginning in 2019, Washington State has advanced in its efforts and entered into a phase of more detailed design and implementation of several activities.

### **Success Stories**

The Health IT team spent much of the first quarter of 2019 focused on integrating the tasks in the Substance Use Disorder (SUD) Health IT Plan (a required component of the SUD IMD 1115 Waiver) into our broader Health IT plans. We submitted a Financial Mapping Report to CMS to fulfill the first required deliverable in the SUD Health IT Plan. One of the funding sources identified in the Financial Mapping Report was the enhanced federal match rate available in Section 5042 of the Support Act for the Design, Development, and Implementation (DDI) of a Qualified Prescription Drug Monitoring Program (PDMP). These federal matching funds were identified as a key funding source for the SUD Health IT Plan given the overlap of tasks in that Plan and the tasks related to the DDI for a Qualified PDMP. Staff from HCA and the Department of Health (DOH) worked on developing an Advanced Planning Document (APD) to secure the enhanced federal match rate available under the Support Act for the DDI of the Qualified PDMP.

The Washington State DoH successfully connected it's PDMP System to the RxCheck Hub and can exchange data with Utah, Illinois and Kentucky. The State is also evaluating connecting to the PMPi Hub. Establishing these connections is an element of the inter-state data sharing requirements in the SUD Health IT Plan and for the Qualified PDMP.

HCA continues to add individuals into the CDR. The CDR now contains more than 7.5 million "continuity of care documents". It averages over 500,000 "continuity of care documents" per month. HCA continued encouraging providers to submit documents to the CDR. In addition, HCA began considerations on potential future uses of the clinical and claims data in the CDR (e.g., supporting statewide population health analytics).

HCA conducted a survey of behavioral health providers and included questions about Electronic Health Record use. The ability to interoperably exchange information with behavioral health providers is needed to support the service delivery transformation priorities in Washington State. Initial analyses suggest that approximately 85 percent of the more than 300 respondents were using either a certified EHR tool (36 percent) or an EHR tool (48 percent). Additional analyses are being conducted and will be included in future quarterly reports.

The state continues to update the State Medicaid Health IT Plan (SMHP) and align the SMHP with activities underway across the Health Care Authority and with key state agency partners (e.g., Department of Health). For example, the updated SMHP integrates information related to the Health IT Roadmap and Operational Plan required in the Medicaid Transformation Program and the SUD HIT Plan required as a component of the SUD IMD Waiver.

In fulfillment of task 1-03, a multi-agency Enterprise Governance Coalition has been formed to ensure coordination and resource alignment of information technology projects across state agencies and programs. One information technology project that the Enterprise Governance Group has considered is the Clinical Data Repository and opportunities for re-use of this infrastructure.

## Progress to date

During the first quarter of 2019, Washington State advanced its Health IT Operational Plan. This work included:

- Coordinating with Tribes and ACHs on state and national HIE resources.
- Continuing to support the Health IT Plan requirements of the SUD IMD waiver.
- Submitted the Financial Mapping Report for health IT tasks in the SUD IMD waiver.
- Conducting a survey of behavioral health providers.

- Considered the need and drafted a charter for a Clinical Data Repository (CDR) Data Governance Committee that, if established, could provide guidance and develop policies and processes regarding clinical and claims data and role-based access for clinical, social and claims data for purposes of the CDR.
- Identified 21 high value use cases for Master Person Index and completed case studies of other States' efforts related to Master Person Index.

While there was substantial progress made on deliverables in the first quarter of 2019, there were only two deliverables that were scheduled to be completed during this quarter:

### **Description of task: 12-01**

Support a survey of BH providers adoption/use of EHR/CEHRT.

This task was completed during the first quarter (initial analysis reported above). HCA plans to complete detailed analysis in the second quarter and include more detailed reporting in subsequent quarterly reports.

### **Description of task: 14-01**

HCA in collaboration with DoH will develop a financial map that identifies sources of funds (e.g., The Support Act, MMIS, CDC grants, DoH Budget) to execute the activities in this SUD HIT Plan in the IMD Waiver.

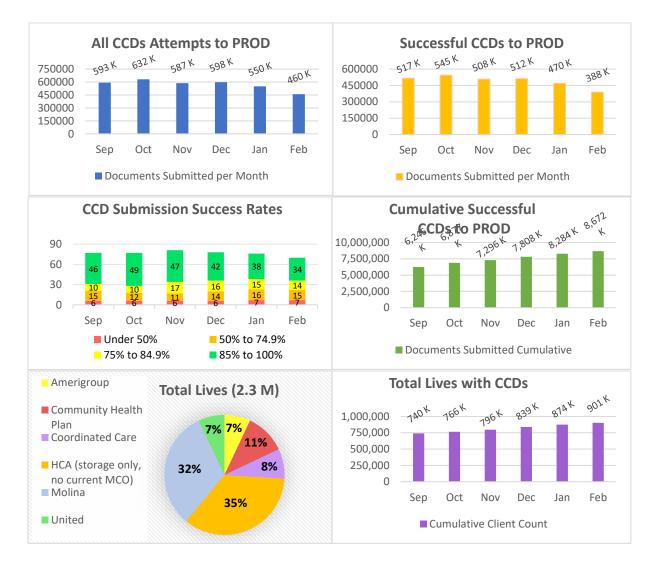

This task was completed on January 22, 2019 by submitting the financial mapping analysis to CMS. Washington State anticipates that financial mapping will be an ongoing activity and will require updates as potential new sources of funding are identified, analyzed and pursued.

Washington State continues to work on remaining deliverables in all major categories.

### Next Steps

Washington State continues to implement the 2019 Health IT Operational Plan. In addition, the state is working to coordinate and align information technology decision making with the multi-agency Enterprise Governance Group. Decisions made by the Enterprise Governance Group could impact activities undertaken in the 2019 Health IT Operational Plan. Finally, the Health Care Authority will submit to CMS in Q2 2019 the updated State Medicaid Health IT Plan (SMHP).
