QUARTERLY UPDATE SFY 2015 Q1 – SFY 2016 Q1

Wraparound with Intensive Services

- Intensive Care Coordination
- Intensive Mental Health Services Provided in Home and Community Settings
- Mobile Crisis Intervention and Stabilization Services

APRIL 2016

Prepared by Washington State Department of Social and Health Services Research and Data Analysis Division Olympia, Washington

CONTACTS

Bridget Pavelle, PhD, Senior Research Manager, DSHS/RDA, 360.902.0741, bridget.pavelle@dshs.wa.gov
Barb Lucenko, PhD, Chief, RDA Program Research and Evaluation Section, 360.902.0890, barbara.lucenko@dshs.wa.gov
David Mancuso, PhD, Director, DSHS Research and Data Analysis Division (RDA), 360.902.7557, david.mancuso@dshs.wa.gov

Contents

WISe Screened, Served, and Proxy Populations, July 1, 2014 through September 30, 2015

- Demographic and Geographic Characteristics
- Behavioral Health History
- Cross-System Involvement History
- Functional Proxy Indicators

WISe Service Characteristics, July 1, 2014 through September 30, 2015
Child and Adolescent Needs and Strengths (CANS) at Intake and 6-Month Follow-Up
WISe Progress to Initial Full Implementation Target, by RSN and County, Data Available as of April 2016

July 1, 2014 to September 30, 2015

NOTES: Tables on pages 1 through 4 present characteristics of youth screened for WISe and receiving WISe Services between 7/1/2014 and 9/30/2015 as well as those in the WISe Proxy in SFY 2015. For youth screened more than once for WISe services, type of services screened into reflects the following hierarchy: (1) WISe; (2) CLIP/BRS; (3) Outpatient. For youth screened for WISe, index month is month of screen (or, in the case of multiple screens, first screen in the date range resulting in that type of WISe services). For youth receiving WISe services, index month is the first month in the date range in which youth received services (even if services began in a prior fiscal year). For youth in WISe proxy, index month is first month of Medicaid eligibility in SFY 2015. Region information is displayed using the current Behavioral Health Organization (BHO) and Fully Integrated Managed Care (FIMC) boundaries. Region assignment is based on location of residence in index month.

Behavioral health history, cross-system involvement history, and functional proxy indicators (pages 2, 3, and 4, respectively) based on 12-month period prior to index month for youth screened for and served by WISe in the date range; based on 12 months in SFY 2015 for youth in WISe proxy. Due to data lag, a small number of youth screened and/or served could not yet be linked with administrative data. *Cells representing fewer than ten individuals have been suppressed at the regional level to protect confidentiality.

July 1, 2014 to September 30, 2015

NOTES: WISe services include all mental health outpatient service encounters submitted to CIS with the WISe "U8" modifier and other WISe-approved outpatient services received in a month with at least one "U8" service. Service provider type, location, and treatment modality are based on the distribution of WISe service hours. Region information is displayed using the current Behavioral Health Organization (BHO) boundaries. Youth served in more than one region during the report date range have been allocated to the region in which they received the greatest number of WISe "U8" service encounters in that date range. Service months for youth served in more than one region during a month have been allocated to the region in which they received the greatest number of WISe "U8" service encounters during the month. Service encounters and service hours are allocated to the region in which they occurred. The Greater Columbia BHO service location is displayed as reported to ProviderONE and may change in future reports if those transactions are updated. *Cells representing fewer than ten individuals at the regional level have been suppressed to protect confidentiality.

NOTES: These statistics reflect change over time in actionable treatment needs and youth strengths as identified on the CANS Full Assessment, conducted at intake and at 6-month follow up, for youth participating in the WISe program. The sample includes youth who completed a CANS initial assessment between 7/01/2014 and 9/30/2015 and subsequently completed a 6-month reassessment as of 1/30/2016. Youth served in different regions at the intake and 6-month timepoint have been allocated to the region in which their 6-month CANS was completed. 5 records from CLIP consumers were omitted from this report. The table displays the proportion of children with clinically significant treatment needs at each timepoint, i.e. the clinician rated the item as a 2 ("need for action") or 3 ("need for immediate or intensive action") instead of a 0 ("no current need") or 1 ("watchful waiting/prevention"). The top five treatment needs within each domain, by proportion at intake/initial assessment, are shown. The top five ranking reflects the statewide ranking and may not reflect item rank order for each BHO. A decline at the time of the 6-month reassessment represents improvement for these measures, i.e., a decrease in the proportion of children and youth with clinically significant treatment needs in these areas. The top five strengths, by growth over time, are shown. An increase at the time of the 6-month reassessment represents improvement for these measures, i.e., an increase in the proportion of children and youth with identified strengths that can be used in treatment planning to facilitate recovery. *Cells representing fewer than ten individuals at the regional level have been suppressed to protect confidentiality. Please note that the Spokane region had 0 individuals who met sample criteria, and thus is not included in the table.

NOTES: Table displays the highest monthly WISe caseload recorded as of April 2016, based on the number of children residing in each county receiving WISe services. Due to data lag, progress shown in some areas may reflect WISe caseload as far back as February 2016 and as recent as March 2016. Initial mid-level monthly service targets reflect mid-level estimates of WISe youth projected to be served each month at full implementation; these initial forecasts are estimates and subject to change (please refer to the RDA document, "Addendum to 'Initial Estimates of WISe Utilization at Full Implementation," dated February 26, 2015). *Caseload counts of less than ten have been suppressed to protect confidentiality, and corresponding measures of "Progress to Target" are shown as ranges.

WISe Progress to Initial Full Implementation Target by Region

Data Available as of April 2016

NOTES: Table displays the highest monthly WISe caseload recorded as of April 2016, based on the number of children residing in each region receiving WISe services. Due to data lag, progress shown in some areas may reflect WISe caseload as far back as February 2016 and as recent as March 2016. Initial mid-level monthly service targets reflect mid-level estimates of WISe youth projected to be served each month at full implementation; these initial forecasts are estimates and subject to change (please refer to the RDA document, "Addendum to 'Initial Estimates of WISe Utilization at Full Implementation," dated February 26, 2015). *Caseload counts less than ten but greater than zero have been suppressed to protect confidentiality, and corresponding measures of "Progress to Target" are shown as ranges.
