Atopic Dermatitis Agents:
Dupilumab (Dupixent)

Medical policy no. 90.27.30.AA-4

Related medical policies:

90.23.00.AA Atopic Dermatitis Agents – Crisaborole (Eucrisa ™)
90.78.40 Atopic Dermatitis Agents – Topical Immunosuppressives
44.60.40 Asthma and COPD Agents – IL-5 Antagonists

Note: New-to-market drugs included in this class based on the Apple Health Preferred Drug List are non-preferred and subject to this prior authorization (PA) criteria. Non-preferred agents in this class require an inadequate response or documented intolerance due to severe adverse reaction or contraindication to at least TWO preferred agents. If there is only one preferred agent in the class documentation of inadequate response to ONE preferred agent is needed. If a drug within this policy receives a new indication approved by the Food and Drug Administration (FDA), medical necessity for the new indication will be determined on a case-by-case basis following FDA labeling.

To see the list of the current Apple Health Preferred Drug List (AHPDL), please visit: https://www.hca.wa.gov/assets/billers-and-providers/apple-health-preferred-drug-list.xlsx

Background:
Dupilumab (Dupixent) is an interleukin-4 receptor antagonist used in the treatment of moderate to severe atopic dermatitis when conventional therapy is not effective. It is also used as an add-on maintenance treatment for moderate-to-severe asthma with eosinophilic phenotype or oral corticosteroid (OCS)-dependent asthma.

Clinical policy:

<table>
<thead>
<tr>
<th>Clinical Criteria</th>
<th>Dupilumab may be approved when all of the following criteria are met:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Atopic Dermatitis</td>
<td>1. Diagnosis of moderate-to-severe chronic atopic dermatitis with at least one of the following:</td>
</tr>
<tr>
<td></td>
<td>a. Percent of body surface area (BSA) involvement (minimum of at least 10% BSA involvement); OR</td>
</tr>
<tr>
<td></td>
<td>b. Disease severity scale scoring to demonstrate severe chronic atopic dermatitis (e.g., Investigator’s Global Assessment (IGA) score of 3 or greater; Eczema Area and Severity Index (EASI), Patient Oriented Eczema Measure (POEM); etc.); AND</td>
</tr>
<tr>
<td></td>
<td>2. Clinical documentation of functional impairment due to atopic dermatitis, which may include, but is not limited to:</td>
</tr>
</tbody>
</table>
a. documentation of limitation of activities of daily living (ADLs); 
   OR
b. skin infections; OR
c. sleep disturbances; AND

3. History of failure, defined as the inability to achieve or maintain remission; intolerance; contraindication or clinically inappropriate to ALL (a, b, c and d) of the following:
   a. Trial of TWO topical corticosteroids for daily treatment for a minimum 28-days each:
      i. Children and adolescents: Failure of 2 preferred medium potency corticosteroids in the previous 6 months; OR
      ii. Adults: Failure of 2 preferred high or very high potency corticosteroids in the previous 6 months; AND
      iii. Contraindications include:
         a) Treatment of sensitive areas (face, anogenital, skin folds) not responding to low potency desonide or hydrocortisone; OR
         b) History of steroid induced atrophy; OR
         c) Long-term uninterrupted use
   b. Trial of ONE topical calcineurin inhibitor (i.e., pimecrolimus, tacrolimus) for daily treatment for at least 28-days:
      i. Contraindications include age less than 2 years of age
   c. Trial of crisaborole for daily treatment for at least 28 days
   d. At least ONE of the following:
      i. Trial and failure of phototherapy; OR
      ii. Trial and failure of systemic corticosteroids; OR
      iii. Any ONE of the following systemic immunosuppressants:
         1. methotrexate; OR
         2. cyclosporine; OR
         3. azathioprine; OR
         4. mycophenolate; AND

4. Patient is 6 years of age or older; AND

5. Dupilumab is not to be used in combination with other monoclonal antibodies
   a. Anti-interleukin 5 therapy [e.g., mepolizumab, resilizumab, benralizumab]; OR
   b. Anti-IgE therapy [e.g., omalizumab]; OR

6. Prescribed by or in consultation with a specialist in dermatology or allergy.

If ALL criteria are met, the request may be approved for 6 months

If all criteria are not met, but there are documented medically necessary or situational circumstances, based on the professional judgement of the clinical reviewer, requests may be approved on a case-by-case basis up to the initial authorization duration.
### Reauthorization Criteria

Dupilumab may be reauthorized when all the following criteria are met:

1. Clinical documentation of disease stability or improvement defined by **BOTH** of the following:
   a. At least **ONE** of the following:
      i. Reduction in body surface area involvement of at least 20%; **OR**
      ii. Achieved or maintained clear or minimal disease from baseline (equivalent to IGA score of 0 or 1); **OR**
      iii. Experienced or maintained a decrease in Eczema Area and Severity Index (EASI) score of at least 50%; **AND**
   b. An improvement in functional impairment, which may include but is not limited to:
      i. Improvement in limitation of activities of daily living (ADLs); **OR**
      ii. Skin infections; **OR**
      iii. Sleep disturbances

If ALL criteria are met, the request may be approved for **12 months**

If all criteria are not met, but there are documented medically necessary or situational circumstances, based on the professional judgement of the clinical reviewer, requests may be approved on a case-by-case basis up to the reauthorization duration.

### Asthma with an eosinophilic phenotype

Dupilumab may be approved when all the following criteria are met:

1. Documentation of blood eosinophil count (in the absence of other potential causes of eosinophilia) of **ONE** of the following:
   a. Greater than or equal to (≥) 150 cells/µL in prior 6 weeks; **OR**
   b. Greater than or equal to (≥) 300 cells/µL in prior 12 months; **AND**

2. Moderate-to-severe persistent asthma as defined by at least **ONE** of the following:
   a. FEV₁ less than (<) 80% of predicted; **OR**
   b. Two or more bursts of systemic corticosteroids in the previous 12 months; **OR**
   c. Poor symptom control (e.g., ACQ score consistently greater than 1.5 or ACT score consistently less than 20); **OR**
   d. Frequent (at least twice per year) additional medical treatment such as: emergency department (ED) visits, hospitalizations, treatment with mechanical ventilation, or unplanned (sick) office visits; **OR**
   e. Limitation of activities of daily living (ADLs), nighttime awakening, or dyspnea
3. History of failure (remains symptomatic after 6 weeks), contraindication or intolerance to high-dose inhaled corticosteroid in combination with additional controller(s) AND
4. History of failure, contraindication or intolerance to the preferred asthma monoclonal antibodies listed on the AHPDL
5. Dupilumab is to be used in combination with additional asthma controller medications (e.g., ICS, LABA, LTRA, tiotropium, etc.); AND
6. Dupilumab is not to be used in combination with other monoclonal antibodies
   a. Anti-interleukin 5 therapy [e.g., mepolizumab, reslizumab, benralizumab]; OR
   b. Anti-IgE therapy [e.g., omalizumab]; OR
7. Patient is 12 years of age or older; AND
8. Prescribed by or in consultation with a specialist in allergy, pulmonology, or immunology

If ALL criteria are met, the request may be approved for 6 months

If all criteria are not met, but there are documented medically necessary or situational circumstances, based on the professional judgement of the clinical reviewer, requests may be approved on a case-by-case basis up to the initial authorization duration.

**Reauthorization Criteria**

Dupilumab may be reauthorized when all the following criteria are met:

1. Clinical documentation of disease improvement compared to baseline measures (e.g., reduced missed days from work or school, improved FEV₁, ACQ or ACT scores, decrease in burst of systemic corticosteroids, etc.)

If ALL criteria are met, the request may be approved for 12 months

If all criteria are not met, but there are documented medically necessary or situational circumstances, based on the professional judgement of the clinical reviewer, requests may be approved on a case-by-case basis up to the reauthorization duration.

**Asthma with oral corticosteroid dependent asthma**

Dupilumab may be approved when all the following criteria are met:

1. Moderate-to-severe persistent asthma as defined by at least ONE of the following:
   a. FEV₁ less than (<) 80% predicted; OR
   b. Two or more bursts of systemic corticosteroids in the previous 12 months; OR
   c. Poor symptom control (e.g., ACQ score consistently greater than 1.5 or ACT score consistently less than 20)
2. Remains symptomatic after 6 weeks with daily oral corticosteroids in addition to high-dose inhaled corticosteroid in combination with additional controller(s); **AND**

3. Dupilumab is to be used in combination with additional asthma controller medications (e.g., ICS, LABA, LTRA, tiotropium, etc.); **AND**

4. Dupilumab is not to be used in combination with other monoclonal antibodies
   a. Anti-interleukin 5 therapy [e.g., mepolizumab, reslizumab, benralizumab]; **OR**
   b. Anti-IgE therapy [e.g., omalizumab]; **OR**

5. Patient is 12 years of age or older; **AND**

6. Prescribed by or in consultation with a specialist in allergy, pulmonology, or immunology

If ALL criteria are met, the request may be approved for **6 months**

If all criteria are not met, but there are documented medically necessary or situational circumstances, based on the professional judgement of the clinical reviewer, requests may be approved on a case-by-case basis up to the initial authorization duration.

### Reauthorization Criteria

Dupilumab may be approved when all the following criteria are met:

1. Reduction in daily oral corticosteroid dosage or usage; **AND**

2. Clinical documentation of disease improvement compared to baseline measures (e.g., reduced missed days from work or school, improved FEV1, ACQ or ACT scores, decrease in burst of systemic corticosteroids, etc.)

If ALL criteria are met, the request may be approved for **12 months**

If all criteria are not met, but there are documented medically necessary or situational circumstances, based on the professional judgement of the clinical reviewer, requests may be approved on a case-by-case basis up to the reauthorization duration.

### Chronic rhinosinusitis with nasal polyposis

Dupilumab may be approved when all the following criteria are met:

1. Clinical documentation of chronic rhinosinusitis with nasal polyposis; **AND**

2. History of persistent symptoms of rhinosinusitis after completion of 2 months of intranasal corticosteroid use; **AND**

3. Continued use of intranasal corticosteroids while using dupilumab; **AND**

4. History of failure, intolerance, or contraindication to short-courses of systemic oral corticosteroids; **AND**
Dupilumab is not to be used in combination with other monoclonal antibodies
   a. Anti-interleukin 5 therapy [e.g., mepolizumab, reslizumab, benralizumab]; OR
   b. Anti-IgE therapy [e.g., omalizumab]; OR

6. Prescribed by or in consultation with an ear, nose, throat specialist or an allergy specialist; AND

7. Patient is 18 years of age or older

If ALL criteria are met, the request may be approved for 6 months

If all criteria are not met, but there are documented medically necessary or situational circumstances, based on the professional judgement of the clinical reviewer, requests may be approved on a case-by-case basis up to the initial authorization duration.

**Reauthorization Criteria**

Dupilumab may be reauthorized when all the following criteria are met:

1. Continued use of intranasal corticosteroids while using dupilumab; AND

2. Clinical documentation of disease improvement compared to baseline, defined as a reduction in sinusitis-related symptoms, such as nasal obstruction, nasal discharge, nasal polyp size, facial pain and pressure, etc.)

If ALL criteria are met, the request may be approved for 12 months

If all criteria are not met, but there are documented medically necessary or situational circumstances, based on the professional judgement of the clinical reviewer, requests may be approved on a case-by-case basis up to the reauthorization duration.
