Denominator:

Data elements required for denominator: Medicaid beneficiaries, aged 5 and younger as of the last day of the measurement year, meeting the above eligibility criteria.

Required exclusions for denominator.

- Eligible population exclusions are listed in the eligible population table above.
- Metric specific exclusions:
 - o Beneficiaries in hospice care.

Deviations from cited specifications for denominator.

- None.

Numerator:

Beneficiaries must qualify for inclusion in the denominator to be eligible for inclusion in the numerator.

Data elements required for numerator: Medicaid beneficiaries who received at least one topical fluoride service by any professional, non-dental provider during a visit in the measurement year.

- Professional, non-dental provider is defined as a servicing/rendering provider that is not included in the NUCC maintained Provider Taxonomy Codes value set.

Value sets required for the numerator:

Name	Value Set
Fluoride application	CDT code: D1206, D1208 CPT: 99188
NUCC maintained Provider Taxonomy Codes	122300000X 1223P0106X 1223X0008X 125Q00000X 1223D0001X 1223P0221X 1223X0400X 261QF0400X 1223D0004X 1223P0300X 124Q00000X 261QR1300X 1223E0200X 1223P0700X 125J00000X 1223G0001X 1223S0112X 125K00000X

Required exclusions for numerator.

- None

Primary Caries Prevention Intervention as Offered by Medical Provider: Topical Fluoride Application Delivered by Non-Dental Health Professional

Deviations from cited specifications for numerator.

Version Control

July 2018 release: The Primary Caries Prevention Intervention measure has undergone significant revision to match the Washington health care context. This update includes: (1) matching current billing practices (non-covered codes removed); (2) defining non-dental health professionals; and (3) revised ACH regional attribution methodology to seven out of twelve months residency.

A prior version of this metric specified the inclusion of services that occurred during a primary care or well/ill child visit. The metric criteria is now broadened to include all topical fluoride applications provided by any non-dental professional provider (nurse practitioners, physician assistants, family practitioners, pediatricians, nurses, medical assistants) during a medical visit.

January 2019 update: The specification was updated to include a metric specific exclusion of beneficiaries in hospice care. This updated was made to maintain consistency with HEDIS® metric requirements. This change is expected to make a minimal or no impact on metric results.
