

# Apple Health Medicaid: Fee-for-Service Preferred Drug List

---

## What is new in this version of the preferred drug list?

Effective for dates of service on and after January 1, 2017, the Health Care Authority will make the following changes:

Drug Class	Drug Name	Change
Antiemetics	Granisol®	Removed from listing, no longer manufactured
Antiemetics	ondansetron ODT tablet	Removed EA requirement, only PDL rules apply
Antiemetics	Zofran ODT®	Removed EA requirement, only PDL rules apply
Long-Acting Opioids	Xtampza®	Non-Preferred, not subject to DAW-1 override
Multiple Sclerosis	Entire class	Client must have tried and failed, or is intolerant to, all preferred products before receiving a non-preferred product for the same indication.
Newer Anticoagulants	Entire class	Client must have tried and failed, or is intolerant to, all preferred products before receiving a non-preferred product for the same indication.

## What is the preferred drug list?

The Health Care Authority (agency) and Labor & Industries (L & I) have developed a list of preferred drugs within a chosen therapeutic class that are selected based on clinical evidence of safety, efficacy, and effectiveness. The drugs within a chosen therapeutic class are studied by an evidence-based practice center (EPC). A written report on the comparative safety, efficacy, and effectiveness from the EPC is evaluated by the Washington State Pharmacy and Therapeutic Committee which makes recommendations to the state agencies regarding the selection of the preferred drugs on the Washington Preferred Drug List (WPDL). (WAC [182-530-4100](http://www.wa.gov))

## What is the process to obtain drugs on the preferred drug list?

1. **Preferred Drugs** - Prescription claims for preferred drugs submitted to the agency are reimbursed without authorization requirements unless the drug requires authorization for:
  - a. Safety criteria;
  - b. Special subpopulation criteria; or
  - c. Limits based on age, gender, dose, or quantity.
2. **Non-preferred Drugs** - Prescription claims for non-preferred drugs submitted to the agency are reimbursed without authorization requirements when written by an Endorsing Practitioner who has indicated “DAW” on the prescription unless the drug requires restrictions for safety. See WAC [182-530-4150](#).
3. Prescription claims for non-preferred drugs submitted to the agency are reimbursed only after authorizing criteria are met if written by a non-endorsing practitioner.
4. Pharmacies must call the agency for authorization when required. Call 800-848-2842 (Option 1) or fax to 866-668-1214.

## What are the authorization criteria that must be met to obtain a nonpreferred drug?

- For most drug classes on this PDL, the authorization criteria is that the client must have tried and failed, or is intolerant to, at least one preferred drug. Drugs may have criteria that go beyond these basic criteria for the reasons stated in #1 on the previous page.
- Drugs that are in drug classes on this PDL that have not been studied by the evidence-based practice center(s) and have not been reviewed by the P&T committee will be treated as non-preferred drugs and will require authorization.

HCA requires pharmacies to obtain authorization for non-preferred drugs when a therapeutic equivalent is on this PDL. The following table shows the preferred and non-preferred drug in each therapeutic drug class on the Apple Health Medicaid Fee-For-Service PDL.

**Note:** The agency changed the format for multiple drug listings. A slash (/) is used to denote multiple forms of a drug. For example: “Cardizem<sup>®</sup>/CD/LA/SR” represents immediate release Cardizem, as well as the CD, LA, and SR forms. A hyphen (-) is used to indicate combination products. For example: “benazepril-HCTZ” represents the combination product of benazepril and hydrochlorothiazide, rather than benazepril AND the combination product.
