

Washington Apple Health (Medicaid)

Mental Health Services Billing Guide

October 1, 2019

Every effort has been made to ensure this guide's accuracy. If an actual or apparent conflict between this document and an agency rule arises, the agency rules apply.

About this guide*

This publication takes effect October 1, 2019, and supersedes earlier guides to this program.

HCA is committed to providing equal access to our services. If you need an accommodation or require documents in another format, please call 1-800-562-3022. People who have hearing or speech disabilities, please call 711 for relay services.

Washington Apple Health means the public health insurance programs for eligible Washington residents. Washington Apple Health is the name used in Washington State for Medicaid, the children's health insurance program (CHIP), and state-only funded health care programs. Washington Apple Health is administered by the Washington State Health Care Authority.

What has changed?

Subject	Change	Reason for Change
<u>Who is eligible to provide and bill for lower-acuity mental health services to clients up to age 18 and younger?</u>	<ul style="list-style-type: none"> • Revised heading and added a note box to reflect that the section applies to clients up to age 18 (until the date of their 18th birthday) • Mental health professionals must have 100 hours of specialized study in child development and treatment 	<ul style="list-style-type: none"> • Clarification • Revised to align with WAC 182-531-1400
<u>Neuropsychological testing</u>	CPT codes 96133, 96137, and 96139 apply to additional services provided on the same day.	Billing clarification
<u>What are the guidelines for billing professional services?</u>	<ul style="list-style-type: none"> • Added a bullet regarding payment for psychiatric diagnostic evaluations • Added a bullet regarding payment for family/group psychotherapy visits 	Revised to align with WAC 182-531-1400
<u>Professional services delivered in an inpatient setting</u>	<ul style="list-style-type: none"> • Revised section heading because an admission can be voluntary or involuntary • Removed ITA (Involuntary Treatment Act) from headings within this section because the information applies to both voluntary and involuntary admissions 	<ul style="list-style-type: none"> • Clarification • Clarification
<u>Professional services provided to a FFS-covered client during a psychiatric admission paid for by a BHO</u>	Added psychologists as providers of professional inpatient mental health services during a psychiatric admission	Revised to align with WAC 182-531-1400
<u>Professional services provided to any MCO-enrolled client during a psychiatric admission paid for by a BHO</u>	Added that an underlying psychiatric admission may be voluntary or involuntary; removed Involuntary Treatment Act admissions from section.	Clarification

Subject	Change	Reason for Change
<u>Professional services during a psychiatric inpatient admission for people who are not eligible for Apple Health</u>	<ul style="list-style-type: none"> • Added psychologists as providers of professional inpatient mental health services during a psychiatric admission; • The underlying psychiatric admission may be voluntary or involuntary; removed Involuntary Treatment Act admissions from section 	Revised to align with WAC 182-531-1400
<u>Billing for professional services provided</u>	<ul style="list-style-type: none"> • Added psychologists as providers who may bill the agency for psychiatric services • Evaluations may be used for both treatment and court testimony purposes during an involuntary admission • Added instruction for Claim Note section voluntary/involuntary admissions – non-Apple Health eligible 	Revised to align with WAC 182-531-1400
<u>Institutional (facility) charges – Voluntary treatment</u>	<ul style="list-style-type: none"> • Added information about services for people who are not eligible for Apple Health. • Added steps an admitting hospital must take for patients without active eligibility 	Clarification
<u>Authorization procedures for inpatient hospital psychiatric care - Administrative days</u>	The agency may authorize payment of pharmacy services and pharmaceuticals in addition to the administrative day rate payment	Revised to align with amendments to Ch. 182-550 WAC
<u>General billing of institutional claims for inpatient hospital psychiatric care</u>	The PA record provides the hospital with pharmacy services provided during the administrative days	Revised to align with amendments to Ch. 182-550 WAC
<u>Services delivered in an inpatient hospital setting</u>	Added psychologists as providers of professional inpatient mental health services during a psychiatric admission	Revised to align with WAC 182-531-1400

Subject	Change	Reason for Change
<u>Medicare/Medicaid dual eligibility and commercial (private) insurance</u>	Pharmacy services and pharmaceuticals may be billed in addition to the agency's administrative day rate payment	Revised to align with Ch. 182-550 WAC
<u>Billing for inpatient hospital psychiatric care</u>	Pharmacy services and pharmaceuticals may be billed in addition to the agency's administrative day rate payment	Revised to align with Ch. 182-550 WAC
<u>Billing for inpatient psychiatric admissions for civil commitments of 90 days or longer</u>	Community hospitals use the psychiatric taxonomy on file in ProviderOne for billing, and authorizations use revenue code 0124	Billing clarification

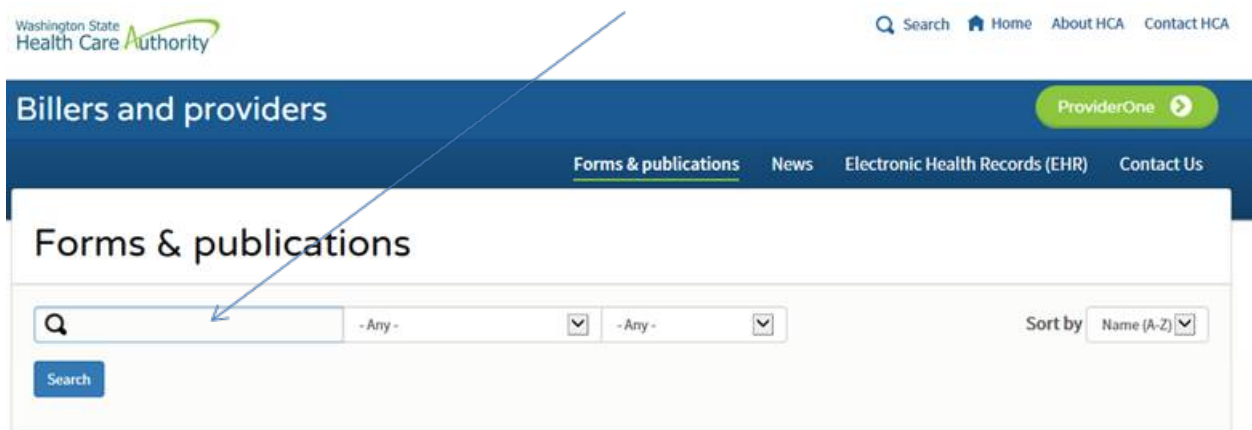

How can I get agency provider documents?

To access provider alerts, go to the agency's [provider alerts](#) webpage.

To access provider documents, go to the agency's [provider billing guides and fee schedules](#) webpage.

Where can I download agency forms?

To download an agency provider form, go to HCA's Billers and providers webpage, select [Forms & publications](#). Type the HCA form number into the **Search box** as shown below (Example: 13-835).

National provider indicator (NPI) – See WAC [182-500-0075](#).

Outpatient – See WAC [182-500-0080](#).

Post stabilization care – Covered services related to an emergency medical condition that are provided after an enrollee is stabilized to maintain the stabilized condition, or, to improve or resolve the patient's condition. For the purposes of the mental health program, emergency services end when patient is ready to discharge from the emergency room and either be released or admitted to an inpatient psychiatric facility.

Prior authorization – See WAC [182-500-0085](#).

Provider – See WAC [182-500-0085](#).

Psychiatric hospital – See WAC [182-550-1050](#).

Psychiatric residential treatment facility (PRTF) – A nonhospital residential treatment center licensed by DOH, and certified by the agency or the agency's designee to provide psychiatric inpatient services to Medicaid-eligible individuals age twenty-one and younger. A PRTF must be accredited by the Joint Commission on Accreditation of Health care Organizations (JCAHO) or any other accrediting organization with comparable standards recognized by Washington State. A PRTF must meet the requirements in 42 C.F.R. 483, Subpart G, regarding the use of restraint and seclusion.

Third-party liability (TPL) – See WAC [182-503-0540](#).

Program Overview

(WAC [182-531-1400](#))

This billing guide describes mental health benefits administered through the Health Care Authority (the agency) that are available to Apple Health clients.

This billing guide is divided into two parts:

[Part I](#) describes:

- The set of lower acuity mental health services for clients with less complex treatment needs covered by managed care organizations (MCOs) and fee-for-service (FFS).
- An overview of inpatient services covered by the Behavior Health Organization (BHO).

[Part II](#) describes:

- The high acuity mental health services available to eligible American Indian/Alaska Native (AI/AN) clients with more complex treatment needs but not enrolled in a BHO or integrated managed care plan.
- How AI/AN clients must be in one of the recipient aid categories (RACs) listed in Part II of this guide. These mental health services are in addition to the lower acuity mental health services covered by the client's MCO or FFS program.

Note: To find the BHO offering mental health coverage for each region, see the [BHO Contacts](#) sheet.

To determine which services are covered by which payer and who to bill, see [How do providers identify the correct payer?](#)

What services are covered?

Apple Health clients in all regions have coverage for:

- Mental health services, including crisis, outpatient and professional services
- Mental health services provided by DOH-licensed behavioral health agencies
- Psychiatric inpatient hospitalization

National correct coding initiative

The agency continues to follow the [National Correct Coding Initiative \(NCCI\) policy](#). The Centers for Medicare and Medicaid Services (CMS) created this policy to promote national correct coding methods. NCCI assists the agency to control improper coding that may lead to inappropriate payment. The agency bases coding policies on the following:

- The American Medical Association’s (AMA) Current Procedural Terminology (CPT) manual
- National and local policies and edits
- Coding guidelines developed by national professional societies
- The analysis and review of standard medical and surgical practices
- Review of current coding practices

Procedure code selection must be consistent with the current CPT guidelines, introduction, and instructions on how to use the CPT coding book. Providers must comply with the coding guidelines that are within each section (e.g., E/M services, radiology, etc.) of the current CPT book.

Medically Unlikely Edits (MUEs) - Part of the NCCI policy are MUEs. MUEs are the maximum unit of service per HCPC or CPT code that can be reported by a provider under most circumstances for the same patient on the same date of service. Items billed above the established number of units are automatically denied as a “Medically Unlikely Edit.” Not all HCPCS or CPT codes are assigned an MUE. The agency adheres to the CMS MUEs for all codes.

The agency may have units of service edits that are more restrictive than MUEs.

The agency may perform a post-pay review on any claim to ensure compliance with NCCI. NCCI rules are enforced by the ProviderOne payment system.

Partnership Access Line (PAL) for child mental health

The Partnership Access Line (PAL) is a telephone-based child mental health consultation system for Washington State. PAL employs child psychiatrists, child psychologists, and social workers affiliated with Seattle Children’s Hospital to deliver its consultation services.

The PAL team is available to any primary care provider throughout Washington State. Washington’s primary care providers are encouraged to call the PAL toll free number (866) 599-7257 as often as needed. PAL provides rapid consultation responses during business hours (Monday-Friday, 8:00 a.m. to 5:00 p.m.) for any type of children’s mental health issue that arises with any child. For more information, see the [Partnership Access Line](#) webpage.

PAL Family Referral Assistance Line

PAL services include Washington’s Mental Health Referral Assist Service. This program facilitates referrals to children’s mental health services and other resources for parents and guardians with concerns related to the mental health of their child. Facilitation activities include assessing the level of services needed by the child within one to two weeks of receiving a call from a parent or guardian, and identifying mental health professionals who are in network health with the child’s health plan and accepting new patients. This service coordinates contact between the family and mental health provider and provides post-referral reviews to determine if the child still has unmet needs. The PAL Family Referral Line is (833) 303-5437.

PAL for Moms

PAL for Moms provides psychiatric consultation to health care providers on any mental health-related questions for patients who are pregnant, in the first year postpartum, or who have pregnancy-related complications (e.g. pregnancy loss, infertility). PAL for Moms is staffed to respond to calls between 1:00 p.m. and 5:00 p.m. on weekdays. The PAL for Moms line is (203) 685-2924.

Additional mental-health-related services

The following covered services are explained in other agency billing instructions and rules:

- [Applied Behavior Analysis \(ABA\) Program Billing Guide](#)
- Alcohol or substance misuse counseling (screening, brief interventions, and referral to treatment) (SBIRT)
(See the [Physician-Related Services/Health Care Professional Services Billing Guide](#))
- Collaborative Care Model Guidelines
(See the [Physician-Related Services/Health Care Professional Services Billing Guide](#))
- Health and behavior codes when provided by a physician or licensed behavioral health provider. Health and behavior codes (96150 – 96155) are used when the primary [diagnosis](#) is medical and the provider is addressing the behavioral, emotional, cognitive and social factors important to the prevention, treatment or management of physical health problems. The focus of the assessment is not mental health but on the biopsychosocial factors important to physical health problems and treatments. (See the [Physician-Related Services/Health Care Professional Services Billing Guide](#))

- Screening children for mental health and caregiver depression screening (See [Early and Periodic Screening Diagnosis and Treatment \(EPSDT\) Program Billing Guide](#))
- [Substance Use Disorder Program Billing Guide](#) (Fee-for-Service, Non-Behavioral Health Organization (BHO))
- Tobacco cessation counseling (See the [Physician-Related Services/Health Care Professional Services Billing Guide](#))

Note: For providers providing evidence-based practice (EBP), including the Positive Parenting Program (Triple P), see [evidence-based practices](#) in this guide.

How are services administered?

Mental health services are available through:

1. Licensed professionals with individual core provider agreements who accept payment on a FFS basis for providing services to people not enrolled with a managed care organization (MCO) and whose condition is low acuity as determined by one of the following:
 - Licensed mental health providers
 - Licensed and BH-ASO-contracted community mental health agencies
2. MCOs under contract with the agency's Apple Health Managed Care program to provide health care services for enrollees with low acuity mental health conditions.
3. BHOs under contract with the agency and serving people with high acuity mental health needs.
4. BHSOs and integrated managed care plans under contract to provide higher-acuity behavioral health care for managed care clients and FFS clients residing in designated integrated managed care regions. See [How do providers identify the correct payer?](#)
5. The regional behavioral health administrative service organization (BH-ASO), which provides all crisis services for Apple Health clients and non-Apple Health clients residing in designated integrated managed care regions. See [How do providers identify the correct payer?](#)

Client Eligibility

Most Apple Health clients are enrolled in an agency-contracted managed care organization (MCO). This means that Apple Health pays a monthly premium to an MCO for providing preventative, primary, specialty, and other health services to Apple Health clients. Clients in managed care must see only providers who are in their MCO’s provider network, unless prior authorized or to treat urgent or emergent care. See the agency’s [Apple Health managed care webpage](#) for further details.

It is important to always check a client’s eligibility prior to providing any services because it affects who will pay for the services.

How do I verify a client’s eligibility?

Check the client’s Services Card or follow the two-step process below to verify that a client has Apple Health coverage for the date of service and that the client’s benefit package covers the applicable service. This helps prevent delivering a service the agency will not pay for.

If a client’s benefit package indicates “Suspended – Inpatient Hospital Services Only” for the date of service, it means that the Jail Booking and Reporting System shows that the client was incarcerated for the date of service. Apple Health covers inpatient hospital services only for the suspension dates. All other services during the suspension timeframe are covered by the jail or state hospital. For more information or instructions on how to make corrections if the client was not incarcerated, see the agency’s [Medicaid suspension webpage](#).

Client Eligibility Spans					
Insurance Type Code	Recipient Aid Category (RAC)	Benefit Service Package	Eligibility Start Date	Eligibility End Date	ACES Coverage Group
▲▼	▲▼	▲▼	▲▼	▲▼	▲▼
MC: Medicaid	8500	SBP - Institutionalized Dates	04/19/2018	12/31/2999	
MC: Medicaid	1201	ABP	04/21/2018	12/31/2999	N05
MC: Medicaid	1201	Suspended - Inpatient Hospital Services Only	04/20/2018	04/20/2018	N05
MC: Medicaid	1201	ABP	06/01/2016	04/19/2018	N05

Verifying eligibility is a two-step process:

Step 1. Verify the patient's eligibility for Apple Health. For detailed instructions on verifying a patient's eligibility for Apple Health, see the *Client Eligibility, Benefit Packages, and Coverage Limits* section in the agency's [ProviderOne Billing and Resource Guide](#).

Note: A client's coverage can change at any time, so check eligibility at each visit.

If the patient is eligible for Apple Health, proceed to **Step 2**. If the patient is **not** eligible, see the note box below.

Step 2. Verify service coverage under the Apple Health client's benefit package. To determine if the requested service is a covered benefit under the Apple Health client's benefit package, see the agency's [Program Benefit Packages and Scope of Services](#) webpage.

Note: Patients who are not Apple Health clients may submit an application for health care coverage in one of the following ways:

1. By visiting the Washington Healthplanfinder's website at:
www.wahealthplanfinder.org
2. By calling the Customer Support Center toll-free at: 855-WAFINDER (855-923-4633) or 855-627-9604 (TTY)
3. By mailing the application to:
Washington Healthplanfinder
PO Box 946
Olympia, WA 98507

In-person application assistance is also available. To get information about in-person application assistance available in their area, people may visit www.wahealthplanfinder.org or call the Customer Support Center.

Are clients enrolled in an agency-contracted managed care organization eligible for services?

Yes. Clients enrolled in one of the agency's contracted managed care organizations (MCO) are eligible for mental health services. Providers can verify eligibility for mental health services using ProviderOne. If the client is enrolled in an agency-contracted MCO, managed care enrollment will be displayed on the client benefit inquiry screen. All services for MCO enrollees must be requested directly through the MCO enrollee's primary care provider. (See WAC [182-538-060](#) and [182-531-0950](#).)

All mental health services covered under an MCO must be obtained by the client through designated facilities or providers. The MCO is responsible for:

- Payment of covered services.
- Payment of services when referred by a provider participating with the MCO to a non-participating provider.

Note: For clients residing in designated integrated managed care regions, see [How do providers identify the correct payer?](#) Contact the client's MCO for referral requirements for mental health services.

Managed care enrollment

Apple Health (Medicaid) places clients into an agency-contracted MCO the same month they are determined eligible for managed care as a new or renewing client. This eliminates a person being placed temporarily in FFS while they are waiting to be enrolled in an MCO or reconnected with a prior MCO. This enrollment policy also applies to clients in FFS who have a change in the program they are eligible for.

New clients are those initially applying for benefits or those with changes in their existing eligibility program that consequently make them eligible for Apple Health managed care. Renewing clients are those who have been enrolled with an MCO but have had a break in enrollment and have subsequently renewed their eligibility.

Checking eligibility

- Providers must check eligibility and know when a client is enrolled and with which MCO. For help with enrolling, clients can refer to the Washington Healthplanfinder's [Get Help Enrolling](#) page.
- MCOs have retroactive authorization and notification policies in place. The provider must know the MCO's requirements and be compliant with the MCO's policies.

Behavioral Health Organization (BHO)

The Health Care Authority manages the contracts for behavioral health services (mental health and substance use disorder) for the following three Regional Service Areas (RSAs):

- **Great Rivers:** Includes Cowlitz, Grays Harbor, Lewis, Pacific, and Wahkiakum counties
- **Salish:** Includes Clallam, Jefferson, and Kitsap counties
- **Thurston-Mason:** Includes Thurston and Mason counties

To view a map and table of the integrated managed care plans available within each region, please see [Changes coming to Washington Apple Health](#). You may also refer to the agency's [Apple Health managed care webpage](#).

See the agency's [Mental Health Services Billing Guide](#) for details.

Apple Health – Changes for July 1, 2019

Effective July 1, 2019, HCA is continuing to shift to whole-person care to allow better coordination of care for both body (physical health) and mind (mental health and drug or alcohol treatment, together known as “behavioral health”). This delivery model is called Integrated Managed Care (formerly Fully Integrated Managed Care, or FIMC, which still displays in ProviderOne and Siebel).

Agency-contracted managed care organizations (MCOs) in certain Region Service Areas (RSAs) have expanded their coverage of behavioral health services (mental health and substance use disorder treatment), along with continuing to cover physical health services. The RSAs are outlined in the [Integrated Managed Care Regions](#) section.

Apple Health clients who are not enrolled in an agency-contracted MCO for their physical health services (e.g., dual-eligible Medicare-Medicaid clients) still receive their behavioral health services through one of the agency-contracted MCOs. The MCO will provide only behavioral health services for the client.

Most clients remained with the same health plan, except in regions where the client's plan was no longer available. HCA auto-enrolled these clients to one of the offered plans.

Clients can change their plan at any time by:

- Visiting the [ProviderOne Client Portal](#).
- Calling Apple Health Customer Service toll-free at 1-800-562-3022. This automated system is available 24 hours a day, 7 days a week.

- Requesting a change online through our secure [Contact us – Apple Health \(Medicaid\) client web form](#). Select the topic “Enroll/Change Health Plans.”
- Visiting the [Washington Healthplanfinder](#) (only for clients with a Washington Healthplanfinder account).

Integrated managed care

For clients who live in an integrated managed care region, all physical health services, mental health services, and substance use disorder treatment are covered and coordinated by the client’s agency-contracted MCO. The BHO will not provide behavioral health services in these regions.

Clients living in an integrated managed care region will enroll with an MCO of their choice that is available in that region. If the client does not choose an MCO, the client will be automatically enrolled into one of the available MCOs, unless the client is American Indian/Alaska Native (AI/AN). Clients currently enrolled in one of the available MCOs in their region may keep their enrollment when the behavioral health services are added.

American Indian/Alaska Native (AI/AN) clients living in an integrated managed care region of Washington may choose to enroll in one of the agency-contracted MCOs available in that region or they may choose to receive all these services through Apple Health FFS. If they do not choose an MCO, they will be automatically enrolled into Apple Health FFS for all their health care services, including comprehensive behavioral health services. See the agency’s [American Indian/Alaska Native webpage](#).

For more information about the services available under the FFS program, see the agency’s [Substance Use Disorder Billing Guide](#).

For full details on integrated managed care, see the agency’s [Apple Health managed care webpage](#) and scroll down to “Changes to Apple Health managed care.”

Integrated managed care regions

Clients who reside in the following integrated managed care regions and who are eligible for managed care enrollment must choose an available MCO in their region. Details, including information about mental health crisis services, are located on the agency’s [Apple Health managed care webpage](#).

Region	Counties	Effective Date
North Sound	Island, San Juan, Skagit, Snohomish, and Whatcom	July 1, 2019
Greater Columbia	Asotin, Benton, Columbia, Franklin, Garfield, Kittitas, Walla Walla, Yakima, and Whitman	January 1, 2019
King	King	January 1, 2019
Pierce	Pierce	January 1, 2019
Spokane	Adams, Ferry, Lincoln, Pend Oreille, Spokane, and Stevens counties	January 1, 2019
North Central	Grant, Chelan, Douglas, and Okanogan	January 1, 2018 January 1, 2019 (Okanogan)
Southwest	Clark, Skamania, and Klickitat	April 2016 January 1, 2019 (Klickitat)

Apple Health Foster Care (AHFC)

Effective January 1, 2019, children and young adults in the Foster Care, Adoption Support and Alumni programs who are enrolled in Coordinated Care of Washington’s (CCW) Apple Health Foster Care program receive both medical and behavioral health services from CCW.

Clients under this program are:

- Under the age of 21 who are in foster care (out of home placement)
- Under the age of 21 who are receiving adoption support
- Age 18-21 years old in extended foster care
- Age 18 to 26 years old who aged out of foster care on or after their 18th birthday (alumni)

These clients are identified in ProviderOne as
“Coordinated Care Healthy Options Foster Care.”

Fee-for-service Apple Health Foster Care

Children and young adults in the fee-for-service Apple Health Foster Care, Adoption Support and Alumni programs receive behavioral health services through the regional Behavioral Health Administrative Services Organization (BH-ASO). For details, see the agency's [Mental Health Services Billing Guide](#), under [How do providers identify the correct payer?](#)

How can I verify a patient's coverage for mental health services?

Providers must verify the client's coverage in ProviderOne in order to bill correctly for furnishing mental health services.

This billing guide is divided into [Part I: Services for Clients Enrolled in a BHO, integrated managed care plan, or BHSO](#) and [Part II: High acuity services for AI/AN fee-for-service clients](#). Use the following lists and ProviderOne screen shots below to identify the provider guide section appropriate for your client. The lists provide the names of MCOs, BHOs, integrated managed care plans, and BHSOs, as they appear in ProviderOne when viewing *Managed Care Information*. The screen shots demonstrate which organization is responsible for a client's medical benefits and behavioral health benefits.

The following list includes MCOs and integrated managed care plans (as they appear in ProviderOne) because both MCOs and integrated managed care plans cover physical health and lower-acuity mental health:

- AMG Fully Integrated Managed Care
- AMG Apple Health Adult Coverage
- AMG Healthy Options Blind/Disabled
- AMG State Children's Health Insurance Program
- MHC Fully Integrated Managed Care
- MHC Apple Health Adult Coverage
- MHC Healthy Options Blind/Disabled
- MHC State Childrens Health Insurance Program
- MHC Healthy Options
- CHPW Fully Integrated Managed Care
- CHPW Apple Health Adult Coverage
- CHPW Healthy Options Blind/Disabled
- CHPW State Childrens Health Insurance Program
- CHPW Healthy Options
- CCW Fully Integrated Managed Care
- Coordinated Care Apple Health Adult Coverage
- Coordinated Care Healthy Options Foster Care
- Coordinated Care Healthy Options Blind/Disabled
- Coordinated Care State Childrens Health Insurance Program
- Coordinated Care Healthy Options
- North Sound Behavioral Health Organization
- UHC Apple Health Adult Coverage
- UHC Healthy Options Blind/Disabled
- UHC State Childrens Health Insurance Program
- UHC Healthy Options
- UHC IMC

The following list includes BHOs, integrated managed care plans, and BHSOs (as they appear in ProviderOne) because they all cover substance use disorder and higher-acuity mental health:

BHOs

- Thurston-Mason Behavioral Health Organizations
- Salish Behavioral Health Organization
- Greater Columbia Behavioral Health

BHSO MCO

- AMG Behavioral Health Services Only
- CCW Behavioral Health Services Only
- CHPW Behavioral Health Services Only
- MHC Behavioral Health Services Only

Use [PART I: Services for Clients Enrolled in a BHO, integrated managed care plan, or BHSO](#) of this billing guide for the following examples:

Once the client’s coverage is identified, refer to [How do providers identify the correct payer?](#)

How do providers identify the correct payer?

Provider can use the [How do providers identify the correct payer?](#) table to identify the payer for a service based on the service type and the client’s health care coverage.

This Mental Health Services billing guide is not applicable to the services in the table marked with an asterisk (*). Contact the managed care organization for information and instructions regarding provider credentialing, benefits, prior authorization requirements, and billing.

Part I: Services for clients enrolled in a BHO, integrated managed care plan, or BHSO

Part I describes the set of lower-acuity mental health services covered by managed care organizations (MCOs) or fee-for-service (FFS) and the higher-acuity services covered by a behavioral health organization (BHO), integrated managed care plan, or behavioral health services only (BHSO) for clients enrolled in these programs.

Crisis services

Crisis mental health services are provided upon request, 24-hours a day, seven days a week, and are available to anyone who needs them regardless of ability to pay. To find telephone numbers for crisis intervention services, see the [State Mental Health Crisis Lines](#).

Tribal health clinics providing crisis services should refer to the [Tribal Health Services Billing Guide](#).

Note: The behavioral health administrative service organization (BH-ASO) provides all crisis services for Apple Health clients and non-Apple Health clients residing in designated integrated managed care regions. For authorizations, the provider [must call the BH-ASO, which is the crisis line for the county](#). See [How do providers identify the correct payer?](#)

Professional services delivered in an outpatient setting

Provider requirements

Who is eligible to provide and bill for lower-acuity mental health services covered by fee-for-service (FFS)?

To be eligible to provide and bill the agency fee-for-service (FFS) for lower-acuity mental health treatment services, all mental health professionals must:

- Be independently licensed by the Department of Health;
- Be in good standing without restriction; and
- Have a current core provider agreement (CPA) and national provider identifier (NPI). For more information about completing the CPA, see the [Provider Enrollment](#) webpage for new providers.

Who is eligible to provide and bill for lower-acuity mental health services to clients up to age 18 and younger?

(WAC [182-531-1400](#))

Note: This section applies to clients up to the day of their 18th birthday.

With the exception of licensed psychiatrists and psychologists, qualified health care professionals who treat clients up to age 18 and younger must:

- Submit a *Mental Health Professionals Attestation* form HCA 13-951 attesting they have a minimum of 100 actual hours of specialized study of child development and treatment and a minimum of one year of supervised experience in the diagnosis and treatment of clients age 18 and younger; or
- Be working under the supervision of a professional who meets these criteria.

Which professional services can be billed in an outpatient setting?

Note: For managed care clients receiving outpatient mental health services, providers must follow the policies and procedures of the managed care organization. For clients who reside in designated integrated managed care regions, contact the client's managed care organization (MCO) for referral requirements for mental health services.

Note: If you are treating or evaluating a client who appears to need more intense services than you can provide, contact the client's BHO or BHSO to make a referral for an intake evaluation.

Eligible providers who are approved to provide mental health services may bill one psychiatric or psychological service per day, per client, which includes the evaluation and management service.

When performing both psychotherapy services and Evaluation & Management (E&M) services during the same visit, use the appropriate E&M code and the appropriate psychiatric add-on CPT® code (e.g., CPT® code +90833).

The agency covers the services below to treat conditions that fall within the current ICD diagnosis code range for mental health. For billing purposes, providers are required to use the most specific code available.

Services delivered outpatient for treatment-resistant depression

(CPT 90867, 90868, 90869, 90870)

Treatment-resistant depression is defined as depression that is unresponsive to trial therapy at a maximum tolerated dose for 4-12 weeks of one antidepressant from two of the following five classes:

- Selective Serotonin Reuptake Inhibitors (SSRI)
- Serotonin Norepinephrine Reuptake Inhibitors (SNRI)
- Noradrenergic and Specific Serotonergic Antidepressant (NaSSA)
- Norepinephrine/Dopamine Reuptake Inhibitor (NDRI)
- Serotonin Antagonist Reuptake Inhibitor (SARI)

Failed trials require a level of compliance considered adequate by the provider, and may include failures that did not meet the duration requirement due to adverse events or reactions.

The agency covers the following two non-pharmacologic treatments for treatment-resistant depression for clients age 19 and older.

- Repetitive Transcranial Magnetic Stimulation (rTMS)
- Electroconvulsive Therapy (ECT)

The agency pays for rTMS as follows:

- Documentation exists supporting other treatments have been unsuccessful
- Limited to 30 visits in a seven-week period followed by six taper treatments
- Must be ordered and performed by a psychiatrist or a P-ARNP
- Must be performed in outpatient settings only

The agency does not consider rTMS to be medically necessary when:

- Psychotic symptoms are present in the current depressive episode
- Conductive, ferromagnetic or other magnetic-sensitive metals are implanted in the client's head which are nonremovable and are within 30 cm of the TMS magnetic coil. (Examples includes: cochlear implants, implanted electrodes/stimulators, aneurysm clips or coil, stents, and bullet fragments.)
- The client is diagnosed with Schizophrenia, Schizophreniform Disorder, or Schizoaffective Disorder

- Other neurological conditions exist (e.g. Epilepsy, Parkinson's disease, Multiple Sclerosis, Cerebrovascular disease, Dementia, increased intracranial pressure, having a history of repetitive or severe head trauma, primary or secondary tumors in the central nervous system, or any other degenerative neurologic condition)
- Used as a maintenance therapy
- The client is an active substance user

The agency pays for ECT when all of the following are met:

- Documentation exists supporting other treatments have been unsuccessful
- Provided by a psychiatrist
- For outpatient ECT services, bill the MCO or FFS based on the client's enrollment.

Billing for professional services in an emergency room setting for a client who is transferred to another facility for an inpatient psychiatric admission

See [How do providers identify the correct payer?](#)

Outpatient psychiatric services and limitations

See the [Mental Health Services Coverage Table](#) for covered mental health services. The agency pays for only one psychiatric diagnostic interview exam (CPT® codes 90791 or 90792) per client, per provider, per calendar year.

Drug monitoring

Drug monitoring refers to a brief office visit for the sole purpose of monitoring or changing drug prescriptions. Drug monitoring (use the appropriate E/M code) is used in the treatment of mental psychoneurotic and personality disorders. It represents a skilled aspect of care for a client who has been determined to have a mental illness. The focus of a drug monitoring visit is the use of medication for relief of the client's signs and symptoms of mental illness. When the client continues to experience signs and symptoms of mental illness that require discussion beyond minimal psychotherapy, the focus of the service is broader and is considered psychotherapy rather than drug monitoring.

Drug monitoring:

- May be billed as one psychiatric medication management service per client, per day, in an outpatient setting when performed by one of the following:
 - ✓ Psychiatrist
 - ✓ P-ARNP
 - ✓ PMHNP-BC
- May be billed when prescribing medication and when reviewing the effects of the prescribed medication.
- Is intended for use for clients whose condition is being managed primarily by psychotropic medications.
- Must be provided during a face-to-face visit with the client, unless it is part of a qualified telemedicine visit.
- Is not allowed in an inpatient hospital (POS 21).

Documentation requirements for drug monitoring

The medical record must be clear, concise, and complete. A checklist by itself is not accepted as complete documentation. The treating provider must document in the medical record that drug monitoring was reasonable and medically necessary. The claim and the medical record must list the diagnosis that most accurately describes the condition that necessitated drug monitoring. These requirements are in addition to those in WAC 182-538D-0200.

Documentation of medical necessity for drug monitoring must address all of the following information in the client’s medical record in legible format:

- Date and time
- Diagnosis – update at least annually
- Interim medication history
- Current symptoms and problems, including any physical symptoms
- Problems, reactions, and side effects, if any, to medications or ECT
- Current mental status exam
- Any medication modifications
- The reasons for medication adjustments/changes or continuation

- Desired therapeutic drug levels, if applicable
- Current laboratory values, if applicable
- Anticipated physical and behavioral outcomes

Note: When a client sees a psychiatrist, P-ARNP, or a PMHNP-BC for psychiatric care and only drug monitoring is necessary, the practitioner may bill for either drug monitoring or an evaluation and management (E&M) visit for that date of service.

Alternatively, when a psychiatrist, P-ARNP, or a PMHNP-BC provides psychotherapy and drug monitoring, the practitioner may bill an E&M visit and a qualifying psychotherapy service on that date of service.

In accordance with the National Correct Coding Initiative (NCCI), drug monitoring and an E&M or psychotherapy service cannot be billed on the same day of service, by the same provider. For additional information, see [NCCI](#).

What psychological testing does the agency cover?

The agency covers psychological testing **after** a detailed diagnostic evaluation if:

- The client's history and symptomatology are not clearly attributable to a specific psychiatric diagnosis and psychological testing would aid in the differential diagnosis of behavioral and psychiatric conditions. The psychological testing questions must be questions that could not otherwise be answered during:
 - ✓ A psychiatric or diagnostic evaluation.
 - ✓ Observation during therapy.
 - ✓ An assessment for level-of-care determinations at a mental health or substance-abuse facility.
- The client has tried various medications and psychotherapies but has not progressed, and continues to be symptomatic. All of the following criteria must be met:
 - ✓ The number of hours or units requested for testing does not exceed the reasonable time necessary to address the clinical questions with the identified measures.
 - ✓ The testing techniques are validated for the proposed diagnostic question or treatment plan.
 - ✓ The testing techniques do not represent redundant measurements of the same cognitive, behavioral or emotional domain.
 - ✓ The testing techniques are both validated for the age and population of the member.

- ✓ The instruments must meet all of the following:
 - Be the most current version of the instrument.
 - Have empirically-substantiated reliability, validity, standardized administration, and clinically-relevant normative data needed to assess the diagnostic question or treatment planning goals.

Note: The agency does not cover neuropsychological testing (NPT) or psychological testing (PT) if the client is actively abusing a substance, having acute withdrawal symptoms, or has recently entered recovery because test results may be invalid.

Psychological testing and evaluation services

- Psychological assessments must include a complete diagnostic history, examination, and assessment. Testing cognitive processes, visual motor responses, and abstract abilities is accomplished by combining several testing procedures.
- To receive reimbursement for the testing and evaluation, the psychologist must keep a report in the client's file that contains all of the components of a psychological assessment including test results and interpretation of results.
- Use CPT® codes 96130 and 96131 when billing for psychological evaluation services from a psychologist or physician. Test selection, clinical decision making, and test interpretation are now billed under 96130 and 96131.
- Use CPT codes 96136 and 96137 billing for test administration and scoring by a psychologist or physician.
- Use CPT codes 96138 and 96139 for test administration and scoring by a qualified technician
- Psychological testing is limited to nine units of any combination of codes 96130, 96131, 96136, 96137, 96138 or 96139 without prior authorization (PA) per client, per lifetime.

Outpatient developmental testing

The agency reimburses for developmental testing (CPT® codes 96112 and 96113) when conducted by a psychologist, or neuropsychologist.

Neuropsychological testing

- Neuropsychological evaluation includes interpretation of test results and clinical data, integration of patient data, clinical decision making, treatment planning, report generation and interactive feedback to the patient, family member(s) or caregiver(s).
- Evaluation services must always be performed by the qualified professional prior to test administration, and may be billed on separate days.
- Use CPT® codes 98132 for the first hour of neuropsychological evaluation and 96133 for each additional hour provided on the same day.
- Use CPT codes 96136 for the first 30 minutes of testing and scoring by a psychologist or neuropsychologist and 96137 for each additional 30 minutes of testing and scoring provided on the same day.
- Use code 96138 for the first 30 minutes of test administration and scoring by a technician, and 96139 for each additional 30 minutes a technician is administering and scoring tests on the same day.

The agency reimburses for neuropsychological testing (CPT® codes 96132, 96133, 96136, and 96137) only when the provider meets the first two requirements or the client meets the third requirement:

- The provider is currently licensed in Washington State to practice psychology or clinical neuropsychology.
- The provider has obtained prior authorization from the agency.
- The client meets the expedited prior authorization (EPA) criteria. (See [Services requiring EPA](#)).

A prior authorization (PA) request for neuropsychological testing of children requires a detailed review of the individualized education plan (IEP) outlining all of the following:

- The specific clinical issues in the IEP that have not been sufficiently addressed
- The aspects of the child's rehabilitation that are not improving
- Specific additional benefits that neuropsychological testing will provide the client, describing what the IEP is already addressing, and how the proposed testing will improve the treatment plan
- Other psychological testing that has been done
- Relevant consultations from psychiatrists, neurologists, developmental pediatricians, etc.

A PA request for neuropsychological testing of adults and children, who are not in school, requires all of the following information:

- The client’s current diagnoses
- If available, a copy of the reports produced by the testing for the agency to review
- For neuropsychological testing that has been done in the past:
 - ✓ Documentation of the provider’s review of reports produced by the testing
 - ✓ Documentation of the provider’s review of the results of the previous testing(s)
- An explanation detailing the essential medical knowledge that is expected to be gained from neuropsychological testing
- Specific details documenting how the results of neuropsychological testing will improve the day-to-day care of this client

Note: The agency no longer requires providers who bill for neuropsychological testing to be board-certified; however, upon request, providers must be able to furnish credentials that demonstrate their expertise.

Neuropsychological Testing	
Note: If the client does not meet the expedited prior authorization (EPA) criteria listed in this guide and this table, the agency requires prior authorization (PA) for the testing.	
Services	Neuropsychological testing of clients age 20 or older in an outpatient or inpatient setting
Providers	<p>The agency pays only “qualified” providers for administering neuropsychological testing to eligible agency clients. To be “qualified,” providers must be both of the following:</p> <ul style="list-style-type: none"> • Currently licensed in Washington State to practice psychology or clinical neuropsychology • One of the following: <ul style="list-style-type: none"> ✓ Board-certified in clinical neuropsychology by the American Board of Clinical Neuropsychology ✓ Have adequate education, training, and experience as defined by having completed all of the following: <ul style="list-style-type: none"> ➤ A doctoral degree in psychology from an accredited university training program

Neuropsychological Testing	
	<ul style="list-style-type: none"> ➤ An internship, or its equivalent, in a clinically relevant area of professional psychology ➤ The equivalent of two full-time years of experience and specialized training, at least one of which is at the post-doctoral level, in the study and practice of clinical neuropsychology and related neurosciences (these two years must include supervision by a clinical neuropsychologist)
Billing Codes	96132, 96133, 96133, 96136, 96137, 96138, 96139 and 96146 may be billed with EPA # 870001207 if all the criteria in this section are met.
Billing and Payment Limits	<p>This section describes four groups of criteria that apply to billing in certain circumstances.</p> <p>To assist with rehabilitation efforts and manage outcomes in inpatient physical medicine and rehabilitation (PM&R) patients, criteria in Group 1 must be met.</p> <p>For outpatient or non-PM&R inpatient settings, criteria in any one of groups 1-4 must be met.</p>
	<p>Group 1</p> <p>All of the following must be met:</p> <ul style="list-style-type: none"> • The patient to be evaluated has, or is suspected to have, an acquired injury to the brain as a result of traumatic brain injury, stroke, multiple sclerosis, aneurysm, anoxia, hypoxia, dementia, neoplasm, or chemotherapy. • The patient is age 20 or older. • The patient was functioning normally (was able to attend school, work competitively, or live independently) prior to the brain disorder. • The patient has potential to return to important areas of role functioning (e.g., work, school, or independent living). • Testing will be used only in conjunction with functionally based rehabilitation, not “cognitive” rehabilitation.

Neuropsychological Testing	
	<p>Group 2</p> <p>The client is suspected to have a diagnosis of dementia or multiple sclerosis based on one of the following:</p> <ul style="list-style-type: none"> • Client or family complaints • A head CT (computed tomography scan) • A mental status examination or other medical examination <p>This suspected diagnosis is not confirmed or able to be differentiated from the following:</p> <ul style="list-style-type: none"> • Normal aging • Mild concussion • Depression • Focal neurological impairments <p>A firm diagnosis would change the medical treatment plan, clinical management, or aid important client or family decisions.</p>
	<p>Group 3</p> <p>The client is undergoing brain surgery for epilepsy, a tumor, or Parkinson’s disease, and neuropsychological testing may help with either of the following:</p> <ul style="list-style-type: none"> • Guide the surgeon in the goal of sparing healthy brain tissue and sites that are critical to some major function such as language • Identify poor candidates for neurological surgery due to dementia (e.g., in cases where deep brain stimulation implants are being considered to manage intractable tumors)
	<p>Group 4</p> <p>The client is being considered for surgery (e.g., a lung transplant), and neuropsychological testing may help identify if the client is a poor candidate for surgery (e.g., in cases where cognitive impairment from chronic hypoxia or other risk factors make it unlikely that the person can accurately follow a rigorous post-transplant protocol to prevent organ rejection).</p>

What mental health services does the agency cover for youth?

- All age appropriate mental health services are available to children
- Depression screening is required for youth 12 through 18yrs. Suggested tools and billing instructions can be found in the [Early and Periodic Screening, Diagnosis and Treatment Billing Guide](#).

What mental health services does the agency cover for transgender clients?

Mental health treatment can be provided to a transgender client, the client's spouse, parent, guardian, or child, or a person with whom the client has a child in common, if the treatment is directly related to the client's care, is medically necessary and is in accordance with WAC [182-531-1400](#).

See this Apple Health [webpage](#) for resources that may be helpful for providing healthcare services to transgender people.

For more information about covered services for transgender health, see the [Physician-Related Services/Health Care Professional Services Billing Guide](#).

What mental health services does the agency cover for infants?

Mental health treatment can be provided to an infant, and the infant's parent or guardian, if the treatment is directly related to the infant's care, is medically necessary, and is in accordance with the WAC [182-531-1400](#).

Providers must bill mental health services for a newborn or child under the newborn or child's ProviderOne client ID.

Note: The agency covers depression screening for caregivers of infants ages six months and younger. This screening should be billed under the infant's ProviderOne client ID when done by the infant's provider.

How are providers reimbursed for aged, blind, or disabled (ABD) evaluation services?

Providers must be enrolled with ProviderOne to claim and receive payment for ABD Evaluation Services. See the DSHS [Medical Evaluation and Diagnostic Procedures](#) webpage.

Medical evidence reimbursements are solely for the cost of obtaining medical evidence of an impairment that limits work activity, and for the purposes of an Aged, Blind, or Disabled (ABD) disability determination. See the DSHS [Medical Evidence Reimbursement](#) webpage.

For information regarding reimbursement for psychological evaluations and testing these DSHS Community Services Division (CSD) [Mental Incapacity Evaluation](#) Services webpage.

How can providers make sure a client receives services in the right place?

Since the agency does not limit the total number of outpatient mental health visits, the agency requires the appropriate place of service for mental health services. When the client meets the behavioral health organization (BHO) access to care standards (ACS), the client should be considered for BHO outpatient mental health services. A mental health professional may continue to provide services under this benefit until the BHO can assume the client's care.

Agency-enrolled providers contracted with, or employed by, Community Mental Health Agencies (CMHAs) must not bill FFS and report a BHO encounter on the same service date when providing services to clients eligible for BHO services that meet the ACS. Reportable services for CMHA clients meeting ACS are authorized and purchased separately under the BHO -Prepaid Inpatient Health Plan (PIHP).

When is out-of-state outpatient care covered?

(WAC [182-501-0182](#))

Out-of-state mental health care requires [prior authorization](#) (PA).

Note: Out-of-state mental health care is not covered for clients under the MCS eligibility program, unless the services are provided in a bordering city listed in WAC [182-508-0005](#).

The agency covers emergency and nonemergency out-of-state health care services provided to eligible Apple Health clients when the services are:

- Within the scope of the client's health care program.
- Allowed to be provided outside the state of Washington by specific program.
- Medically necessary.

When the agency pays for covered health care services furnished to an eligible Apple Health client outside the state of Washington, its payment is payment in full according to [42 C.F.R. § 447.15](#).

Where can I view the fee schedules?

See the following fee schedules for more information:

- [Early and Periodic Screening Diagnosis and Treatment \(EPSDT\) Fee Schedule](#)
- [Mental Health Services Fee Schedule](#)
- [Physician-Related/Professional Services Fee Schedule](#)

Prior authorization and expedited prior authorization

Authorization is the agency's approval for certain medical services, equipment, or supplies, before the services are provided to clients, as a precondition for provider reimbursement. **Prior Authorization (PA), Expedited prior authorization (EPA) and limitation extensions (LE) are forms of prior authorization.**

What is prior authorization (PA)?

Prior authorization (PA) is the agency or the agency designee's approval for certain medical services, equipment, or supplies, before the services are provided to clients. When PA is applicable, it is a precondition for provider reimbursement. Expedited prior authorization (EPA) is a form of prior authorization.

What is the expedited prior authorization (EPA) process?

The agency or agency designee's expedited prior authorization (EPA) process is designed to eliminate the need for written/fax authorization. The intent is to establish authorization criteria and identify these criteria with specific codes, enabling the provider to use the agency's designated "EPA" number when appropriate.

Note: EPA does not apply to [out-of-state care](#).

Billing with an EPA number

For electronic billing, enter the EPA in the *Prior Authorization* section. For more information about entering EPA numbers, see the [Direct data entry of an institutional claim](#) or [Medical provider workshop](#) webinars.

Note: When the client's situation does not meet published criteria for EPA, formal written PA is necessary.

EPA guidelines

Clinical information obtained from the hospital or outpatient chart may be used to meet conditions for EPA. Claims submitted without the appropriate diagnosis, procedure code, or service will be denied.

EPA documentation

The billing provider must document how EPA criteria were met in the client’s file and make this information available to the agency or the agency’s designee upon request.

Services requiring EPA

The following services require EPA:

EPA Code	Service Name	CPT/HCPCS /Dx Code	Criteria
870001207	Neuropsychological Testing	CPT: 96132, 96133, 96136, 96137, 96138, 96139 and 96146	Refer to Neuropsychological Testing . Up to 15 units for any of these codes combined in a calendar year.
870001369	Inpatient professional services provided to a non- integrated managed care - enrolled MCO client when the admission was authorized by the BHO		All of the following conditions must be met: ❖ The client is enrolled in an MCO ❖ The client’s inpatient hospital (POS 21, 51) admission was paid for by the BHO ❖ The client’s primary diagnosis is in the psychiatric range for ICD diagnosis codes ❖ The services are provided by a psychiatrist, psychologist, or psychiatric ARNP

❖ For integrated managed care clients, see [How do providers identify the correct payer?](#)

Note: The following CPT codes may be used for inpatient professional services provided to an MCO client during a BHO-authorized admission to place of service 21 or 51:

- +90785
- 90791
- 90792
- 90832
- 90833

- 99367

EPA billing requirements for evidence and research-based practices

Evidence-based medicine, evidence-based practice, research-based practice, and evidence-based health care (collectively “EBPs”) include programs such as cognitive behavioral therapy (CBT) and the Positive Parenting Program (Triple P). The agency is required by law to collect data on EBPs in Washington State. Providers who provide these services to clients under age 21 should include the appropriate EPA number from the following table when billing for EBP.

Programs/Coding for Mental Health Professionals		
Anxiety		
Treatment Category	Specific Treatment and Approved Trainings	EPA #
Cognitive Behavioral Therapy (CBT) for children with anxiety (group, individual or remote)(151)		870001555
	<ul style="list-style-type: none"> • CBT4 CBT training (Coping Cat) (151) • Centre for Emotional Health (Cool Kids) (151) • Effective Child Therapy/ Society of Clinical Child & Adolescent Psychology (151) • Harborview CBT + Learning Collaborative (151) • The Reach Institute (CATIE trainings) (151) • Other Live Training: Provider can document that the training agenda covered all Essential Elements for this program type. (151) 	870001555
	Cool Kids (032)	870001556

	Trauma Grief Component Therapy (137)	870001596
Child – Parent Psychotherapy (163)		870001597
Eye Movement Desensitization and Reprocessing (EMDR) for child trauma (043)		870001598

Allowable CPT codes to use with evidence based practices: 90832, 90833, 90834, 90836, 90837, 90838, 90846, 90847, 90849 and 90853

What is a limitation extension (LE)?

The agency limits the amount, frequency, or duration of certain services and reimburses up to the stated limit without requiring PA. The agency requires a provider to request PA for a limitation extension (LE) in order to exceed the stated limits.

See [Resources](#) for the fax number and specific information (including forms) that must accompany the request for LE.

The agency evaluates requests for LE under the provisions of WAC [182-501-0169](#).

How do I obtain written authorization?

Send your request to the agency’s Authorization Services Office. For more information on requesting authorization, see the agency’s [ProviderOne Billing and Resource Guide](#).

Billing

All claims must be submitted electronically to the agency, except under limited circumstances. For more information about this policy change, see [Paperless Billing at HCA](#). For providers approved to bill paper claims, see the agency’s [Paper Claim Billing Resource](#).

How do I bill claims electronically?

Instructions on how to bill Direct Data Entry (DDE) claims can be found on the agency’s [Billers and Providers](#) webpage, under Webinars. See [Direct data entry of an institutional claim](#) or [Medical provider workshop](#) for professional claims.

For information about billing Health Insurance Portability and Accountability Act (HIPAA) Electronic Data Interchange (EDI) claims, see the ProviderOne 5010 companion guides on the [HIPAA Electronic Data Interchange \(EDI\)](#) webpage.

What are the guidelines for billing professional services?

- Providers must bill using the most appropriate procedure code for the total time spent on direct patient care during each visit.
- The agency pays for one psychiatric diagnostic evaluation for a client, per provider, per calendar year, unless a significant change in the client's circumstances makes an additional evaluation medically necessary. In that event, the provider must request a limitation extension from the agency prior to the evaluation to exceed the limit.
- The agency pays for one or more individual or family/group psychotherapy visits per day (with or without the client), per client, when medically necessary.
- For each date of service billed, the diagnosis on the detail line must indicate the specific reason for the visit.

Professional services delivered in an inpatient setting

Note: For eligible AI/AN Apple Health clients who are **not** enrolled in an MCO, BHO, or integrated managed care plan, and who have high needs refer to [Part II: High acuity services for AI/AN fee-for-service clients](#).

Clients enrolled in a BHO for higher-acuity behavioral health services require prior authorization (PA) for all admissions for acute, community psychiatric inpatient care from the BHO responsible for the client. For clients residing in an integrated managed care region, follow any PA procedures required by the plan in which they are enrolled for behavioral health services. For more information, see:

- [Inpatient hospital psychiatric admissions](#)
- [How can I verify a patient's coverage for mental health services?](#)
- [How do providers identify the correct payer?](#)

Professional services provided to a FFS-covered client during a psychiatric admission paid for by a BHO

The agency covers professional inpatient mental health services when provided by a psychiatrist, P-ARNP, PMHNP-BC, or a psychologist, in conjunction with the prescribing provider, to FFS Apple Health-covered clients or clients determined Apple Health-eligible as a result of this admission, for both voluntary and involuntary psychiatric admissions under Chapters [71.34](#) and [71.05](#) RCW.

- The agency pays only for the total time spent on direct psychiatric client care during each visit, including services rendered when making rounds. The agency considers services rendered during rounds to be direct client care services and may include up to one-hour individual psychotherapy, family/group therapy, and electroconvulsive therapy.
- One ECT or narcosynthesis per client, per day only when performed by a psychiatrist.

Professional services provided to any MCO-enrolled client during a psychiatric admission paid for by a BHO

How do I bill the professional mental health services for an inpatient MCO client?

The agency covers professional inpatient mental health services when provided by a psychiatrist, P-ARNP, PMHNP-BC, or a psychologist, in conjunction with the prescribing provider, to any MCO-enrolled client during a psychiatric admission, including an ITA admission, paid for by a BHO.

All professional claims submitted to the agency for inpatient mental health services rendered to a non-integrated managed care MCO client during a BHO-authorized admission must include EPA #[870001369](#).

For payment of these services for clients who are enrolled in integrated managed care plans, see [How do providers identify the correct payer?](#)

Non-psychiatric services (physical/medical services) rendered during a BHO-authorized admission must be billed to the MCO, including the integrated managed care MCO.

Professional services during a psychiatric inpatient admission for people who are not eligible for Apple Health

Note: The services are paid with state-only funds. These people are not eligible for any program administered by Apple Health.

The agency covers the inpatient professional mental health services delivered by psychiatrists, P-ARNPs, PMHNP-BCs, or psychologists, in conjunction with the prescribing provider, for people residing in Washington state who are admitted under Chapters [71.34](#) and [71.05](#) RCW, and are not Apple Health clients or Apple Health-eligible.

Billing for inpatient professional services

Physicians, P-ARNPs, and psychologists may bill the agency for all psychiatric services provided according to the following guidelines:

- Each person must be examined and evaluated by a licensed physician or P-ARNP within 24 hours of admission or payment will be denied. This evaluation may be used for both treatment purposes and court testimony during an involuntary admission.

When billing for an evaluation under these circumstances, do both of the following:

- ✓ Enter SCI=I in the Claim Note section of the electronic professional claim for involuntary or SCI=V for voluntary admissions.
 - ✓ Provide documentation that the client was admitted to an inpatient facility.
- A day's rounds, along with any one of the following, constitute direct client care:
 - ✓ Narcosynthesis
 - ✓ Brief (up to one hour) individual psychotherapy
 - ✓ Multiple/family group therapy
 - ✓ Group therapy
 - ✓ ECT
 - If an Apple Health client requires psychiatric hospitalization while out of state, the hospital must obtain authorization from the appropriate behavioral health designee. See [How can I verify a patient's coverage for mental health services?](#) for more information.
 - The agency does not pay for services provided to Medical Care Services (MCS) program clients who are out of state, unless the services are provided in a bordering city listed in [WAC 182-501-0175](#).

- **During an involuntary admission:**
 - ✓ A court may request another physician or P-ARNP evaluation.
 - ✓ The agency pays for physician or P-ARNP evaluations and consultations to the court regarding the need for continued involuntary psychiatric hospitalization of a client.
 - ✓ Documentation of the time required for actual testimony must be maintained in the client's medical record. Only one court testimony is paid per hearing. Bill using the medical testimony code (CPT® code 99075) for time spent doing court testimony. Additional costs for court testimony are paid from the ITA administrative fund.
- ITA applies only within the borders of Washington State. Neither the agency nor the BHO pays for involuntary inpatient services for non-Apple Health clients provided outside of the state of Washington.

Note: For general information about admissions under the Involuntary Treatment Act (ITA), see [Involuntary Treatment Act admissions](#).

	Note: LMHPs are not eligible for reimbursement in an inpatient setting.						

The agency does not cover psychiatric sleep therapy.

- Claims for inpatient rounds must be charged using one of the inpatient CPT® codes in this section.

Services delivered inpatient for treatment-resistant depression
(CPT 90870)

Treatment-resistant depression is defined as depression that is unresponsive to trial therapy at a maximum tolerated dose for 4-12 weeks of one antidepressant from two of the following five classes:

- Selective Serotonin Reuptake Inhibitors (SSRI)
- Serotonin Norepinephrine Reuptake Inhibitors (SNRI)
- Noradrenergic and Specific Serotonergic Antidepressant (NaSSA)
- Norepinephrine/Dopamine Reuptake Inhibitor (NDRI)
- Serotonin Antagonist Reuptake Inhibitor (SARI)

Failed trials require a level of compliance considered adequate by the provider, and may include failures that did not meet the duration requirement due to adverse events or reactions.

The agency pays for ECT for individuals age 19 and older when all of the following are met:

- Documentation exists supporting other treatments have been unsuccessful
- Provided by a psychiatrist
- For inpatient ECT services:
 - ✓ For integrated managed care clients, bill the managed care organization.
 - ✓ For nonintegrated managed care MCO clients, bill FFS using expedited prior authorization (EPA) number [870001369](#).

Institutional (facility) charges

Inpatient hospital psychiatric care criteria

Inpatient psychiatric care for all Apple Health clients, including managed care enrollees (i.e., those on Medicaid and state programs), must be all of the following:

- Medically necessary (as defined in [WAC 182-500-0070](#))
- Admissions where psychiatric needs are the focus of treatment
- Approved (ordered) by the professional in charge of the hospital or hospital unit
- Services provided in a psychiatric hospital shall have psychiatric diagnosis and be in APR DRG 740-760
- Authorized by the payer (except for clients listed in [Part II](#) of this guide)

Provider requirements

This section of the billing guide **does not** apply to any of the following:

- Freestanding Evaluation and Treatment (E&T) facilities, with the exception of those contracted with the state for long-term care
- Children’s Long Term Inpatient Program (CLIP) facilities
- Eastern State Hospital
- Western State Hospital
- Residential treatment facilities

The agency pays for hospital inpatient psychiatric care, as defined in Chapters [246-320](#) and [246-322](#) WAC under inpatient psychiatric facility prospective payment rules when provided by:

- Free-standing psychiatric hospitals determined by the agency to meet the federal definition of an Institution for Mental Diseases (IMD), which is: “a hospital, nursing facility, or other institution of more than sixteen beds that is primarily engaged in providing diagnosis, treatment, or care of people with mental diseases, including medical attention, nursing care, and related services;”
- Medicare-certified, distinct psychiatric units;
- Hospitals that provide active psychiatric treatment (see WAC [246-322-170](#)) outside of a Medicare-certified or state-designated psychiatric unit, under the supervision of a physician, including single-bed certifications for ITA admissions and voluntary admissions that occur in an emergency circumstance under the direction of the designated crisis responder (DCR) or written order of the emergency physician;
- State-designated pediatric psychiatric units; or
- Facilities with state-contracted long-term beds

Hospitals providing **involuntary** hospital inpatient psychiatric care must be **licensed and certified** by DOH in accordance with Chapter 246-341 WAC and must meet the general conditions of payment criteria in WAC [182-502-0100](#).

If a person is detained for involuntary care and a bed is not available in a facility certified by DOH, the state psychiatric hospitals (under the authority of DSHS) may, at their discretion, issue a **single bed certification** which serves as temporary certification (see WAC 182-538D-0526) allowing for inpatient admission to occur in that setting.

Voluntary treatment

The BHO/MCO representative may authorize and pay for voluntary hospital inpatient psychiatric hospitalization services provided to clients who are receiving or have applied and are eligible for Apple Health programs (e.g., Categorically Needy Program). For more information on Apple Health programs, see the agency's [ProviderOne Billing and Resource Guide](#).

The agency's representative (BHO, MCO, or BHSO) pays for services provided to clients who are eligible for or enrolled in Apple Health. The BHO (or BH-ASO for people residing in the designated integrated managed care regions) pays for these services if a person is not eligible for Apple Health. See [How do providers identify the correct payer?](#) to determine the payer for an Apple Health client or a person who is not eligible for Apple Health.

The BHO or BH-ASO representative also authorizes voluntary services provided to clients who are in crisis and do not qualify for any Apple Health program. These inpatient stays are paid for with state funds.

Any patient without active eligibility must have a ProviderOne Client ID.

The admitting hospital:

- Contacts the BHO or the BH-ASO representative for authorization;
- Requests the BHO or the BH-ASO to create a voluntary-based eligibility segment; and
- Provides the BHO/BH-ASO representative with the following information:
 - ✓ **Name:** First, Last, Middle Initial
 - ✓ **Date of birth**
 - ✓ **Social Security Number** (if available)
 - ✓ **Washington county of residence**
 - ✓ **A brief summary of services and care to date** (if possible)

Age of consent for voluntary inpatient hospital psychiatric care

Minors age 12 and younger:	May be admitted to treatment only with the permission of the minor's parent/legal guardian.
Minors age 13 and older:	May be admitted to treatment with the permission of any of the following: <ul style="list-style-type: none"> • The minor and the minor's parent/guardian • The minor without parental consent • The minor's parent/legal guardian without the minor's consent through the Parent Initiated Treatment process
Age 18 years and older:	May be admitted to treatment only with the client's voluntary and informed, written consent. In cases where the client has a legal guardian, the guardian's consent is required.
Members of Indian Tribes	The age of consent of the associated tribe supersedes the other requirements listed.

Involuntary treatment

Only people age 13 and older (see "Age of consent for voluntary inpatient hospital psychiatric care" above) may be detained in an inpatient community hospital setting under the provisions of the Involuntary Treatment Act (ITA) as defined by Chapters [71.05](#) and [71.34](#) RCW. The agency's representative (BHO, MCO, or BHSO) pays for services provided to clients who are Apple Health-enrolled or eligible. The BHO (or the BH-ASO for clients residing in the designated integrated managed care regions) pays for these services if the person is not eligible for Apple Health. See [How do providers identify the correct payer?](#) to determine the payer for any Apple Health client or any person who is not eligible for Apple Health.

The representative also authorizes services that are provided to clients detained under ITA law when the client either refuses to apply for, or does not qualify for, any Apple Health program. These inpatient stays are paid for with state funds.

An ITA patient without active eligibility must have a ProviderOne Client ID.

The admitting hospital:

- Contacts the BHO (or the BH-ASO for people residing in the designated integrated managed care regions) representative for authorization;
- Requests BH or the BH-ASO to create an ITA-based eligibility segment; and
- Provides the BHO/BH-ASO representative with the following information:
 - ✓ **Name:** First, Last, Middle Initial
 - ✓ **Date of birth**
 - ✓ **Social Security Number** (if available)
 - ✓ **WA county of residence**
 - ✓ **A brief summary of services and care to date** (if possible)

Consent for involuntary admissions

Involuntary admissions occur in accordance with ITA in Chapters [71.05](#) and [71.34](#) RCW. Therefore, no consent is required. Only people age 13 and older are subject to the provisions of these laws.

Authorization requirements for inpatient hospital psychiatric care (except eligible clients not enrolled in an MCO, BHO, BHSO, or integrated managed care plan who are in one of the RACs in Part II)

Authorization requirements for clients enrolled in a BHO

The hospital must obtain prior authorization (PA) for payment from the appropriate BHO representative for *all* inpatient hospital psychiatric admissions when the agency is the primary payer. To view BHO information, visit the agency's [Contractor and provider resources](#) webpage.

Note: Information indicating which BHO or BHSO is associated with an active recipient is available in the managed care section of the Client Benefit Inquiry Screen in ProviderOne or through the agency's Interactive Voice Response System at 1-800-562-3022.

This PA requirement includes clients eligible for both Medicare and Apple Health and who have exhausted their lifetime Medicare benefits at admission or during the course of hospitalization. This also includes clients eligible for primary commercial or private insurance and Apple Health and who have exhausted their primary insurance benefits at admission or during the course of hospitalization. Unless the hospital receives this authorization, the agency will not pay for the services rendered. The BHO or BH-ASO representative may not withhold its decision pending eligibility for Apple Health and must issue a documented authorization decision within the timelines described below upon the hospital's request regardless of whether or not third party liability (TPL) is present.

To determine which BHO to contact when BHO responsibility is unclear, refer to the [Behavioral Health Organization \(BHO\) Contacts](#) sheet.

Authorization requirements for patients in designated integrated managed care regions

Providers must confirm eligibility and plan enrollment for all patients. If the patient is an Apple Health client, contact the client's managed care organization (MCO). If the patient is not an Apple Health client or Apple Health-eligible, contact the [regional BH-ASO](#).

Except for involuntary treatment, the remaining pages of this provider guide do not apply to admissions for managed care clients who reside in designated integrated managed care regions. Providers must follow the policies and procedures of the client's MCO or the regional BH-ASO as indicated.

The MCOs and the regional BH-ASOs, which are covering inpatient psychiatric services for people in designated integrated managed care regions, must follow these rules:

- For emergency admissions, including ITA admissions for enrollees, the MCOs require admission notification within 24 hours, or the next business day, of the decision to admit.
- Emergency and nonemergency voluntary admissions for non-Apple Health clients require prior authorization from the regional BH-ASO.
- The regional BH-ASO may authorize and pay for voluntary hospital inpatient psychiatric admissions for people who are **not** eligible for Apple Health. Contact the regional BH-ASO for more information.
- The MCOs will conduct concurrent review activities on all psychiatric admissions. These activities must be completed according to the MCO's policies and instructions.
- Contact the MCOs for additional information.
- Providers must submit inpatient psychiatric claims to the client's MCO for processing and payment. Claims must not be submitted to ProviderOne.
- Noncitizens may be eligible for coverage for emergency inpatient psychiatric admissions under the Alien Emergency Medical program ([WAC 182-507-0115](#)).

Note: Services provided to blind and disabled clients in a certified public expenditure (CPE) hospital must be billed fee-for-service to the agency through ProviderOne.

Time frames for PA requests

Time frames for submission of PA requests are as follows:

- Hospitals must request authorization prior to admission unless the stay results from a prudent layperson emergency. This PA requirement includes clients eligible for both Medicare and Apple Health who have exhausted their lifetime Medicare benefits at admission or during the course of hospitalization and for clients with primary commercial or private insurance and secondary Apple Health coverage when their primary insurance has been exhausted at admission or during the course of hospitalization.
- If Medicare or primary benefits are exhausted during the course of hospitalization, PA must be requested within the calendar day of benefit exhaustion.
- If a client presents at a hospital for emergency services, the hospital must contact the BHO or BH-ASO for authorization of post-stabilization services as soon as the client has

been determined stable enough to be transferred or discharged. If the hospital intends to provide further care, the BHO or BH-ASO must respond with a decision within an hour of the hospital's request.

- If the BHO or BH-ASO does not respond to the hospital's request for authorization of post stabilization services, the treating staff may assume authorization and execute their plan of care until contact with the BHO or BH-ASO is made.
- Hospitals must notify the BHO or BH-ASO and request authorization of emergency services within 30 days of the date of discharge.

Length of Stay Extension: Unless the BHO or BH-ASO representative specifies otherwise within the PA record, hospitals must submit requests for extension of authorized stays at least 24 hours prior to the expiration of the authorization period. A hospital may choose to submit a request more than 24 hours prior to an expiration of an authorization period. Whenever possible, hospitals are encouraged to submit extension requests during regular business hours. BHO or BH-ASO representatives are required to provide a determination within 24 hours of the receipt of the extension request. An exception may be made in acute emergencies.

- **Nonemergency transfer:** If the admitted client is to be transferred from one hospital to another hospital during the course of hospital inpatient psychiatric care, the hospital from which the client is being transferred must contact the BHO or BH-ASO representative to request a new authorization for services to be provided in the new hospital at least 24 hours prior to the change in hospital of service (transfer). BHO or BH-ASO representatives are required to provide a determination on the request within 24 hours of the receipt of the transfer request.
- **Retrospective:** Retrospective authorization may occur if the client becomes eligible for Apple Health after admission or in rare situations where circumstances beyond the control of the hospital prevented the hospital from requesting an authorization prior to admission. Hospitals may request authorization after the client is admitted, or admitted and discharged. BHO or BH-ASO representatives acting as the prepaid inpatient health plan (PIHP) have the authority to consider requests for retrospective certification for a client's voluntary inpatient psychiatric admission, length of stay extension, or transfer when hospital notification did not occur within the timeframes stipulated in WAC [182-550-2600](#).
 - ✓ For retrospective certification requests *prior to discharge*, the hospital must submit a request for authorization for the current day and days forward. For these days, the BHO or BH-ASO representative must respond to the hospital or hospital unit within 2 hours of the request and provide certification and authorization or denial within 12 hours of the request. For days prior to the current day (i.e. admission date to the day before the BHO or BH-ASO representative was contacted), the hospital must submit a separate request for authorization. The BHO or BH-ASO representative must provide a determination within 30 days upon receipt of the required clinical documentation for the days prior to notification.

- ✓ For retrospective certification requests *after the discharge*, the hospital must submit a request for authorization as well as provide the required clinical information to the BHO or BH-ASO representative within 30 days of discharge. The BHO or BH-ASO representative must provide a determination within 30 days of the receipt of the required clinical documentation for the entire episode of care.

All retrospective certifications must be in accordance with the requirements of this section and an authorization or denial must be based upon the client's condition and services rendered at the time of admission and over the course of the hospital stay until the date of notification or discharge, as applicable.

Medicare/Medicaid dual eligibility

For the purposes of this section, "Medicare dual eligibility" refers to cases when a client has health care coverage under both Medicare and Apple Health. In such cases, the following applies:

- Although hospitals are not required to seek the BHO or BH-ASO representative's authorization for Medicare inpatient services, they *are* required to notify the BHO or BH-ASO representative of a client's dual eligibility at the time of admission via phone or fax within the same calendar day as the admission. The BHO or BH-ASO representative is responsible for the client's deductible, co-insurance, or co-payment, up to the agency determined allowed amount.
- If the client with Medicare dual eligibility has exhausted the Medicare lifetime benefit at admission, the hospital is required to seek authorization from the BHO or BH-ASO representative at admission. BHO or BH-ASO representatives are required to respond within 2 hours and provide determination within 12 hours.
- If the client with Medicare dual eligibility has exhausted the Medicare lifetime benefit during the course of hospital inpatient psychiatric care, the hospital is required to request authorization from the BHO or BH-ASO representative prior to the anticipated benefit exhaustion for the remaining expected days. BHO or BH-ASO representatives are required to respond within 2 hours and provide a determination within 12 hours.

Commercial (private) insurance

As with Medicare and Medicaid dual eligibility, hospitals are required to notify the BHO or BH-ASO representative at admission if a client has commercial or private insurance that pays for hospital inpatient psychiatric care and has Apple Health as a secondary payer. Hospitals are required to request the BHO or BH-ASO representative's authorization 24 hours prior to the benefit exhaustion of the commercial or private insurance for any anticipated days past the benefit exhaustion date. The BHO or BH-ASO representative may provide authorization retrospectively in cases where a delay has occurred in the commercial or private insurer's

notification to the hospital that the benefit is exhausted. BHO or BH-ASO representatives are required to respond to requests within 2 hours and make a determination within 12 hours.

Changes in status

There may be more than one authorization needed during an episode of hospitalization. A request for authorization is required when there has been a change in a client's legal status, principal diagnosis, or hospital of service as indicated below. BHO or BH-ASO representatives must respond to hospital requests for authorization within the timelines below when there has been a change in client's legal status, principal diagnosis, or hospital of service as follows:

- **Change in legal status:** If a client's legal status changes from involuntary to voluntary, the hospital must contact the BHO or BH-ASO representative within 24 hours to request a new authorization reflecting the changed legal status. A subsequent authorization may be issued if the stay is authorized. If a client's legal status changes from voluntary to involuntary, the hospital is not required to notify the BHO or BH-ASO representative because a designated crisis responder (DCR) is required for detention; therefore the BHO or BH-ASO representative would already be notified. The BHO or BH-ASO representative will issue a separate authorization for the involuntary days. Any previously authorized days under the previous legal status that are past the date of the change in legal status are not covered. BHO or BH-ASO representatives are required to respond to requests within 2 hours and make a determination within 12 hours.
- **Change in Principal Diagnosis:** The situations below outline different scenarios and corresponding expectations when a change in principal diagnosis occurs. BHO or BH-ASO representatives must respond within 2 hours and provide determinations within 12 hours for requests related to changes in principal diagnosis:
 - ✓ If a client's principal diagnosis changes from a physical health condition to a covered mental health condition, the hospital must contact the BHO or BH-ASO representative within the calendar day to request an authorization related to the new principal covered diagnosis.
 - ✓ If a client's principal diagnosis changes from a covered mental health diagnosis to a physical health diagnosis, the hospital must notify the authorizing BHO or BH-ASO representative within 24 hours of this change. Any previously authorized days under the previous principal covered diagnosis that are past the date of the change in principal covered diagnosis are not covered.
 - ✓ If a client's principal diagnosis changes from a covered mental health diagnosis to another covered mental health diagnosis, a new authorization is *not* required, though this change should be communicated to the BHO or BH-ASO representative within 24 hours of the change as a matter of best practice.
 - ✓ If a client is authorized for hospital inpatient psychiatric care, is discharged, admitted to medical care and then discharged from the medical care and readmitted to psychiatric care during the course of their hospitalization, the BHO

or BH-ASO representative must be notified of the initial discharge from psychiatric care and a new authorization is required for the readmission to psychiatric care for that day forward.

- **Change in Hospital of Service (transfer):** If the client is to be transferred from one hospital to another hospital during the course of inpatient psychiatric care, the hospital from which the client is being transferred must contact the BHO or BH-ASO representative to request a new authorization for services to be provided in the new hospital 24 hours prior to the change in hospital of service (transfer). A subsequent authorization may be issued if the stay is approved. Hospitals must ensure that when a client who has been involuntarily detained is transferred from one facility to another, the client's current medical, psychiatric, and copies of any ITA or court papers accompany the client. BHO or BH-ASO representatives are required to provide a determination on the request within 24 hours of receipt of the request.

Notification of discharge

For clients who have been authorized for inpatient care by the BHO or BH-ASO representative, hospitals must notify the BHO or BH-ASO representative within 24 hours when a client has been discharged or has left against medical advice prior to the expiration of the authorized period. Authorized days that extend past the date the client was discharged or left the facility are not covered. The BHO or BH-ASO representative will add the discharge date information to the ProviderOne PA record.

Authorization denials and enrollee rights of appeal

BHOs or BH-ASOs must issue timely adverse benefit determinations to enrollees and/or their representatives whenever the following occur:

- The denial or limited authorization of a requested service, including determinations based on the type or level of service, requirements for medical necessity, appropriateness, setting, or effectiveness of a covered benefit
- The reduction, suspension, or termination of a previously authorized service
- The denial, in whole or in part, of payment for a service
- The failure to reach service authorization decisions within the required time frame, or the failure to provide services in a timely manner (see WAC 182-538D-0665)

Enrollees may request an administrative hearing after receiving notice that an adverse benefit determination by the BHO or BH-ASO has been upheld. If a BHO or BH-ASO fails to comply with the notice and timing requirements in [42 CFR 438.408](#), the enrollee is considered to have exhausted the BHO's or BH-ASO's appeals process and may request an administrative hearing.

Authorization procedures for inpatient hospital psychiatric care (except eligible clients in one of the RACs listed in Part II)

Documentation

To receive authorization for hospital inpatient psychiatric care, the hospital intending to provide the service must contact the appropriate BHO or BH-ASO representative so the designee may construct an accurate prior authorization (PA) record within the following required timelines:

- **PA:** Hospitals must request authorization prior to admission unless the services result from an emergency medical condition such as danger to self or others. This PA requirement includes clients with Medicare dual eligibility and clients with commercial or private insurance with Apple Health as secondary when the client has exhausted lifetime Medicare benefits at admission, or the commercial or private insurance has been exhausted at admission.
- For clients with Medicare dual eligibility and clients with commercial or private insurance who exhaust their lifetime benefits during the course of hospitalization, authorization must be requested within the calendar day of benefit exhaustion. If the hospital chooses to admit a client without PA due to an emergency medical condition, the hospital must submit a request for post stabilization care. BHO or BH-ASO representatives are required to respond to requests for post stabilization care one hour.

The PA record generated by the BHO or BH-ASO provides the BHO or BH-ASO representative's authorization of the:

- ✓ Authorized days (covered REV code units);
- ✓ Administrative days, if applicable (days paid at the administrative day rate);
- ✓ Non-authorized days (non-covered days) for the stay.

These days are important for billing purposes (see [Billing for inpatient hospital psychiatric care](#) for instructions on how to use the Initial Certification form in the billing process.)

Hospitals must request **subsequent/new authorizations** from the BHO or BH-ASO representative for changes in all of the following:

- ✓ Legal status
- ✓ Principal covered diagnosis
- ✓ Hospital of service (see [Changes in status](#))

- **Application for Medical Assistance:** If a client applies for Apple Health eligibility, the BHO or BH-ASO representative must be contacted within the calendar day. The BHO or

BH-ASO representative may not withhold its decision pending the outcome of the applicant's Apple Health eligibility. BHO or BH-ASO representatives are required to respond to requests within 2 hours and communicate a determination within 12 hours.

Note: A PA record may be created for voluntary services before eligibility is established; however, a valid ProviderOne Client ID is required for payment. If the patient establishes eligibility, give the ProviderOne Client ID to the BHO or BH-ASO. The BHO or BH-ASO will then add the ProviderOne Client ID to the PA record and payment may proceed.

- **Extension certification for admission to inpatient psychiatric care (extension certification):** The BHO or BH-ASO representative must be contacted for requests for extension at least 24 hours prior to expiration of the currently authorized period, unless otherwise indicated by the BHO or BH-ASO representative. A hospital may request an extension more than 24 hours prior to the expiration of the currently authorized period. The extension certification provides the BHO or BH-ASO representative's authorization of the:
 - ✓ Authorized days (covered).
 - ✓ Administrative days, if applicable (paid at the administrative day rate).
 - ✓ Nonauthorized days (non-covered) for the extended stay.

These days are important for billing purposes (see [Billing for inpatient hospital psychiatric care](#) for instructions on how to use the Initial Certification form in the billing process.)

The BHO or BH-ASO representative cannot deny extension requests for adults who are detained under the Involuntary Treatment Act (ITA) law unless another less-restrictive alternative is available. The hospitals and BHO or BH-ASO representatives are encouraged to work together to find less-restrictive alternatives for these clients. However, all alternative placements must be ITA-certified (either as a facility or through the single bed certification). Additionally, since the ITA court papers indicate the name of the facility in which the client is to be detained, the court would need to be approached for a change of detention location if a less restrictive placement is found (see [Billing instructions specific to involuntary treatment](#)).

- **Retrospective certification for admission to inpatient psychiatric care (PA):** The PA subsystem is also used for retrospective certifications and provides the BHO or BH-ASO representative's authorization for:
 - ✓ Authorized days (covered REV code units).
 - ✓ Administrative days, if applicable (paid at the administrative day rate).
 - ✓ Non-authorized days (noncovered) for the **extended** stay.

Retrospective authorization may occur if the client becomes eligible for Apple Health after admission or in rare situations where circumstances beyond the control of the hospital prevented the hospital from requesting an authorization prior to admission.

Hospitals may request authorization after the client is admitted, or admitted and discharged. A BHO or BH-ASO representative on behalf of the agency has the authority to render authorization decisions for retrospective certification for a client's voluntary inpatient psychiatric admission, length of stay extension, or transfer when hospital notification did not occur within the timeframes stipulated in WAC [182-550-2600](#).

- ✓ For retrospective certification requests *prior to discharge*, the hospital must submit a request for authorization for the current day and days forward. For these days, the BHO or BH-ASO representative must respond to the hospital or hospital unit within 2 hours of the request and provide certification and authorization or denial within 12 hours of the request. For days prior to the current day (i.e. admission date to the day before the BHO or BH-ASO representative was contacted), the hospital must submit a separate request for authorization. The BHO or BH-ASO representative must provide a determination within 30 days upon receipt of the required clinical documentation for the days prior to notification.
- ✓ For retrospective certification requests *after the discharge*, the hospital must submit a request for authorization as well as provide the required clinical information to the BHO or BH-ASO representative within 30 days of discharge. The BHO or BH-ASO representative must provide a determination within 30 days of the receipt of the required clinical documentation for the entire episode of care.
- **Administrative days:** The BHO or BH-ASO representative may issue approval for administrative days only when all of the following conditions are true:
 - ✓ The client has a legal status of “voluntary.”
 - ✓ The client no longer meets medical necessity criteria.
 - ✓ The client no longer meets intensity of service criteria.
 - ✓ Less restrictive alternatives are not available, posing a barrier to safe discharge.
 - ✓ The hospital and BHO or BH-ASO representative mutually agree to the appropriateness of the administrative day.

Agencies may bill the negotiated administrative day rate payment, as well as payment for pharmacy services and pharmaceuticals.

- **Extensions for youth waiting for children's long-term inpatient program (CLIP):** The BHO or BH-ASO representative cannot deny an extension request for a child or youth who has been detained under ITA and is waiting for a CLIP placement unless another less-restrictive alternative is available. As previously noted, use of administrative days may be considered in voluntary cases only.
 - ✓ **Voluntary:** For a child waiting for CLIP placement who is in a community psychiatric hospital on a voluntary basis, the BHO or BH-ASO representative may authorize or deny extensions or authorize administrative days. Hospitals and

BHO or BH-ASO representatives are encouraged to work together to find less restrictive alternatives for these children.

- ✓ **Involuntary:** For a youth waiting for CLIP placement, who is in a community psychiatric hospital on an involuntary basis, extensions may *not* be denied and the BHO or BH-ASO representative may *not* authorize administrative days. The hospitals and BHO or BH-ASO representatives are encouraged to work together to find less restrictive alternatives available to meet the treatment needs for these youths. However, any less-restrictive placements would need to be ITA-certified (either as a facility or through the single bed certification). Additionally, since the ITA court papers indicate the name of the facility in which the youth is to be detained, the court would need to be approached for a change of detention location if a less-restrictive placement is found.

Additional requirements

In addition to timely requests for authorization and provision of required client information as indicated, admission must be determined to be **medically necessary** for treatment of a **covered principal diagnosis code** (see Diagnostic Categories).

- For the purpose of Inpatient Hospital Psychiatric Admissions, “Medically Necessary or Medical Necessity” is defined as follows:
 - ✓ Ambulatory care resources available in the community do not meet the treatment needs of the client; **AND**
 - ✓ Proper treatment of the client’s psychiatric condition requires services on an inpatient basis under the direction of a physician (according to WAC [246-322-170](#)); **AND**
 - ✓ The services can reasonably be expected to improve the client’s level of functioning or prevent further regression of functioning; **AND**
 - ✓ The client has been diagnosed as having an emotional/behavioral disorder or a severe psychiatric disorder (as defined in the current edition of the *Diagnostic and Statistical Manual of Mental Disorders* published by the American Psychiatric Association) and warrants extended care in the most intensive and restrictive setting; **OR**
 - ✓ The client was evaluated and met the criteria for emergency involuntary detention (Chapter [71.05](#) or [71.34](#) RCW); **OR**
 - ✓ The client was evaluated and met the criteria for emergency involuntary detention (Chapter [71.05](#) or [71.34](#) RCW) but agreed to inpatient care and was admitted on a voluntary basis.

- **Provision of required clinical data:** In order for the BHO or BH-ASO representative to make medical necessity determination, the hospital must provide the requisite agency - **required clinical data** for initial and extended authorizations. While BHO or BH-ASO representatives may use different formats for collection of this clinical data, the data set that is required is the same regardless of which BHO or BH-ASO representative is certifying the need for inpatient psychiatric care.

Note: See the [Clinical data required for initial certification](#) and [Clinical data required for extension certification](#) requests.

- **Determination of the appropriate BHO representative to contact:** For assistance in determining which agency designee is appropriate for authorization, see the following resources:
 - ✓ BHO contact information on the [Behavioral Health Organization \(BHO\) Contacts](#) sheet
 - ✓ [CSO and HCS Office Information List](#) on the Community Services Offices webpage

Note: If the client is eligible for mental health services, the BHO will appear under “Managed Care Information.” See [How can I verify a patient’s coverage for mental health services?](#)”

- ✓ **Referral to the children’s long-term inpatient program (CLIP):** Children and youth ages 6-17 can be referred to CLIP voluntarily or involuntarily using the process outlined on the [CLIP Administration webpage](#). When the court determines that a 180-day commitment to inpatient care in a state-funded facility is necessary for a juvenile, the committing hospital must notify the CLIP Administration of the court’s decision *by the end of the next working day following the court hearing* (RCW [71.34](#)). Once the Committee is notified, authorization for additional care can be issued by the appropriate BHO or BH-ASO representative. (See the [Behavioral Health Organization \(BHO\) Contact](#) sheet.)

Note: The agency *does not* reimburse for services provided in a juvenile detention facility.

- **Initial notification:** The committing hospital must notify the CLIP Administration by the end of the next working day of the 180-day court commitment to state-funded long-term inpatient care.

The following information is required:

- ✓ Referring staff, organization and telephone number
- ✓ Client’s first name and date of birth
- ✓ Beginning date of 180-day commitment and initial detention date

- ✓ Client's county of residence
- ✓ A copy of the minor's certified 180-day court order

- **Discharge summary and Review of Admissions:** Within two weeks of transfer from the hospital to a CLIP program, a copy of the completed discharge summary must be submitted by the hospital to the CLIP Administration and to the facility where the child is receiving treatment. *All referral materials* should be sent to the CLIP Administration at the following address:

Children's Long-Term Inpatient Program (CLIP)
2142 10th Avenue W
Seattle, WA 98119
T: 206-588-2985
Fax: 206-859-6432

Under the conditions of the At Risk/Runaway Youth Act, as defined in Chapter [71.34](#) RCW, hospitals must provide the BHO or BH-ASO representative access to review the care of any minor (regardless of source of payment) who has been admitted upon application of his/her parent or legal guardian. For the purposes of the Review of Admissions, all information requested must be made available to the BHO or BH-ASO representative. The BHO or BH-ASO representative must document in writing any subsequent determination of continued need for care. A copy of the determination must be in the minor's hospital record.

- **Referral packet:** A referral packet concerning the ITA committed child must be submitted to the CLIP Administration within five (5) working days of telephone notification for the 180-day commitment. If the child is transferred to another facility for an interim placement until CLIP care is available, the referral packet must accompany the child. The following items are required components of the referral packet:
 - ✓ A certified copy of the court order and the 180-day commitment petition with supporting affidavits from a physician and the psychiatrist or a children's mental health specialist
 - ✓ A diagnosis by a psychiatrist, including Axis I-V related to the current edition of the Diagnostic and Statistical Manual of Mental Disorders published by the American Psychiatric Association
 - ✓ An admission evaluation including:
 - Medical evaluation
 - Psychosocial evaluation
 - ✓ The hospital record face sheet

- ✓ Other information about medical status including:
 - Laboratory work
 - Medication records
 - Consultation reports
- ✓ An outline of the child's entire treatment history
- ✓ All transfer summaries from other hospitals where the child has been admitted during the current commitment as well as discharge summaries from any prior facility
- ✓ A brief summary of child's progress in treatment to date, including hospital course, family involvement, special treatment needs, and recommendations for long-term treatment/assignment
- **Submitting other background information for CLIP referrals:** During the 20 days following the 180-day commitment hearing, the committing hospital must arrange to have the following background information submitted to the CLIP Administration. Submit all of the following information prior to admission to the CLIP program:
 - ✓ Written formulation/recommendation of the local intersystem team responsible for the child's long-term treatment plan. The plan should include family's involvement, and detail of treatment history, as well as less restrictive options being considered
 - ✓ The agency case records, including placement history form, individualized service plans (ISPs), court orders, etc. Include legal history regarding juvenile arrests, convictions, probation/parole status.
 - ✓ Complete records from all hospitalizations, including admission and discharge summaries, treatment plans, social history evaluations, consultations, and all other assessments (do not include daily progress notes)
 - ✓ Treatment summaries and evaluations from all foster or residential placements, and all day treatment and outpatient treatment summaries
 - ✓ If not contained in other documents, a comprehensive social history, including developmental and family history
 - ✓ School records, including special services assessments, transcripts, psychological evaluations, current IEP, current level of functioning
 - ✓ Immunization record, copy of social security card and birth certificate
- **Interfacility transfer reports** - When a youth who has been involuntarily detained is transferred from one facility to another, an interfacility or hospital transfer report detailing the child's current medical, psychiatric, and legal status (in terms of both ITA

commitment and custody) must accompany that child as well as a certified copy of the court order. For general information, visit the [Children's Long Term Inpatient Program for Washington State \(CLIP\)](#) webpage.

Billing for inpatient hospital psychiatric care (except eligible clients in one of the RACs listed in Part II and not enrolled in an MCO, BHO, BHSO, or integrated managed care plan)

General billing of institutional claims for inpatient hospital psychiatric care

Note: For clients residing in designated integrated managed care regions, providers must submit inpatient psychiatric claims to the client's managed care organization (MCO) for processing and payment; not ProviderOne. However, if the client is admitted to a CPE-designated hospital and the client is a Healthy Options-Blind/Disabled (HOBD) client, the provider must bill ProviderOne and follow the instructions in this section.

All of the following must occur in order for hospitals to be paid for providing inpatient hospital psychiatric care:

- Hospitals must contact the appropriate BHO or BH-ASO so that the BHO or BH-ASO may construct a valid prior authorization (PA) record for voluntary or involuntary hospital inpatient psychiatric admission in accordance with the agency's [Inpatient Hospital Services Billing Guide](#).
- For *all* hospital inpatient psychiatric admissions, including clients with Medicare dual eligibility (when the client's Medicare lifetime benefit has been exhausted) as well as clients with commercial or private insurance with Apple Health as secondary payer (when the primary insurance is exhausted), hospitals must obtain authorization from the appropriate BHO or BH-ASO representative.
- Each claim for inpatient psychiatric care must include an **authorization number**. The BHO or BH-ASO representative that authorized the hospital admission must provide an authorization number. In order to receive payment, hospitals must ensure the authorization number appears in the *Prior Authorization Number* field of the claim. In addition, SCI=I or SCI=V (reflecting involuntary or voluntary legal status) must be noted in the *Billing Note* section of the electronic institutional claim.
- Hospitals must obtain a **subsequent/new authorization** from the agency's BHO or BH-ASO representative on an Initial Certification Authorization for Admission to Inpatient Psychiatric Care form, when there is a change in any of the following:
 - ✓ Legal status
 - ✓ Principal covered diagnosis
 - ✓ Hospital of service

- The PA record provides the hospital with authorization for all of the following:
 - ✓ Authorized days (covered REV code days)
 - ✓ Administrative days, if applicable (paid at the administrative payment methodology), and pharmacy services provided during the administrative days
 - ✓ Nonauthorized days (non-covered) for the **initial** or **extended** stay respectively
 - ✓ Date when the hospital must contact the BHO or BH-ASO representative for an extension request

- An episode of inpatient care may require more than one certification or authorization record. To allow concurrent review, if the inpatient care requires additional days of care, authorization must be requested at least one day before the current authorization ends.

Note: The agency’s [ProviderOne Billing and Resource Guide](#) provides information on how to “Check Status of an Authorization.”

- **Authorized (covered) days:** Authorized days are determined by the BHO or BH-ASO representative utilizing legal status and clinical presentation. Authorized (covered) days on the billing claim must match authorized days in the ProviderOne PA record.

- Days not authorized are considered noncovered. Hospitals must bill the covered and noncovered days on separate lines.

Example:

Revenue Code	Covered Days	Noncovered Days
0xx4	\$xx.xx	
0xx4		\$xx.xx

- Hospitals must bill any **administrative days** and associated covered charges for services rendered on these days with revenue code **0169** on a separate claim.

- Hospitals must bill approved psychiatric room charges using one of the following revenue codes: 0114, 0124, 0134, 0144 or 0204.

- Per coding standards, hospitals must report **all current ICD diagnosis codes at the highest level of specificity**

Note: The claim must indicate in the *Billing Note* section of the claim whether the days billed were **voluntary** or **involuntary**. Use one of the following special claims indicator to show how the client was admitted (no spaces within designated comment below):

- “SCI=V” for voluntary
- “SCI=I” for involuntary

Claims for voluntary or involuntary portions of an episode of care must be authorized separately and billed separately.

Claims for psychiatric services when the principal diagnosis falls outside of the BHO or BH-ASO psychiatric diagnosis range

For certain psychiatric diagnosis codes, coding rules require the associated neurological or medical condition be coded first. Such claims are reviewed and manually processed for payment when:

- An inpatient psychiatric admission to the hospital occurs on an involuntary or voluntary basis.
- The admission is authorized by a BHO or BH-ASO representative on behalf of the agency.
- The principal diagnosis on the hospital claim is a medical diagnosis.

Splitting claims

When the focus of care shifts from medical to psychiatric services or from psychiatric to medical services, psychiatric services and acute medical services must be billed on separate claims.

Billing instructions specific to involuntary treatment

- The agency will process claims for services provided to detained clients who have applied for Apple Health and were denied if the BHO or BH-ASO representative requests the creation of an ITA-related eligibility segment (previously called ITA-Q).
- **Out-of-state hospitals** must obtain authorization from the appropriate BHO or BH-ASO representative for all **Apple Health** clients. Neither the agency nor the BHO or BH-ASO representative pays for inpatient services for non-Apple Health clients if provided outside of the State of Washington. All claims for admissions to **out-of-state hospitals** are paid as “**voluntary legal status**” as the Involuntary Treatment Act applies only within the borders of Washington State.

- For all clients involuntarily detained under Chapter [71.34](#) or [71.05](#) RCW, the agency does *not* provide payment for hospital inpatient psychiatric care past the **20th calendar day** from the date of initial detention *unless* a length of stay extension certification request is authorized by the BHO or BH-ASO representative.

Note: In order to be paid, all claims must be accurate, complete, and include the required documents as indicated in this section. Incorrectly or partially completed claims, or claims not associated with a valid PA record, will be denied and require resubmission which will delay payment.

How do I bill for clients covered by Medicare Part B only (No Part A), or who have exhausted Medicare Part A benefits prior to the stay?

Description	DRG	Per Diem	RCC	CPE	CAH
Bill Medicare Part B for qualifying services delivered during the hospital stay.	Yes	Yes	Yes	Yes	Yes
Bill the agency for hospital stay as primary.	Yes	Yes	Yes	Yes	Yes
Show as noncovered on the agency 's bill what was billed to Medicare under Part B.	No	No	Yes	Yes	Yes
Expect the agency to reduce payment for the hospital stay by what Medicare paid on the Part B bill.	Yes	Yes	No	No	No
Expect the agency to recoup payment as secondary on Medicare Part B bill*.	Yes	Yes	No*	No*	No*
Report the Part B payment on the claim in the other payer field “Medicare Part B”	Yes	Yes	Yes	Yes	Yes
Include a claim note**	Yes	Yes	Yes	Yes	Yes

* The agency pays line item by line item on some claims (RCC, CPE, and CAH). The agency does not pay for line items that Medicare has already paid. The agency pays by the stay (DRG claims) or the day (Per Diem) on other claims. The agency calculates the payment and then subtracts what Medicare has already paid. The agency recoups what it paid as secondary on the Medicare claim.

**The claim note should be one of the following:

- No Part A benefits
- Part A benefits exhausted prior to stay

What the agency pays the hospital:

DRG Paid Claims:

DRG allowed amount minus what Medicare paid under Part B. When billing, put the Part B payment amount in the TPL commercial insurance field and indicate the primary payer as Medicare Part B.

Per Diem Paid Claims:

Per diem allowed amount minus what Medicare paid under Part B. When billing, put the Part B payment amount in the TPL commercial insurance field and indicate the primary payer as Medicare Part B.

RCC, CPE and CAH claims:

Allowed amount for line items covered by the agency (line items usually covered by Medicare under Part A, if client were eligible).

How do I bill for clients when Medicare coverage begins during an inpatient stay or Medicare Part A has been exhausted during the stay?

Providers bill for clients when Medicare coverage begins or Medicare Part A has been exhausted during an inpatient stay using the steps below. These instructions are also available in the [ProviderOne Billing and Resource Guide](#).

1. Bill Medicare
 - Medicare PPS Payment Manual, Chapter 3, Section 40A, bullet 3 states:
“The beneficiary becomes entitled after admission. The hospital may not bill the beneficiary or other people for days of care preceding entitlement except for days in excess of the outlier payment.”
2. The agency must have a paid/billed inpatient crossover claim in the system.
3. After the inpatient crossover claim is paid, bill the primary claim for the entire stay to the agency:
 - If billing ratio of costs-to-charges (RCC), certified public expenditures (CPE), or are a critical access hospital (CAH), list the Medicare covered day’s charges as non-covered.
 - If billing DRG or per diem, list all services (do not list noncovered services).
4. If Part A is exhausted during the stay, bill Medicare for the Part B charges.
5. The agency may pay an amount using the following formula:
 - The agency’s allowed amount for the entire stay minus Medicare’s payment minus the agency’s crossover payments

6. Add the following claim note:
 - “Part A Benefits exhausted during stay;” or
 - “Medicare Part A coverage began during the stay;” or
 - Enter the Part A start date or the date benefits are exhausted in the “occurrence” fields using occurrence Code “A3”.
7. Attach Part A and Part B Medicare explanation of benefits (EOMB)
8. These claims can be very complex and are addressed on a case-by-case basis and sometimes it is necessary for the agency to contact the biller for additional information.

Billing for medical admissions with psychiatric principal diagnosis

If a client had a medical admission for non-psychiatric care and the principal diagnosis is a psychiatric diagnosis contained in Chapter 5, Mental Behavioral and Neurodevelopmental Disorders of the ICD-10 CM, the claim will be reviewed prior to a payment decision. Providers must submit the claim with adequate documentation to support payment as a medical necessity (i.e., history and physical, discharge summary, and physician orders).

Note: If the client is covered by a managed care organization (MCO), the required documentation and claim must be submitted to the client’s MCO. Do not send these claims to the agency.

Recoupment of payments

The agency recoups any inappropriate payments made to hospitals for unauthorized days or for authorized days that exceeded the actual date of discharge.

Noted Exceptions

- The requirements in this section do not apply to three-day and five-day detoxification program admissions associated with the agency. See the [Hospital-Based Inpatient Detoxification Billing Guide](#).
- For people admitted involuntarily under Chapter [71.05](#) or [71.34](#) RCW, the exclusion of Non-psychotic Mental Disorders and Intellectual Disabilities do not apply.
- For people with Medicare and Medicaid dual eligibility, the exclusion of Non-psychotic Mental Disorders and Intellectual Disabilities does not apply until the lifetime Medicare benefit has been exhausted.

Clinical data required for initial certification

In addition to the information required for the PA record, the hospital must also provide the following data elements when seeking initial certification and authorization. While BHO representatives may use different formats for collection of this clinical data, the elements that are required are the same regardless of which BHO representative is certifying and authorizing the need for inpatient psychiatric care. BHO representatives use this information to determine medical necessity and (if authorized) the number of days authorized.

History	
Risk Factors by HX	Prior hospitalizations, CLIP, foster care, suicide attempts, ER use, legal system involvement, homelessness, substance abuse TX, and enrollment in MH system.
Presenting Problems	
Mental Status	Diagnosis, thought content, risk of harm to self or others, behavioral presentation.
Co-Morbidity Issues	Substance abuse HX/current, toxicity screen results, developmental disability, medical issues.
Other System Issues	Jail hold, other legal issues, DDD/MH Cross System Crisis Plan.
Actions Taken to Prevent Hospitalization	
Less Restrictives	Involvement of natural supports, outpatient services including medication management, CM, PACT team, WRAP-Around, etc. Consultation with Crisis Plan, DD/MH Cross-System Crisis Plan, or Advanced Directive.
Rule Outs	Malingering, medical causes, toxicity, hospitalization in lieu of homelessness or inability to access outpatient services.
Anticipated Outcomes for Initial Stay	
Proposed TX Plan	Medical interventions or tests planned, psychiatric interventions planned (individual, group, medications), goal of hospitalization.
Discharge Plan	Anticipated length of stay, involvement of client, CM, formal and natural supports in d/c planning including identification of barriers to discharge and plans to address these.

Clinical data required for extension certification

In addition to the information required for the PA record, hospitals must also provide the following data elements when seeking an extension certification and authorization. While BHO representatives may use different formats for collection of this clinical data, the elements that are required are the same regardless of which BHO representative is certifying and authorizing the need for inpatient psychiatric care. BHO representatives use this information to determine medical necessity and (if authorized) the number of days authorized.

Course of Care	
Treatment Rendered	<i>All</i> inpatient services rendered since admission (medical and psychiatric tests, therapies, and interventions performed including type and frequency) and client response to treatment thus far.
Changes	Changes in diagnoses, legal status, TX plan, or discharge plan.
Current Status	
Mental Status	Diagnoses Axis I-V, thought content, risk of harm to self or others, behavioral presentation.
Medical Status	Diagnoses, labs, behavioral presentation, withdrawal.
Anticipated Outcomes for Continued Stay	
Proposed TX Plan	Medical interventions or tests planned, psychiatric interventions planned (individual, group, medications), goal of continued stay and justification of why a less restrictive alternative is not appropriate at this time.
Discharge Plan	Anticipated length of continued stay, involvement of client, CM, formal and natural supports in d/c planning including identification of barriers to discharge and plans to address these.

Inpatient psychiatric civil commitments for 90 days or longer

This section of applies to free-standing Evaluation & Treatment (E&T) facilities and E&T units within community hospitals that have a current (active) contract directly with the agency. **This information does not apply to any other facility.**

The identified population are clients mandated by a court process for a civil commitment stay of 90-180 days. (See [Section 204P of the enacted 2018 Washington State Budget](#), Chapters [246-320](#) and [246-322](#) WAC, and [RCW 71.05](#).)

The agency pays for inpatient bed capacity in free-standing E&T facilities and E&T units in community hospitals that provide inpatient psychiatric care, as defined in Chapters 246-320 and 246-322 WAC. (See individual contract-specific language for the pre-determined number of beds.)

The Department of Health (DOH) must license and certify all contracted facilities under WAC 388-865-0511, and facilities must meet the general conditions of payment criteria in WAC 182-502-0100.

Recoupment of payments

The agency recoups any inappropriate payments made to hospitals.

Authorizations for inpatient psychiatric admissions civil commitments for 90 days or longer

The contracted requesting facility must contact the agency at LTCAuths@HCA.wa.gov using the contracted facility's secure email system to report the change in stay from 14 days per a court order to 90 days or longer per a court order *within 48 hours of admission*. The contracted requesting facility will request an end to the initial authorization. The agency will create a new authorization in ProviderOne for the new episode of care and provide the facility with an authorization number. A pdf copy of the **court documentation** must be included in the email or faxed to the agency at 360-763-4702. Court documentation **cannot contradict** the facility's location. For example, if a specific facility is mentioned, the documentation must reflect that facility. If a facility is not specifically identified, the person can transfer to a facility in his or her home county if clinically appropriate.

The contracting requesting facility must provide the agency with the following required information to create an authorization number:

- Client's full name (confirm correct spelling)
- Client's date of birth (DOB)
- Client's ProviderOne ID number (ending with "WA")
- Provider NPI number
- Begin date/anticipated end date for authorization
- ICD 10 Diagnosis
- Additional insurance, if any (i.e. Medicare or private insurance).

Send communications to LTCAuths@hca.wa.gov. If communication contains personal health information, use the contracted facility's secure email system.

Billing for inpatient psychiatric admissions for civil commitments of 90 days or longer

Under the new authorization number, both community hospitals and free-standing E&T facilities must use the following claim instructions to bill for these services on an electronic institutional claim form (837i):

Name	Entry
Taxonomy	320800000X
Claim Note	SCI=I
Revenue Code	1001
Bill Type	86x

Enter dates at the line level

Community hospitals

Community hospitals must bill Medicare and any other third-party insurance prior to billing Medicaid. Retroactive billing **is** allowed for charges not covered by Medicare or third-party insurance. The agency reimburses the contracted facility the amount that is not covered by the private insurer up to the contracted daily occupied rate.

Free-standing E&T facilities

Medicare does not cover services billed by freestanding E&T facilities. Providers must document in the client's record that this benefit is not covered by Medicare and bill Medicaid as the primary payer.

Billing for Unoccupied Beds

The agency reimburses providers for unoccupied beds at a rate identified in the contract. For occupied community hospital rates, see the inpatient provider rates (IPPS) fee schedule on the agency's [hospital reimbursement webpage](#). For occupied free-standing E&T rates, see the mental health service fee schedule (specialized mental health services) on the agency's [provider billing guides and fee schedules](#) webpage.

These beds are not linked to a client, and the agency reimburses using a provided A19 Invoice Voucher. Each month the contracted requesting facility must submit to the agency the number of empty beds and the number of days the beds were empty.

Part II: High acuity services for AI/AN fee-for-service clients

Specialized mental health services are for eligible Apple Health clients who need high acuity care and who are not enrolled in a behavioral health organization (BHO), integrated managed care plan, or behavioral health services only (BHSO). Eligible clients have one of the following recipient aid categories (RACs):

1014-1023	1039	1046-1049
1052-1055	1059	1061
1065-1074	1083-1084	1086
1088-1089	1091	1101-1111
1121-1122	1124	1126
1134	1146-1153	1162-1169
1174-1175	1196-1207	1209
1217-1225	1236-1269	

If the client requires high acuity care but does not have one of the RAC codes listed above, refer to the BH-ASO or BHO.

Crisis services

Crisis mental health services are provided upon request, 24-hours a day, seven days a week, and are available to anyone who needs them regardless of ability to pay. To find telephone numbers for crisis intervention services, see the [State Mental Health Crisis Lines](#).

Crisis services provided for Apple Health clients who are not enrolled in a BHO, integrated managed care plan, or BHSO are eligible for FFS billing when the provider meets the above qualifications.

Tribal health clinics providing crisis services should refer to the [Tribal Health Services Billing Guide](#).

Provider eligibility

Who is eligible to provide and bill for these specialized mental health services?

To be eligible to provide and bill the agency for specialized mental health services described above, the provider must:

- Be licensed and certified by the Department of Health to provide the services;
- Be in good standing without restriction;
- Have a current core provider agreement (CPA) and national provider identifier (NPI). For more information about completing the CPA, see the [Provider Enrollment](#) webpage for new providers; and
- Be registered with the Provider Network through the provider entry portal (PEP). See the [Contractor and provider resources](#) webpage.

Professional services

The agency covers professional services for medically necessary specialized mental health services, including services rendered at a free-standing evaluation and treatment center, using CPT and HCPCS codes on a professional claim form or 837P. For more information about coverage, services, and codes, see the [Contractor and provider resources](#) webpage. All providers must comply with the documentation requirements in WAC 246-341-0640. For inpatient hospital professional services, see [Services delivered in an inpatient hospital setting](#).

State Plan Modality	CPT/HCPCS Codes	Brief Description	Required Modifier
Crisis Services	H2011	Crisis intervention service, per 15 minutes	TG
Crisis Services	H0030	Behavioral health hotline service	TG

Wraparound with Intensive Services (WISe) monthly case rate

Wraparound with Intensive Services (WISe) is a Medicaid-funded range of services for clients age 20 or younger with mental disorders causing severe disruptions in behavior and requiring:

- Coordinating services and support across multiple domains (i.e., mental health system, juvenile justice, child protection/welfare, special education, developmental disabilities).
- Intensive care collaboration.
- Ongoing intervention to stabilize the child and family to prevent more restrictive or institutional placement.

WISe team members accommodate families by working evenings and weekends, and responding to crises 24 hours a day, seven days a week. Services are based on the client's needs and the Cross System Care Plan developed by the Child and Family Team.

Approved WISe providers are eligible to receive a monthly case rate. The WISe case rate is allowed each month for each client enrolled in WISe. The case rate is in addition to the reimbursement schedule for services provided and billed within the same time period.

How do approved providers bill claims with the WISe case rate?

For general billing information, see the instructions in the agency's [ProviderOne Billing and Resource Guide](#). All approved WISe providers must bill as follows:

- Continue to bill as usual for services provided to child receiving WISe.
- Using the information in the chart below, bill the monthly case rate for WISe: once per month, per child, starting with the first date of service on a single claim retroactive to July 1, 2018.
- For information about billing and Health Insurance Portability and Accountability Act (HIPAA), see the [HIPAA Electronic Data Interchange \(EDI\)](#).

Billing

All claims must be submitted electronically to the agency, except under limited circumstances. For more information about this policy change, see [Paperless Billing at HCA](#). For providers approved to bill paper claims, see the agency's [Paper Claim Billing Resource](#).

How do I bill claims electronically?

Instructions on how to bill Direct Data Entry (DDE) claims can be found on the agency's [Billers and Providers](#) webpage, under Webinars. See [Direct data entry of an institutional claim](#) or [Medical provider workshop](#) for professional claims.

For information about billing Health Insurance Portability and Accountability Act (HIPAA) Electronic Data Interchange (EDI) claims, see the ProviderOne 5010 companion guides on the [HIPAA Electronic Data Interchange \(EDI\)](#) webpage.

What are the general guidelines for billing professional services?

- Providers must bill using the most appropriate procedure code for the total time spent on direct patient care during each visit.
- For each date of service billed, the diagnosis on the detail line must indicate the specific reason for the visit.

How do specialized mental health providers bill claims for professional services?

For general billing information, see the instructions in the agency's [ProviderOne Billing and Resource Guide](#).

All specialized mental health providers must bill as follows:

- Report modifier TG as the first modifier for services that are high acuity.
- Use billing taxonomy 261QM0801X.
- Do not bill with individual servicing provider NPIs. Bill with the clinic NPI and taxonomy only.
- Do not report high acuity services on the same claim form as low acuity care services.

For information about billing Health Insurance Portability and Accountability Act (HIPAA) Electronic Data Interchange (EDI) claims, see the ProviderOne 5010 companion guides on the [HIPAA Electronic Data Interchange \(EDI\)](#) webpage.

Where can I view the fee schedules?

See the following fee schedules for more information:

- [Specialized Mental Health Services Fee Schedule](#)

Note: The reimbursement rate for these specialized mental health services may differ from reimbursement in other mental health FFS programs, based on the acuity of the client.

Services delivered in an inpatient hospital setting

Prior authorization (PA) is **not** required for eligible AI/AN people who are not enrolled in a BHO, integrated managed care plan, or BHSO plan.

The agency covers professional inpatient mental health services when provided by a psychiatrist, P-ARNP, or PMHNP-BC, or psychologist in conjunction with the prescribing provider.

- The agency pays only for the total time spent on direct psychiatric client care during each visit, including services rendered when making rounds. The agency considers services rendered during rounds to be direct client care services and may include up to one hour individual psychotherapy, family/group therapy, and electroconvulsive therapy.
- One ECT or narcosynthesis per client, per day only when performed by a psychiatrist.

Inpatient professional psychiatric services provided to an eligible Apple Health client not enrolled in an integrated managed care plan

See [How do providers identify the correct payer?](#)

The agency pays for psychiatric services provided by a psychiatrist, P-ARNP, or PMHNP-BC to any client during a psychiatric admission when the client is not enrolled in an integrated managed care plan.

If a client is an MCO-covered client and is not in integrated managed care plan, all professional claims submitted to the agency for inpatient psychiatric services must include EPA #[870001369](#).

Note: Non-psychiatric services rendered during an inpatient psychiatric admission must be billed to the MCO.

How do I bill freestanding evaluation and treatment services provided to eligible Apple Health clients not enrolled in a BHO, integrated managed care plan, or BHSO, and are in one of the RAC codes listed in this section?

The agency covers freestanding evaluation and treatment services provided by Community Mental Health Centers who are eligible to bill for specialized mental health services according to this section of the billing guide. At a minimum, these services include:

- An evaluation;
- Stabilization and treatment provided by or under the direction of licensed psychiatrists, nurses and other mental health professionals; and
- Discharge planning involving the individual, family, and significant others to ensure continuity of mental health care.

Use the 837i (institutional) format to bill freestanding evaluation and treatment services with the following information on the claims.

Taxonomy	320800000X
Revenue code	1001
Bill type/classification:	86X*

Enter dates at the line level

*The X is a placeholder. For example, if the facility is a community health center, replace the X with C for a bill classification of 86C.

How do I bill the professional services in an emergency room setting for a client who is transferred to another facility for an inpatient psychiatric admission?

See [How do providers identify the correct payer?](#)

Professional services for involuntarily admitted clients

For Involuntary Treatment Act (ITA) admissions under Chapters [71.34](#) and [71.05](#) RCW, the agency covers the inpatient professional mental health services delivered by psychiatrists, P-ARNPs, or PMHNP-BCs to clients covered by an MCO, except for clients who reside in the integrated managed care region. See [How do providers identify the correct payer?](#)

To bill for psychiatric services under the ITA follow these guidelines:

- Each involuntarily committed person must be examined and evaluated by a licensed physician or P-ARNP within 24 hours of admission or payment will be denied. This evaluation may be used for both treatment purposes and court testimony. Bill admissions through the emergency room using either CPT® code 90791 or 90792.

When billing for an evaluation under these circumstances, do both of the following:

- ✓ Enter SCI=I in the Claim Note section of the electronic professional claim.
- ✓ Provide documentation that the client was admitted to an inpatient facility.
- A day's rounds, along with any one of the following, constitute direct client care:
 - ✓ Narcosynthesis
 - ✓ Brief (up to one hour) individual psychotherapy
 - ✓ Multiple/family group therapy
 - ✓ Group therapy
 - ✓ ECT
- A court may request another physician or P-ARNP evaluation.
- The agency pays for physician or P-ARNP evaluations and consultations to the court regarding the need for continued involuntary psychiatric hospitalization of a client.
- Documentation of the time required for actual testimony must be maintained in the client's medical record. Only one court testimony is paid per hearing. Bill using the medical testimony code (CPT® code 99075) for time spent doing court testimony.

- The agency does not cover services provided outside the State of Washington under the Involuntary Treatment Act (Chapter [71.05](#) RCW and Chapter 182-538D WAC), including services provided in designated bordering cities.

If the person is not receiving Apple Health or not Apple Health-eligible, see [Professional services for ITA individuals who are not receiving or not eligible for Apple Health](#) for assistance with how to bill for these professional services.

When is out-of-state outpatient care covered?

(WAC [182-501-0182](#))

Out-of-state mental health care requires [prior authorization](#) (PA).

The agency covers emergency and nonemergency out-of-state health care services provided to eligible Apple Health clients when the services are:

- Within the scope of the client's health care program.
- Allowed to be provided outside the state of Washington by specific program.
- Medically necessary.

When the agency pays for covered health care services furnished to an eligible Apple Health client outside the state of Washington, its payment is payment in full according to [42 C.F.R. § 447.15](#).

Inpatient hospital psychiatric admissions

Inpatient hospital psychiatric care criteria

Inpatient psychiatric care for all Apple Health clients, including managed care enrollees (i.e., those on Medicaid and state programs), must be all of the following:

- Medically necessary (as defined in WAC [182-500-0070](#))
- For a principal covered diagnosis (see Diagnostic Categories)
- Approved (ordered) by the professional in charge of the hospital or hospital unit

Provider requirements

This section **does not** apply to any of the following:

- Children's Long Term Inpatient Program (CLIP) facilities
- Eastern State Hospital
- Western State Hospital
- Residential treatment facilities

The agency pays for hospital inpatient psychiatric care, as defined in Chapters [246-320](#) and [246-322](#) WAC, only when provided by one of the following Department of Health (DOH) **licensed hospitals or units**:

- Free-standing psychiatric hospitals determined by the agency to meet the federal definition of an Institution for Mental Diseases (IMD), which is: “a hospital, nursing facility, or other institution of more than sixteen beds that is primarily engaged in providing diagnosis, treatment, or care of people with mental diseases, including medical attention, nursing care, and related services”
- Medicare-certified, distinct psychiatric units
- Hospitals that provide active psychiatric treatment (see WAC [246-322-170](#)) outside of a Medicare-certified or state-designated psychiatric unit, under the supervision of a physician
- State-designated pediatric psychiatric units

Hospitals providing **involuntary** hospital inpatient psychiatric care must be **licensed and certified** by DOH in accordance with Chapter 246-341 WAC and must meet the general conditions of payment criteria in WAC [182-502-0100](#).

If a person is detained for involuntary care and a bed is not available in a facility certified by DOH, the state psychiatric hospitals (under the authority of DSHS) may, at their discretion, issue a **single bed certification** which serves as temporary certification (see WAC 182-538D-0526) allowing for inpatient admission to occur in that setting.

Voluntary treatment

For clients who are not enrolled in a BHO, integrated managed care plan, or BHSO, voluntary inpatient hospital psychiatric treatment is eligible for payment based on the determination of medical necessity by the admitting clinician and subject to retrospective review by the agency.

Age of consent for voluntary inpatient hospital psychiatric care

Minors age 12 and younger:	May be admitted to treatment only with the permission of the minor's parent/legal guardian.
Minors age 13 and older:	May be admitted to treatment with the permission of any of the following: <ul style="list-style-type: none"> • The minor and the minor's parent/guardian • The minor without parental consent • The minor's parent/legal guardian without the minor's consent through the Parent Initiated Treatment process
Age 18 years and older:	May be admitted to treatment only with the client's voluntary and informed, written consent. In cases where the client has a legal guardian, the guardian's consent is required.
Members of Indian Tribes:	The age of consent of the associated tribe supersedes the requirements above.

Involuntary treatment

Only people age 13 and older (see "Age of consent for voluntary inpatient hospital psychiatric care" above) may be detained under the provisions of the Involuntary Treatment Act (ITA) as defined by Chapters [71.05](#) and [71.34](#) RCW. The agency pays for services provided to clients who are enrolled in Apple Health.

Consent for involuntary admissions

Involuntary admissions occur in accordance with ITA in Chapters [71.05](#) and [71.34](#) RCW. Therefore, no consent is required. Only people age 13 and older are subject to the provisions of these laws.

Authorization requirements for inpatient hospital psychiatric care

The hospital does not have a prior authorization (PA) requirement for Apple Health clients who are not enrolled in a BHO, integrated managed care plan, or BHSO and are in one of the RAC codes at the beginning of this [section](#).

If an Apple Health FFS client not enrolled in a BHO, integrated managed care plan, or BHSO program requires inpatient psychiatric services, the hospital may submit a claim for medically necessary inpatient days of care or administrative days without PA.

Note: Do not enter any digits into the *Prior Authorization Number* field for services that do not require PA.

Medicare/Medicaid dual eligibility and commercial (private) insurance

A client is “dual eligible” when they have coverage through Medicare or a commercial insurance plan and Apple Health. In such cases, the agency will coordinate benefits based on applicable adjudication rules.

- **Administrative days:** administrative days are eligible for payment when all of the following conditions are true:
 - ✓ The client has a legal status of “voluntary.”
 - ✓ The client no longer meets medical necessity criteria.
 - ✓ The client no longer meets intensity of service criteria.
 - ✓ Less restrictive alternatives are not available, posing a barrier to safe discharge.
 - ✓ The hospital determines the appropriateness of the administrative day.

When administrative days are authorized, the agency reimburses for the administrative day rate, as well as for pharmacy services and pharmaceuticals.

Additional requirements

Admission must be determined to be **medically necessary** for treatment of a **covered principal diagnosis code** (see Diagnostic Categories).

- For the purpose of Inpatient Hospital Psychiatric Admissions, “Medically Necessary,” or “Medical Necessity” is defined as follows:
 - ✓ Ambulatory care resources available in the community do not meet the treatment needs of the client; **AND**
 - ✓ Proper treatment of the client’s psychiatric condition requires services on an inpatient basis under the direction of a physician (according to WAC [246-322-170](#)); **AND**
 - ✓ The services can reasonably be expected to improve the client’s level of functioning or prevent further regression of functioning; **AND**
 - ✓ The client has been diagnosed as having an emotional/behavioral disorder or a severe psychiatric disorder (as defined in the current edition of the *Diagnostic and Statistical Manual of Mental Disorders* published by the American Psychiatric Association) that is considered a principal covered

diagnosis (see Diagnostic Categories) and warrants extended care in the most intensive and restrictive setting; **OR**

- ✓ The client was evaluated and met the criteria for emergency involuntary detention (Chapter [71.05](#) or [71.34](#) RCW); **OR**
- ✓ The client was evaluated and met the criteria for emergency involuntary detention (Chapter [71.05](#) or [71.34](#) RCW) but agreed to inpatient care.

Referral to the children’s long-term inpatient program (CLIP): Children and youth ages 6-17 can be referred to CLIP voluntarily or involuntarily using the process outlined on the [CLIP Administration webpage](#). When the court determines that a 180-day commitment to inpatient care in a state-funded facility is necessary for a juvenile, the committing hospital must notify the CLIP Administration of the court's decision *by the end of the next working day following the court hearing* (RCW [71.34](#)). Once the Committee is notified, authorization for additional care can be issued by the appropriate BHO representative. (See the agency’s BHO representative [Behavioral Health Organization \(BHO\) Contacts](#) sheet.)

The agency *does not* reimburse for services provided in a juvenile detention facility.

- **Initial notification:** The committing hospital must notify the CLIP Administration by the end of the next working day of the 180-day court commitment to state-funded long-term inpatient care.

The following information is required:

- ✓ Referring staff, organization and telephone number
- ✓ Client’s first name and date of birth
- ✓ Beginning date of 180-day commitment and initial detention date
- ✓ Client's county of residence

- **Discharge summary and Review of Admissions:** Within two weeks of transfer from the hospital to a CLIP program, a copy of the completed discharge summary must be submitted by the hospital to the CLIP Administration and to the facility where the child is receiving treatment. *All referral materials* should be sent to the CLIP Administration at the following address:

Children's Long-Term Inpatient Program (CLIP)
2142 10th Avenue W
Seattle, WA 98119
206.298.9654

Under the conditions of the At Risk/Runaway Youth Act, as defined in Chapter [71.34](#) RCW, hospitals must provide the BHO representative access to review the care of any minor (regardless of source of payment) who has been admitted upon application of the child’s parent or legal guardian. For the purposes of the Review of

Admissions, all information requested must be made available to the BHO representative. The BHO representative must document in writing any subsequent determination of continued need for care. A copy of the determination must be in the minor's hospital record.

- **Referral packet:** A referral packet concerning the ITA-committed child must be submitted to the CLIP Administration within five (5) working days of telephone notification for the 180-day commitment. If the child is transferred to another facility for an interim placement until CLIP care is available, the referral packet must accompany the child. The following items are required components of the referral packet:
 - ✓ A certified copy of the court order and the 180-day commitment petition with supporting affidavits from a physician and the psychiatrist or a children's mental health specialist
 - ✓ A diagnosis by a psychiatrist, including Axis I-V related to the current edition of the Diagnostic and Statistical Manual of Mental Disorders published by the American Psychiatric Association
 - ✓ An admission evaluation including:
 - Medical evaluation
 - Psychosocial evaluation
 - ✓ The hospital record face sheet
 - ✓ Other information about medical status including:
 - Laboratory work
 - Medication records
 - Consultation reports
 - ✓ An outline of the child's entire treatment history
 - ✓ All transfer summaries from other hospitals where the child has been admitted during the current commitment as well as discharge summaries from any prior facility
 - ✓ A brief summary of child's progress in treatment to date, including hospital course, family involvement, special treatment needs, and recommendations for long-term treatment/assignment

- **Submitting other background information for CLIP referrals:** During the 20 days following the 180-day commitment hearing, the committing hospital must arrange to have the following background information submitted to the CLIP Administration. Submit all of the following information prior to admission to the CLIP program:
 - ✓ Written formulation/recommendation of the local intersystem team responsible for the child's long-term treatment plan. The plan should include family's involvement, and detail of treatment history, as well as less restrictive options being considered
 - ✓ The agency case records, including placement history form, individualized service plans (ISPs), court orders, etc. Include legal history regarding juvenile arrests, convictions, probation/parole status.
 - ✓ Complete records from all hospitalizations, including admission and discharge summaries, treatment plans, social history evaluations, consultations, and all other assessments (do not include daily progress notes)
 - ✓ Treatment summaries and evaluations from all foster or residential placements, and all day treatment and outpatient treatment summaries
 - ✓ If not contained in other documents, a comprehensive social history, including developmental and family history
 - ✓ School records, including special services assessments, transcripts, psychological evaluations, current IEP, current level of functioning
 - ✓ Immunization record, copy of social security card and birth certificate
- **Interfacility transfer reports:** When a youth who has been involuntarily detained is transferred from one facility to another, an interfacility or hospital transfer report detailing the child's current medical, psychiatric, and legal status (for both ITA commitment and custody) must accompany that child as well as a certified copy of the court order. For general information, visit the [Children's Long Term Inpatient Program for Washington State \(CLIP\)](#) webpage.

Billing for inpatient hospital psychiatric care

General billing of institutional claims for inpatient hospital psychiatric care for clients who are not enrolled in a BHO, integrated managed care plan or BHSO

All of the following must occur in order for hospitals to be paid for providing inpatient hospital psychiatric care for clients who are not enrolled in a BHO, integrated managed care plan, or BHSO:

- In order to receive payment, each claim for inpatient psychiatric care must include SCI=I or SCI=V (reflecting involuntary or voluntary legal status) and must be noted in the *Billing Note* section of the electronic institutional claim.
- Hospitals must bill any **administrative days** and associated covered charges for services rendered on these days with revenue code **0169** on a separate claim. When a patient is on administrative days, the provider may bill for pharmacy services and pharmaceuticals in addition to the administrative day rate.
- Hospitals must bill approved psychiatric room charges using one of the following revenue codes: 0114, 0124, 0134, 0144 or 0204.
- Per coding standards, hospitals must report **all ICD 10 diagnosis codes at the highest level of specificity**.

Note: The claim must indicate in the *Billing Note* section of the claim whether the days billed were **voluntary** or **involuntary**. Use one of the following special claims indicator to show how the client was admitted (no spaces within designated comment below):

- “SCI=V” for voluntary
- “SCI=I” for involuntary

Claims for voluntary or involuntary portions of an episode of care must be billed separately.

Claims for psychiatric services when the principal diagnosis falls outside the psychiatric diagnosis range

For certain psychiatric diagnosis codes, coding rules require the associated neurological or medical condition be coded first. Such claims are reviewed and manually processed for payment when:

- An inpatient psychiatric admission to the hospital occurs on an involuntary or voluntary basis.
- The principal diagnosis on the hospital claim is a medical diagnosis.

Splitting claims

When the focus of care shifts from medical to psychiatric services or from psychiatric to medical services, psychiatric services and acute medical services must be billed on separate claims.

Note: In order to be paid, all claims must be accurate, complete, and include the required documents as indicated in this section. Incorrectly or partially completed claims, will be denied and require resubmission which will delay payment.

How do I bill for clients covered by Medicare Part B only (No Part A), or who have exhausted Medicare Part A benefits prior to the stay?

Description	DRG	Per Diem	RCC	CPE	CAH
Bill Medicare Part B for qualifying services delivered during the hospital stay.	Yes	Yes	Yes	Yes	Yes
Bill the agency for hospital stay as primary.	Yes	Yes	Yes	Yes	Yes
Show as noncovered on the agency 's bill what was billed to Medicare under Part B.	No	No	Yes	Yes	Yes
Expect the agency to reduce the hospital stay payment by what Medicare paid on the Part B bill.	Yes	Yes	No	No	No
Expect the agency to recoup payment as secondary on Medicare Part B bill*.	Yes	Yes	No*	No*	No*
Report the Part B payment on the claim in the other payer field "Medicare Part B"	Yes	Yes	Yes	Yes	Yes
Include a claim note**	Yes	Yes	Yes	Yes	Yes

* The agency pays line item by line item on some claims (RCC, CPE, and CAH). The agency does not pay for line items that Medicare has already paid. The agency pays by the stay (DRG claims) or the day (Per Diem) on other claims. The agency calculates the payment and then subtracts what Medicare has already paid. The agency recoups what it paid as secondary on the Medicare claim.

**The claim note should be one of the following:

- No Part A benefits
- Part A benefits exhausted prior to stay

What the agency pays the hospital:

DRG Paid Claims:

DRG allowed amount minus what Medicare paid under Part B. When billing, put the Part B payment amount in the TPL commercial insurance field and indicate the primary payer as Medicare Part B.

Per Diem Paid Claims:

Per diem-allowed amount minus what Medicare paid under Part B. When billing, put the Part B payment amount in the TPL commercial insurance field and indicate the primary payer as Medicare Part B.

RCC, CPE and CAH claims:

Allowed amount for line items covered by the agency (line items usually covered by Medicare under Part A, if client were eligible).

How do I bill for clients when Medicare coverage begins during an inpatient stay or Medicare Part A has been exhausted during the stay?

Providers bill for clients when Medicare coverage begins or Medicare Part A has been exhausted during an inpatient stay using the steps below. These instructions are also available in the [ProviderOne Billing and Resource Guide](#).

1. Bill Medicare
 - Medicare PPS Payment Manual, Chapter 3, Section 40A, bullet 3 states:
“The beneficiary becomes entitled after admission. The hospital may not bill the beneficiary or other people for days of care preceding entitlement except for days in excess of the outlier payment.”
2. The agency must have a paid/billed inpatient crossover claim in the system.

3. After the inpatient crossover claim is paid, bill the primary claim for the entire stay to the agency:
 - If billing ratio of costs-to-charges (RCC), certified public expenditures (CPE), or are a critical access hospital (CAH), list the Medicare covered day's charges as non-covered.
 - If billing DRG or per diem, list all services (do not list noncovered services).
4. If Part A is exhausted during the stay, bill Medicare for the Part B charges.
5. The agency may pay an amount using the following formula:
 - The agency's allowed amount for the entire stay minus Medicare's payment minus the agency's crossover payments
6. Add the following claim note:
 - "Part A Benefits exhausted during stay;" or
 - "Medicare Part A coverage began during the stay;" or
 - Enter the Part A start date or the date benefits are exhausted in the "occurrence" fields using occurrence Code "A3".
7. Attach Part A and Part B Medicare explanation of benefits (EOMB)
8. These claims can be very complex and are addressed on a case-by-case basis. Sometimes it is necessary for the agency to contact the biller for additional information.

Billing when Medicare Part A benefits are exhausted during the stay

If a client's Medicare coverage ends while receiving inpatient psychiatric care (due to limits on psychiatric inpatient coverage in IMDs), use an occurrence code with qualifier A3 and provide the last Medicare Part A payable date. Enter "Medicare benefits exhausted during stay" in claim comments field.

Billing for medical admissions with psychiatric principal diagnosis

If a client had a medical admission for non-psychiatric care and the principal diagnosis is a psychiatric diagnosis contained in Chapter 5, Mental Behavioral and Neurodevelopmental Disorders of the ICD-10 CM.), the claim will be reviewed prior to a payment decision. Providers must submit the claim with adequate documentation to support payment as a medical necessity (i.e., history and physical, discharge summary, and physician orders).

Note: If the client is covered by an MCO, the required documentation and claim must be submitted to the client's MCO. Do not send these claims to the agency.

Recoupment of payments

The agency recoups any inappropriate payments made to hospitals.

Authorizations for inpatient psychiatric admissions civil commitments for 90 days or longer

The contracted requesting facility must contact the agency at LTCAuths@HCA.wa.gov using the contracted facility's secure email system to report the change in stay from 14 days per a court order to 90 days or longer per a court order *within 48 hours of admission*. The contracted requesting facility will request an end to the initial authorization. The agency will create a new authorization in ProviderOne for the new episode of care and provide the facility with an authorization number. A pdf copy of the **court documentation** must be included in the email or faxed to the agency at 360-763-4702. Court documentation **cannot contradict** the facility's location. For example, if a specific facility is mentioned, the documentation must reflect that facility. If a facility is not specifically identified, the person can transfer to a facility in his or her home county if clinically appropriate.

The contracting requesting facility must provide the agency with the following required information to create an authorization number:

- Client's full name (confirm correct spelling)
- Client's date of birth (DOB)
- Client's ProviderOne ID number (ending with "WA")
- Provider NPI number
- Begin date/anticipated end date for authorization
- ICD 10 Diagnosis
- Additional insurance, if any (i.e. Medicare or private insurance).

Send communications to LTCAuths@hca.wa.gov. If communication contains personal health information, use the contracted facility's secure email system.

Billing for inpatient psychiatric admissions for civil commitments of 90 days or longer

Under the new authorization number, both community hospitals and free-standing E&T facilities must use the claim instructions below to bill for these services on an electronic institutional claim form (837i).

Community hospitals

Community hospitals must bill Medicare and any other third-party insurance prior to billing Medicaid. Retroactive billing **is** allowed for charges not covered by Medicare or third-party insurance. Community hospitals must use the psychiatric taxonomy on file in ProviderOne and use revenue code 0124 for authorizations.

Free-standing E&T facilities

Medicare does not cover services billed by freestanding E&T facilities. Providers must document in the client’s record that this benefit is not covered by Medicare and bill Medicaid as the primary payer.

Name	Entry
Taxonomy	320800000X
Claim Note	SCI=I
Revenue Code	1001
Bill Type*	86x

Enter dates at the line level

Billing for Unoccupied Beds

The agency reimburses providers for unoccupied beds at a rate identified in the contract. For occupied community hospital rates, see the inpatient provider rates (IPPS) fee schedule on the agency’s [hospital reimbursement webpage](#). For occupied free-standing E&T rates, see the mental health service fee schedule (specialized mental health services) on the agency’s [provider billing guides and fee schedules](#) webpage.

These beds are not linked to a client, and the agency reimburses using a provided A19 Invoice Voucher. Each month the contracted requesting facility must submit to the agency the number of empty beds and the number of days the beds were empty.
