

CYBHWG Workforce and Rates subgroup

Date: October 19, 2022

Leads: Representative Mari Leavitt, Hugh Ewart, Laurie Lippold

Review of recommendation outcome

- Member consensus was reached on the rates increase for multiple settings as an overarching recommendation; Children’s Long-term Inpatient program (CLIP) rate increase included.
- Unable to get consensus for the recommendation of expanding services and codify a consistent approach to support the needs of youth who are effectively “stuck” in hospitals, therefore it will be moved to the “new” recommendations category.
- All recommendations were presented with the decision to hold an additional meeting to be scheduled to determine recommendations to move forward with members voting on their top choices and then a vote to rank the top choices.

Next steps for workforce recommendations

- Advocate for workforce compensation and retention.
- Still need to determine the final vote for proposed recommendations.

Identify additional support items

- Recommendations from Washington council for Behavioral Health.
- Recommendations from Workforce Training and Education Board.
- Support for Community Health Worker grants.
- Inner-state compacts.

November meeting schedule

- It was decided the subgroup will meet twice in November.
