Notes:

Analysis is limited to live births with valid birth weights.

Hospitals with fewer than three births are not shown.

* Indicates a facility with a high level of neonatal care (Pediatric Level III or IV), and therefore a destination facility for high risk deliveries.

1. **Medicaid women** had either Medicaid-paid maternity care or at least three months of capitated payments in the six months prior to delivery.
2. **Medicaid Managed Care (MMC)** includes women who met Medicaid designation criteria as noted above and 1) were enrolled in a managed care plan at the time of delivery, or 2) were low income women enrolled in the Basic Health Plan and covered by Medicaid at time of delivery.
3. **Medicaid Fee-for-Service (MFFS)** includes women with Medicaid-paid maternity care who were not enrolled in a managed care plan at time of delivery, excluding undocumented women.
4. **Medicaid Undocumented Fee-for-Service (MU)** includes undocumented women as determined from Medicaid eligibility records.
5. **LBW** includes total births weighing less than 2,500 grams for all liveborn infants (singletons and multiples). The denominator for the low birthweight rate is all liveborn infants, and the numerator is all liveborn infants weighing less than 2,500 grams.
6. **Other places of Birth** include military/naval facilities, home births, birthing centers, non-OB facilities, and out of state hospitals.
7. Rates calculated from small numbers may be unstable and may fluctuate widely. Caution should be used when interpreting rates based on small numbers.
8. As of 2014, records do not include out-of-state deliveries to Washington residents because birth certificates for states other than Washington were not available for record linkage.
