

RULE-MAKING ORDER PERMANENT RULE ONLY

CR-103P (December 2017) (Implements RCW 34.05.360)

CODE REVISER USE ONLY

OFFICE OF THE CODE REVISER
STATE OF WASHINGTON
FILED

DATE: January 06, 2021
TIME: 9:36 AM

WSR 21-02-087

Agency: Health Care Authority

Effective date of rule:

Permanent Rules

- 31 days after filing.
 Other (specify) _____ (If less than 31 days after filing, a specific finding under RCW 34.05.380(3) is required and should be stated below)

Any other findings required by other provisions of law as precondition to adoption or effectiveness of rule?

- Yes No If Yes, explain:

Purpose: The agency amended these rules to increase psychiatric per diem rates for community hospitals that serve patients in long-term inpatient psychiatric care.

Citation of rules affected by this order:

New:
Repealed:
Amended: 182-550-3800
Suspended:

Statutory authority for adoption: RCW 41.05.021, 41.05.160, ESSB 6168, Chapter 357, Laws of 2020, Sec. 215(24)(b)

Other authority:

PERMANENT RULE (Including Expedited Rule Making)

Adopted under notice filed as WSR 20-24-116 on December 1, 2020 (date).
Describe any changes other than editing from proposed to adopted version: N/A

If a preliminary cost-benefit analysis was prepared under RCW 34.05.328, a final cost-benefit analysis is available by contacting:

**Note: If any category is left blank, it will be calculated as zero.
No descriptive text.**

**Count by whole WAC sections only, from the WAC number through the history note.
A section may be counted in more than one category.**

The number of sections adopted in order to comply with:

Federal statute:	New	___	Amended	___	Repealed	___
Federal rules or standards:	New	___	Amended	___	Repealed	___
Recently enacted state statutes:	New	___	Amended	___	Repealed	___

The number of sections adopted at the request of a nongovernmental entity:

New	___	Amended	___	Repealed	___
-----	-----	---------	-----	----------	-----

The number of sections adopted on the agency's own initiative:

New	___	Amended	___	Repealed	___
-----	-----	---------	-----	----------	-----

The number of sections adopted in order to clarify, streamline, or reform agency procedures:

New	___	Amended	1	Repealed	___
-----	-----	---------	---	----------	-----

The number of sections adopted using:

Negotiated rule making:	New	___	Amended	___	Repealed	___
Pilot rule making:	New	___	Amended	___	Repealed	___
Other alternative rule making:	New	___	Amended	1	Repealed	___

Date Adopted: January 6, 2021	Signature: 
Name: Wendy Barcus	
Title: HCA Rules Coordinator	

WAC 182-550-3800 Rebasing. The medicaid agency redesigns (rebases) the medicaid inpatient payment system as needed. The base inpatient conversion factor and per diem rates are only updated during a detailed rebasing process, or as directed by the state legislature. Inpatient payment system factors such as the ratio of costs-to-charges (RCC), weighted costs-to-charges (WCC), and administrative day rate are rebased on an annual basis. As part of the rebasing, the agency does all of the following:

(1) Gathers data. The agency uses the following data resources considered to be the most complete and available at the time:

(a) One year of fee-for-service (FFS) paid claim data from the agency's medicaid management information system (MMIS). The agency excludes:

(i) Claims related to state programs and paid at the Title XIX reduced rates from the claim data; and

(ii) Critical access hospital claims paid per WAC 182-550-2598; and

(b) The hospital's most current medicare cost report data from the health care cost report information system (HCRIS) maintained by the Centers for Medicare and Medicaid Services (CMS). If the hospital's medicare cost report from HCRIS is not available, the agency uses the medicare cost report provided by the hospital.

(c) FFS and managed care encounter data.

(2) Estimates costs. The agency uses one of two methods to estimate costs. The agency may perform an aggregate cost determination by multiplying the ratio of costs-to-charges (RCC) by the total billed charges, or the agency may use the following detailed costing method:

(a) The agency identifies routine and ancillary cost for operating capital, and direct medical education cost components using different worksheets from the hospital's medicare cost report;

(b) The agency estimates costs for each claim in the dataset as follows:

(i) Accommodation services. The agency multiplies the average hospital cost per day reported in the medicare cost report data for each type of accommodation service (e.g., adult and pediatric, intensive care unit, psychiatric, nursery) by the number of days reported at the claim line level by type of service; and

(ii) Ancillary services. The agency multiplies the RCC reported for each ancillary type of services (e.g., operating room, recovery room, radiology, laboratory, pharmacy, or clinic) by the allowed charges reported at the claim line level by type of service; and

(c) The agency uses the following standard cost components for accommodation and ancillary services for estimating costs of claims:

(i) Routine cost components:

(A) Routine care;

(B) Intensive care;

(C) Intensive care-psychiatric;

(D) Coronary care;

(E) Nursery;

(F) Neonatal ICU;

(G) Alcohol/substance abuse;

(H) Psychiatric;

(I) Oncology; and

- (J) Rehabilitation.
- (ii) Ancillary cost components:
 - (A) Operating room;
 - (B) Recovery room;
 - (C) Delivery/labor room;
 - (D) Anesthesiology;
 - (E) Radio, diagnostic;
 - (F) Radio, therapeutic;
 - (G) Radioisotope;
 - (H) Laboratory;
 - (I) Blood administration;
 - (J) Intravenous therapy;
 - (K) Respiratory therapy;
 - (L) Physical therapy;
 - (M) Occupational therapy;
 - (N) Speech pathology;
 - (O) Electrocardiography;
 - (P) Electroencephalography;
 - (Q) Medical supplies;
 - (R) Drugs;
 - (S) Renal dialysis/home dialysis;
 - (T) Ancillary oncology;
 - (U) Cardiology;
 - (V) Ambulatory surgery;
 - (W) CT scan/MRI;
 - (X) Clinic;
 - (Y) Emergency;
 - (Z) Ultrasound;
 - (AA) NICU transportation;
 - (BB) GI laboratory;
 - (CC) Miscellaneous; and
 - (DD) Observation beds.

(3) Specifies resource use with relative weights. The agency uses national relative weights designed by 3M™ Corporation as part of its all-patient refined-diagnostic related group (APR-DRG) payment system. The agency periodically reviews and determines the most appropriate APR-DRG grouper version to use.

(4) Calculates base payment factors. The agency calculates the average, or base, DRG conversion factor and per diem rates. The base is calculated as the maximum amount that can be used, along with all other payment factors and adjustments described in this chapter. The agency models the rebased system to be budget neutral on a prospective basis, including global adjustments to the budget target determined by the agency. The agency ensures that base DRG conversion factors and per diem rates are sufficient to support economy, efficiency, and access to services for medicaid recipients. The agency will publish base rate factors on its website.

(5) To maintain budget neutrality, the agency makes global adjustments as needed.

(a) Claims paid under the DRG, rehab per diem, and detox per diem payment methods were reduced to support an estimated three million five hundred thousand dollar increase in psychiatric payments to acute hospitals.

(b) Claims for acute hospitals paid under the psychiatric per diem method were increased by a factor to inflate estimated system payments by three million five hundred thousand dollars.

(c) Effective for dates of admission on and after October 1, 2017, the agency increased psychiatric per diem rates as directed by the legislature. The increase applies to any hospital with two hundred or more psychiatric bed days.

(i) The agency prioritized the increase for hospitals not currently paid based on provider-specific costs using a similar methodology to set rates for existing inpatient facilities utilizing cost report information for hospital fiscal years ending in 2016.

(ii) The distribution of funds for each fiscal year is as follows:

(A) Free-standing psychiatric hospitals receive 68.15 percent of the statewide average cost per day.

(B) All other hospitals receive the greater of 78.41 percent of their provider-specific cost, or their current medicaid psychiatric per diem rate.

(iii) The agency set the increased rates to assure that the distribution of funds does not exceed the amounts provided by the legislature.

(iv) The agency conducts annual reviews for updated cost information to determine whether new and existing providers meet the two hundred or more bed criteria.

(v) The agency will apply the same cost percentage criteria for future rebasing of the psychiatric per diem rates.

(6) Effective July 1, 2020, through June 30, 2021, the agency sets psychiatric per diem rates specific to long-term civil commitments separately from other psychiatric per diem rates.

(a) In order to qualify for a provider-specific long-term civil commitment psychiatric per diem, the provider must be contracted with the agency to provide long-term civil commitment beds.

(b) The agency sets the provider-specific rate at the time of contracting.

(c) The agency sets the rate as follows:

(i) For a hospital that has a medicare cost report on file with the agency for the most recent filing year, the rate is set using hospital specific costs or nine hundred forty dollars, whichever is greater.

(ii) For a hospital that does not have a medicare cost report on file with the agency, the rate is set using the average of all in-state long-term psychiatric per diem rates based on provider type or the hospital's current short-term psychiatric per diem rates, whichever is greater.

(d) The agency sets the rates so as to not exceed the amounts appropriated by the legislature.

(7) Determines provider specific adjustments. The following adjustments are applied to the base factor or rate established in subsection (4) of this section:

(a) Wage index adjustments reflect labor costs in the cost-based statistical area (CBSA) where a hospital is located.

(i) The agency determines the labor portion by multiplying the base factor or rate by the labor factor established by medicare; then

(ii) The amount in (a)(i) of this subsection is multiplied by the most recent wage index information published by CMS at the time the rates are set; then

(iii) The agency adds the nonlabor portion of the base rate to the amount in (a)(ii) of this subsection to produce a hospital-specific wage adjusted factor.

(b) Indirect medical education factors are applied to the hospital-specific base factor or rate. The agency uses the indirect medical education factor established by medicare on the most currently available medicare cost report that exists at the time the rates are set; and

(c) Direct medical education amounts are applied to the hospital-specific base factor or rate. The agency determines a percentage of direct medical education costs to overall costs using the most currently available medicare cost report that exists at the time the rates are set.

~~((7))~~ (8) The final, hospital-specific rate is calculated using the base rate established in subsection (4) of this section along with any applicable adjustments in subsections ~~((5))~~ (6) and ~~((6))~~ (7) of this section.
