

# WISe Dashboard

#### **ANNUAL UPDATE** SFY 2016 Q1 – SFY 2016 Q3

#### Wraparound with Intensive Services

- Intensive Care Coordination
- Intensive Mental Health Services Provided in Home and Community Settings
- Mobile Crisis Intervention and Stabilization Services

#### **JANUARY 2017**

Prepared by Washington State Department of Social and Health Services Research and Data Analysis Division Olympia, Washington

#### CONTACTS

Bridget Pavelle, PhD, Senior Research Manager, DSHS/RDA, 360.902.0741, bridget.pavelle@dshs.wa.gov Barb Lucenko, PhD, Chief, RDA Program Research and Evaluation Section, 360.902.0890, barbara.lucenko@dshs.wa.gov David Mancuso, PhD, Director, DSHS Research and Data Analysis Division (RDA), 360.902.7557, david.mancuso@dshs.wa.gov

#### Contents

WISe Screened, Served, and Proxy Populations, July 1, 2015 through March 31, 2016

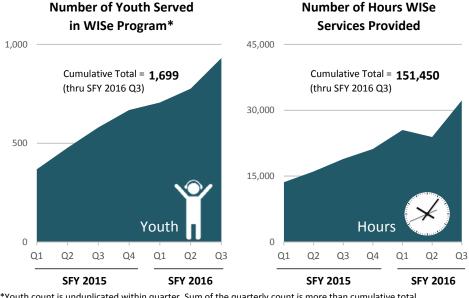

- Demographic and Geographic Characteristics
- Behavioral Health & Services
- Social & Health Services
- Functional Proxy Indicators

WISe Service Characteristics, July 1, 2015 through March 31, 2016

Child and Adolescent Needs and Strengths (CANS) at Intake and 6-Month Follow-Up

WISe Progress to Initial Full Implementation Target, by RSN and County, Data Available as of April 2016

### WISe At A Glance

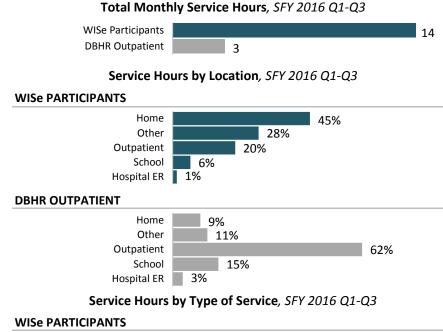

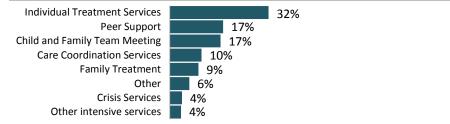

\*Youth count is unduplicated within quarter. Sum of the quarterly count is more than cumulative total.

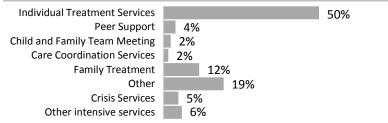

Counties offering WISe shown in color

#### **DBHR OUTPATIENT**

NOTES: WISe participants N=1,302. DBHR outpatient N=49,825 (clients age 0-20 with any DBHR outpatient mental health services). WISe participants are a subset of DBHR outpatient. Greater Columbia BHO omitted from location summary because location data not available.

#### July 1, 2015 to March 31, 2016

TOTAL POPULATION	1,350		240		105		1,005		1,302		25,090	

DATA SOURCE: List of youth screened and referral outcomes from BHAS data, list of youth receiving WISe and in WISe proxy from administrative data. Characteristics of all three populations from administrative data.

NOTES: Table presents characteristics of youth screened for WISe and receiving WISe Services between 7/1/2015 and 3/31/2016 as well as those in the WISe Proxy in SFY 2015. For youth screened more than once for WISe services, type of services screened into reflects the following hierarchy: (1) WISe; (2) CLIP/BRS; (3) Outpatient/Other. For youth screened for WISe, index month is month of screen (or, in the case of multiple screens, first screen in the date range resulting in that type of WISe services). For youth receiving WISe services, index month is the first month in the date range resulting in that type of WISe services (even if services began in a prior fiscal year). For youth in WISe proxy, index month is first month of Medicaid eligibility in SFY 2015. Region information is displayed using the current Behavioral Health Organization (BHO) and Fully Integrated Managed Care (FIMC) boundaries. Region assignment is based on location of residence in index month. Due to data lag, a small number of youth screeened and/or served could not yet be linked with administrative data. \*Cells representing fewer than ten individuals at the regional level have been suppressed to protect confidentiality.

#### DATA SOURCE: Administrative data.

NOTES: WISe services include all mental health outpatient service encounters submitted to CIS with the WISe "U8" modifier and other WISe-approved outpatient services received in a month with at least one "U8" service. Service provider type, location, and treatment modality are based on the distribution of WISe service hours. Region information is displayed using the current Behavioral Health Organization (BHO) boundaries. Youth served in more than one region during the report date range have been allocated to the region in which they received the greatest number of WISe "U8" service encounters in that date range. Service months for youth served in more than one region during a month have been allocated to the region in which they received the greatest number of WISe "U8" service encounters and service hours are allocated to the region in which they occurred. The Greater Columbia BHO service location is not available at the current time and is not included in statewide totals for this metric. Rounding may result in a slight difference between the total and sum of each region. \*Cells representing fewer than ten individuals at the regional level have been suppressed to protect confidentiality.

DATA SOURCE: Behavioral Health Assessment System (BHAS).

NOTES: These statistics reflect change over time in actionable treatment needs and youth strengths as identified on the CANS Full Assessment, conducted at intake and a 6-month follow up, for youth participating in the WISe program. The sample includes youth who completed a CANS initial assessment between 07/01/2015 and 3/31/2016 and subsequently completed a 6-month reassessment as of 11/30/2016. Youth served in different regions at the intake and 6-month time point have been allocated to the region in which their 6-month CANS was completed. 15 records from CLIP consumers were omitted from this report. The table displays the proportion of children with clinically significant treatment needs at each time point, i.e. the clinician rated the item as a 2 ("need for action") or 3 ("need for immediate or intensive action") instead of a 0 ("no current need") or 1 ("watchful waiting/prevention"). The top five treatment needs within each domain, by proportion at intake/initial assessment, are shown. The top five ranking reflects the statewide ranking and may not reflect item rank order for each region. A decline at the time of the 6-month reassessment represents improvement for these measures, i.e., a decrease in the proportion of children and youth with identified strengths that can be used in treatment planning to facilitate recovery. Strengths are identified when the clinician rated a strengths item as a 0 ("significant strength") or 3 ("no strength identified at this time").\*Cells representing fewer than ten individuals at the regional level have been suppressed to protect confidentiality.
