Every effort has been made to ensure this guide’s accuracy. If an actual or apparent conflict between this document and an agency rule arises, the agency rules apply.
About this guide*

This publication takes effect November 1, 2019, and supersedes earlier guides to this program.

The Health Care Authority (agency) is committed to providing equal access to our services. If you need an accommodation or require documents in another format, please call 1-800-562-3022. People who have hearing or speech disabilities, please call 711 for relay services.

Washington Apple Health means the public health insurance programs for eligible Washington residents. Washington Apple Health is the name used in Washington State for Medicaid, the children's health insurance program (CHIP), and state-only funded health care programs. Washington Apple Health is administered by the Washington State Health Care Authority.

What has changed?

<table>
<thead>
<tr>
<th>Subject</th>
<th>Change</th>
<th>Reason for Change</th>
</tr>
</thead>
<tbody>
<tr>
<td>Medical policy updates</td>
<td>Changed age restriction from age 18 and older to age 21 and older</td>
<td>To align with EPSDT rules</td>
</tr>
<tr>
<td></td>
<td>This change is effective for dates of service on and after October 1, 2019.</td>
<td></td>
</tr>
<tr>
<td>Sacroiliac joint fusion</td>
<td>Changed age restriction from age 18 and older to age 21 and older</td>
<td>To align with EPSDT rules</td>
</tr>
<tr>
<td></td>
<td>This change is effective for dates of service on and after October 1, 2019.</td>
<td></td>
</tr>
<tr>
<td>Breast and ovarian genetic testing</td>
<td>Added section on breast and ovarian genetic testing</td>
<td>To add EPA policy for breast and ovarian genetic testing.</td>
</tr>
<tr>
<td></td>
<td>This change is effective for dates of service on and after October 1, 2019.</td>
<td></td>
</tr>
<tr>
<td>Vision coverage table</td>
<td>Added “No” in the “PA?” column for the CPT codes 92071, 92072, V2630, V2631, and V2632</td>
<td>To reflect current policy. This information was omitted in previous publications.</td>
</tr>
<tr>
<td>Drugs administered to managed care clients but</td>
<td>Changed the HCPCS code for Gamifant from “Bill under Misc.”</td>
<td>To reflect the new code</td>
</tr>

Definitions

This section defines terms and abbreviations, including acronyms, used in this billing guide. Refer to [Chapter 182-500 WAC](#) for a complete list of definitions for Washington Apple Health.

**Acquisition cost (AC)** – The cost of an item excluding shipping, handling, and any applicable taxes.

**Acute care** – Care provided for clients who are not medically stable or have not attained a satisfactory level of rehabilitation. These clients require frequent monitoring by a health care professional in order to maintain their health status.

**Add-on procedure(s)** – Secondary procedure(s) performed in addition to another procedure.

**Admitting diagnosis** – The medical condition responsible for a hospital admission. [WAC 182-531-0050](#)

**Assignment** – A process in which a doctor or supplier agrees to accept the Medicare program’s payment as payment in full, except for specific deductible and coinsurance amounts required of the patient.

**BAHA** – Auditory sound processors that allow wearers to hear by vibrating sound to the cochlea, or inner ear, by bone conduction. These sound processors are attached to a post implanted in the skull or held against the skull with a soft headband. Regardless of how these devices are held in position, they are considered BAHAs.

**Base anesthesia units (BAU)** – A number of anesthesia units assigned to an anesthesia procedure that includes the usual preoperative, intra-operative, and postoperative visits. This includes the administration of fluids and/or blood incident to the anesthesia care, and interpretation of noninvasive monitoring by the anesthesiologist.

**Bundled services** – Services integral to the major procedures that are included in the fee for the major procedure. Bundled services are not reimbursed separately.

**Calendar year** – January through December.

**Code of federal regulations (CFR)** – A codification of the general and permanent rules published in the federal register by the executive departments and agencies of the federal government.

**HCPCS-** See Healthcare Common Procedure Coding System.

**Healthcare Common Procedure Coding System (HCPCS)** – Standardized coding system that is used primarily to identify products, supplies, and services not included in the CPT® codes, such as ambulance services and durable medical equipment, prosthetics, orthotics, and supplies (DMEPOS) when used outside a physician's office.
Physician-Related Services/Health Care Professional Services

**Informed consent** – Where an individual consents to a procedure after the provider who obtained a properly completed consent form has done all of the following:

1. Disclosed and discussed the client’s diagnosis
2. Offered the client an opportunity to ask questions about the procedure and to request information in writing
3. Given the client a copy of the consent form
4. Communicated effectively using any language interpretation or special communication device necessary per 42 C.F.R. Chapter IV 441.257
5. Given the client oral information about all of the following:
   a. The client’s right to not obtain the procedure, including potential risks, benefits, and the consequences of not obtaining the procedure
   b. Alternatives to the procedure including potential risks, benefits, and consequences
   c. The procedure itself, including potential risks, benefits, and consequences

**Inpatient hospital admission** – An admission to a hospital that is limited to medically necessary care based on an evaluation of the client using objective clinical indicators, assessment, monitoring, and therapeutic service required to best manage the client’s illness or injury, and that is documented in the client’s medical record.

**Medical consultant** – Physicians employed by the agency who are authorities on the medical aspects of the Medical Assistance program. As part of their responsibilities, agency medical consultants:

- Serve as advisors in communicating to the medical community the scope, limit, and purpose of the program.
- Assist in the development of agency medical policy, procedures, guidelines, and protocols.
- Evaluate the appropriateness and medical necessity of proposed or requested medical treatments in accordance with federal and state law, applicable regulations, agency policy, and community standards of medical care.
- Serve as advisors to agency staff, helping them to relate medical practice realities to activities such as claims processing, legislative requests, cost containment, and utilization management.
- Serve as liaisons between agency and various professional provider groups, health care systems (such as HMOs), and other state agencies.
- Serve as expert medical and program policy witnesses for agency at fair hearings.

**Newborn or neonate or neonatal** - A person younger than 29 days old.

**Noncovered service or charge** – A service or charge not reimbursed by the agency.

**Professional component** – The part of a procedure or service that relies on the provider’s professional skill or training, or the part of that reimbursement that recognizes the provider’s cognitive skill.
Relative value unit (RVU) – A unit that is based on the resources required to perform an individual service. RBRVS RVUs are comprised of three components – physician work, practice expense, and malpractice expense.

Resource based relative value scale (RBRVS) – A scale that measures the relative value of a medical service or intervention, based on the amount of physician resources involved.

RBRVS maximum allowable amount – The Medicare Fee Schedule relative value unit, multiplied by the statewide geographic practice cost index, times the applicable conversion factor.

Revised code of Washington (RCW) – Washington State laws.

Technical component – The part of a procedure or service that relates to the equipment set-up and technician’s time, or the part of the procedure and service reimbursement that recognizes the equipment cost and technician time.

Year – The time period starting 365 days before the date of service.
Introduction

Acquisition cost

Drugs with an acquisition cost (AC) indicator in the fee schedule with billed charges of $1,100.00 or greater, or supplies with billed charges of $50.00 or greater, require a manufacturer’s invoice in order to be paid. Attach the invoice to the claim, and if necessary, note the quantity given to the client in the Claim Note section of the claim. DO NOT attach an invoice to the claim for procedure codes with an AC indicator in the fee schedule for drugs with billed charges under $1,100.00, or supplies with billed charges under $50.00, unless requested by the agency.

**Note:** Bill the agency for one unit of service only when billing for drugs with an AC indicator.

Add-on codes

The agency will not pay for procedure codes defined in the current CPT® manual as “add-on codes” when these codes are billed alone or with an invalid primary procedure code.

**Note:** The agency has instituted claims edits requiring that “add-on” procedure codes be billed with a correct primary procedure.

By report

Services with a by report (BR) indicator in the fee schedule with billed charges of $1,100.00 or greater require a detailed report in order to be paid. Attach the report to the claim. For billed charges under $1,100.00, DO NOT attach a report to the claim for services with a BR indicator in the fee schedule, unless requested by the agency. The agency pays for medically necessary services on the basis of usual and customary charges or the maximum allowable fee established by the agency, whichever is lower according to WAC 182-502-0100.
Codes for unlisted procedures
(CPT code XXX99)

Providers must bill using the appropriate procedure code. The agency does not pay for procedures when they are judged to be less-than-effective (i.e., an experimental procedure), as reported in peer-reviewed literature (see WAC 182-501-0165). If providers bill for a procedure using a code for an unlisted procedure, it is the provider’s responsibility to know whether the procedure is effective, safe, and evidence-based. The agency requires this for all its programs, as outlined in WAC 182-501-0050. If a provider does not verify the agency’s coverage policy before performing a procedure, the agency may not pay for the procedure.

Conversion factors

Conversion factors are multiplied by the relative value units (RVUs) to establish the rates in the agency’s Physician-related services/health care professionals fee schedule.

Diagnosis codes

The agency requires valid and complete ICD diagnosis codes. When billing the agency, use the highest level of specificity (6th or 7th digits when applicable) or the services will be denied.

The agency does not cover the following diagnosis codes when billed as the primary diagnosis:

- V00-Y99 codes (Supplementary Classification)
- Most codes in Z00-Z99 (factors influencing health status and contact with health services)

The agency reimburses providers for only those covered procedure codes and diagnosis codes that are within their scope of practice.

Discontinued codes

The agency follows Medicare and does not allow providers a 90-day grace period to use discontinued CPT and HCPCS codes. Use of discontinued codes to bill services provided after the date that the codes are discontinued will cause claims to be denied.
National correct coding initiative

The agency continues to follow the National Correct Coding Initiative (NCCI) policy. The Centers for Medicare and Medicaid Services (CMS) created this policy to promote national correct coding methods. NCCI assists the agency to control improper coding that may lead to inappropriate payment. The agency bases coding policies on the following:

- National and local policies and edits
- Coding guidelines developed by national professional societies
- The analysis and review of standard medical and surgical practices
- Review of current coding practices

Procedure code selection must be consistent with the current CPT guidelines, introduction, and instructions on how to use the CPT coding book. Providers must comply with the coding guidelines that are within each section (e.g., E/M services, radiology, etc.) of the current CPT book.

**Medically Unlikely Edits (MUEs)** - MUEs are part of the NCCI policy. MUEs are the maximum unit of service per HCPC or CPT code that can be reported by a provider under most circumstances for the same patient on the same date of service. Items billed above the established number of units are automatically denied as a “Medically Unlikely Edit.” Not all HCPCS or CPT codes are assigned an MUE. The agency follows the CMS MUEs for all codes.

The agency may have units of service edits that are more restrictive than MUEs.

The agency may perform a post-pay review on any claim to ensure compliance with NCCI. NCCI rules are enforced by the ProviderOne payment system.

Procedure codes

The agency uses the following types of procedure codes within this billing guide:

- Current Procedure Terminology (CPT)
- Level II Healthcare Common Procedure Coding System (HCPCS)
- Current Dental Terminology (CDT)

Procedures performed must match the description and guidelines from the most current CPT or HCPCS manual for all agency-covered services. Due to copyright restrictions, the agency publishes only the official short CPT descriptions. To view the full CPT description, refer to a current CPT manual.
Provider Eligibility

Who may provide and bill for physician-related services?
(WAC 182-531-0250 (1))

The following health care professionals may request enrollment with the agency to provide and bill for physician-related and health care professional services provided to eligible clients:

- Advanced Registered Nurse Practitioners (ARNPs)
- Federally Qualified Health Centers (FQHCs)
- Genetic Counselors
- Health Departments
- Hospitals currently licensed by the Department of Health (DOH)
- Independent (outside) laboratories CLIA-certified to perform tests. See WAC 182-531-0800
- Licensed marriage and family therapists, only as provided in WAC 182-531-1400
- Licensed mental health counselors, only as provided in WAC 182-531-1400
- Licensed radiology facilities
- Licensed social workers, only as provided in WAC 182-531-1400 and 182-531-1600
- Medicare-certified Ambulatory Surgery Centers (ASCs)
- Medicare-certified Rural Health Clinics (RHCs)
- Naturopathic physicians (see naturopathic physicians)
- Providers who have a signed agreement with the agency to provide screening services to eligible persons in the Early and Periodic, Screening, Diagnosis, and Treatment (EPSDT) program
- Registered Nurse First Assistants (RNFAs)
• Persons currently licensed by the State of Washington DOH to practice any of the following:
  ✓ Dentistry
  ✓ Medicine and osteopathy
  ✓ Nursing
  ✓ Optometry
  ✓ Podiatry
  ✓ Psychiatry
  ✓ Psychology

Can naturopathic physicians provide and bill for physician-related services?

Yes. Effective for dates of service on and after January 1, 2014, the agency added naturopathic physicians (taxonomy 175F00000X) to the list of professionals who can provide and bill for physician-related services. The agency recognizes a naturopathic physician’s scope of practice in accordance with RCW 18.36A.040.

Licensure

Naturopathic physicians with an active Washington State license may request enrollment with the agency. If a naturopathic physician is practicing naturopathic childbirth, the agency requires the naturopathic physician to have a separate active Washington State midwifery license.

Limitations

• The agency does not pay for:
  ✓ Nonsurgical cosmetic procedures.
  ✓ Prescription or nonprescription botanical, herbal, or homeopathic medicine.

• Manual manipulation - The agency applies the limitations for manual manipulation (mechanotherapy). See manipulative therapy (CPT® codes 98925-98929).

• Malignancies – Treatment of a client with a malignancy must not be done independently by a naturopathic physician.

• Controlled substance prescriptions – As authorized under WAC 246-836-211, these are limited to testosterone and codeine-containing substances in Schedules III-V.

• Billing a client - A Medicaid client must not be charged for a covered over-the-counter (nonprescription) drug which is dispensed in the office. Covered over-the-counter drugs must be prescribed and the prescription filled by a pharmacy. Refer to the agency’s Prescription Drug Program Billing Guide for complete instructions.
Injectable drugs – Physician-administered injectable drugs are subject to prior authorization requirements as described in the agency’s Professional administered drugs fee schedule.

Can substitute physicians (locum tenens) provide and bill for physician-related services?

Yes. Physicians may bill under certain circumstances for services provided on a temporary basis (i.e., locum tenens) to their patients by another physician [42 U.S.C. Chapter 7, Subchapter XIX, Sec 1396a (32)(C)].

The physician’s claim must identify the substituting physician providing the temporary services. Complete the claim as follows:

- Enter the provider NPI and taxonomy of the locum tenens physician who performed the substitute services in the Rendering (Performing) Provider section of the electronic claim.
- Any provider that will perform as a locum tenens provider that will treat a Medicaid client must be enrolled as a Washington Apple Health (Medicaid) provider in order for claims to be paid. For enrollment information, go to the Enroll as a provider webpage.
- Enter the billing provider information in the usual manner.
- Use modifier Q6 when billing.

Documentation in the patient’s record must show that in the case of:

- An informal reciprocal arrangement, billing for temporary services was limited to a period of 14 continuous days, with at least one day elapsing between 14-day periods.
- A locum tenens arrangement involving per diem or other fee-for-time compensation, billing for temporary services was limited to a period of 90 continuous days, with at least 30 days elapsing between 90-day periods.
Resident Physicians

A resident cannot bill the agency for services they provide to a client. If a resident physician prescribes, orders, or refers, the resident physician must be enrolled with the agency as a nonbilling provider according to WAC 182-502-0006.

If a resident is involved in any part of the patient care or treatment, the billing provider must use a GC modifier with the appropriate HCPCS or CPT code when billing. The modifier is for tracking purposes only and does not affect payment.

Which health care professionals does the agency not enroll?

(WAC 182-531-0250 (2))

The agency does not enroll licensed or unlicensed health care practitioners not specifically listed in WAC 182-502-0002, including but not limited to:

- Acupuncturists
- Christian Science practitioners or theological healers
- Counselors (i.e., M.A. and M.S.N.), except as provided in WAC 182-531-1400
- Herbalists
- Homeopathists
- Massage therapists as licensed by the Washington State Department of Health (DOH)
- Sanipractors
- Social workers, except those who have a master's degree in social work (MSW) and:
  - Are employed by an FQHC.
  - Who have received prior authorization from the agency to evaluate a client for bariatric surgery.
  - As provided in WAC 182-531-1400.
- Any other licensed or unlicensed practitioners not otherwise specifically provided for in WAC 182-502-0010
• Any other licensed practitioners providing services that the practitioner is not licensed or trained to provide

The agency pays practitioners listed above for physician-related and health care professional services only if those services are mandated by, and provided to, clients who are eligible for one of the following:

• The EPSDT program
• A Medicaid program for qualified Medicare beneficiaries (QMB)
• A waiver program (WAC 182-531-0250 (3))

**Does the agency pay for out-of-state hospital admissions?**
(Does not include border hospitals)

The agency pays for emergency care at an out-of-state hospital, not including hospitals in bordering cities, only for Medicaid and CHIP clients on an eligible program. See WAC 182-501-0175 for recognized bordering cities.

The agency requires prior authorization (PA) for elective, nonemergency care and approves these services only when both of the following apply:

• The client is on an eligible program (e.g., the Categorically Needy Program).
• The service is medically necessary and is unavailable in the State of Washington.

Providers requesting elective, out-of-state care must send a completed *Out-of-State Medical Services Request* form, 13-787, with additional required documentation attached, to the agency Medical Request Coordinator. (See the agency’s Billers, providers, and partners webpage. See also Where can I download agency forms?)

Providers must obtain prior authorization from the appropriate Behavioral Health and Service Integration Administration (BHSIA) designee for out-of-state psychiatric hospital admissions for all Washington Apple Health (Medicaid) clients. Neither the agency nor the BHSIA designee pays for inpatient services for non-Medicaid clients if those services are provided outside of the state of Washington. An exception is clients who are qualified for the medical care services (MCS) program. For these clients, the agency and the BHSIA designee pays for inpatient psychiatric services provided in bordering cities and critical border hospitals. All claims for admissions to out-of-state hospitals are paid as voluntary legal status as the Involuntary Treatment Act applies only within the borders of Washington State.
Client Eligibility

Most Apple Health clients are enrolled in an agency-contracted managed care organization (MCO). This means that Apple Health pays a monthly premium to an MCO for providing preventative, primary, specialty, and other health services to Apple Health clients. Clients in managed care must see only providers who are in their MCO’s provider network, unless prior authorized or to treat urgent or emergent care. See the agency’s Apple Health managed care webpage for further details.

It is important to always check a client’s eligibility prior to providing any services because it affects who will pay for the services.

How do I verify a client’s eligibility?

Check the client’s Services Card or follow the two-step process below to verify that a client has Apple Health coverage for the date of service and that the client’s benefit package covers the applicable service. This helps prevent delivering a service the agency will not pay for.

Verifying eligibility is a two-step process:

**Step 1. Verify the patient’s eligibility for Apple Health.** For detailed instructions on verifying a patient’s eligibility for Apple Health, see the Client Eligibility, Benefit Packages, and Coverage Limits section in the agency’s ProviderOne Billing and Resource Guide.

If the patient is eligible for Apple Health, proceed to Step 2. If the patient is not eligible, see the note box below.

**Step 2. Verify service coverage under the Apple Health client’s benefit package.** To determine if the requested service is a covered benefit under the Apple Health client’s benefit package, see the agency’s Program benefit packages and scope of services webpage.
Note: Patients who are not Apple Health clients may submit an application for health care coverage in one of the following ways:

1. By visiting the Washington Healthplanfinder’s website at: www.wahealthplanfinder.org
2. By calling the Customer Support Center toll-free at: 855-WAFINDER (855-923-4633) or 855-627-9604 (TTY)
3. By mailing the application to:
   Washington Healthplanfinder
   PO Box 946
   Olympia, WA 98507

In-person application assistance is also available. To get information about in-person application assistance available in their area, people may visit www.wahealthplanfinder.org or call the Customer Support Center.

Are clients enrolled in an agency-contracted managed care organization (MCO) eligible?

Yes. Many agency clients are enrolled in one of the agency’s contracted managed care organizations (MCOs). For these clients, managed care enrollment will be displayed on the client benefit inquiry screen in ProviderOne.

Clients enrolled in an agency-contracted MCO must obtain services through their MCO, unless otherwise noted.

Note: A client’s enrollment can change monthly. Providers who are not contracted with the MCO must receive approval from both the MCO and the client’s primary care provider (PCP) prior to serving a managed care client.

Send claims to the client’s MCO for payment. Call the client’s MCO to discuss payment prior to providing the service. Providers may bill clients only in very limited situations as described in WAC 182-502-0160.
Managed care enrollment

Apple Health (Medicaid) places clients into an agency-contracted MCO the same month they are determined eligible for managed care as a new or renewing client. This eliminates a person being placed temporarily in FFS while they are waiting to be enrolled in an MCO or reconnected with a prior MCO. This enrollment policy also applies to clients in FFS who have a change in the program they are eligible for.

New clients are those initially applying for benefits or those with changes in their existing eligibility program that consequently make them eligible for Apple Health managed care. Renewing clients are those who have been enrolled with an MCO but have had a break in enrollment and have subsequently renewed their eligibility.

Checking eligibility

- Providers must check eligibility and know when a client is enrolled and with which MCO. For help with enrolling, clients can refer to the Washington Healthplanfinder’s Get Help Enrolling page.
- MCOs have retroactive authorization and notification policies in place. The provider must know the MCO’s requirements and be compliant with the MCO’s policies.

Behavioral Health Organization (BHO)

The Health Care Authority (agency) manages the contracts for behavioral health services (mental health and substance use disorder) for the following three Regional Service Areas (RSAs):

- **Great Rivers:** Includes Cowlitz, Grays Harbor, Lewis, Pacific, and Wahkiakum counties
- **Salish:** Includes Clallam, Jefferson, and Kitsap counties
- **Thurston-Mason:** Includes Thurston and Mason counties

To view a map and table of the integrated managed care plans available within each region, please see Changes coming to Washington Apple Health. You may also refer to the agency’s Apple Health managed care webpage.

See the agency’s Mental Health Services Billing Guide for details.
Apple Health – Changes for July 1, 2019

**Effective July 1, 2019,** the agency is continuing to shift to whole-person care to allow better coordination of care for both body (physical health) and mind (mental health and drug or alcohol treatment, together known as “behavioral health”). This delivery model is called Integrated Managed Care (formerly Fully Integrated Managed Care, or FIMC, which still displays in ProviderOne and Siebel).

Agency-contracted MCOs in certain RSAs expanded their coverage of behavioral health services (mental health and substance use disorder treatment), along with continuing to cover physical health services. The RSAs are outlined in the Integrated Managed Care Regions section.

Apple Health clients who are not enrolled in an agency-contracted MCO for their physical health services (e.g., dual-eligible Medicare-Medicaid clients) still receive their behavioral health services through one of the agency-contracted MCOs. The MCO will provide only behavioral health services for the client.

Most clients remained with the same health plan, except in regions where the client’s plan was no longer available. The agency auto-enrolled these clients to one of the offered plans.

Clients can change their plan at any time by:

- Visiting the [ProviderOne Client Portal](#).
- Calling Apple Health Customer Service toll-free at 1-800-562-3022. This automated system is available 24 hours a day, 7 days a week.
- Requesting a change online through our secure [Contact us – Apple Health (Medicaid) client web form](#). Select the topic “Enroll/Change Health Plans.”
- Visiting the [Washington Healthplanfinder](#) (only for clients with a Washington Healthplanfinder account).
Integrated managed care

For clients who live in an integrated managed care region, all physical health services, mental health services, and drug and alcohol treatment are covered and coordinated by the client’s agency-contracted MCO. The BHO will not provide behavioral health services in these regions.

Clients living in an integrated managed care region will enroll with an MCO of their choice that is available in that region. If the client does not choose an MCO, the client will be automatically enrolled into one of the available MCOs, unless the client is American Indian/Alaska Native (AI/AN). Clients currently enrolled in one of the available MCOs in their region may keep their enrollment when the behavioral health services are added.

American Indian/Alaska Native (AI/AN) clients living in an integrated managed care region of Washington may choose to enroll in one of the agency-contracted MCOs available in that region or they may choose to receive all these services through Apple Health FFS. If they do not choose an MCO, they will be automatically enrolled into Apple Health FFS for all their health care services, including comprehensive behavioral health services. See the agency’s American Indian/Alaska Native webpage.

For more information about the services available under the FFS program, see the agency’s Mental Health Services Billing Guide and the Substance Use Disorder Billing Guide.

For full details on integrated managed care, see the Medicaid agency’s Apple Health managed care webpage and scroll down to “Changes to Apple Health managed care.”
Integrated managed care regions

Clients who reside in the following integrated managed care regions and who are eligible for managed care enrollment must choose an available MCO in their region. Specific details, including information about mental health crisis services, is located on the agency’s Apple Health managed care webpage.

Integrated Apple Health foster care (AHFC)

**Effective January 1, 2019,** children and young adults in the Foster Care, Adoption Support and Alumni programs who are enrolled in Coordinated Care of WA’s (CCW) Apple Health Foster Care program receive both medical and behavioral health services from CCW.

Clients under this program are:

- Under the age of 21 who are in foster care (out of home placement)
- Under the age of 21 who are receiving adoption support
- Age 18–21 years old in extended foster care
- Age 18 to 26 years old who aged out of foster care on or after their 18th birthday (alumni)

These clients are identified in ProviderOne as “Coordinated Care Healthy Options Foster Care.”
Fee-for-service Apple Health foster care

Children and young adults in the fee-for-service Apple Health Foster Care, Adoption Support and Alumni programs receive behavioral health services through the regional Behavioral Health Administrative Services Organization (BH-ASO). For details, see the agency’s Mental Health Services Billing Guide, under How do providers identify the correct payer?
Coverage - General

What is covered?

(WAC 182-531-0100)

The agency covers health care services, equipment, and supplies listed in this guide, according to agency rules and subject to the limitations and requirements in this guide, when they are:

- Within the scope of an eligible client's medical assistance program. Refer to WAC 182-501-0060 and 182-501-0065.

- Medically necessary as defined in WAC 182-500-0070.

The agency evaluates a request for a service that is in a covered category under the provisions of WAC 182-501-0165.

The agency evaluates requests for covered services that are subject to limitations or other restrictions and approves such services beyond those limitations or restrictions as described in WAC 182-501-0169.

The agency covers the following physician-related services and health care professional services, subject to the conditions listed in this billing guide:

- Allergen immunotherapy services

- Anesthesia services

- Cosmetic, reconstructive, or plastic surgery, and related services and supplies to correct physiological defects from birth, illness, or physical trauma, or for mastectomy reconstruction for post cancer treatment

- Dialysis and end stage renal disease services (see the agency’s Kidney Center Services Billing Guide)

- Early and periodic screening, diagnosis, and treatment (EPSDT) services (see the agency’s Early and Periodic Screening, Diagnosis, and Treatment (EPSDT) Billing Guide)

- Emergency physician services

- ENT (ear, nose, and throat) related services
Physician-Related Services/Health Care Professional Services

- Foot care and podiatry services
- Habilitative services (see Habilitative services)
- Hospital inpatient services (see the agency’s Inpatient Hospital Services Billing Guide)
- Maternity care, delivery, and newborn care services (see Maternity Care and Delivery)
- Office visits
- Osteopathic treatment services
- Pathology and laboratory services
- Physiatry and other rehabilitation services
- Primary care services
- Psychiatric services, provided by a psychiatrist (see the agency’s Mental Health Services Billing Guide)
- Psychotherapy services (see the agency’s Mental Health Services Billing Guide)
- Pulmonary and respiratory services
- Radiology services
- Reproductive health services (see the agency’s Family Planning Billing Guide)
- Surgical services
- Vision-related services (see also the agency’s Vision Hardware for Clients 20 Years of Age and Younger Billing Guide)
- Other outpatient physician services
The agency covers physical examinations for medical assistance clients only when the physical examination is one or more of the following:

- A screening exam covered by the EPSDT program
- An annual exam for clients of the Developmental Disabilities Administration
- A screening pap smear performed according to nationally recognized clinical guidelines
- Mammogram performed according to nationally recognized clinical guidelines
- Prostate exam performed according to nationally recognized clinical guidelines

By providing covered services to a client eligible for a medical assistance program, a provider who has signed an agreement with the agency accepts the agency's rules and fees as outlined in the agreement, which includes federal and state law and regulations, billing guides, and agency issuances.

### Does the agency cover nonemergency services provided out-of-state?

**WAC 182-501-0182**

The agency covers nonemergency services provided out-of-state with prior authorization as described in **WAC 182-501-0182**. A designated bordering city is considered the same as an in-state city for the purposes of health care coverage (see **WAC 182-501-0175**).

### What services are noncovered?

**WAC 182-501-0070**

**General information**

Procedures that are noncovered are noted with (NC) in the Nonfacility Setting (NFS) and Facility Setting (FS) columns in the fee schedule.

The agency reviews requests for noncovered health care services according to **WAC 182-501-0160** as an exception to rule (ETR). To request a noncovered service using the ETR process, send a completed typed *General Authorization* form (HCA13-835) and a *Fax/Written Request Basic Information* form, 13-756, to the agency. (See the agency’s [Billers, providers, and partners webpage.](Where can I download agency forms?)

Refer to the agency’s [ProviderOne Billing and Resource Guide](Where can I download agency forms?) for information regarding noncovered services and billing an agency client who is on a fee-for-service program.
The following are examples of administrative costs and/or services not covered separately by the agency:

- Missed or canceled appointments
- Mileage
- Take-home drugs
- Educational supplies or services
- Copying expenses, reports, client charts, insurance forms
- Service charges/delinquent payment fees
- Telephoning for prescription refills
- Other areas as specified in this fee schedule
- After-hours charges for services during regularly scheduled work hours

Noncovered physician-related and health care professional services

(WAC 182-531-0150)

The agency does not cover the following:

- Acupuncture, massage, or massage therapy
- Any service specifically excluded by statute
- Care, testing, or treatment of infertility, frigidity, or impotency. This includes procedures for donor ovum, sperm, womb, and reversal of vasectomy or tubal ligation
- Cosmetic treatment or surgery, except for medically necessary reconstructive surgery to correct defects attributable to trauma, birth defect, or illness
- Experimental or investigational services, procedures, treatments, devices, drugs, or application of associated services, except when the individual factors of an individual client's condition justify a determination of medical necessity under WAC 182-501-0165
- Hair transplantation
- Marital counseling or sex therapy
- More costly services when the agency determines that less costly, equally effective services are available
• Vision-related services as follows:
  ✓ Services for cosmetic purposes only
  ✓ Group vision screening for eyeglasses
  ✓ Refractive surgery of any type that changes the eye's refractive error (refractive surgery is intended to reduce or eliminate the need for eyeglass or contact lens correction, and does not include intraocular lens implantation following cataract surgery)

• Payment for body parts, including organs, tissues, bones and blood, except as allowed in this guide

• Physician-supplied medication, except those drugs administered by the physician in the physician's office

• Physical examinations, routine checkups, and other preventive services, except as provided in this guide

• Foot care to treat chronic acquired conditions of the foot such as, but not limited to:
  ✓ Treatment of mycotic disease tinea pedis
  ✓ Removal of warts, corns, or calluses
  ✓ Trimming of nails and other regular hygiene care
  ✓ Treatment of flat feet
  ✓ Treatment of high arches (cavus foot)
  ✓ Onychomycosis
  ✓ Bunions and tailor’s bunion (hallux valgus)
  ✓ Hallux malleus
  ✓ Equinus deformity of foot, acquired
  ✓ Cavovarus deformity, acquired
  ✓ Adult acquired flatfoot (metatarsus adductus or pes planus
  ✓ Hallux limitus

• Except as provided in this guide, weight reduction and control services, procedures, treatments, devices, drugs, products, gym memberships, equipment for the purpose of weight reduction, or the application of associated services

• Nonmedical equipment
• Nonemergency admissions and associated services to out-of-state hospitals or noncontracted hospitals in contract areas

• Vaccines recommended or required for the sole purpose of international travel. This does not include routine vaccines administered according to current Centers for Disease Control (CDC) advisory committee on immunization practices (ACIP) immunization schedule for adults and children in the United States.

**Note:** The agency covers excluded services listed in this section if those services are mandated under and provided to a client who is eligible for one of the following:

- The EPSDT program
- A Medicaid program for qualified Medicare beneficiaries (QMBs)
- A waiver program
Medical Policy Updates

Policy updates effective 10/1/2019

- Based upon review of evidence provided by the Health Technology Clinical Committee (HTCC), the agency does not consider minimally invasive and open sacroiliac joint fusion procedures to be medically necessary for clients age 21 and older with chronic sacroiliac joint pain related to degenerative sacroiliitis or sacroiliac joint disruption, or both. This decision does not apply to any the following:

  ✓ Low back pain of other etiology
  ✓ Sacroiliac joint pain related to recent major trauma or fracture
  ✓ Infection
  ✓ Cancer
  ✓ Sacroiliitis associated with inflammatory arthropathies

For these issues, see the fee schedule for coverage.

Policy updates effective 7/1/2019

- Based upon review of evidence provided by the HTCC, the agency in most cases considers positron emission tomography (PET) scans (i.e., PET with computed tomography or PET/computed tomography) for lymphoma to be medically necessary under certain conditions. See Positron emission tomography (PET) scans for lymphoma.

Policy updates effective 4/1/2019

- Based upon review of evidence provided by the HTCC, the agency in most cases does not consider tumor treating fields to be medically necessary for treatment of newly diagnosed glioblastoma multiforme, recurrent glioblastoma multiforme, and for treatment of other cancers.
Policy updates effective 1/1/2019

- The agency covers gene expression profile testing with conditions for breast or prostate cancer.

- The agency pays for surgery for lumbar radiculopathy or sciatica when criteria are met.

- The agency pays for the in-home use of professional or diagnostic continuous glucose monitoring for a 72-hour monitoring period with Expedited prior authorization (EPA).
Billable Services Provided By Resident Physicians

Billable services provided by resident physicians

The agency follows Medicare’s rules for teaching physicians and residents. The agency also allows a teaching physician to work with a resident physician providing services outside of the sponsoring teaching facility (such as private practice).

The teaching physician-to-resident ratio is 1:1.

The resident must have completed a minimum of six months in a Graduate Medical Education (GME) approved residency program and be assigned to a physician outside the sponsoring teaching facility. The teaching physician can schedule a regular client load and allow the resident-in-training to examine patients independently under the teaching physician’s supervision.

The teaching physician is personally responsible for the care of each client and must be on-site at all times. The teaching physician can bill for routine or low level services provided by the resident physician after the teaching physician reviews and countersigns the resident physician’s note, assuring that the resident has written a note appropriate to the service provided.

Billing requirements for teaching physicians

The primary physician must be identified on all claims as the teaching physician.

- Use the GC modifier when billing for a service performed in part by a resident physician under the direction of a teaching physician.
- Use the GE modifier if the teaching physician is not physically present.
General documentation guidelines

The teaching physician and the resident physician must document physician services in the patient’s medical record. The documentation must be dated and contain a legible signature or identity completed using one of these methods:

- Dictated and transcribed
- Typed
- Hand-written
- Computer-generated

Billing codes

The following codes are considered routine or low level under the primary care exception:

- 99381
- 99382
- 99383
- 99384
- 99385 (for ages 18-20 only)
- 99391
- 99392
- 99393
- 99394
- 99395 (for ages 18-20 only)
- 99201
- 99202
- 99203
- 99211
- 99212
- 99213

Claims must comply with requirements in the General documentation guidelines and Documentation guidelines for evaluation and management services.
Medical students

A medical student is a person who is not an intern or resident and who is not in an approved Graduate Medical Education (GME) program. The medical student must be in one of the following programs: Liaison Committee on Medical Education (LCME), AOA Commission on Osteopathic College Accreditation (COCA), or Association of Accredited Naturopathic Medical Colleges (AANMC).

The agency allows medical students to review systems and past person, family, and social information when done as a part of an Evaluation and Management (E/M) service. The teaching physician or resident must be physically present during all portions of the E/M service. The teaching physician must personally perform the physical exam and medical decision-making activities of the billed E/M service. Medical students can document their own findings and findings of the teaching physician. The teaching physician can review and verify a student’s review without redoing or re-documenting it.
Evaluation and Management

Evaluation and management documentation and billing

The evaluation and management (E/M) service is based on key components listed in the CPT® manual. Providers must use either the 1995 or 1997 Documentation guidelines for evaluation and management services to determine the appropriate level of service.

Once the licensed practitioner chooses either the 1995 or 1997 guidelines, the licensed practitioner must use the same guidelines for the entire visit. Chart notes must contain documentation that justifies the level of service billed.

Documentation must:

- Be legible to be considered valid.
- Support the level of service billed.
- Support medical necessity for the diagnosis and service billed.
- Be authenticated by provider performing service with date and time.

Keys to documenting medical necessity to support E/M service:

- Document all diagnoses managed during the visit.

- For each established diagnosis, specify if the patient’s condition is stable, improved, worsening, etc.

- Document rationale for ordering diagnostic tests and procedures.

- Clearly describe management of the patient (e.g., prescription drugs, over the counter medication, surgery).

A provider must follow the CPT coding guidelines and their documentation must support the E&M level billed. While some of the text of CPT has been repeated in this billing guide, providers should refer to the CPT book for the complete descriptors for E/M services and instructions for selecting a level of service.
Advance directives/physician orders for life-sustaining treatment

The agency covers for counseling and care planning services for end of life treatment when conducted by a licensed health care provider.

End of life service should be evidence-based and use tested guidelines and protocols. This service may include assisting the client or the client’s authorized representative to understand and complete advance directives and/or a physician orders for life-sustaining treatment (POLST) form.

The agency pays separately for this counseling and planning in addition to the appropriate E/M code. Bill for this service using one of the following procedure codes, as appropriate:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
<th>Short Descriptions</th>
</tr>
</thead>
<tbody>
<tr>
<td>S0257</td>
<td>End of life counseling</td>
</tr>
<tr>
<td>99497</td>
<td>Advncd care plan 30 min</td>
</tr>
<tr>
<td>99498</td>
<td>Advncd care plan addl 30 min</td>
</tr>
</tbody>
</table>

This service may include:

- Assessing client readiness.
- Educating the client on their health status.
- Helping the client choose a suitable surrogate and involving the designated surrogate in the conversation if appropriate.
- Discussing and clarifying values (e.g., “If you were in X situation, what would be most important to you?”).
- Documenting the advance care plan with an advance directive and POLST if appropriate.

The Washington State Medical Association (WSMA) coordinates the Washington POLST Task Force with the Washington State Department of Health. The WSMA offers up-to-date POLST forms, frequently asked questions, and provides resources to providers and patients about the legality of and operational uses of POLST.

For further information, see [www.polst.org](http://www.polst.org) and [www.wsma.org/polst](http://www.wsma.org/polst).
Telephone services

The agency pays for telephone services when used by a physician to report and bill for episodes of care initiated by an established patient (i.e., someone who has received a face-to-face service from you or another physician of the same specialty in your group in the past three years) or by the patient's guardian. Report and bill for telephone services using the following CPT codes:

- CPT code 99441 - Telephone evaluation and management (E/M) service provided by a physician to an established patient, parent or guardian not originating from a related E/M service provided within the previous seven days nor leading to an E/M service or procedure within the next 24 hours or soonest available appointment; 5–10 minutes of medical discussion.
- CPT code 99442 - Same as CPT code 99441 except call includes 11–20 minutes of medical discussion
- CPT code 99443 - Same as CPT code 99441 except call includes 21–30 minutes of medical discussion.

Additional information when billing with these codes for telephone services:

1. Telephone services that are billed with CPT codes 99441, 99442 or 99443 must be personally performed by the physician.
2. If the telephone service relates to and takes place within the postoperative period of a procedure provided by the physician, the service is considered part of the procedure and should not be billed separately.
3. Telephone services should not be billed when the same services are billed as care plan oversight or anticoagulation management (CPT codes 99339-99340, 99374-99380 or 99363-99364).
4. When a telephone service refers to an E/M service performed and billed by the physician within the previous seven days, it is not separately billable, regardless of whether it is the result of patient-initiated or physician-requested follow-up.
5. This service should not be billed if the service results in the patient being seen within 24 hours or the next available appointment.
Partnership Access Line

The Partnership Access Line (PAL) is a telephone-based child mental health consultation system for Washington State. PAL employs child psychiatrists, child psychologists, and social workers affiliated with Seattle Children’s Hospital to deliver its consultation services.

The PAL team is available to any primary care provider throughout Washington State. Washington’s primary care providers are encouraged to call the PAL toll free number 866-599-7257 as often as they would like. PAL provides rapid consultation responses during business hours (Monday-Friday, 8:00 a.m. to 5:00 p.m.) for any type of child mental health issue that arises with any child.

Office and other outpatient services

Office or other outpatient visit limits

The agency allows one office or other outpatient visit per noninstitutionalized client, per day for an individual provider (except for call-backs to the emergency room). Refer to WAC 182-531-0500. Certain procedures are included in the office call and cannot be billed separately.

Example: The agency does not pay separately for ventilation management (CPT codes 94002-94004, 94660, and 94662) when billed in addition to an Evaluation and Management (E/M) service, even if the E/M service is billed with modifier 25.

New patient visits

The agency pays one new patient visit, per client, per provider or group practice in a three-year period.

Note: A new patient is one who has not received any professional services from the physician (or qualified health care professional) or another physician (or qualified health care professional) of the exact same subspecialty who belongs to the same group practice, within the past three years.

An established patient has received professional services from the physician (or qualified health care professional) or another physician (or qualified health care professional) in the same group and the same specialty within the prior three years.
**Established patient visits**  
(CPT code 99211)

When billing the agency for CPT code 99211, at a minimum, the client’s record must be noted with the reason for the visit and the outcome of the visit. The note must be signed and dated (with title) by the qualified health care professional who provided the service.

**Nursing facility services**

The agency allows two physician visits per month for a client residing in a nursing facility or an intermediate care facility. Nursing facility discharges (CPT codes 99315 and 99316) are not included in the two-visit limitation. The agency pays for one nursing facility discharge per client, per stay.

**Note:** The two physician visits per month limit does not apply to pulmonologists or their designee that are seeing clients who are ventilator and/or tracheostomy dependent and residing in the respiratory care unit of a designated ventilator weaning nursing facility. For these clients, the physician visit limit is five per month.

**Pre-operative visit prior to performing a dental service under anesthesia**

The agency allows one pre-operative evaluation and management (E/M) visit by a physician per client prior to performing a dental service under anesthesia. Bill using the appropriate dental diagnosis codes as the primary diagnosis along with the appropriate pre-op diagnosis codes as the secondary diagnosis.

For clients assigned to an agency managed care organization, bill the agency directly for E/Ms for dental surgery (not oral surgery).

**Physical examination - clients of the DSHS’ Developmental Disabilities Administration**

The agency allows one physical examination per client, per 12 months for clients of DSHS’ Developmental Disabilities Administration (DDA) as identified in ProviderOne. Use HCPCS code T1023 with modifier HI and ICD diagnosis code Z13.40, Z13.41, Z13.42, Z13.49, or Z13.89 to bill for an examination.
Office visit related to acamprosate, naltrexone, buprenorphine/naloxone

The agency will cover medication assisted treatment (MAT) products for the treatment of substance use disorders as an office-based therapy. The pharmacy will continue to require prior authorization for some medications. For coverage details, see the Apple Health (Medicaid) drug coverage criteria webpage.

The agency pays for office visits related to acamprosate (Campral®), naltrexone (ReVia®), naltrexone (Vivitrol®) or buprenorphine.

Buprenorphine/naloxone (Suboxone®): The agency pays for office visits related to buprenorphine/naloxone (Suboxone®). Clients enrolled in an agency-contracted managed care organization (MCO) must contact their MCO for information regarding their coverage.

Acamprosate and oral naltrexone when prescribed as MAT are covered without prior authorization.

Coverage for naltrexone injections

The agency will cover naltrexone (Vivitrol®) injections for clients who have a diagnosis of moderate to severe opioid or alcohol use disorder. See the Apple Health (Medicaid) drug coverage criteria webpage.

Aged, Blind, or Disabled (ABD) Evaluation Services

Effective for claims with dates of service on and after November 1, 2015, providers must be enrolled with ProviderOne to claim and receive payment for ABD Evaluation Services. See the Department of Social and Health Services’ (DSHS) Medical evaluation and diagnostic procedures webpage.

Medical evidence reimbursements are solely for the cost of obtaining medical evidence of an impairment that limits work activity, and for the purposes of an ABD disability determination. See the DSHS Medical evidence requirements and reimbursements webpage.

For information regarding reimbursement for psychological evaluations and testing, see the DSHS Community Services Division (CSD) Mental incapacity evaluation services webpage.
Behavior change intervention - smoking (tobacco) cessation

Smoking cessation, which can include free counseling, nicotine replacement therapy (NRT), and prescription drugs, represents a major advancement in public health for Washington State. Below is a brief overview of the way the benefit works and the services available for clients in the agency fee-for-service program. Clients enrolled in an agency-contracted managed care organization (MCO) must contact their MCO for information regarding the smoking cessation benefit.

Services available

Refer clients to the toll-free Washington State Tobacco Quitline for one or more services, which include:

- Telephone counseling and follow-up support calls through the Quitline.
- Nicotine replacement therapy to include patches, lozenges, inhalers, nasal spray, or gum through the Quitline, if appropriate.
- Prescription medications recommended by the Quitline. The client will then be referred back to the provider for a prescription, if appropriate.

Client eligibility

- All Washington Apple Health (Medicaid) clients 18 years of age and older and all pregnant women regardless of age are eligible for smoking cessation services through the Tobacco Quitline.

- Clients eligible for the Alien Emergency Medical (AEM) program or enrolled in the Family Planning Only – Pregnancy Related program or Family Planning Only program (formerly referred to as TAKE CHARGE) are eligible for some of the above mentioned services; however, these clients are not eligible for prescription drugs and smoking cessation services provided by their primary care provider. These clients qualify for smoking cessation services provided by the Department of Health Tobacco Quitline.

When a client is receiving counseling from the Tobacco Quitline, the Tobacco Quitline may recommend a smoking cessation prescription for the client. The Tobacco Quitline will mail a letter to the client’s home with prescribing information for the client’s primary care provider. The client should take the letter to their primary care provider’s office for completion. The primary care provider will fax the letter and prescription to the agency at (360) 725-1754 for prior authorization. Over-the-counter nicotine replacement therapy (NRT) products will be supplied to the client directly from the Tobacco Quitline.

Payment for a smoking cessation referral

The agency will pay a provider which may include physicians, advanced registered nurse practitioners (ARNPs), physician assistants (PAs), dentists, and dental hygienists for a smoking cessation referral (T1016) when all of the following are met:

- The client is pregnant or 18 years of age and older.

- The client presents a Services Card and is covered by a Benefit Package.

- The client is not eligible for the AEM program or enrolled in the Family Planning Only – Pregnancy Related program or Family Planning Only program (formerly referred to as TAKE CHARGE).

- The referral is billed with an appropriate ICD diagnosis. (Client is nicotine dependent, or nicotine is complicating the pregnancy, or both.)

This service may be provided in combination with another service or evaluation management office visit within the provider’s scope of practice.
Smoking cessation referral for an evaluation for a smoking cessation prescription

The agency pays the prescriber for a smoking cessation referral (T1016) for an evaluation for a smoking cessation prescription when all of the following are met:

- The client is pregnant or 18 years of age or older.
- The client is enrolled in this smoking cessation program.
- The client presents a Services Card and is covered by a Benefit Package.
- The client is not eligible for the AEM program or enrolled in the Family Planning Only – Pregnancy Related program or Family Planning Only program (formerly referred to as TAKE CHARGE).
- The referral is billed with the appropriate ICD diagnosis codes.
- Evaluate the client for a smoking cessation prescription, with or without the client present, complete the form, and fax it to the agency’s Pharmacy Authorization Section, Drug Use and Review.
- The referral is not billed in combination with an evaluation and management office visit.

Additional information:

- Call the agency toll-free at 800-562-3022.
- Visit Washington State Department of Health’s Tobacco Quitline.
- Visit Secondhand Smoke.

Tobacco cessation for pregnant clients

The agency pays for face-to-face counseling for tobacco cessation for pregnant clients. Tobacco cessation counseling complements the use of prescription and nonprescription smoking cessation products. These products are also covered by Medicaid.

Pregnant clients can receive provider-prescribed nicotine replacement therapy directly from a pharmacy and can obtain prescription medications for tobacco cessation without going through the Quitline. Clients must be actively receiving counseling services from their prescribing provider. The prescribing provider must add narrative to the prescription supporting that the prescriber is providing counseling.
Face-to-face visit requirements for pregnant women

The Clinical Practice Guideline, Treating Tobacco Use and Dependence: 2008 Update demonstrated that efficacious treatments for tobacco users exist and should become a part of standard caregiving.

Two components of counseling are especially effective, and clinicians are expected to use these when counseling pregnant patients making a quit attempt:

- Practical counseling (problem solving/skills training)
- Social support delivered as part of treatment

The guideline recommends that a practitioner should follow the "5 A's" of treating tobacco dependence, which include: Ask, Advise, Assess, Assist, and Arrange follow-up.

For patients not ready to make a quit attempt, clinicians should use a brief intervention designed to promote the motivation to quit. Content areas that should be addressed can be captured by the “5 R’s”: Relevance, Risks, Rewards, Roadblocks, and Repetition. Research suggests that the “5 R’s” enhance future quit attempts.

Providers must document the client’s pregnancy status and estimated date of confinement in the medical record. Additionally, the provider must establish and document the client’s motivation to quit tobacco use and provide an appropriate intervention based on client’s readiness to change.

If a tobacco user currently is unwilling to make a quit attempt, clinicians should use the motivational treatments shown in the guideline to be effective in increasing future quit attempts. For each visit, the provider needs to document the time and interventions used aimed at tobacco cessation.

Promotion of the motivation to quit for pregnant women

All patients entering a health care setting should have their tobacco use status assessed routinely. Clinicians should advise all tobacco users to quit and then assess a patient's willingness to make a quit attempt. For patients not ready to make a quit attempt at the time, clinicians should use a brief intervention designed to promote the motivation to quit.

Patients unwilling to make a quit attempt during a visit may lack information about the harmful effects of tobacco use and the benefits of quitting, may lack the required financial resources, may have fears or concerns about quitting, or may be demoralized because of previous relapse. Such patients may respond to brief motivational interventions that are based on principles of Motivational Interviewing (MI), a directive, patient-centered counseling intervention. There is evidence that MI is effective in increasing future quit attempts; however, it is unclear that MI is successful in boosting abstinence among individuals motivated to quit smoking.

Clinicians employing MI techniques focus on exploring a tobacco user's feelings, beliefs, ideas, and values regarding tobacco use in an effort to uncover any ambivalence about using tobacco.
Once ambivalence is uncovered, the clinician selectively elicits, supports, and strengthens the patient's “change talk” (e.g., reasons, ideas, needs for eliminating tobacco use) and “commitment language” (e.g., intentions to take action to change smoking behavior, such as not smoking in the home). MI researchers have found that having patients use their own words to commit to change is more effective than clinician exhortations, lectures, or arguments for quitting, which tend to increase rather than lessen patient resistance to change.

The four general principles that underlie MI are: (1) express empathy, (2) develop discrepancy, (3) roll with resistance, and (4) support self-efficacy. Specific MI counseling strategies that are based on these principles are listed in Strategy B1. Because this is a specialized technique, it may be beneficial to have a member of the clinical staff receive training in motivational interviewing. The content areas that should be addressed in a motivational counseling intervention can be captured by the “5 R’s”: relevance, risks, rewards, roadblocks, and repetition (Strategy B2). Research suggests that the “5 R’s” enhance future quit attempts.

Providers must provide client educational materials on the benefits of not using tobacco products and document this in the client’s record.

**Provider types for providing face-to-face smoking cessation counseling for pregnant women**

Office-based practitioners (physicians, Advanced Registered Nurse Practitioners, Physician-Assistants-Certified), Psychologists, Pharmacists, and Licensed Midwives (LM).

**Benefit limitations for providing face-to-face smoking cessation counseling for pregnant women**

A cessation counseling attempt occurs when a qualified physician or other Medicaid-recognized practitioner determines that a beneficiary meets the eligibility requirements and initiates treatment with a cessation counseling attempt.

Face-to-face cessation counseling attempts are defined and limited as follows:

- An attempt is defined as up to four cessation counseling sessions.
- Two cessation counseling attempts (or up to 8 sessions) are allowed every 12 months.

This limit applies to the client regardless of the number of providers a client may see for tobacco cessation.

Providers can request a limitation extension by submitting a request to the agency.
Documentation requirements

Keep patient record information on file for each Medicaid patient for whom a smoking and tobacco-use cessation counseling claim is made. Medical record documentation must include standard information along with sufficient patient history to adequately demonstrate that Medicaid coverage conditions were met. Documentation must include the client’s EDC Diagnosis codes should reflect that the client is pregnant and has a tobacco use disorder such as diagnosis codes O99.330 – O99.335. Also include if the condition the patient is being treated for with a therapeutic agent whose metabolism or dosing is affected by tobacco use.

Provider resources

- The Agency for Healthcare Research and Quality’s (AHRQ’s) [Treating tobacco use and dependence: 2008 update](#) – This site provides the DHHS Public Health Service Clinical Practice Guideline for Treating Tobacco Use and Dependence: 2008 Update (PHSG) and includes evidence-based treatment, provider and patient educational materials.
- [Helping Smokers Quit – A Guide for Clinicians](#)

Substance use disorder treatment

The agency reimburses for buprenorphine/naloxone when dispensed in an opiate substitution treatment program (OTP). The OTP must be Division of Behavioral Health and Recovery (DBHR)-certified and have a current certification on file with the agency. Before billing for this service, the OTP must submit a copy of their DBHR certification and their NPI number to the agency. Mail or fax certification to:

Provider Enrollment
PO Box 45562
Olympia, WA 98504-5562
Fax: 360-725-2144

Clients enrolled in an agency-contracted managed care organization (MCO) must contact their MCO for information regarding their coverage.
How to bill for combination therapy

Providers must bill according to the actual tablet strength dispensed and not the dose given. For example, if dispensing a 10mg dose as a 1-2mg tablet and 1-8mg tablet, bill one unit of J0572 and 1 unit of J0574. You would not use J0575. For a 16mg dose, you would bill 2 units of J0574. The J0575 should only be used when dispensing a tablet strength greater than 10mg.

The agency reimburses the following codes. For rates, see the [Physician-related/professional services](#) or [Professional administered drugs](#) fee schedules.

<table>
<thead>
<tr>
<th>Procedure Code</th>
<th>Short Description</th>
<th>Limitation Restricted to ICD Dx and/or Dosing</th>

<td>Buprenorphine/naloxone</td>
<td>Oral, greater than 10 mg buprenorphine</td>
</tr>
</tbody>
</table>

**Note:** The agency considers film to be included as orally administered buprenorphine/naloxone.

How to bill for monotherapy

All monotherapy must be given only as a witnessed dose. **The agency does not reimburse for carry medication for monotherapy.** Use the following code:

<table>
<thead>
<tr>
<th>Procedure Code</th>
<th>Short Description</th>
<th>Limitation Restricted to ICD Dx and/or Dosing</th>
</tr>
</thead>
<tbody>
<tr>
<td>J0571</td>
<td>Buprenorphine</td>
<td>Oral, 1 mg, or J0592 Injection, buprenorphine hydrochloride, 0.1 mg</td>
</tr>
</tbody>
</table>

**Note:** The agency considers film to be included as orally administered buprenorphine.
Collaborative Care Model Guidelines
(WAC 182-531-0425)

Collaborative Care

The following are Washington State Health Care Authority guidelines for practicing a Collaborative Care Model (CoCM).

Collaborative care is a specific type of integrated care developed at the University of Washington where medical providers and behavioral health providers work together to address behavioral health conditions, including mental health conditions and substance use disorders. When behavioral health problems are not effectively treated, this can impair self-care and adherence to treatments, and as a result are associated with poor health outcomes and increased mortality.

Psychiatric Collaborative Care Model

The Collaborative Care Model (CoCM) is a model of behavioral health integration that enhances “usual” primary care by adding two key services: care management support for clients receiving behavioral health treatment, and regular psychiatric or board-certified addiction medicine consultation with the primary care team, particularly regarding clients whose conditions are not improving.

Collaborative care is provided monthly for an episode of care that ends when targeted treatment goals are met or there is failure to attain targeted treatment goals, culminating in referral to behavioral health specialty care, or there is a break in episode (no collaborative care services for six consecutive months).

Eligible behavioral health conditions include, but are not limited to, substance use disorders, including opioid use disorder, anxiety, attention deficit hyperactivity disorder (ADHD), and depression that are being treated by the billing provider and, in the clinical judgment of the provider, warrant enrollment in CoCM services.

There are five core principles to CoCM developed in 2011 in consultation with a group of national experts in integrated behavioral health care with support from The John A. Hartford Foundation, The Robert Wood Johnson Foundation, the Agency for Healthcare Research and Quality, and the California HealthCare Foundation.
Core Principles

Patient-Centered Team Care
Primary care and behavioral health providers collaborate with shared care plans that incorporate patient goals. The ability to get both physical and behavioral health care at a familiar location is comfortable to patients and reduces duplicate assessments. Increased patient engagement oftentimes results in a better health care experience and improved patient outcomes.

The treating medical provider leads the care. The treating medical provider prescribes all medications, including those recommended by the psychiatric consultant. The team structure in CoCM includes the following team members. These team members are required to be part of the care in order to be reimbursed for CoCM.

- **Treating (Billing) Medical Provider:** A physician and/or non-physician practitioner (MD, ARNP, ND, DO); typically primary care, but may be of another specialty (e.g., cardiology, oncology). This provider leads the care and prescribes all medications, including those recommended by the psychiatric consultant.

- **Behavioral Health Care Manager:** A designated licensed professional with formal education or specialized training in behavioral health (including social work, nursing, or psychology), working under the oversight and direction of the treating medical provider.

- **Psychiatric Consultant:** A medical professional trained in psychiatry and qualified to prescribe the full range of psychotropic medications. This may be a board-certified addiction medicine provider or an addiction psychiatrist when the client has a substance use disorder.

- **Beneficiary:** The beneficiary is the patient who is a member of the care team.
The following visual was developed by the University of Washington to demonstrate the team structure and support that surrounds the client through CoCM:

**Measurement-Based Treatment to Target**
A client’s treatment plan must clearly articulate personal goals and target clinical outcomes that are routinely measured by using a validated clinical rating scale like the PHQ-9 depression scale. Treatment adjustments are made for clients not improving as expected under their current treatment plan. Treatment adjustments are made until clients achieve treatment goals or care is discontinued due to referral or clients not participating.

**Population-Based Care**
The data-driven workflow to support CoCM requires the care team to use a registry to track clients on a CoCM caseload and monitor individual client’s clinical outcomes over time. A registry can be used in conjunction with the practice’s electronic health records (EHR) if not built into it. The Advancing Integrated Mental Health Solutions (AIMS) Center offers registry tools for use in conjunction with an EHR. Additional information is located in the AIMS Center’s implementation guide: Identify a behavioral health patient tracking system.

**Evidence-Based Treatment**
Clients are offered evidence-based treatments to help meet treatment goals. These include medications and brief psychotherapy interventions such as behavioral activation, problem solving treatment, and motivational interviewing.
Accountable Care
Providers are accountable for the treatment of all clients referred to the program, including quality of care and clinical outcomes for the clients managed under CoCM.

Additional Information
The University of Washington has additional information on the implementation of CoCM and has a variety of tools to learn more about CoCM and assess a provider’s readiness to implement CoCM.

What to do next
Review the guidelines and requirements for reimbursement for CoCM and assess practice readiness through the AIMS tools. If a practice is able to meet the requirements, complete the agency’s Attestation for Collaborative Care Model form (HCA-13-0017) and send completed form to:

Provider Enrollment
PO Box 45562
Olympia, WA 98504-5562

Or fax to 360-725-2144 Attn: Provider Enrollment
Or email providerenrollment@hca.wa.gov

The treating (billing) medical provider submits the attestation.

Once the attestation is received and reviewed, an indicator will be placed in the Medicaid billing system, ProviderOne, allowing reimbursement for fee-for-service and notification will be provided to all agency-contracted managed care organizations. Provider Enrollment will contact the provider if there are any issues with their attestation form.

If at any time a practice no longer meets the core principles and specific function requirements to practice CoCM, notify the agency by calling Provider Enrollment at 360-725-2144. Providers are subject to post pay review to ensure the CoCM model requirements are being met. If the CoCM requirements were not met at the time of billing, recoupment of payment may occur.

Note: If a practice bills under one base location NPI and has several servicing locations, each servicing location must submit an attestation to provide and be reimbursed for CoCM service.

For general instructions on billing, please see the ProviderOne Billing and Resource Guide. For reimbursement rates see the Physician-related/professional health care services fee schedule.
### Psychiatric Collaborative Care Model (CoCM) Codes

**Purpose:**
This matrix is a tool to describe the requirements for selected codes. Licensed health care professionals use these codes to bill only for those services that are within their scope of licensure as defined by the Department of Health. Psychiatric CoCM typically is provided by a primary care team consisting of a treating medical provider and a care manager who work in collaboration with a psychiatric consultant, such as a psychiatrist or a psychiatric ARNP, see the CoCM guidelines. Care is directed by the primary care team and includes structured care management with regular assessments of clinical status using validated tools and modification of treatment as appropriate. Payments are based on services provided by all team members. CoCM practices must meet model requirements as defined by CMS and submit an attestation to the agency to be eligible for reimbursement. Additional information and introductory resources around training for practice staff are available from the AIMS Center (Advancing Integrated Mental Health Solutions).

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

**99493— Subsequent psychiatric collaborative care management, first 60 minutes in the subsequent month of behavioral health care manager activities, in consultation with a psychiatric consultant, and directed by the treating physician or other qualified health care professional.**

**With the following required elements:**
- Tracking client follow-up and progress using the registry, with appropriate documentation
- Participation in weekly caseload consultation with the psychiatric consultant
- Ongoing collaboration with and coordination of the patient’s mental health care with the treating physician or other qualified health care professional and any other treating mental health providers
- Additional review of progress and recommendations for changes in treatment, as indicated, including medications, based on recommendations provided by the psychiatric consultant
- Provision of brief interventions using evidence-based techniques such as behavioral activation, motivational interviewing, and other focused treatment strategies
- Monitoring of client outcomes using validated rating scales and relapse prevention planning with clients as they achieve remission of symptoms and/or other treatment goals and are prepared for discharge from active treatment.
- Clients must have one face-to-face visit at least every three months.

**Provider Type:** Billable by medical provider with collaborative care indicator (e.g. ARNP, DO, MD, ND)

**Place of Service:** No limitations on the place of service. Exception: Federally Qualified Health Centers (FQHC’s) and Rural Health Clinics (RHC’s) bill for CoCM using a specific code-see code G0512 for details.

**Limitations:**
- Bill once per month
- Billed for subsequent calendar months following the initiation of an episode of CoCM services
- May bill 5 months of subsequent care for each episode of care initiated without PA or EPA
- Requires EPA to continue the episode after 6th month
**Physician-Related Services/Health Care Professional Services**

<table>

<td>99494</td>
<td>Initial or subsequent psychiatric collaborative care management, each additional 30 minutes in a calendar month of behavioral health care manager activities, in consultation with a psychiatric consultant, and directed by the treating physician or other qualified health care professional.</td>
</tr>
</tbody>
</table>

**Documentation:**
- Client’s progress towards goals
- Updated results of the validated clinical rating scales being used
- Modifications to treatment as appropriate

**Billing:** Additional 30 minute units of behavioral health care manager activities in consultation with a psychiatric consultant, and directed by the treating physician or other qualified health care professional.

**Provider Type:** Billable by medical provider with collaborative care indicator (e.g. ARNP, DO, MD, ND)

**Place of Service:** No limitations on the place of service. Exception: Federally Qualified Health Centers (FQHC’s) and Rural Health Clinics (RHC’s) bill for CoCM using a specific code—see code G0512 for details.

**Limitations:**
- Use for additional 30 minutes of behavioral health care manager activities
- 99494 to be used with 99492 or 99493

**Clients must have a minimum of one face-to-face visit every three months with the directing treating physician or other qualified health care professional**
- **Requires PA** after 12 months
- A new episode of care must be initiated after 6 month lapse in services and include an initial assessment and a treatment plan
- **EPA is required** if less than a 6 month lapse in service and new episode of care is to be initiated.
### FQHC & RHC

**G0512- Psychiatric Collaborative Care Model**

*services: Minimum of 60 minutes per calendar month*

Service elements provided by CoCM team for CoCM services must include:
- Outreach and engagement of clients
- Initial assessment, including administration of validated scales and resulting in a treatment plan
- A minimum of one face-to-face visit every three months with the directing treating physician or other qualified health care professional
- Entering clients into a registry for tracking client follow-up and progress
- Participation in weekly caseload review with psychiatric consultant and modifications to treatment, if recommended
- Provision of brief interventions using evidence-based treatments such as behavioral activation, problem-solving treatment, and other focused treatment activities
- Tracking client follow-up and progress using validated rating scales
- Ongoing collaboration and coordination with treating FQHC and RHC providers
- Relapse prevention planning and preparation for discharge from active treatment

**Documentation:**

The provider must:
- Use a registry to track the clients clinical outcomes
- Use a validated clinical rating scale
- Ensure the registry is used in conjunction with the practice’s EHR
- Include a plan of care
- Identify outcome goals of the treatments

**Billing:** A minimum of 60 minutes in any month of behavioral health care manager activities in consultation with a psychiatric consultant, and directed by the treating physician or other qualified health care professional.

**Provider Type:** Billable by medical provider in a FQHC or RHC with collaborative care indicator (e.g. ARNP, DO/MD/ND)

**Place of Service:** Federally Qualified Health Centers (FQHC’s) and Rural Health Clinics (RHC’s)

**Limitations:**
- This code does not qualify for an encounter
- Once per month
- May bill 5 months of subsequent care for each episode of care initiated without PA or EPA
- EPA is required to continue the episode after 6th month
- PA is required after 12 months following initiation of episode
- A new episode of care must be initiated after 6 month lapse in services and include an initial assessment and development of a treatment plan
- If less than a 6 month lapse in service and new episode of care is to be initiated, EPA is required
**Additional billing information:**

Use expedited prior authorization (EPA) in the following circumstances:

- For additional services beyond the initial 6 months of CoCM services, an EPA is required. See EPA# 870001428.
- For starting a new episode of care 99492 or G0512 with less than a 6 month lapse in services, an EPA is required. See EPA# 870001427.
- If the client does not meet the EPA criteria, prior authorization (PA) is required.

Use prior authorization (PA) in the following circumstance:

- After 12 months of CoCM services, PA is required.

**Note:** A psychiatric consultant working in the CoCM model may also provide traditional services directly to the client in the same month, but may not bill for the same time using multiple codes. The time spent on these activities for services reported separately may not be included in the services reported using time applied to 99492, 99493, 99494 and G0512.

---

**Health and behavior codes**  
*CPT codes 96150-96155*

**Effective January 1, 2019,** the agency will cover health and behavior codes when provided by a physician or licensed behavioral health provider. Providers use health and behavior codes (CPT codes 96150-96155) when the primary diagnosis is medical and the provider is addressing the behavioral, emotional, cognitive, and social factors important to the prevention, treatment or management of physical health problems. The focus of the assessment is not mental health but on the biopsychosocial factors important to physical health problems and treatments.

Use modifier HE to indicate the service is not part of a substance use disorder (SUD) or maternity support service (MSS). If these health and behavior codes are billed with a mental health diagnosis and the HE modifier, the agency will deny the claim.

For additional information on code descriptions and billing for health and behavior codes, visit the Behavioral health and recovery webpage.

**Children's primary health care**  
(CPT codes 99201-99215)

The agency pays a higher payment rate for primary health care performed in the office setting (CPT codes 99201-99215) for children age 20 and younger. These are the only services that are paid at the higher rate.

If a child is younger than 60 days of age and has not been issued an individual ProviderOne Client ID, use the mother's ProviderOne Client ID, and put "SCI=B" in the claim notes field. Put the child’s name, gender, and birth date in the client information fields. If the mother is enrolled in an agency-approved managed care organization (MCO), newborns will be enrolled in the same MCO as their mother.

**Pediatric primary care rate increase**

A primary care provider rate increase is available for vaccine administration and certain pediatric care services for clients age 18 and younger.

The rate increase is effective for dates of service beginning October 1, 2018 and ending no sooner than June 30, 2020. Physician and non-physician practitioners are eligible for the increase.

See the Pediatric primary care rate increase website for more information. To view the Enhanced pediatric fee schedule, see the agency’s Provider billing guides and fees schedules webpage. Scroll down to and select “Physician-related/professional services.”

**Note:** Providers serving clients covered by an agency-contracted managed care organization (MCO) should contact the individual MCO for rate information.

**Consultations**

**TB treatment services**

Performed by professional providers – office visits only

The E/M codes 99201-99215 are for office visits only, and must be billed for professional providers such as physicians (or nursing staff under a physician’s supervision), Advanced Registered Nurse Practitioners (ARNPs), and Physician Assistants (PAs).
Performed by professional providers – in client’s home, see [link to home services].

Performed by nonprofessional providers – office visits and in client’s home

Health departments billing for TB treatment services provided by nonprofessional providers in either the client’s home or in the office must bill using HCPCS code T1020 (personal care services). Do not bill the initial visit with a modifier. Follow-up visits must be billed using T1020 with modifier TS (follow-up services modifier). Use the appropriate ICD diagnosis code.

**Critical care**
(CPT codes 99291-99292)
([WAC 182-531-0450](https://laws.wa.gov/TableOfContents/Chapters/182-531-0450.htm))

**Note:** For neonatal or pediatric critical care services, see [Neonatal intensive care unit (NICU)/Pediatric intensive care unit (PICU)](https://www.americanacademyofpediatrics.org/clinical-guidance/critical-care-unit). Critical care is the direct delivery and constant attention by a provider(s) for a critically ill or critically injured patient. A critical illness or injury acutely impairs one or more vital organ systems such that there is a high probability of imminent or life threatening deterioration in the patient’s condition.

Critical care involves high complexity decision making to assess, manipulate, and support vital system function(s); to treat single or multiple vital organ system failure; and/or to prevent further life threatening deterioration of the patient’s condition.

Providing medical care to a critically ill, injured, or postoperative patient qualifies as a critical care service only if both the illness or injury and the treatment being provided meet the above requirements. Critical care is usually, but not always, given in a critical care area, such as the coronary care unit, intensive care unit, pediatric intensive care unit, respiratory care unit, or the emergency care facility. Services for a patient who is not critically ill but happens to be in a critical care unit are reported using other appropriate E/M codes.

**Billing for critical care**

When billing for critical care, providers must bill using CPT codes 99291-99292:

- For the provider’s attendance during the transport of critically ill or critically injured clients age 25 months or older to or from a facility or hospital.
- To report critical care services provided in an outpatient setting (e.g., emergency department or office), for neonates and pediatric clients up through 24 months.
To report the total duration of time spent by a physician providing critical care services to a critically ill or critically injured client, even if the time spent by the physician on that date is not continuous. For any given period of time spent providing critical care services, the physician must devote his or her full attention to the client and cannot provide services to any other patient during the same period of time.

**Note:** Surgery, stand-by, or lengthy consultation on a **stable** client does not qualify as critical care.

Where is critical care performed?

Critical care is usually performed in a critical care area of a hospital, such as a(n):

- Coronary care unit.
- Intensive care unit.
- Respiratory care unit.
- Emergency care facility.

What is covered?

The agency covers:

- A maximum of three hours of critical care per client, per day.
- Critical care provided by the attending physician who assume(s) responsibility for the care of a client during a life-threatening episode.
- Critical care services provided by more than one physician if the services involve multiple organ systems (unrelated diagnosis). However, in the emergency room, payment for critical care services is limited to one physician.

The following services (with their corresponding CPT codes) are included in critical care. Do not bill these separately:

- Vascular access procedures (CPT codes 36000, 36410, 36415, 36591, and 36600)
- Gastric intubation (CPT codes 43752 and 43753)
- Chest X-rays (CPT codes 71010, 71015, and 71020)
- Temporary transcutaneous pacing (CPT codes 92953)
• The interpretation of cardiac output measurements (CPT codes 93561-93562)
• Ventilator management (CPT codes 94002-94004, 94660, and 94662)
• Pulse oximetry (CPT codes 94760 and 94762)
• Blood gases, and information data stored in computers (e.g., ECGs, blood pressures, hematologic data) (CPT code 99090)

Note: CPT code 43752 may be billed separately when it is the only procedure code billed.

Domiciliary, rest home, or custodial care services

CPT codes 99304-99318 are not appropriate E/M codes for use in place of service 13 (Assisted Living) or 14 (Group Home). Providers must use CPT codes 99324-99328 or 99334-99337 for E/M services provided to clients in these settings.

Emergency department services

Emergency physician-related services
(CPT codes 99281-99285) [WAC 182-531-0500]

• For services performed by the physician assigned to, or on call to, the emergency department, bill the agency using CPT codes 99281-99285.

Note: For multiple emergency room (ER) visits on the same day with related diagnoses, the time(s) of the additional visit(s) must be noted in the Claim Note section of the electronic claim.

• The agency does not pay emergency room physicians for hospital admissions (e.g., CPT codes 99221-99223) or after-hours services (e.g., CPT codes 99050 and 99053).

• Physicians who perform emergency room services must not bill modifier 54 when billing the agency for surgical procedures.

• Physicians who provide only the follow-up services for minor procedures performed in emergency departments must bill the appropriate level of office visit code without modifier 55.
• The agency follows Medicare’s policy to not pay emergency room providers for the following procedure codes: CPT codes 96360-96361 or 96365-96368.

Habilitative services

Habilitative services are those medically necessary services provided to help a client partially or fully attain or maintain developmental age-appropriate skills that were not fully acquired due to a congenital, genetic, or early-acquired health condition. Such services are required to maximize the client’s ability to function in his or her environment.

For those clients in the expanded population and covered by the Alternative Benefit Plan (ABP) only, the agency covers prosthetic and orthotic (P&O) devices and supplies, medical equipment and supplies, and outpatient therapy (physical, occupational, and speech) to treat one of the qualifying conditions listed in the agency’s Habilitative Services Billing Guide, under Client Eligibility.

Billing for habilitative services

Habilitative services must be billed using one of the qualifying diagnosis codes listed in the agency’s Habilitative Services Billing Guide in the primary diagnosis field on the claim.

Neurodevelopmental Centers, Outpatient Hospital Services, Physician-Related Services/Health Care Professional Services (includes Audiology), Home Health Services, and Outpatient Rehabilitation providers who provide physical therapy, occupational therapy, or speech language pathology to treat a condition that qualifies for habilitative services, for a client enrolled in ABP, must bill for these therapies according to the agency’s Habilitative Services Billing Guide.

Services and equipment related to any of the following programs must be billed using their specific billing guide:

• Medical Equipment and Supplies
• Prosthetic/Orthotic Devices and Supplies
• Complex Rehabilitation Technology

All other program requirements are applicable to a habilitative service and should be followed unless otherwise directed (e.g., prior authorization).
Home services

Home evaluation and management

The agency pays for home evaluation and management (CPT codes 99341-99350) only when services are provided in place of service 12 (home).

TB treatment services – performed by professional providers – in client’s home

When billing for TB treatment services provided by professional providers in the client’s home, Health Departments may also bill CPT codes 99341 and 99347.

For TB treatment services performed by nonprofessional providers in client’s home, see TB treatment services for nonprofessional providers – office or client’s home.

Hospital inpatient and observation care services (CPT codes 99217-99239) (WAC 182-531-0750)

Inpatient admissions must meet intensity of service/severity of illness criteria for an acute inpatient level of care. Admission status changes must be noted in the client’s chart.

Admission status

Admission status is a client’s level of care at the time of admission. Some examples of typical types of admission status are: inpatient, outpatient observation, medical observation, outpatient surgery or short-stay surgery, or outpatient (e.g., emergency room).

Admission status is determined by the admitting physician or practitioner. Continuous monitoring, such as telemetry, can be provided in an observation or inpatient status; consider overall severity of illness and intensity of service in determining admission status rather than any single or specific intervention. Specialty inpatient areas (including intensive care unit or critical care unit) can be used to provide observation services. Level of care, not physical location of the bed, dictates admission status.
Change in admission status

A change in admission status is required when a client’s symptoms/condition and/or treatment does not meet medical necessity criteria for the level of care the client is initially admitted to. The documentation in the client’s medical record must support the admission status and the services billed.

The agency does not pay for:

- Services that do not meet the medical necessity of the admission status ordered.
- Services that are not documented in the hospital medical record.
- Services greater than what is ordered by the physician or practitioner responsible for the client’s hospital care.

Inpatient to outpatient observation

The attending physician or practitioner may make an admission status change from inpatient to outpatient observation when:

- The attending physician/practitioner and/or the hospital’s utilization review staff determine that an inpatient client’s symptoms/condition and treatment do not meet medical necessity criteria for an acute inpatient level of care and do meet medical necessity criteria for an observation level of care.
- The admission status change is made prior to, or on the next business day following, discharge.
- The admission status change is documented in the client’s medical record by the attending physician or practitioner. If the admission status change is made following discharge, the document must:
  - Be dated with the date of the change.
  - Contain the reason the change was not made prior to discharge (e.g., due to the discharge occurring on the weekend or a holiday).
Outpatient observation to inpatient

The attending physician or practitioner may make an admission status change from outpatient observation to inpatient when:

- The attending physician/practitioner and/or the hospital’s utilization review staff determine that an outpatient observation client’s symptoms/condition and treatment meet medical necessity criteria for an acute inpatient level of care.

- The admission status change is made prior to, or on the next business day following, discharge.

- The admission status change is documented in the client’s medical record by the attending physician or practitioner. If the admission status change is made following discharge, the documentation must:
  - Be dated with the date of the change.
  - Contain the reason the change was not made prior to discharge (e.g., due to the discharge occurring on the weekend or a holiday).

Inpatient or outpatient observation to outpatient

The attending physician or practitioner may make an admission status change from inpatient or outpatient observation to outpatient when:

- The attending physician/practitioner and/or the hospital’s utilization review staff determine that an outpatient observation or inpatient client’s symptoms/condition and treatment do not meet medical necessity criteria for observation or acute inpatient level of care.

- The admission status change is made prior to, or on the next business day following, discharge.

- The admission status change is documented in the client’s medical record by the attending physician or practitioner. If the admission status change is made following discharge, the documentation must:
  - Be dated with the date of the change.
  - Contain the reason the change was not made prior to discharge (e.g., due to the discharge occurring on the weekend or a holiday).
Outpatient surgery/procedure to outpatient observation or inpatient

The attending physician or practitioner may make an admission status change from outpatient surgery/procedure to outpatient observation or inpatient when:

- The attending physician/practitioner and/or the hospital’s utilization review staff determine that the client’s symptoms/condition and/or treatment require an extended recovery time beyond the normal recovery time for the surgery/procedure and medical necessity for outpatient observation or inpatient level of care is met.

- The admission status change is made prior to, or on the next business day following, discharge.

- The admission status change is documented in the client’s medical record by the attending physician or practitioner. If the admission status change is made following discharge, the documentation must:

  ✓ Be dated with the date of the change.

  ✓ Contain the reason the change was not made prior to discharge (e.g., due to the discharge occurring on the weekend or a holiday).

**Note:** During post-payment retrospective utilization review, the agency may determine the chronic care management is not supported by documentation in the medical record. The agency may consider payment made in this circumstance an overpayment and payment may be recouped or adjusted.
Payment

The agency pays for:

- One inpatient hospital call per client, per day for the same or related diagnoses. The agency does not pay separately for the hospital call if it is included in the global surgery payment. (See Other surgical policies for information on global surgery policy.)

- Professional inpatient services (CPT codes 99221-99223) during the global surgery follow-up period only if they are performed on an emergency basis and are unrelated to the original surgery. Use modifier 24 to indicate that the service is unrelated to the original surgery.

  **Note:** The agency pays providers for CPT codes 99221-99223 for scheduled hospital admissions during the follow-up period only when billed with a modifier 24.

The agency does not pay for:

- A hospital admission (CPT codes 99221-99223) and a planned surgery billed in combination. The hospital admission is included in the global fee for the surgery.

- Inpatient or observation care services [including admission and discharge services (CPT codes 99234-99236) for stays of less than 8 hours on the same calendar date.

Other guidelines

- When a hospital admission (CPT codes 99221-99223) and an emergency surgery is billed in combination, the agency will pay when there is a decision to do surgery, the provider has not seen the client for this condition, and modifier 57 is used. This only applies to surgical procedures with a 90-day global period.

- When a client is admitted for observation care for less than 8 hours and is discharged on the same calendar date, providers must bill using CPT codes 99218-99220. The agency does not pay providers separately for discharge services.

- When a client is admitted for observation care and is discharged on a different calendar date, providers must bill using CPT codes 99218-99220 and observation discharge CPT code 99217.

- When a client qualifies for an inpatient hospital admission and is discharged on a different calendar date, providers must bill using CPT codes 99221-99233 and hospital discharge day management CPT code 99238 or 99239.
• When a client qualifies for an inpatient hospital admission and is discharged on the same calendar date, providers must bill using CPT codes 99234-99236. The agency does not pay providers separately for hospital discharge day management services.

• Providers must satisfy the documentation requirements for both admission to and discharge from, inpatient or observation care in order to bill CPT codes 99234-99236. The length of time for observation care or treatment status must also be documented.

• When clients are fee-for-service (FFS) when admitted to a hospital and then enroll in an agency managed care organization (MCO) during the hospital stay, the entire stay for physician services is paid FFS until the client is discharged. Enter the initial hospitalization date in the appropriate field for the claim billing format. For billing details, see the ProviderOne Billing and Resource Guide.

Inpatient neonatal and pediatric critical care

Neonatal intensive care unit (NICU)/Pediatric intensive care unit (PICU)
(CPT codes 99468-99480)
(WAC 182-531-0900)

NICU/PICU care includes management, monitoring, and treatment of the neonate/infant including respiratory, pharmacological control of the circulatory system, enteral and parenteral nutrition, metabolic and hematological maintenance, parent/family counseling, case management services, and personal direct supervision of the health care team’s activities.

The agency covers:

• One NICU/PICU service per client, per day.

• Intensive observation, frequent interventions, and other intensive services for neonates. Use CPT code 99477 for initial hospital care, per day, when a neonate requires intensive observation, frequent interventions and other intensive services. Providers may report CPT 99460 and 99477 when two distinct services are provided on the same day, but must use modifier 25 with CPT code 99460. Bill CPT code 99460 with modifier 25 when a normal newborn is seen after an uneventful delivery and then later the infant develops complications and is transferred to an intensive setting for observation, frequent interventions, and other intensive services.

• NICU/PICU services when directing the care of a neonate/infant in a NICU/PICU. These codes represent care beginning with the date of admission to the NICU/PICU.

Note: Once the infant is no longer considered critically ill, hospital care CPT codes 99231-99233 or 99478-99480 must be used.
• Newborn resuscitation (CPT code 99464, 99465) in addition to NICU/PICU services.

• The provider’s attendance during the transport of critically ill or critically injured pediatric clients 24 months of age or younger to or from a facility or hospital (CPT code 99466 or 99467).

• CPT codes 99291-99292 for critical care services provided in an outpatient setting when the client is 24 months of age or younger.

The following services and the subsequent intensive, noncritical services (with their corresponding CPT codes) are included in neonatal or pediatric critical care. Do not bill these separately. Providers must follow the national CCI edits as this list is not exhaustive:

• Bladder catheterization (CPT codes 51701-51702)

• Central (CPT code 36555) or peripheral vessel catheterization (CPT code 36000)

• Continuous positive airway pressure (CPAP) (CPT code 94660)

• Endotracheal intubation (CPT code 31500)

• Initiation and management of mechanical ventilation (CPT codes 94002-94004)

• Invasive or noninvasive electronic monitoring of vital signs, bedside pulmonary function testing (CPT code 94375), and/or monitoring or interpretation of blood gases or oxygen saturation (CPT codes 94760-94762)

• Lumbar puncture (CPT code 62270)

• Oral or nasogastric tube placement (CPT code 43752)

• Other arterial catheters (CPT codes 36140 and 36620)

• Umbilical arterial catheterization (CPT code 36660)

• Umbilical venous catheterization (CPT code 36510)

• Suprapubic bladder aspiration (CPT code 51100)

• Surfactant administration, intravascular fluid administration (CPT codes 96360, 96361, 90780, and 90781)

• Transfusion of blood components (CPT codes 36430 and 36440)

• Vascular punctures (CPT codes 36420 and 36600)
• Vascular access procedures (CPT codes 36400, 36405, and 36406)

**Note:** Procedure code 43752 may be billed separately when it is the only procedure code billed.

### Intensive (noncritical) low birth weight services
(CPT codes 99478-99480)

• Bill the appropriate procedure codes only once per day, per client.

• These codes represent care that begins subsequent to the admission date.

### Perinatal conditions

The agency covers professional services related to conditions originating in the perinatal period if all of the following are met:

• The services are considered to be medically necessary and would otherwise be covered by the agency.

• Professional services are provided in an inpatient hospital (place of service 21).

• ICD diagnosis codes are listed as the primary diagnosis.

• An admission date is included on the claim.

• There are 28 or fewer days between the patient’s date of birth and the admission date listed on the claim.

For clients who transfer between facilities for services not otherwise available, or to a higher level of care, the original date of admission must be used on the claim to represent a continuous episode of care. For clients greater than 28 days of age, the appropriate ICD diagnosis codes may be listed as the secondary rather than the primary diagnosis.
Mental health

For coverage and billing information for mental health services for children and adults, including evidence-based medicine, evidence-based practice, research-based practice, and evidence-based health care (collectively “EBM”), see the agency’s Mental Health Services Billing Guide.

Note: The reimbursement rate may differ depending on the provider’s education level. See the Mental health services and the Physician-related/professional services fee schedules for details.

Depression Screening

Structured Depression screening

Structured depression screening is required for children age 12 years and older at least once every other year. Use procedure code 96127 or 96160.

Caregiver/Maternal depression screening

- Caregiver/Maternal depression screening is required at well-child checkups for caregivers/mothers of infants up to age six months. Use procedure code 96161 with EPA number 870001424 for fee-for-service (FFS) with the infant’s ProviderOne ID number.

- Caregiver/maternal depression screening completed by the caregiver’s provider during the six months postpartum and billed under the caregiver’s Provider One ID number. Use procedure code 96160 with EPA number 870001424.

For further information, see the Early and Periodic Screening, Diagnosis and Treatment (EPSDT) Billing Guide and the Mental Health Services Billing Guide.

Services provided to an MCO client during BHO-approved admissions

How do I bill the professional mental health services for an inpatient MCO client?

The agency pays for psychiatric services provided by a psychiatrist, psychologist, or psychiatric ARNP to an MCO client during the BHO-authorized admission. Expedited prior authorization is required. See EPA#870001369 for coverage criteria. If these services are provided by any other provider during a BHO-authorized admission, the services must be billed to the MCO.
Newborn care
(CPT 99460, 99461)

To assist providers in billing CPT codes with "newborn" in the description, the agency defines a newborn as 28 days old or younger.

Newborn diagnosis codes are to be used as the primary diagnosis during the newborn 28-day period. After 28 days and throughout the life of the patient, a newborn code may be used as an additional diagnosis if the condition is still present.

The agency covers:

- One newborn evaluation per newborn when they are not discharged on the same day using either CPT code 99460 for hospital or birthing center or CPT code 99461 for home births.

- Subsequent hospital care (other than initial evaluation or discharge) using CPT code 99462.

- One newborn evaluation and discharge per newborn performed in the hospital or birthing center on the same day using CPT code 99463.

Billing for infants not yet assigned a ProviderOne client ID

Use the mother’s ProviderOne Client ID for a newborn if the infant has not yet been issued a ProviderOne Client ID. Enter indicator SCI=B in the Comments section of the claim to indicate that the mom’s ProviderOne Client ID is being used for the infant. Put the child’s name, gender, and birthdate in the client information fields. When using a mom’s ProviderOne Client ID for twins, triplets, etc., use the following claim indicators to identify the infant being treated: SCI=BA for twin A, SCI=BB for twin B, and SCI=BC for a third infant in the case of triplets, using a separate claim for each. Note: For a mother enrolled in an agency managed care organization (MCO), the MCO is responsible for providing medical coverage for the newborn(s).

For more information on billing for newborns and for newborns who will be placed in foster care, see the Inpatient Hospital Services Billing Guide.
Does the agency pay for newborn screening tests?

Yes. The initial screening is typically billed through the hospital.

For newborns born at a birthing center or at home, the Washington State Department of Health (DOH) will bill the agency directly for the screening test using HCPCS code S3620. The midwife or physician will collect the blood for the newborn screening and send it to DOH.

For subsequent screenings done in an outpatient setting, the provider may bill the agency directly for the screening test using HCPCS code S3620.

The newborn screening panel includes:

- Biotinidase deficiency
- Congenital adrenal hyperplasia (CAH)
- Congenital hypothyroidism
- Homocystinuria
- Phenylketonuria (PKU)
- Galactosemia
- Hemoglobinopathies
- Homocystinuria
- Maple Syrup Urine Disease (MSUD)
- Medium chain acyl-CoA dehydrogenase deficiency (MCAD deficiency)
- Severe combined immunodeficiency (SCID)

Note: Payment includes two tests for two different dates of service, allowed once per newborn. Do not bill HCPCS code S3620 if the baby is born in the hospital. This code is only for outpatient services in birthing centers, physician offices, and homes in which midwives provide home births.

Physicals for clients of DSHS’ Developmental Disabilities Administration

The agency covers one physical every 12 months for clients of the Developmental Disabilities Administration (DDA) within the Department of Social and Health Services. Use HCPCS code T1023 with modifier HI and the appropriate ICD diagnosis code Z13.4 or Z13.89 to bill for an annual exam.
Physician care plan oversight
(CPT codes 99375, 99378, and 99380) (WAC 182-531-1150)

The agency covers:

- Physician care plan oversight services once per client, per month.
  - A plan of care must be established by the home health agency, hospice, or nursing facility.
  - The provider must perform 30 or more minutes of oversight services for the client each calendar month.

The agency does not cover:

- Physician care plan oversight services of less than 30 minutes per calendar month (CPT codes 99374, 99377, and 99379).
- Physician care plan oversight services provided by more than one provider during the global surgery payment period, unless the care plan oversight is unrelated to the surgery.

Physician supervision of a patient requiring complex and multidisciplinary care modalities

The agency covers CPT codes 99339 and 99340 with prior authorization. For supervision services that are less than 30 minutes, use code 99339; and for services exceeding 30 minutes, use code 99340. There is a unit limit of one unit of CPT 99339 or one unit of CPT 99340 per calendar month. Claims are subject to post-payment review.

Clear documentation of care plan oversight is required by the agency, including:

- Time allocation.
- Care plans.
- Review of diagnostic reports and laboratory studies.
- Treatment-related communications with other health care professionals and caregivers.
- Adjustment of medical therapy.
Physician-Related Services/Health Care Professional Services

<table>
<thead>
<tr>
<th>CPT Code</th>

Preventative medicine services

**HIV/AIDS counseling/testing**
(CPT code 99401) *(WAC 182-531-0600)*

The agency covers two sessions of risk factor reduction counseling (CPT code 99401) counseling per client, each time tested (i.e., one pre- and one post-HIV/AIDS counseling/testing session). Use ICD diagnosis code Z71.7 when billing CPT code 99401 for HIV/AIDS counseling.

The agency does not pay for HIV/AIDS counseling when billed with an E/M service unless the client is being seen on the same day for a medical problem and the E/M service is billed with a separately identifiable diagnosis code and with modifier 25.

See the agency’s [HIV/AIDS Case Management Billing Guide](#) for additional information on HIV/AIDS case management billing.
Prolonged services
(CPT codes 99354-99357) (WAC 182-531-1350)

Prolonged services with direct patient contact

The agency covers prolonged services:

- Up to three hours per client, per diagnosis, per day.

  **Note:** The time counted toward payment for prolonged E/M services includes only direct face-to-face contact between the provider and the client, whether or not the services were continuous.

- Only when the provider performs one of the services listed below for the client on the same day:

<table>
<thead>
<tr>
<th>Prolonged CPT Code</th>
<th>Other CPT Code(s)</th>
</tr>
</thead>
<tbody>
<tr>
<td>99354</td>
<td>99201-99215, 99241-99245, 99324-99337, 99341-99350, 90815</td>

</tr>
<tr>
<td>99357</td>
<td>99356 and one of the E/M codes required for 99356</td>
</tr>
</tbody>
</table>

  **Note:** Both the prolonged services CPT code and any of the “Other CPT Code(s)” listed above must be billed on the same claim.
Physician stand-by services
(CPT code 99360) (WAC 182-531-1250)

The agency covers physician stand-by services when those services are requested by another physician and involve prolonged physician attendance without direct (face-to-face) client contact.

**Note:** The standby physician cannot provide care or services to other clients during the standby period.

**Limitations**

- Standby services of less than 30 minutes are not covered.

- After the first 30 minutes, subsequent periods of standby services are covered only when a full 30 minutes of standby is provided for each unit billed.

**The agency does not cover physician stand-by services when:**

- The provider performs a surgery that is subject to the global surgery policy.

- Billed in addition to any other procedure code, with the exception of CPT codes 99460 and 99465.

- When the service results in an admission to a neonatal intensive care unit (CPT code 99468) on the same day.
Telemedicine
(WAC 182-531-1730)

What is telemedicine?

Telemedicine is when a health care practitioner uses HIPAA-compliant, interactive, real-time audio and video telecommunications (including web-based applications) or store and forward technology to deliver covered services that are within his or her scope of practice to a client at a site other than the site where the provider is located.

If the service is provided through store and forward technology, there must be an associated office visit between the client and the referring health care provider.

Using telemedicine when it is medically necessary enables the health care practitioner and the client to interact in real-time communication as if they were having a face-to-face session. Telemedicine allows agency clients, particularly those in medically underserved areas of the state, improved access to essential health care services that may not otherwise be available without traveling long distances.

The agency does not cover the following services as telemedicine:

- Email, audio only telephone, and facsimile transmissions
- Installation or maintenance of any telecommunication devices or systems
- Purchase, rental, or repair of telemedicine equipment

Who is eligible for telemedicine?

Fee-for-service clients are eligible for medically necessary covered health care services delivered via telemedicine. The referring provider is responsible for determining and documenting that telemedicine is medically necessary. As a condition of payment, the client must be present and participating in the telemedicine visit. Clients under the Family Planning Only – Pregnancy Related program, Family Planning Only program (formerly referred to as TAKE CHARGE), First Steps, and School-Based Health Care Services programs are eligible for telemedicine through fee-for-service.

The agency will not pay separately for telemedicine for services covered under an agency-contracted managed care plan. Clients enrolled in an agency-contracted managed care organization (MCO) are identified as such in ProviderOne. MCO enrollees must have all services arranged and provided by their primary care providers (PCP). Contact the MCO regarding whether or not the plan will authorize telemedicine coverage for services covered under the plan.
When does the agency cover telemedicine?

The agency covers telemedicine when it is used to substitute for an in-person face-to-face, hands-on encounter for only those services specifically listed in this telemedicine section. Clients enrolled in an agency-contracted MCO must contact the MCO regarding whether or not the plan will authorize telemedicine coverage.

What are the documentation requirements?

The documentation requirements are the same as those listed in Evaluation and management documentation and billing, in addition to the following:

- Verification that the service was provided via telemedicine
- The location of the client and a note of any medical personnel with the client
- The location of the provider
- The names and credentials (MD, ARNP, RN, PA, CNA, etc.) of all people involved in the telemedicine visit, and their role in the encounter at both the originating and distant sites

Originating site (location of client)

What is an originating site?

An originating site is the physical location of the eligible agency client at the time the professional service is provided by a physician or practitioner through telemedicine. Approved originating sites are:

- Clinics
- Community mental health/chemical dependency settings
- Dental offices
- Federally qualified health centers (FQHC)
- Homes or any location determined appropriate by the individual receiving service
- Hospitals (inpatient and outpatient)
- Neurodevelopmental centers
- Physician or other health professional’s offices
- Renal dialysis centers, except an independent renal dialysis center
- Rural health clinics (RHC)
- Schools
- Skilled nursing facilities
Is the originating site paid for telemedicine?

Yes. The originating site is paid an originating site facility fee per completed transmission for telemedicine services. The agency does not pay the originating site facility fee to the client in any setting.

How does the originating site bill the agency for the originating site facility fee?

- **Hospital outpatient**: When the originating site is a hospital outpatient agency, payment for the originating site facility fee will be paid according to the maximum allowable fee schedule. To receive payment for the originating site facility fee, outpatient hospital providers must bill revenue code 0780 on the same line as HCPCS code Q3014.

- **Hospital inpatient, skilled nursing facility, home, or location determined appropriate by the individual receiving service**: There is no payment to the originating site for the originating site facility fee in these settings.

- **Critical access hospitals**: When the originating site is a critical access hospital outpatient agency, payment is separate from the cost-based payment methodology. To receive payment for the originating site facility fee, critical access hospitals must bill revenue code 0789 on the same line as HCPCS code Q3014.

- **FQHCs and RHCs**: When the originating site is an FQHC or RHC, bill for the originating site facility fee using HCPCS code Q3014. This is not considered an FQHC or RHC service and is not paid as an encounter.

- **Physicians’ or other health professional offices**: When the originating site is a physician’s office, bill for the originating site facility fee using HCPCS code Q3014.

- **Other settings**: When the originating site is an approved telemedicine site, bill for the originating site facility fee using HCPCS Q3014.

If a provider from the originating site performs a separately identifiable service for the client on the same day as telemedicine, documentation for both services must be clearly and separately identified in the client’s medical record.
Distant site (location of consultant)

What is a distant site?

A distant site is the physical location of the health care professional providing the health care service to an eligible agency client through telemedicine.

What services are covered using telemedicine?

The agency reimburses medically necessary covered services through telemedicine when the service is provided by a Washington Apple Health provider and is within their scope of practice.

How does the distant site bill the agency for the services delivered through telemedicine?

The payment amount for the professional service provided through telemedicine by the provider at the distant site is equal to the current fee schedule amount for the service provided. Submit claims for telemedicine services using the appropriate CPT or HCPCS code for the professional service.

Use place of service (POS) 02 to indicate that a billed service was furnished as a telemedicine service from a distant site.

The agency discontinued the use of the GT modifier for claims submitted for professional services (services billed on a CMS-1500 claim form, when submitting paper claims). Beginning January 1, 2018, distant site practitioners billing for telemedicine services under the Critical Access Hospital (CAH) optional payment method must use the GT modifier. See the agency’s ProviderOne Billing and Resource Guide for more information on submitting claims to the agency. See the agency’s Inpatient Hospital Services Billing Guide for more information on billing for services under the CAH optional payment method.

Follow CMS guidance for modifiers if Medicare is the primary insurance.

Add modifier 95 (via interactive audio and video telecommunications system) if the distant site is designated as a nonfacility.

Nonfacility providers must add modifier 95 to the claim to receive the nonfacility payment.
Store and Forward

Store and Forward is the transmission of medical information to be reviewed at a later time by a physician or practitioner at a distant site. A client’s medical information may include, but is not limited to, video clips, still images, x-rays, laboratory results, audio clips, and text. The physician or practitioner at the distant site reviews the case without the client present.

The agency pays for Store and Forward for teledermatology.

The agency pays for Store and Forward when all of the following conditions are met:

- It is associated with an office visit between the eligible client and the referring health care provider. The associated visit can be done in person or via asynchronous telemedicine and include one or more of the following types of information: video clips, still images, x-rays, MRIs, electrocardiograms and electroencephalograms, laboratory results, audio clips, and text. The visit results in a documented care plan that is communicated back to the referring provider.

- The transmission of protected health information is HIPPA compliant.

- Written informed consent is obtained from the client that store and forward technology will be used and who the consulting provider is.

If the consultation results in a face-to-face visit in person or via telemedicine with the specialist within 60 days of the Store and Forward consult, the agency does not pay for the store and forward consultation.

Teledermatology does not include single-mode consultations by telephone calls, images transmitted via facsimile machines, or electronic mail.

Teledermatology services provided via store and forward telecommunications system must be billed with modifier GQ.

Only the portion(s) rendered from the distant site are billed with modifier GQ. The sending provider bills as usual with the E&M and no modifier. The use of modifier GQ does not alter reimbursement for the CPT or HCPCS code billed.

**Note:** The originating site for Store and Forward is not eligible to receive an originating site fee.

The POS 02 must be used to indicate the location where health services are provided through store and forward technology. The POS 02 code does not apply to the originating site.

**Claims will be denied if a bill is submitted for Store and Forward services with POS code 02 but without the GQ modifier.**
The agency may perform a post-pay review on any claim to ensure the above conditions were met.

The following codes are covered for teledermatology:

Note: Teledermatology requires expedited prior authorization (EPA). See EPA 870001419.
Anesthesia

General anesthesia

• The agency requires providers to use anesthesia CPT® codes 00100-01999 to bill for anesthesia services paid with base and time units. Do not use the surgical procedure code with an anesthesia modifier to bill for the anesthesia procedure.

• The agency pays for CPT code 01922 for noninvasive imaging or radiation therapy when either of the following applies:
  ✓ The client is 17 years of age or younger.
  ✓ There are client-specific reasons why the procedure cannot be performed without anesthesia services. Documentation must be kept in the client's medical record.

• The agency pays providers for covered anesthesia services performed by one of the following:
  ✓ Anesthesiologist
  ✓ Certified registered nurse anesthetist (CRNA)
  ✓ Other providers who have a contract with the agency to provide anesthesia services  (See also Oral surgery)

• For each client, the anesthesia provider must do all of the following:
  ✓ Perform a pre-anesthetic examination and evaluation
  ✓ Prescribe the anesthesia plan
  ✓ Personally participate in the most demanding aspects of the anesthesia plan, including, induction and emergence
  ✓ Ensure that any procedures in the anesthesia plan that he or she does not perform are done by a qualified individual as defined in program operating instructions
  ✓ Monitor the course of anesthesia administration at frequent intervals
  ✓ Remain physically present and available for immediate diagnosis and treatment of emergencies
  ✓ Provide indicated postanesthesia care

• The anesthesia provider may direct no more than four anesthesia services concurrently. The anesthesia provider may not perform any other services while directing these services, other than attending to medical emergencies and other limited services as allowed by Medicare policy.
The anesthesia provider must document in the client's medical record that the medical direction requirements were met. Providers do not need to submit documentation with each claim to substantiate these requirements.

Anesthesia time begins when the anesthesia provider starts to physically prepare the client for the induction of anesthesia in the operating room area or its equivalent. When there is a break in continuous anesthesia care, blocks of time may be summed as long as there is continuous monitoring of the client within the blocks of time. An example of this includes, but is not limited to, the time a client spends in an anesthesia induction room or under the care of an operating room nurse during a surgical procedure. Anesthesia time ends when the anesthesia provider or surgeon is no longer in constant attendance (i.e. when the client can be safely placed under postoperative supervision).

Do not bill CPT codes 01953 or 01996 with an anesthesia modifier or with the time in the "units" field. The agency has assigned flat fees for these codes.

The agency does not adopt any ASA RVG codes that are not included in the CPT book. Bill all anesthesia codes according to the descriptions published in the current CPT book. When there are differences in code descriptions between the CPT book and the ASA RVG, the agency follows CPT code descriptions.

The agency does not pay providers for anesthesia services when these services are billed using the CPT surgery, radiology, and/or medicine codes with anesthesia modifiers. Continue to use the appropriate anesthesia modifier with anesthesia CPT codes.

**Exception:** Anesthesia providers may bill CPT pain management/other services procedure codes that are not paid with base and time units. These services are paid as a procedure using RBRVS methodology. Do not bill time in the unit field or use anesthesia modifiers.

When billing for sterilization, details regarding anesthesia are located in the Sterilization Supplemental Billing Guide.

When multiple surgical procedures are performed during the same period of anesthesia, bill the surgical procedure with the greatest base value, along with the total time in whole minutes.

When more than one anesthesia provider is present, the agency pays each provider 50% of the allowed amount. The agency limits payment in this circumstance to 100% of the total allowed payment for the service.

Providers must report the number of actual anesthesia minutes (calculated to the next whole minute) in the appropriate field on the claim. The agency calculates the base units.
Regional anesthesia

- Bill the agency the appropriate procedure code (e.g. epidural CPT code 62326) with no time units and no anesthesia modifier. The agency determines payment by using the procedure’s maximum allowable fee, not anesthesia base and time units.

- Local nerve block CPT code 64450 (other than digital and metacarpal) for subregional anatomic areas (such as the hand, wrist, ankle, foot and vagina) is included in the global surgical package and is not paid separately.

Moderate sedation

Moderate sedation is a drug induced depression of consciousness performed while the patient responds purposefully to verbal commands, either alone or accompanied by light tactile stimulation. Moderate sedation does not include minimal sedation, deep sedation, or monitored anesthesia care.

Providers must report the appropriate CPT or HCPCS code that describes the moderate sedation services provided. Moderate sedation services are provided in combination with and in support of a procedural service, consistent with CPT guidance.

Moderate sedation is covered when medically necessary.
Other

- Patient acuity does not affect payment levels. Qualifying circumstances (CPT codes 99100, 99116, 99135, and 99140) are considered bundled and are not paid separately.

- The agency follows Medicare’s policy of not paying surgeons for anesthesia services. Claims for anesthesia services with modifier 47 will be denied. Under Medicare's payment policy, separate payment for local, regional, or digital block or general anesthesia administered by the surgeon is not allowed. These services are considered included in the RBRVS payments for the procedure.

- When billing for anesthesia services using CPT unlisted anesthesia code 01999, providers must attach documentation (operative report) to their claim indicating what surgical procedure was performed that required the anesthesia, in order to receive payment. The agency will determine payment amount after review of the documentation.

Teaching anesthesiologists

The agency pays teaching anesthesiologists for supervision of anesthesiology residents as follows:

- When supervising one resident only, the teaching anesthesiologist must bill the agency the appropriate anesthesia procedure code with modifier AA. Payment to the teaching anesthesiologist will be 100% of the allowed amount.

- When supervising two or more residents concurrently, the teaching anesthesiologist must bill the agency the appropriate anesthesia procedure codes with modifier QK. Payment to the teaching anesthesiologist will be 50% of the allowed amount for each case supervised.
Physician fee schedule payment for services of teaching physicians

General rule: If a resident physician participates in providing a service in a teaching setting, physician fee schedule payment is made only if a teaching physician is present during the key portion of any service or procedure for which payment is sought.

- **Surgical, high-risk, or other complex procedures:** The teaching physician must be present during all critical portions of the procedure and immediately available to furnish services during the entire service or procedure.
  - **Surgery:** The teaching physician's presence is not required during opening and closing of the surgical field.
  - **Procedures performed through an endoscope:** The teaching physician must be present during the entire viewing.

- **Evaluation and management services:** The teaching physician must be present during the portion of the service that determines the level of service billed. (However, in the case of evaluation and management services furnished in hospital outpatient departments and certain other ambulatory settings, the requirements of 42 C.F.R. §415.174 apply.)

Anesthesia for dental

General anesthesia is allowed when provided by an anesthesiology provider in a hospital for dental admissions. To bill for dental anesthesia provided in a hospital, providers must use CPT anesthesia code 00170 with the appropriate anesthesia modifier.

See the agency’s [Dental-Related Services Billing Guide](#) for information on billing for office-based anesthesia for dental procedures.

**Note:** Bill the agency directly for dental anesthesia for all clients, including those enrolled in an agency-contracted managed care organization.
Physician-Related Services/Health Care Professional Services

Anesthesia for maternity
(WAC 182-531-0300(9))

- The agency pays a maximum of 6 hours (360 minutes) of anesthesia for labor and delivery time (CPT codes 01960, 01961, 01967 and 01968) per delivery, including multiple births and/or cesarean section delivery.

**Exception:** The following obstetrical anesthesia codes are not subject to the 6-hour (360 minute) limitation: CPT codes 01962-01966 or 01969.

- When billing more than one time-limited anesthesia code, the total time may not exceed 6 hours (360 minutes).

- Bill the applicable CPT anesthesia code with applicable modifier and time. To determine time for obstetric epidural anesthesia during normal labor and delivery and C-sections, time begins with insertion and ends with removal for a maximum of 6 hours per delivery.

- CPT codes 01968 and 01969 are anesthesia add-on codes to be used for cesarean delivery and cesarean hysterectomy following anesthesia given for a planned vaginal delivery. An additional base of 3 is allowed for 01968 and an additional base of 5 is allowed for 01969, in conjunction with the base of 5 for 01967. The time involved with each portion of the procedure should be reported with the appropriate CPT code.

**For example:** When a physician starts a planned vaginal delivery (CPT code 01967) and it results in a cesarean delivery (CPT code 01968), both of these procedures may be billed. However, if both an anesthesiologist and a certified registered nurse assistant (CRNA) are involved, each provider bills only for those services he/she performed. The sum of the payments for each procedure will not exceed the agency’s maximum allowable fee.

- Anesthesia time for sterilization is added to the time for the delivery when the two procedures are performed during the same operative session. If the sterilization and delivery are performed during different operative sessions, the time is calculated separately.
Anesthesia for radiological procedures

(WAC 182-531-0300 (2) and (7))

General anesthesia is allowed for radiological procedures for children and/or noncooperative clients when the medically necessary procedure cannot be performed unless the client is anesthetized.

Providers must use the anesthesia CPT code 01922 when providing general anesthesia for noninvasive imaging or radiation therapy. Do not bill the radiological procedure code (e.g., CPT code 71010) with an anesthesia modifier to bill for the anesthesia procedure. When using CPT code 01922 for noninvasive imaging or radiation therapy, one of the following must be met:

- The client must be 17 years of age or younger.
- A statement of the client-specific reasons why the procedure cannot be performed without anesthesia services must be kept in the client's medical record and made available to the agency on request.

Anesthesia payment calculation for services paid with base and time units

- The agency’s current anesthesia conversion factor is $21.20.
- Anesthesia time is paid using one minute per unit.
- Total anesthesia payment is calculated by adding the base value for the anesthesia procedure with the actual time. Bill time in total minutes only, rounded to the next whole minute. Do not bill the procedure’s base units.

The following table illustrates how to calculate the anesthesia payment:

<table>
<thead>
<tr>
<th>Payment Calculation</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>A.</td>
<td>Multiply base units by 15.</td>
</tr>
<tr>
<td>B.</td>
<td>Add total minutes to value from step A.</td>
</tr>
<tr>
<td>C.</td>
<td>Divide anesthesia conversion factor by 15, to obtain the rate per minute.</td>
</tr>
<tr>
<td>D.</td>
<td>Multiply total from Step B by the rate per minute in Step C.</td>
</tr>
</tbody>
</table>

Anesthesia conversion factor is based on 15-minute time units.
Surgery

(WAC 182-531-1700)

The agency requires prior authorization for selected surgical procedures. Providers must check the Physician-related services fee schedule for those surgical services that require either prior authorization (PA) or expedited prior authorization (EPA).

Smoking cessation

Nicotine use is a strong contraindication to spine surgeries. Patients undergoing cervical fusions and repeat fusions for radiculopathy are required to abstain from nicotine for four weeks before surgery. The agency covers smoking cessation which can include free counseling and prescription drugs. See Behavior change intervention - smoking cessation.

Pain management services

- Pain management services and selected surgical services that are commonly performed by anesthesiologists and CRNAs are not paid with anesthesia base and time units. These services are paid using the agency’s assigned maximum allowable fee for the procedure code.

- When billing for pain management and other services that are payable using the agency’s assigned maximum allowable fee, do not use anesthesia modifiers. The agency denies claims for these services billed with an anesthesia modifier.

- Two postoperative procedures for pain management are allowed during the same inpatient stay. Only one (1) unit may be billed per procedure. Do NOT bill time.
Pain management procedure codes

The listings shown below are not guaranteed to be all-inclusive and are provided for convenience purposes only.

The procedure codes listed in the following table with an asterisk (*) are limited to two (2) during the postoperative period while the client is admitted to the hospital. Do not bill modifier 59, XE, XS, XP, or XU with any of these procedure codes.

</table>

These codes are paid as a procedure using the agency’s maximum allowable fee, not with base units and time.
Interoperative or postoperative pain management

The agency covers interoperative and postoperative pain control using a spinal injection or infusion (CPT® 62320, 62322, 62324, and 62326). Expedited prior authorization (EPA) is required. See EPA #870001351. If the client does not meet the EPA criteria, prior authorization (PA) is required (see Prior authorization). Authorization requests must be submitted to the agency, not Comagine Health.

Registered Nurse First Assistants

Registered Nurse First Assistants (RNFAs) are allowed to assistant at surgeries within their scope of practice. Use modifier AS to bill the agency for these services.

New RNFA providers must meet all of the following criteria:

- Licensed in Washington State as a Registered Nurse in good standing
- Work under the direct supervision of the performing surgeon
- Hold current certification as a certified nurse operating room (CNOR)

Submit all of the following documentation to the agency along with the Core Provider Agreement:

- Proof of current certification as a CNOR from the Certification Board Perioperative Nursing

- Proof of successful completion of an RNFA program that meets the Association of Perioperative Registered Nurses (AORN) standards for RN first assistant education programs. (See Perioperative Standards and Recommended Practices, Denver, CO: AORN)

- Proof of allied health personnel privileges in the hospital where the surgeries are performed

- Proof of liability insurance
Billing/Payment

Bilateral procedures

- If a procedure is done bilaterally and is identified by its terminology as bilateral (e.g. CPT codes 27395 or 52290), do not bill the procedure with modifier 50.

- If a procedure is done bilaterally and is not identified by its terminology as a bilateral procedure, bill the procedure using modifier 50 on one line only or include modifier LT or RT on the separate lines when the surgical procedure is performed on both sides.

- Use modifiers LT and RT to indicate left and right for unilateral procedures.

Bundled services

The following procedure codes are bundled within the payment for the surgical procedure during the global period. Do not bill these codes separately unless one of the conditions on the following page exists:

<table>
<thead>
<tr>
<th>Procedure Code</th>
<th>Short Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>E/M Services</td>
<td></td>
</tr>
<tr>
<td>99211-99223</td>

<td>General ophthalmological services</td>
</tr>
</tbody>
</table>
Physician-Related Services/Health Care Professional Services

The E/M codes may be allowed if there is a separately identifiable reason for the additional E/M service unrelated to the surgery. In these cases, the E/M code must be billed with one of the following modifiers:

<table>
<thead>
<tr>
<th>Modifier</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>24</td>
<td>Unrelated E/M service by the same physician during a postoperative period (reason for the E/M service must be unrelated to the procedure)</td>
</tr>
<tr>

<td>Significant, separately identifiable E/M service by the same physician on the same day of a procedure (reason for the E/M service must be unrelated to the procedure)</td>
</tr>
<tr>
<td>57</td>
<td>Decision for surgery (only applies to surgeries with a 90-day global period)</td>
</tr>
<tr>
<td>79</td>
<td>Unrelated procedure or service by the same physician during the postoperative period</td>
</tr>
<tr>
<td></td>
<td>Professional inpatient services (CPT codes 99221-99223) are payable only during the global follow-up period if they are performed on an emergency basis (i.e. they are not payable for scheduled hospital admissions).</td>
</tr>
<tr>
<td></td>
<td>Bundled procedure codes are not payable during the global surgery payment period.</td>
</tr>
</tbody>
</table>

A provider (other than the surgeon) who provides all postoperative care (including all inpatient postoperative care) before discharge, must bill subsequent hospital care codes (CPT codes 99231-99233) for the inpatient hospital care, and the surgical code with modifier 55 for the post-discharge care. The surgeon must bill the surgery code with modifier 54.

- Providers who perform only the follow-up services for minor procedures performed in emergency agencies must bill the appropriate level E/M code. These services are not included in the global surgical payment.
- The provider who performs the emergency room service must bill for the surgical procedure without using modifier 54.
- Preoperative and postoperative critical care services provided during a global period for a seriously ill or injured client are not considered related to a surgical procedure and are paid separately when all of the following apply:
  - The client is critically ill or injured and requires the constant attendance of the provider.
  - The critical care is unrelated to the specific anatomic injury or general surgical procedure performed.
The client is potentially unstable or has conditions that could pose a significant threat to life or risk of prolonged impairment.

Bill the appropriate critical care codes with either modifier 24 or 25.

- The agency allows separate payment for:
  - The initial evaluation to determine need for surgery.
  - Preoperative visits that occur two or more days before the surgery. Use the specific medical diagnosis for the client. Do not use Z01.89.
  - Postoperative visits for problems unrelated to the surgery.
  - Postoperative visits for services that are not included in the normal course of treatment for the surgery.
  - Services of other providers, except when more than one provider furnishes services that are included in a global package (see modifiers 54 and 55).

Global surgery payment

Global surgery payment includes all the following services:

- The surgical procedure

- For major surgeries (90-day global period), preoperative visits (all sites of service) that occur the day before or the day of the surgery

- For minor surgeries (less than 90-day global period), preoperative visits (all sites of service) that occur on the day of surgery

- Services by the primary surgeon (all sites of service) during the postoperative period

- Postoperative dressing changes, including all of the following:
  - Local incision care and removal of operative packs
  - Removal of cutaneous sutures, staples, lines, wires, tubes, drains and splints;
  - Insertion, irrigation and removal of urinary catheters, routine peripheral IV lines, nasogastric and rectal tubes
  - Change and removal of tracheostomy tubes
• Additional medical or surgical services required because of complications that do not require additional operating room procedures

Note: Casting materials are not part of the global surgery policy and are paid separately.

Global surgery payment period

• The global surgery payment period applies to any provider who participates in the surgical procedure. These providers include:
  ✓ The surgeon.
  ✓ The assistant surgeon (modifiers 80, 81, or 82).
  ✓ Two surgeons (modifier 62).
  ✓ Team surgeons (modifier 66).
  ✓ Anesthesiologists and CRNAs.
  ✓ Physician assistant, nurse practitioner, or clinical nurse specialist for assistant at surgery (modifier AS).

Multiple surgeries

When multiple surgeries are performed on the same client, during the same operative session, the agency pays providers:

• 100% of the agency’s maximum allowable fee for the most expensive procedure; plus,
• 50% of the agency’s maximum allowable fee for each additional procedure.

To expedite payment of claims, bill all surgeries performed during the same operative session on the same claim. This includes secondary claims with payment by a primary commercial insurance and Medicare crossover claims.

If a partial payment is made on a claim with multiple surgeries, providers must adjust the paid claim. Refer to the ProviderOne Billing and Resource Guide, Key Step 6 under “Submit Fee for Service Claims to Medical Assistance” which addresses adjusting paid claims. Providers must adjust claims electronically.

Note: For second operative session performed on the same date of service (e.g., return to the operating room for a staged procedure), bill the second operative session on a separate claim. Add in the claim comments, “Operative reports attached” and submit claim to the agency with operative reports.
Other surgical policies

- Use modifiers 80, 81, and 82 to bill for an assistant surgeon. An assistant at major surgery is paid at 20% of the surgical procedure’s maximum allowable fee. The multiple surgery rules apply for surgery assistants.

- Use modifier AS for an assistant at surgery for PA-Cs, ARNPs, or Clinical Nurse Specialists – **do not use modifier 80**. An assistant at major surgery is paid at 20% of the surgical procedure’s maximum allowable fee.

- To expedite payment of claims, bill for the assistant surgeon on a different claim.

- A properly completed consent form must be attached to all claims for sterilization and hysterectomy procedures. For sterilizations, see the Sterilization Supplemental Billing Guide. For hysterectomies, see the hysterectomy section of this guide.

- Microsurgery **Add On CPT Code 69990**

  CPT indicates that CPT code 69990 is not appropriate when using magnifying loupes or other corrected vision devices. Also, CPT code 69990 is not payable with procedures where use of the operative microscope is an inclusive component of the procedure (i.e. the procedure description specifies that microsurgical techniques are used).

  The agency follows CCI guidelines regarding the use of the operating microscope. Do not bill CPT code 69990 in addition to procedures where the use of the operating microscope is an inclusive component.

- The agency pays for the following procedure codes which include breast removal and breast reconstruction for clients who have breast cancer or history of breast cancer, burns, open wound injuries, or congenital anomalies of the breast. If a client does not have one of these conditions, **the service requires prior authorization (PA)**.

- Removal of failed breast implants with the appropriate ICD diagnosis code T85.41XA or T85.42XA requires PA. The agency will pay to remove implants (CPT codes 19328 and 19330) but will not replace them if they were placed for cosmetic reasons.

- The agency requires EPA for reduction mammoplasties (CPT code 19318) and for mastectomy for gynecomastia for men (CPT code 19300). See Expedited prior authorization for more information.

</table>

- Salpingostomies (CPT codes 58673 and 58770) are payable only for a tubal pregnancy (ICD diagnosis code O00.1).

- Modifier 53 must be used when billing for incomplete colonoscopies (CPT code 45378, or HCPCS codes G0105 or G0121). Do not bill incomplete colonoscopies as sigmoidoscopies. Modifier 53 indicates that the physician elected to terminate a surgical procedure. Use of modifier 53 is allowed for all surgical procedures. Modifier 53 is a payment modifier when used with CPT code 45378 or HCPCS codes G0105 or G0121. It is informational only for all other surgical procedures.
Panniculectomy

Panniculectomy requires prior authorization (PA). Photographs and supporting clinical documentation must be submitted with PA requests.

All of the following must be present for panniculectomy:

- The pannus hangs at or below the level of the symphysis pubis
- The pannus causes a chronic and persistent skin condition (e.g., intertriginous dermatitis, panniculitis, cellulitis, or skin ulcerations) that is refractory to at least three months of medical treatment and associated with at least one episode of cellulitis requiring systemic antibiotics. In addition to good hygiene practices, all of the following treatments (unless contraindicated) have been tried and failed: topical antifungals, topical or systemic corticosteroids, and local or systemic antibiotics
- The pannus causes a functional deficit because of a severe physical deformity or disfigurement
- The surgery is expected to restore or improve the functional deficit
- The pannus is interfering with daily living

How do providers get paid for implantable devices?

To receive payment for implantable devices, providers must:

- Use HCPCS procedure codes C1713 or L8699.
- Bill for implantable devices on the same claim as the primary procedure code associated with the device. The primary procedure code must be covered on the agency’s Physician-related services/professional health care services fee schedule. Claims without a primary procedure code on the claim will be denied.
- Use HCPCS procedure codes C1713 or L8699 only once per claim. Bill multiple units if appropriate.
- Bill the agency the acquisition cost (AC). AC is the item’s cost minus shipping, handling, and taxes listed in a manufacturer’s invoice. Submit both the manufacturer’s invoice and the claim to the agency for procedures listed as AC.
If the implantable device is a necessary supply, not an “over and above” supply, CPT considers it inclusive to the procedure code billed, and the agency will not reimburse separately. For example, in order to place the tympanostomy tube, the tube is a necessary supply, not an “over and above” supply. Under CPT, this supply is included in the procedure code billed.

**Pre-/intra-/postoperative payment splits**

Pre-, intra-, and postoperative payment splits are made when modifiers 54, 55, 56, and 78 are used.

The agency has adopted Medicare's payment splits. If Medicare has not assigned a payment split to a procedure, the agency uses a payment split of 10%/80%/10% if modifiers 54, 55, 56, and 78 are used. For current information and updates on Medicare payment splits, see the Medicare physician fee schedule (MPFS).

**Auditory system**

**Tympanostomies**

The agency covers tympanostomies for clients diagnosed with acute otitis media or otitis media with effusion. Expedited prior authorization (EPA) is required. See EPA #870001382. If the client does not meet the EPA criteria, prior authorization (PA) is required (see Prior authorization).

**Cochlear implant services (clients age 20 and younger)**

*(WAC 182-531-0200(4) (c))*

Unilateral (CPT code 69930) and bilateral (CPT code 69930 with modifier 50) cochlear implantation require EPA (see EPA#870000423 for unilateral and EPA#870001365 for bilateral). If a client does not meet the EPA criteria, PA is required.

The agency covers replacement parts for cochlear devices through the agency’s Hearing Hardware Program only. The agency pays only those vendors with a current core provider agreement that supply replacement parts for cochlear implants and bone-anchored hearing aids (BAHA).

**Note:** The agency does not pay for new cochlear implantation for clients age 21 and older. The agency considers requests for removal or repair of previously implanted cochlear implants for clients age 21 and older when medically necessary. Prior authorization is required.
BAHA for clients age 20 and younger

Insertion or initial placement of BAHAs (CPT codes 69714-69718; HCPCS L8693) requires prior authorization (PA) (refer to Prior authorization). For billing the initial placement of soft headband BAHA, use the appropriate E/M procedure code and the appropriate hardware HCPCS code. See the agency’s Hearing hardware fee schedule.

**Note:** This information relates only to those clients NOT enrolled in an agency-contracted managed care organization (MCO). For clients enrolled in an agency-contracted MCO, refer to the coverage guidelines in the enrollee’s plan.

The procedure can be performed in an inpatient hospital setting or outpatient hospital setting.

The agency covers replacement parts or repair for BAHA through the agency’s Hearing Hardware Program only. The agency pays only those vendors that supply replacement parts for cochlear implants and BAHA who have a current Core Provider Agreement.

**Note:** The agency does not pay for a new BAHA for clients age 21 and older. The agency considers requests for removal or repair of previously implanted BAHA for clients age 21 and older when medically necessary. PA is required.

Bariatric surgeries

(WAC 182-531-1600 and WAC 182-550-2301)

Bariatric surgery requires prior authorization (PA) and must be performed in a facility that is accredited by the Metabolic and Bariatric Surgery Accreditation and Quality Improvement Program (MBSAQIP).

Clients enrolled in an agency-contracted managed care organization (MCO) may be eligible for bariatric surgery. Clients enrolled in an agency-contracted MCO must contact their MCO for information regarding the bariatric surgery benefit.

Clients age 21 through 59

The agency covers medically necessary bariatric surgery for clients 21 through 59 years of age in an approved hospital with a bariatric surgery program in accordance with WAC 182-531-1600. Prior authorization is required. To begin the authorization process, providers must fax the agency a completed Bariatric Surgery Request form 13-785. (See the agency’s Billers, providers, and partners webpage. See also Where can I download agency forms?)

Clients age 18 through 20

The agency covers medically necessary bariatric surgery for clients age 18 through 20 years:

- For the laparoscopic gastric band procedure (CPT code 43770).
- When prior authorized.
- When performed in an approved hospital with a bariatric surgery program.
- In accordance with WAC 182-531-1600.

Bariatric case management fee

The agency may authorize up to 34 units of a bariatric case management fee as part of the Stage II bariatric surgery approval. One unit of HCPCS code G9012 = 15 minutes of service. Prior authorization is required.

This fee is given to the primary care provider or bariatric surgeon performing the services required for Bariatric Surgery Stage II. This includes overseeing weight loss and coordinating and tracking all the necessary referrals, which consist of a psychological evaluation, nutritional counseling, and required medical consultations as requested by the agency.

Clients enrolled in an agency-contracted managed care organization (MCO) must contact their MCO for information regarding coverage of bariatric case management.
Cardiovascular system

Carotid artery stenting

The agency pays for extracranial carotid artery stenting:

- When performed in an agency-accredited facility as determined by CMS. For a list of accredited facilities, see CMS’s webpage for Carotid artery stenting facilities.

- For patients who are at high surgical risk for carotid endarterectomy (CEA) and who also have one of the following:
  - Symptomatic carotid artery stenosis >50%
  - Asymptomatic carotid artery stenosis ≥80%

Patients at high surgical risk for CEA are defined as having significant comorbidities and/or anatomic risk factors (i.e., recurrent stenosis and/or previous radical neck dissection), and would be poor candidates for CEA. Significant comorbid conditions include, but are not limited to the following:

- Congestive heart failure (CHF) class III/IV
- Left ventricular ejection fraction (LVEF) < 30%
- Unstable angina
- Contralateral carotid occlusion
- Recent myocardial infarction (MI)
- Previous CEA with recurrent stenosis
- Prior radiation treatment to the neck
- Other conditions that were used to determine patients at high risk for CEA in the prior carotid artery stenting trials and studies, such as ARCHER, CABERNET, SAPPHIRE, BEACH, and MAVERIC II

The agency does not pay for carotid artery stenting of intracranial arteries.
Implantable ventricular assist devices

Left ventricular assist devices (LVAD), right ventricular assist devices (RVAD), Bi-ventricular assist devices (BiVAD)

The agency may consider implantable ventricular assist devices with FDA approval to be medically necessary in the following situations:

• For use as a bridge to transplantation when both of the following requirements are met:
  ✓ The client is currently listed as a heart transplantation candidate or under evaluation to determine eligibility for heart transplantation.
  ✓ The client is not expected to live until a donor heart is available.

• For use in the post-cardiotomy setting in clients who are unable to be weaned off cardiopulmonary bypass.

• For use as a destination therapy when the following requirements are met:
  ✓ The client is at end-stage heart failure.
  ✓ There is documented ineligibility for human heart transplantation.
  ✓ The client has either of the following:
    ➢ New York Heart Association (NYHA) class III or IV* for at least 28 days and received at least 14 days support with an intraaortic balloon pump or is dependent on intravenous inotropic agents, with two failed weaning attempt
    ➢ NYHA class IV* heart failure for at least 60 days.

*NYHA Class III = marked limitation of physical activity; less than ordinary activity leads to symptoms

NYHA Class IV= inability to carry on any activity without symptoms; symptoms may be present at rest

Note: Destination therapy must be done at a CMS-approved VAD destination therapy facility.
Implantable ventricular assist devices battery replacement and accessories

- Battery replacement- 6 months
- Accessories- 1 year

Percutaneous ventricular assist devices (pVAD)

The agency considers a FDA-approved percutaneous left ventricular assist device (pVAD) medically necessary for the following indications:

- Providing short-term circulatory support in cardiogenic shock
- As an adjunct to percutaneous coronary intervention (PCI) in the following high-risk patients:
  - Clients undergoing unprotected left main or last-remaining-conduit PCI with ejection fraction less than 35 %
  - Clients with three vessel disease end diastolic ejection fraction less than 30 %

Pediatric VAD (age 0-18 years)

Agency considers FDA-approved pediatric VADs medically necessary when both of the following criteria are met:

- The child has documented end-stage left ventricular failure.
- An age and size-appropriate VAD will be used until a donor heart can be obtained.

Varicose vein treatment

Limitations of coverage

The following treatments for varicose veins are covered when the indications are present:

- Endovenous Laser Ablation (EVLA)
- Radiofrequency Ablation (RFA)
- Sclerotherapy
- Phlebectomy
Indications (required to be present):

- Demonstrated reflux in the affected vein
- Minimum of three months of symptoms of pain or swelling sufficient to interfere with instrumental activities of daily living, or presence of complications (e.g. ulceration, bleeding, recurrent thrombophlebitis)
- For tributary varicose veins, the previous two conditions must apply and must have a diameter larger than 3 mm.

Varicose vein treatment requires a medical necessity review by Comagine Health.

Noncovered indications

Pregnancy, active infection, peripheral arterial disease, and deep vein thrombosis (DVT) are noncovered.

Digestive system

Diagnostic upper endoscopy for GERD

Diagnostic upper endoscopy for adults with gastroesophageal reflux disease (GERD) may be considered medically necessary with one of the following conditions:

- Failure of an adequate trial of medical treatment to improve or resolve symptoms
- Presence of the following alarm symptoms:
  - Persistent dysphagia or odynophagia
  - Persistent vomiting of unknown etiology
  - Evaluation of epigastric mass
  - Confirmation and specific histological diagnosis of radiologically demonstrated lesions
  - Evaluation for chronic blood loss and iron deficiency anemia when an upper gastrointestinal source is suspected or when colonoscopy results are negative
  - Progressive unintentional weight loss
This policy does not apply to therapeutic endoscopy (e.g., removal of foreign body) or for clients with known esophageal or gastric varices or neoplasms, inflammatory bowel disease, familial adenomatous polyposis syndrome, biopsy confirmed Barrett’s esophagus, biopsy confirmed esophageal or gastric ulcers, history of upper gastrointestinal stricture.

</table>

**Closure of enterostomy**

Mobilization of splenic flexure (CPT code 44139) is not paid when billed with enterostomy procedures (CPT codes 44625 and 44626). CPT code 44139 must be used only in conjunction with partial colectomy (CPT codes 44140-44147).

**Fecal microbiota transplantation**

Fecal microbiota transplantation (FMT) is covered for patients with c. difficile infection who have undergone a failed course of appropriate antibiotic therapy.

FMT is not covered for treatment of inflammatory bowel disease.

The agency may perform a post-pay review on any claim to ensure the treatment met coverage conditions.

**FDA position update:**

The FDA announced that it would exercise enforcement discretion regarding FMT. As long as the treating physician obtains adequate informed consent from the patient or the patient’s legally authorized representative for the procedure, the FDA will not require submission of an Investigational New Drug Application (IND). Informed consent should include, at a minimum, a statement that the use of FMT products to treat c. difficile is investigational and include a discussion of its potential risks. The FMT product is not obtained from a stool bank. The FDA will exercise this discretion on an interim basis while the agency develops appropriate policies for the study and use of FMT products under IND.
Drug eluting or bare metal cardiac stents

The agency pays for drug eluting stents or bare metal cardiac stents when the technology criteria are met. This procedure requires EPA. See expedited prior authorization (EPA) criteria for EPA #870000422.

Cardiovascular

Angioscopy

The agency pays for one unit of angioscopy (CPT code 35400), per session.

Apheresis

Therapeutic apheresis (CPT codes 36511-36516) includes payment for all medical management services provided to the client on the date of service. The agency pays for only one unit of either CPT code per client, per day, per provider. Separate payment is not allowed for the following procedures on the same date that therapeutic apheresis services are provided, unless a significant and separately identifiable condition exists which is reflected by the diagnosis code and billed with modifier 25:

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

Do not bill apheresis management when billing for critical care time (CPT codes 99291-99292).
Extracorporeal membrane oxygenation therapy (ECMO)

Extracorporeal membrane oxygenation therapy (ECMO) is a covered benefit for the following clients:

- Clients with severe life-threatening, but potentially reversible, acute respiratory or cardiac dysfunction unresponsive to conventional management
- Clients who need a bridging therapy for pulmonary failure and who are on a pulmonary transplant list
- Clients who need a bridging therapy for cardiac failure and who are eligible for a ventricular assist device or cardiac transplantation

Note: All procedures must be provided at a facility participating in the Extracorporeal Life Support Organization (ELSO) case registry. To bill for ECMO services, the facility must have, available on request, documentation demonstrating current ELSO registration.

Transcatheter aortic valve replacement (TAVR)

Transcatheter aortic valve (TAVR) is considered medically necessary only for the treatment of severe symptomatic aortic valve stenosis when all of the following occur:

- Prior authorization (PA) must be obtained for the procedure.
- The NPI for each team surgeon must be provided for payment.
- The heart team and hospital must be participating in a prospective, national, audited registry approved by CMS.
- Conditions of the CMS Medicare national coverage determinations must be met.

Note: The agency does not pay for TAVR for indications not approved by the FDA, unless treatment is being provided in the context of a clinical trial and PA has been obtained.
Percutaneous pulmonary valve implantation (PPVI)

The agency will cover PPVI with prior authorization (PA) for adult patients and children. To obtain PA, the client:

- Must have right ventricular outflow tract (RVOT) dysfunction following prior RVOT repair.
- Must have conduits equal to or larger than 16 millimeters (mm) and equal to or smaller than 22 mm.
- Cannot undergo, or would like to delay, pulmonary valve replacement through open heart surgery.
- Must have one of the following dx codes:
  - I37.x* – Nonrheumatic pulmonary valve disorders
  - I37.0 – Nonrheumatic pulmonary valve stenosis
  - I37.1 – Nonrheumatic pulmonary valve insufficiency
  - I37.2 – Nonrheumatic pulmonary valve stenosis with insufficiency
  - I37.8 – Other nonrheumatic pulmonary valve disorders
  - I37.9 – Nonrheumatic pulmonary valve disorder, unspecified
  - Q21.3 – Tetralogy of Fallot
  - Q22.x* – Congenital malformations of pulmonary and tricuspid valves
  - Q22.0 – Pulmonary valve atresia
  - Q22.1 – Congenital pulmonary valve stenosis
  - Q22.2 – Congenital pulmonary valve insufficiency
  - Q22.3 – Other congenital malformations of pulmonary valve

*The x represents a range of codes; it is dependent on the specific diagnosis.*
Female genital system

Hysterectomies

(WAC 182-531-1550(10))

Prior authorization for hysterectomies is required regardless of the client’s age. Some hysterectomy procedures will require a medical necessity review by Comagine Health to establish medical necessity. However, the agency will use expedited prior authorization (EPA) criteria, instead of a medical necessity review, for one of the following clinical situations:

- Cancer
- Trauma

For more information, including the EPA numbers and specific criteria, refer to Expedited prior authorization (EPA).

- Hysterectomies are paid only for medical reasons unrelated to sterilization. A sterilization consent form is not required when a hysterectomy is performed.

- Federal regulations prohibit payment for hysterectomy procedures until a properly completed Hysterectomy Consent and Patient Information Form, 13-365 is received. See Where can I download agency forms? To comply with this requirement, surgeons, anesthesiologists, and assistant surgeons must obtain a copy of a completed agency-approved consent form to attach to their claim.

- ALL hysterectomy procedures require a properly completed agency-approved Hysterectomy Consent and Patient Information Form, 13-365, regardless of the client’s age or the ICD diagnosis. The form must be completed and signed by all parties prior to the procedure. See Where can I download agency forms?

- Submit the claim and completed agency-approved consent form (see the agency’s Billers, providers, and partners webpage).

Download the Hysterectomy Consent and Patient Information Form, 13-365. See Where can I download agency forms?

Sterilizations

(WAC 182-531-1550)

Information on sterilization, instructions on how to complete the sterilization consent form and how to become an approved hysteroscopic sterilization provider are available in the agency’s Sterilization Supplemental Billing Guide.
Integumentary system

Clarification of coverage policy for miscellaneous procedures

Male genital system

Circumcisions
(CPT codes 54150, 54160, and 54161)

Circumcisions are covered when billed with one of the following diagnoses:

- Phimosis (ICD diagnosis code N47.3 - N47.8)
- Balanoposthitis (ICD diagnosis code N47.0 – N47.8, N48.1)
- Balanitis Xerotica (ICD diagnosis code N48.0)

**Note:** The agency covers circumcisions (CPT codes 54150, 54160, and 54161) *only* with medical ICD diagnosis codes Phimosis, Balanoposthitis, or Balanitis Xerotica.

Musculoskeletal system

Artificial disc replacement

The agency pays for Cervical Disc Replacement when the technology criteria are met. These procedures require a medical necessity review by Comagine Health.

As of July 1, 2017, lumbar disk replacement is no longer a covered service.
Bone growth stimulators

The agency pays for bone growth stimulators (CPT codes 20974, 20975, and 20979) when the technology criteria are met. These procedures require prior authorization (PA) to establish medical necessity.

Bone morphogenetic protein 2 for lumbar fusion

The agency requires that the following criteria be met for the use of bone morphogenetic protein -2 (rhBMP-2):

- Clients are age 18 and older.
- It is used only in the lumbar spine.
- Either of the following:
  - ✓ It is used in primary anterior open or minimally invasive fusion at one level between L4 and S1.
  - ✓ Revision of lumbar fusion when autologous bone or bone marrow harvest is not technically feasible, or is not expected to result in fusion for clients who are diabetic, smokers or have osteoporosis.
- Lumbar fusion is not covered for clients with a diagnosis of degenerative disc disease.

**Note:** The agency requires a medical necessity review by Comagine Health for associated spinal fusion procedures. Include in the request for authorization:

- The anticipated use of BMP -2
- Either of the following:
  - ✓ The CPT code 20930.
  - ✓ Diagnosis code 3E0U0GB, insertion of recombinant bone morphogenetic protein.
Bone morphogenetic protein 7 for lumbar fusion

The agency will not pay for bone morphogenetic protein – 7 (rhBMP-7) as supporting clinical evidence has not been established.

Cervical spinal fusion arthrodesis

The agency pays for cervical spinal fusion for degenerative disc disease with limitations.

For clients 20 age and younger, the agency does not require prior authorization for these services. For clients age 21 and older, the agency requires a medical necessity review by Comagine Health.

Limitations of Coverage

Cervical spinal fusion is covered when all of the following conditions are met:

- Patients have signs and symptoms of radiculopathy
- There is advanced imaging evidence of corresponding nerve root compression
- Conservative (non-operative) care has failed

Cervical surgery for radiculopathy and myelopathy

The agency may cover cervical surgery for neck pain when there is subjective, objective and imaging evidence of radiculopathy or myelopathy. For clients age 20 and younger, the agency does not require prior authorization for the surgeries listed below. For clients age 21 and older the surgeries listed below require a medical necessity review by Comagine Health.

- ACDF anterior cervical discectomy with fusion
- TDA total disc arthroplasty
- Laminotomy
- Laminectionomy with or without a fusion
- Laminoplasty
- Foraminotomy
- Corpectomy
- Repeat surgeries

*For nicotine users: Abstinence from nicotine for at least four weeks before surgery as shown by two negative urine cotinine tests is highly recommended for all fusions and repeat fusions done for radiculopathy. This does not apply to progressive myelopathy or motor radiculopathy. Smoking cessation services are a covered benefit. See Smoking Cessation.
Endoscopy procedures

Endoscopy procedures are paid as follows:

- When multiple endoscopies from the same endoscopy group are performed on the same day, the procedure with the highest maximum allowable fee is paid the full amount. The second, third, etc., are paid at the maximum allowable amount minus the base endoscopy procedure's allowed amount.

- When multiple endoscopies from different endoscopy groups are billed, the multiple surgery rules detailed above apply.

- When payment for other procedures within an endoscopy group is less than the endoscopy base code, no payment is made.

- The agency does not pay for an E/M visit on the same day as the diagnostic or surgical endoscopy procedure unless there is a separately identifiable service unrelated to the endoscopy procedure. If it is appropriate to bill the E/M code, use modifier 25.

Epiphyseal

Epiphyseal surgical procedures (CPT codes 25450, 25455, 27185, 27475, 27477-27485, 27742, and 27730-27740) are allowed only for clients age 17 and younger.

Hip resurfacing

Hip resurfacing is not covered.

Hip surgery for femoroacetabular impingement syndrome

Medical necessity has not been established for hip surgery to treat Femoroacetabular Impingement Syndrome (FAI).
Knee arthroscopy for osteoarthritis

The agency does not recognize lavage, debridement and/or shaving of the knee (CPT code 29877) as medically necessary when these are the only procedure(s) performed during the arthroscopy. The agency does not reimburse for CPT code 29877 under these circumstances. The agency will pay for arthroscopies done for other diagnostic and therapeutic purposes. This requires a medical necessity review by Comagine Health.

Microprocessor-controlled lower limb prostheses

Microprocessor-controlled lower limb prostheses (MCP) for the knee is considered medically necessary for both of the following conditions:

- Functional levels 3 or 4, (level 2 is under agency review)
- Experienced user, (exceptions are under agency review)

MCP must be used with manufacturers’ specifications. Prior authorization is required.

For additional information and authorization requirements, see the agency’s Prosthetic and Orthotic Devices Billing Guide.

Note: Microprocessor-controlled lower limb prostheses (MCP) for the feet and ankle are not considered medically necessary.
Osteochondral allograft and autograft transplantation

The agency does **not** recognize osteochondral allograft or autograft transplantation for joints other than the knee as medically necessary. Osteochondral allograft or autograft transplantation in the knee joint may be considered **medically necessary**.

Osteochondral allograft or autograft transplantation is considered medically necessary under all of the following conditions:

- The client is younger than 50 years of age.
- There is no presence of malignancy, degenerative arthritis or inflammatory arthritis in the joint.
- There is a single focal full-thickness articular cartilage defect that measures less than 3 cm in diameter and 1 cm in bone depth on the weight bearing portion of the medial or lateral femoral condyle.

The following codes are covered and require a [medical necessity review by Comagine Health](#) for clients age 21 and older:

<table>

</tbody>
</table>

Percutaneous kyphoplasty, vertebroplasty and sacroplasty

The agency does **not** recognize percutaneous kyphoplasty, vertebroplasty and sacroplasty as medically necessary for relief of pain and improvement of function for spinal fractures.
Sacroiliac joint fusion

Based upon review of evidence provided by the HTCC, the agency does not consider minimally invasive and open sacroiliac joint fusion procedures to be medically necessary for clients age 21 and older with chronic sacroiliac joint pain related to degenerative sacroiliitis or sacroiliac joint disruption, or both. This decision does not apply to any of the following:

- Low back pain of other etiology
- Sacroiliac joint pain related to recent major trauma or fracture
- Infection
- Cancer
- Sacroiliitis associated with inflammatory arthropathies

For these issues, see the fee schedule for coverage.

Robotic assisted surgery

Although robotic assisted surgery (RAS) may be considered medically necessary, the agency does not pay separately for HCPCS code S2900 and reimburses only for the underlying procedure.

When billing for the underlying procedure, the agency requests billing providers to include RAS on the claim in order to track utilization and outcome. The agency will monitor RAS through retrospective auditing of billing and the review of operative reports.

Nervous system

Discography

The following procedures require prior authorization from the agency for clients age 21 and older. Prior authorization is not required for clients age 20 and younger.
Discography for clients with chronic low back pain and uncomplicated lumbar degenerative disc disease is considered not medically necessary. Conditions which may be considered for authorization by the agency include:

- Radiculopathy.
- Functional neurologic deficits (motor weakness or EMG findings of radiculopathy).
- Spondylolisthesis (> Grade 1).
- Isthmic spondylolysis.
- Primary neurogenic claudication associated with stenosis.
- Fracture, tumor, infection, inflammatory disease.
- Degenerative disease associated with significant deformity.

### Facet neurotomy, cervical and lumbar

Facet neurotomy requires a [medical necessity review by Comagine Health](https://www.comaginehealth.com). The agency has instructed Comagine Health to use Washington State’s Labor & Industries (L&I) [Medical Treatment Guidelines](https://www.lni.wa.gov) (MTG) to establish medical necessity with the following exceptions:

A trial of conservative treatment modalities have been tried and failed for a minimum of three months, instead of six months, including all of the following:

- Medications: NSAIDS, muscle relaxants, corticosteroids, antidepressants, anticonvulsants or opiates
- Activity modification
- Physical therapy

### Lumbar radiculopathy

The agency pays for surgery for lumbar radiculopathy or sciatica when criteria are met. For clients age 20 and younger, the agency does not require prior authorization for these services. For clients age 21 and older, the agency requires a [medical necessity review by Comagine Health](https://www.comaginehealth.com).
Limitations of coverage

The agency covers open discectomy or microdiscectomy with or without endoscopy (lumbar laminectomy, laminotomy, discectomy, foraminotomy) with all the following conditions:

- For clients age 21 and older with lumbar radiculopathy with subjective and objective neurologic findings that are corroborated with an advanced imaging test (i.e., Computed Tomography (CT) scan, Magnetic Resonance Imaging (MRI), or myelogram)
- There is a failure to improve with a minimum of 6 weeks of nonsurgical care, unless progressive motor weakness is present

The agency does not cover minimally invasive procedures that do not include laminectomy, laminotomy, or foraminotomy, including but not limited to:

- Energy ablation techniques
- Automated Percutaneous Lumbar Discectomy (APLD)
- Percutaneous laser
- Nucleoplasty

The agency does not consider these minimally invasive procedures to be medically necessary.

Implantable infusion pumps or implantable drug delivery systems

The agency pays for CPT codes 62350, 62351, 62360, and 62361 when medically necessary and only for the indications below:

- Cancer pain
- Spasticity

**Note:** Implantable drug delivery systems (Infusion Pump or implantable drug delivery system) are not considered medically necessary for treatment of chronic pain not related to cancer.

Spinal cord stimulation for chronic neuropathic pain

The agency does not recognize spinal cord stimulation for chronic neuropathic pain as medically necessary. The agency will consider requests for other diagnoses. CPT codes 64575, 64580, 64581, 64585 and 64595 require prior authorization (PA) through the agency.
Spinal injections for diagnostic or therapeutic purposes (outpatient)

The agency requires medical necessity reviews for spinal injection procedures, including diagnostic selective nerve root block through Comagine Health, which uses an established online questionnaire. (See Comagine Health in this guide for additional information.)

Diagnostic selective nerve root block

The agency requires a medical necessity review for the diagnostic selective nerve root block through Comagine Health.

Sacroiliac joint injections

For this procedure, the following policy applies:

- The patient has chronic sacroiliac joint pain.
- There must be a failure of at least 6 weeks of conservative therapy.
- These injections must be done with fluoroscopic or CT guidance

Restrictions:

- There must be no more than 1 injection without medical record documentation of at least 30% improvement in function and pain, when compared to the baseline documented before the injections started.
- Requests for more than 2 injections require clinical review.

Therapeutic/diagnostic epidural injections in the cervical, thoracic or lumbar spine

Therapeutic/diagnostic epidural injections in the cervical, thoracic or lumbar spine are considered medically necessary for the treatment of chronic pain when the following criteria are met:

- Radicular pain (such as, back pain radiating below the knee, with or without positive straight leg raise) with at least 6 weeks of failed conservative therapy
- Radiculopathy (such as motor weakness, sensory low or reflex changes) with at least 2 weeks of failed conservative therapy
- The medical record with objective documentation of patient’s baseline level of function and pain
Physician-Related Services/Health Care Professional Services

- An injection that is given with anesthetic agent and/or steroid agent
- An injection that is transforaminal, translaminar or interlaminar
- Use of fluoroscopic, CT or ultrasound guidance

Restrictions:

- Prior authorization is required for the first injection, which will cover the second injection, if indicated. Additional authorization is required for the third injection.
- No more than 2 injections (2 dates of service) may be given without medical record documentation of a 30% improvement in function and pain when compared to the baseline documented before the injections started. Function and pain must be measured and documented on a validated instrument.
- There is a maximum of 3 injections within 6 months, and no more than 3 injections per a 12-month period.
- There should be no more than 2 vertebral levels and only one side injected (right or left) per date of service.
- The MRI/CT scan is not a prerequisite for authorization of an epidural injection.

Transcutaneous electrical nerve stimulation (TENS) device

The agency does not cover TENS devices, related supplies and services for independent home-use.

Vagus nerve stimulation (VNS) (WAC 182-531-0200(4)(h))

The agency considers VNS for the treatment of epilepsy as medically necessary only for management of epileptic seizures in clients age 12 and older who have a medically refractory seizure disorder. VNS requires EPA. See EPA# 870001554 for clinical criteria. If clients do not meet the EPA criteria, PA is required.

VNS procedures can be performed in an inpatient hospital or outpatient hospital setting.

The agency does not pay for VNS and related procedures for a diagnosis of depression (CPT 64553-64565, 64590-64595, 95970, 95974, and 95975).

VNS for the treatment of depression has no evidence to support coverage.
Skin substitutes

The agency considers skin substitutes to be medically necessary for wound treatment under the following conditions:

- For the treatment of partial and full-thickness diabetic foot ulcers of greater than 4 weeks duration that have not adequately responded to standard ulcer therapy (including adequate off-loading and debridement) and that extend through the dermis but without tendon, muscle, or bone exposure. Standard wound therapy is defined to include all the following:
  - Assessment of vascular status with treatment as indicated
  - Nutritional optimization
  - Optimal blood glucose control
  - Adequate debridement
  - Moist dressing
  - Off-loading
  - Treatment of infection
  - Smoking cessation intervention when applicable.

- For the treatment of chronic, non-infected, partial and full-thickness venous stasis ulcers that have failed standard ulcer therapy of greater than 4 weeks using regular dressing changes and therapeutic compression

- For the treatment of burns, including partial-thickness and full-thickness burns

- For the treatment of wounds related to dystrophic epidermolysis bullosa when standard wound therapy has failed

- For use in breast reconstruction surgery as a part of breast cancer treatment

Limitations

- The agency covers a maximum of 10 applications per year.
- The agency does not cover reapplication if the initial treatment episode is not successful.
Sleep apnea

Surgical treatment for sleep apnea

The agency requires prior authorization for the following surgical treatment for obstructive sleep apnea (OSA) or upper airway resistance syndrome (UARS) when billed with diagnosis code G47.33 (obstructive sleep apnea) or G47.30 (unspecified sleep apnea):

<table>
<thead>
<tr>

</tbody>
</table>

See also Sleep medicine testing.

Urinary systems

Collagen implants

The agency pays for CPT code 51715 and HCPCS codes L8603, L8604 and/or L8606 only when the appropriate diagnosis code N36.42 or N36.43 (Intrinsic sphincter deficiency) is used. See Urinary tract implants for limitations.
Indwelling catheter

- Separate payment is allowed for insertion of a temporary, indwelling catheter when it is used to treat a temporary obstruction and is performed in a physician's office.

- Bill for the insertion of the indwelling catheter using CPT code 51702 or 51703.

- The agency pays providers for insertion of an indwelling catheter only when performed in an office setting.

- Insertion of an indwelling catheter is bundled when performed on the same day as a major surgery.

- Insertion of an indwelling catheter is bundled when performed during the postoperative period of a major surgery.

Urinary tract implants
(CPT code 51715)

Prior to inserting a urinary tract implant, the provider must:

- Have urology training in the use of a cystoscope and must have completed a urinary tract implant training program for the type of implant used.

- Document that the client has shown no incontinence improvement through other therapies for at least 12 months prior to collagen therapy.

- Administer and evaluate a skin test for collagen sensitivity (CPT code 95028) over a four-week period prior to collagen therapy. A negative sensitivity must be documented in the client's record.

Refer to urinary tract implants covered by the agency. All services provided and implant codes must be billed on the same claim.

Urological procedures with sterilizations in the description

These procedures may cause the claim to stop in the agency's payment system and trigger a manual review as a result of the agency's effort to remain in compliance with federal sterilization consent form requirements. If the surgery is not being done for the purpose of sterilization, or the sterilizing portion of the procedure is not being performed, a sterilization consent form is not required. However, one of the following must be noted in the Claim Note section of the claim:

- Not sterilized
- Not done primarily for the purpose of sterilization
Radiology Services

(WAC 182-531-1450)

Radiology services – general limits

- The agency does not pay radiologists for after-hours service codes.
- Claims must have the referring provider’s national provider identifier (NPI) in the appropriate field on the claim.
- The following services are not usually considered medically necessary and may be subject to post-pay review:
  - X-rays for soft tissue diagnosis
  - Bilateral X-rays for a unilateral condition
  - X-rays in excess of two views

  **Note:** The agency does not pay for radiology services with diagnosis code Z01.89. Providers must bill the appropriate medical ICD diagnosis code.

Radiology modifiers for bilateral procedures

- Bill the procedure on two separate lines using modifier 50 on one line only. In addition, include **modifier LT or RT** on the separate lines when the radiological procedure is performed on both sides.
- Do not use modifier 50, LT, or RT if the procedure is defined as bilateral.
Breast, mammography

Mammograms

The agency has adopted the National Cancer Institute (NCI) recommendations regarding screening mammograms. For clients age 40 and over, one annual screening mammogram is allowed per calendar year. Screening mammograms, with or without tomosynthesis, for clients age 39 and younger require prior authorization.

The agency covers digital breast tomosynthesis when performed with a screening mammography for clients age 40 through 74 who are candidates for screening mammography. One annual screening is allowed per calendar year. See the agency’s Physician-related/professional services fee schedule for specific code details.

Diagnostic mammograms are a covered service when they are medically necessary. Digital breast tomosynthesis is covered when medically necessary and performed with diagnostic mammography.

Diagnostic radiology (diagnostic imaging)

Multiple procedure payment reduction (MPPR)

The agency applies the multiple payment model outlined by the Centers for Medicare and Medicaid Services (CMS) for multiple diagnostic radiology procedures. See MLN Matters® Number: MM6993.

The MPPR applies to the technical component (TC) of certain diagnostic imaging procedures when billed for the same client, on the same day and session, by the same billing provider.

The MPPR applies to:

- TC only services.
- TC portion of global services for the procedures with multiple surgery value of ‘4’ in the Medicare Physicians Fee Schedule Database.

The MPPR does not apply to:

- The professional component (PC).
- The PC portion of global services.
The agency’s payment is as follows:

- A full payment for the highest priced TC radiology code on the claim
- A 50% reduction applied to each subsequent TC radiology code on the same claim

Which procedures require a medical necessity review by Comagine Health?

(WAC 182-531-1450)

The agency requires prior authorization for selected procedures.

The agency and Comagine Health have contracted to provide web-based submittal for utilization review services to establish the medical necessity of selected procedures. Comagine Health conducts the review of the request to establish medical necessity, but does not issue authorizations. Comagine Health forwards its recommendations to the agency for final authorization determination. See Medical necessity review by Comagine Health for additional information.

*Required for outpatient hospital claims
Reminder for outpatient hospitals: When requesting a medical necessity review by Comagine Health for a breast MRI, use the 7xxxx CPT® code. However, when billing Medicaid, use the “C” HCPCS code.

Advanced imaging services do **NOT** require prior authorization when billed with either of the following place of service (POS):

- (POS) 21 (Inpatient Hospital)
- (POS) 23 (Emergency Room)

When billing for a professional component performed in a POS other than POS 21 or 23 such as a radiologist’s office, but the image was performed on a client who was in the ER or an inpatient setting, use modifier 26 and enter “ER ordered service,” or “client inpatient,” or “client referred from ER,” or “professional read only for image not done by our facility,” or “professional services only for pre-authorized service” in the **Claim Note** section of the electronic claim.

A radiologist who performed a professional interpretation, referred to as a “read-only,” on an outpatient advanced image must be added to the agency’s authorization record to receive payment.

- Contact the agency at 800-562-3022, ext. 52018, to add the reading radiologist’s NPI to the record.

  - **OR** –

- Submit a written request for an NPI add/update as follows:

  ✓ Go to Document submission cover sheets.

  ✓ Scroll down to PA (Prior Authorization) Pend Forms.

  ✓ When the form appears on the screen, insert the Authorization Reference number (ProviderOne authorization number) in the space provided and press enter to generate the barcode on the form.

**Note:** Professionals who do “read-only” when another facility ordered and performed the advanced imaging, **but did not obtain prior authorization**, must add: “Professional read only for image not done by our facility” in the comments field of the claim.
Imaging for rhinosinusitis

Imaging of the sinus with computed tomography (CT) or magnetic resonance imaging (MRI) is covered for rhinosinusitis when one of the following is true:

- The client is experiencing the following “red flags:”
  - Swelling of orbit
  - Altered mental status
  - Neurological findings
  - Signs of meningeal irritation
  - Severe headache
  - Signs of intracranial complication, including, but not limited to:
    - Meningitis
    - Intracerebral abscess
    - Cavernous sinus thrombosis
  - Involvement of nearby structures, including, but not limited to periorbital cellulitis

- Two of the following persistent symptom for more than 12 weeks AND medical therapy has failed:
  - Facial pain-pressure-fullness
  - Mucopurulent drainage
  - Nasal obstruction (congestion)
  - Decreased sense of smell

- Needed for surgical planning.

Magnetic resonance imaging (MRI) of the sinus is covered when the criteria in this section are met AND the client is younger than age 18 or is pregnant.

**Note:** Expedited prior authorization is required.
- Use EPA number 870001422 or 870001553 for MRI of the sinus.
- Use EPA number 870001423 for CT imaging of the sinus.

Repeat scanning (CT or MRI) is covered for “red flags” or surgical planning only.
Computed tomography angiography (CTA)

CPT code 75574 is restricted to place of service 19, 21, 22, 23.

The agency pays for CTA when:

• Using computed tomography machines with 64-slice or better capability

  AND

• The following medical necessity criteria are met:

  ✓ Patients have low to intermediate risk of coronary artery disease

  ✓ Investigation of acute chest pain is conducted in an emergency department or hospital setting

The agency will not pay for CTA when:

• Using a CT scanner that uses lower than 64-slice technology

  OR

• The procedure is not medically necessary as follows:

  ✓ Patients are asymptomatic or at high risk of coronary artery disease.

  ✓ Investigation of coronary artery disease is conducted outside of the emergency department or hospital setting.

Contrast material

(WAC 182-531-1450(2))

Contrast material is not paid separately, except in the case of low-osmolar contrast media (LOCM) used in intrathecal, intravenous, and intra-arterial injections for clients with one or more of the following conditions:

• A history of previous adverse reaction to contrast material, with the exception of a sensation of heat, flushing, or a single episode of nausea or vomiting

• A history of asthma or allergy

• Significant cardiac dysfunction including recent or imminent cardiac decompensation, severe arrhythmia, unstable angina pectoris, recent myocardial infarction, and pulmonary hypertension
• Generalized severe debilitation

• Sickle cell disease

To bill for LOCM, use the appropriate HCPCS procedure codes: Q9951, Q9965, Q9966 or Q9967. The brand name of the LOCM and the dosage must be documented in the client's record.

Consultation on X-ray examination

When billing a consultation, the consulting physician must bill the specific X-ray code with modifier 26 (professional component).

For example: The primary physician would bill with the global chest X-ray (CPT code 71020), or the professional component (CPT code 71020-26), and the consulting physician would bill only for the professional component of the chest X-ray (e.g., CPT code 71020-26).

Coronary artery calcium scoring

The agency does not recognize computed tomography, heart, without contrast material, with quantitative evaluation of coronary calcium as medically necessary.

Prior authorization from the agency is required for CPT code 75571.

Magnetic resonance imaging (MRI)

• Check the Physician’s related services fee schedule for authorization requirements for MRIs.

• The agency is implementing the Washington State Health Technology Clinical Committee (HTCC's) decision that uMRI (upright MRI) is experimental and investigational; therefore, according to WAC 182-501-0165, uMRI is a "D" level evidence that is not supported by any evidence regarding its safety and efficacy. Medicaid will not reimburse unless one of the following criteria is met:
  ✓ The client must have a humanitarian device exemption.
  ✓ There must be a local Institutional Review Board protocol in place.

• The agency covers fetal MRIs under CPT code 74712.
Portable X-rays

- Portable X-ray services furnished in a client’s home or nursing facility and payable by the agency are limited to the following:
  - Skeletal films involving extremities, pelvis, vertebral column, or skull
  - Chest or abdominal films that do not involve the use of contrast media
  - Diagnostic mammograms

- Bill for transportation of X-ray equipment as follows:
  - R0070 - If there is only one patient, bill one unit.
  - R0075 - If there are multiple patients, **bill one unit** per individual client’s claim with one of the following modifiers, as appropriate. **Bill using a separate claim for each Medicaid client seen.** The agency pays the fee for procedure code R0075 divided by the number of clients, as outlined by the modifiers in the following table:

<table>
<thead>
<tr>
<th>Procedure Code</th>
<th>Short Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>R0070</td>
<td>Transport portable x-ray</td>
</tr>
<tr>
<td>R0075-UN</td>
<td>Transport port x-ray multipl-2 clients seen</td>
</tr>
<tr>
<td>R0075-UP</td>
<td>Transport port x-ray multipl-3 clients seen</td>
</tr>
<tr>
<td>R0075-UQ</td>
<td>Transport port x-ray multipl-4 clients seen</td>
</tr>
<tr>
<td>R0075-UR</td>
<td>Transport port x-ray multipl-5 clients seen</td>
</tr>
<tr>
<td>R0075-US</td>
<td>Transport port x-ray multipl-6 or more clients seen</td>
</tr>
</tbody>
</table>

**Note:** The fee for HCPCS code R0075 is divided among the clients served, as outlined by the modifiers indicated above. If no modifiers are used for HCPCS code R0075, the code will be denied. Do not bill HCPCS code R0070 in combination with HCPCS code R0075.

Ultrasound screening for abdominal aortic aneurysm
(CPT 76706)

The agency covers ultrasound screening for abdominal aortic aneurysm only when both of the following apply:

- Billed with diagnosis code Z13.6 (special screening for other and unspecified cardiovascular conditions)
• A client meets at least one of the following conditions:
  ✓ Has a family history of an abdominal aortic aneurysm
  ✓ Is a male who is between 65 and 75 years old and has smoked at least 100 cigarettes in his lifetime

Virtual colonoscopy or computed tomographic colonography

The agency does not recognize computed tomographic colonography for routine colorectal cancer screening as medically necessary.

<table>
<thead>
<tr>
<th>CPT Code</th>

</tr>
<tr>
<td>74263</td>
<td>Ct colonography screening</td>
</tr>
</tbody>
</table>

Screening and monitoring tests for osteopenia/osteoporosis

The agency covers bone mineral density testing and repeat testing with dual x-ray absorptiometry (DXA) with limitations. These tests require expedited prior authorization. See EPA #870001363 and EPA #870001364 for criteria. If the EPA criteria are not met, prior authorization is required.

**Note:** Serial monitoring is not covered once treatment for osteoporosis has begun.

Functional neuroimaging for primary degenerative dementia or mild cognitive impairment

The agency does not cover functional neuroimaging for primary degenerative dementia or mild cognitive impairment.
Diagnostic Ultrasound

Obstetrical ultrasounds

Routine ultrasounds for average risk pregnant women are considered medically necessary with limitations. The agency considers two ultrasounds per average risk singleton pregnancy as medically necessary. The agency pays for:

- One routine ultrasound in the first trimester (less than 13 weeks gestational age) for the purpose of:
  - Identifying fetal aneuploidy
  - Anomaly
  - Dating confirmation

- One routine ultrasound for the purpose of anatomy screening between 16 and 22 weeks gestation.

The agency does not pay for:

- Ultrasounds when provided solely for the determination of gender.
- Third trimester ultrasounds unless a specific indication has developed or the pregnancy is considered high-risk.

The above conditions and limitations do not apply to multiple gestation pregnancies and/or fetus with aneuploidy or known anomaly.

**Note: Additional ultrasounds are subject to postpayment review.**

Nuclear medicine

The agency requires prior authorization for selected procedures.

Which procedures require a medical necessity review from the agency?
(CPT code 78459)

The agency requires prior authorization for myocardial PET imaging for metabolic evaluation.
Which procedures require a medical necessity review by Comagine Health?

(WAC 182-531-1450)

The agency and Comagine Health have contracted to provide web-based submittal for utilization review services to establish the medical necessity of selected procedures. Comagine Health conducts the review of the request to establish medical necessity, but does not issue authorizations. Comagine Health forwards its recommendations to the agency for final authorization determination. See Medical necessity review by Comagine Health for additional information.

Advanced imaging services do NOT require PA when billed with either of the following place of service (POS):

- (POS) 21 (Inpatient Hospital)
- (POS) 23 (Emergency Room)

When billing for a professional component performed in a POS other than POS 21 or 23 such as a radiologist’s office, but the image was performed on a client who was in the ER or an inpatient setting, enter “ER Ordered Service” or “client inpatient” in the Claim Note section of the electronic claim.

A radiologist who performed a professional interpretation, referred to as a “read-only”, on an outpatient advanced image must be added to the agency’s authorization record to receive payment. Contact the agency at 800-562-3022, ext. 52018, to add the reading radiologist’s NPI to the record.

Note: Professionals who do read-only when another facility ordered and performed the advanced imaging, but did not obtain prior authorization, must add: “Professional read only for image not done by our facility” in the claim note of the claim.
Radiopharmaceutical diagnostic imaging agents

- When performing nuclear medicine procedures, the agency allows separate payment for radiopharmaceutical diagnostic imaging agents. To see if a procedure code is covered, see the Professional administered drugs fee schedule.

- The agency allows the following CPT codes for radiopharmaceutical therapy without PA: CPT codes 79101, 79445, and 79005.

Positron emission tomography (PET) scans for lymphoma

- Based upon review of evidence provided by the Health Technology Clinical Committee (HTCC), the agency in most cases considers positron emission tomography (PET) scans (i.e., PET with computed tomography or PET/computed tomography) for lymphoma to be medically necessary under the following conditions:

  ✓ Initial staging scan. Covered followed by up to three (3) scans per active occurrence of lymphoma.

  ➢ When used to assess a response to chemotherapy, scans should not be done any sooner than 3 weeks after completion of any chemotherapy cycle, except for advanced stage Hodgkin’s lymphoma, after four (4) cycles of ABVD chemotherapy.

  ➢ When used to assess response to radiation therapy, scans should not be done any sooner than 8 weeks after completion of radiation or combined chemotherapy and radiation therapy.

  ✓ Relapse. Covered when relapse is suspected in the presence of clinical symptoms or other imaging finding suggestive of recurrence.

The agency does not consider PET scans to be medically necessary when done for surveillance.
Nuclear medicine - billing

When billing the agency for nuclear medicine, the multiple surgery rules are applied when the coding combinations listed below are billed:

- For the same client, on the same day, by the same physician or by more than one physician of the same specialty in the same group practice

- With other codes that are subject to the multiple surgery rules, not just when billed in the combinations specified below:
  - CPT code 78306 (bone imaging; whole body) and CPT code 78320 (bone imaging; SPECT)
  - CPT code 78802 (radionuclide localization of tumor; whole body), CPT code 78803 (tumor localization; SPECT), and CPT code 78804 (radiopharmaceutic localization of tumor requiring 2 or more days)
  - CPT code 78806 (radionuclide localization of abscess; whole body) and 78807 (radionuclide localization of abscess; SPECT)

Radiation oncology

Intensity modulated radiation therapy (IMRT)

IMRT is considered medically necessary:

- To spare adjacent critical structures to prevent toxicities within client’s expected life span
  - See EPA #870001374.
  - To meet EPA criteria, any cancer that would require radiation to focus on the head/neck/chest/abdomen meets the EPA criteria. Clinical documentation is required that states which critical structure is spared. For example: “Critical structure spared is bladder.” IMRT is considered medically necessary when there is a concern about damage to surrounding critical structures with the use of external beam or 3D conformal radiation therapy.

- For undergoing treatment in the context of evidence collection/submission of outcome data - Prior authorization required
Proton beam radiation therapy

The following procedure codes for proton beam radiation therapy require prior authorization (PA):

<table>
<thead>
<tr>
<th>Procedure Code</th>
<th>Short Description</th>
<th>PA</th>
</tr>
</thead>
<tbody>
<tr>
<td>77520</td>
<td>Proton trmt simple w/o comp</td>

<td>Proton treatment complex</td>
<td>Yes</td>
</tr>
<tr>
<td>S8030</td>
<td>Tantalum ring application</td>
<td>Yes</td>
</tr>
</tbody>
</table>

Limitations of Coverage

Proton beam therapy is a **covered benefit for the following conditions**:

- Ocular cancers
- Pediatric cancers (e.g., medulloblastoma, retinoblastoma, Ewing’s sarcoma)
- Central nervous system tumors
- Other non-metastatic cancers when the patient has had prior radiation in the expected treatment field with contraindication to all other forms of therapy

Stereotactic radiation surgery

Stereotactic Radiation Surgery (SRS) for Central Nervous System (CNS) primary and metastatic tumors require prior authorization.

The agency pays for SRS for adults and children when both of the following criteria are met:

- Patient functional status score (i.e., Karnofsky score) is greater than or equal to 50
- Evaluation includes multidisciplinary team analysis (e.g., tumor board), including surgical input

Stereotactic body radiation therapy

Stereotactic Body Radiation Therapy (SBRT) is covered for adults and children for the following conditions only:

- For cancers of spine/paraspinal structures
- For inoperable non-small cell lung cancer, stage 1

Evaluation includes multidisciplinary team analysis (e.g., tumor board), including surgical input.
Tumor treating fields

Based upon review of evidence provided by the Health Technology Clinical Committee (HTCC), the agency in most cases does not consider tumor treating fields to be medically necessary for treatment of newly diagnosed glioblastoma multiforme, recurrent glioblastoma multiforme, and for treatment of other cancers.
Pathology and Laboratory

Certifications

Independent laboratories - certification

Independent laboratories must be certified according to Title XVII of the Social Security Act (Medicare) to receive payment from Medicaid. The agency pays laboratories for Medicare-approved tests only.

Reference labs and facilities - CLIA certification

All reference (outside) labs and facilities performing laboratory testing must have a Clinical Laboratory Improvement Amendment (CLIA) certificate and identification number on file with the agency in order to receive payment from the agency.

To obtain a CLIA certificate and number, or to resolve questions concerning a CLIA certification, call (206) 361-2805 or write to:

DOH - Office of Laboratory Quality Assurance
1610 NE 150th Street
Shoreline, WA 98155
(206) 361-2805 (phone); (206) 361-2813 (fax)
Anatomic pathology

Pap smears

For professional services related to Pap smears, refer to Cancer screens.

- Use CPT® codes 88147-88154, 88164-88167, and HCPCS P3000-P3001 for conventional Pap smears.

- The agency pays for thin layer preparation CPT codes 88142-88143 and 88174-88175. The agency does not pay providers for HCPCS codes G0123-G0124 and G0141-G0148. The agency pays for thin layer Pap smears at Medicare's payment levels. Thin layer preparation and conventional preparation CPT codes cannot be billed in combination.

- Use CPT code 88141 in conjunction with one of the following codes: 88142-88143, 88164-88167, or 88174-88175.

- Use the appropriate medical diagnosis if a condition is found.

- The agency pays providers for cervical cancer screening according to nationally recognized clinical guidelines in conjunction with an office visit focused on family planning.

- For clients on the Family Planning Only – Pregnancy Related program or the Family Planning Only program (formerly referred to as TAKE CHARGE), see the Family Planning Billing Guide.
Screening exams

Cancer screens
(HCPCS codes G0101, G0103-G0105, G0121-G0122, G0297 and CPT codes 82270 and 81519)

The agency covers the following cancer screenings:

- Cervical or vaginal
- Colonoscopies
- Colorectal
- Lung (low dose CT)
- Oncology genomic testing (breast)
- Pelvic/breast exams
- Prostate
- PSA testing
- Screening sigmoidoscopies

<table>
<thead>

*Note: Per Medicare guidelines, the agency’s payment is reduced when billed with modifier 53 (discontinued procedure).
Disease organ panels--automated multi-channel tests

The agency pays for CPT lab panel codes 80047, 80048, 80050, 80051, 80053, 80061, 80069, and 80076. The individual automated multi-channel tests are:

</table>

- Providers may bill a combination of panels and individual tests not included in the panel. Duplicate tests will be denied. Providers may not bill for the tests in the panel separately per the National Correct Coding Initiative (NCCI).
- Each test and/or panel must be billed on a separate line.
- All automated/nonautomated tests must be billed on the same claim when performed for a client by the same provider on the same day.
Fetal fibronectin

The semiquantitative measurement of fetal fibronectin may be considered as medically necessary with all of the following conditions:

- Singleton or multiple gestation pregnancies
- Intact amniotic membranes
- Cervical dilation <3 cm
- Signs or symptoms suggestive of preterm labor (such as, regular uterine contractions, cramping, abdominal pain, change in vaginal discharge, vaginal bleeding, pelvic pressure, or malaise)
- Sampling that is performed between 24 weeks 0 days and 34 weeks 6 days of gestation
- Results available in less than 4 hours, for the test results to impact immediate care decisions for the pregnant client

The use of fetal fibronectin assays is considered to be not medically necessary for the following indications:

- No symptoms of preterm birth (there is no clinical evidence that treating women with no labor symptoms or high risk for premature delivery benefits mother or baby)
- Routine screening or determination of risk of preterm delivery in asymptomatic women
- Outpatient tests and the woman awaits test results at home
- Monitoring of asymptomatic women at high-risk for preterm labor (PTL)
- Women not requiring induction due to likelihood of delivery within 24 to 48 hours
- Ruptured membranes or advanced cervical dilation (3 cm or more)
- Imminent birth

For all other indications, there is insufficient evidence to permit conclusions on efficacy and net health outcomes.

Noninvasive prenatal diagnosis of fetal aneuploidy using cell-free fetal nucleic acids in maternal blood (NIPT)

The agency pays for noninvasive prenatal diagnosis of fetal aneuploidy using cell-free fetal nucleic acids in maternal blood (NIPT) (CPT code 81507 and 81420) when it is medically necessary. Expedited prior authorization (EPA) is required. See EPA#870001344.

Vitamin D screening and testing
(CPT code 82306, 82652)

Routine Vitamin D screening for the general population (CPT codes 82306, 82652) is not considered medically necessary.

Vitamin D testing (25-hydroxyvitamin D, calcidiol, CPT code 82306) may be considered medically necessary for the following conditions:

- Chronic kidney disease stage 3 or greater
- End stage renal disease
- Evaluation of hypo- or hypercalcemia
- Hypocalcemia and hypomagnesemia of newborn
- Hypophosphatemia
- Hypoparathyroidism
• Intestinal malabsorption including:
  ✓ Blind loop syndrome
  ✓ Celiac disease
  ✓ Pancreatic Steatorrhea

• Secondary hyperparathyroidism

• Hypervitaminosis D

• Osteomalacia

• Osteopenia

• Rickets

• In the setting of other laboratory or imaging indicators of vitamin D deficiency for:
  ✓ Calculus of kidney or ureter
  ✓ Chronic liver disease in the absence of alcohol dependency
  ✓ Protein-calorie malnutrition

Vitamin D testing (1,25-dihydroxyvitamin D, calcitriol, CPT 82652) may be considered medically necessary as a second tier test for the following conditions:

• Disorders of calcium metabolism
• Familial hypophosphatemia
• Fanconi syndrome
• Hypoparathyroidism or hyperparathyroidism
• Vitamin D resistant rickets
• Tumor induced osteomalacia
• Sarcoidosis

**Lead toxicity screening**

Lead toxicity screening is mandatory at age 12 months and 24 months for all children, including children enrolled in an agency-contracted managed care organization, regardless of lead exposure risk.

Additionally, all children between age 36 months and 72 months must receive a lead toxicity screening if they have not been tested previously.
Drug Testing for Substance Use Disorder

The agency pays for drug screens when both of the following apply:

- The screen is medically necessary and ordered by a physician as part of a medical evaluation.
- The drug or alcohol screen is required to assess suitability for medical tests or treatment being provided by the physician.

Drug screening for medication assisted treatment (MAT)

Urine and blood drug assay tests are covered for Washington Apple Health clients receiving medication assisted treatment (MAT) for substance use disorders under the following conditions. Other biological testing is noncovered.

For presumptive testing, use the following codes:

- 80305, 80306, and 80307 (Only one of the three presumptive codes may be billed per client per day.)
- Up to 24 presumptive tests will be reimbursed per client, per year

For definitive drug testing, use the following G codes:

- G0480, G0481, G0482 and G0483 (Only one of the four definitive G codes may be billed per client per day.)
- Up to 16 definitive tests (follow-up tests to presumptive tests) will be reimbursed per client, per year

If additional tests are needed, providers can submit a limitation extension request to the agency. For definitive testing, the unit used to determine the appropriate definitive G code to bill is “drug class.” Each drug class may only be used once per day in determining the appropriate definitive G code to bill. Drug classes are listed in the CPT Manual. The CPT Manual may be consulted for examples of individual drugs within each class. Codes G0481, G0482 and G0483 are reimbursed at the same rate.
The following testing codes are no longer covered:

- G0431, G0434
- HCPCS codes G6030 through G6058
- 80309 – 80377

For substance use disorder, the agency will not reimburse for serial quantitative testing to monitor levels of drug metabolites.

(Monitoring for patients who are on chronic opioid therapy for the treatment of chronic noncancer pain should follow the Agency Medical Director’s Group 2015 Interagency guideline on prescribing opioids for pain, Appendix D).

(These guidelines do not pertain to urine drug testing required for employment, emergency department evaluation or those related to criminal justice requirements).

For monitoring patients receiving (MAT), drug assay tests are considered medically necessary in the following instances:

Screening, presumptive, or in office testing with point of care immunoassays (IA) is considered medically necessary to:

- Confirm the use of prescribed substances
- Identify the presence of illicit or non-prescribed substances
- Prior to starting a patient on MAT for a substance use disorder

Confirmatory or definitive testing with gas chromatography–mass spectrometry (GCMS) or liquid chromatography-tandem mass spectrometry (LCMS) is considered medically necessary to interpret the findings on presumptive testing when there is a discrepancy between patient report, the test and what is being prescribed:

For example:

- To confirm the presence of an unexpected or non-prescribed drug identified by an IA
- To confirm that a prescribed drug or its metabolite not present on the IA are in fact being taken

In addition, confirmatory testing should only be ordered and performed on a patient/drug specific basis. Clinical documentation must support why a particular drug or class was tested for and document a follow up plan based on the test results.
Note: The agency requires prior authorization for the use of presumptive or confirmatory testing panels that test substances or drug groups not listed below. Clinical documentation supporting the rationale for the particular tests being ordered is required.

Serial quantitative monitoring of drugs or drug metabolite levels is not considered medically necessary.

Periodic reviews of ordering patterns will be performed to look for and contact practices that appear to be outliers compared to their peers.

Additional information when prescribing (Suboxone®)

The provider must have FDA approval to prescribe buprenorphine/naloxone (Suboxone®) for opioid use disorders (OUD).

A provider must be categorized as a High Complexity MTS/CLIA by the Office of Washington Laboratory Assurance, or be accredited as High Complexity MTS/CLIA by COLA/College of American Pathologists Joint Commission if confirmatory testing is performed at the site of practice.

Enter the following information on the claim forms: “Certified bupren provider” in the Claim Note section of the electronic claim

More information regarding CLIA certification can be found on the U.S. Food and Drug Administration website.

For treatment of chronic noncancer pain, the agency has adopted the Agency Medical Directors’ Group (AMDG) drug screening guidelines outlined in the AMDGs’ interagency guidelines. For more information, go online to Interagency guidelines on opioid dosing for chronic non-cancer pain.

<table>
<thead>
<tr>
<th>Risk Category</th>
<th>Recommended Urine Drug Testing Frequency</th>
</tr>
</thead>
<tbody>
<tr>
<td>Low Risk by Opiate Risk Tool (ORT)</td>
<td>Periodic (e.g., up to one time per year)</td>
</tr>
<tr>
<td>Moderate Risk by ORT</td>
<td>Regular (e.g., up to two times per year)</td>
</tr>
<tr>
<td>High Risk by ORT or opioid doses &gt;120 MED/d</td>
<td>Frequent (e.g., up to three times per year)</td>
</tr>
<tr>
<td>Aberrant Behavior (lost prescriptions, multiple requests for early refill, opioids from multiple providers, unauthorized dose escalation, apparent intoxication)</td>
<td>At the time of visit (address aberrant behavior in person, not by telephone)</td>
</tr>
</tbody>
</table>
The agency does not pay for either of the following:

- Routine drug screening panels
- Monitoring for program compliance in either a residential or outpatient drug or alcohol treatment program

**Note:** Labs must offer single drug testing. Drug screening must be medically indicated and the reason for the specific drug screening must be documented in the client record. Lab slips must be signed by the prescribing provider.

When monitoring a client for drug/alcohol use, refer the client to a Division of Behavioral Health and Rehabilitation (DBHR)-approved program for evaluation and treatment. Clients served by these programs may receive drug/alcohol screening according to an established treatment plan determined by their treating provider.

For clients in the DBHR-contracted methadone treatment programs and pregnant women in DBHR-contracted treatment programs, drug screens are paid through a contract issued to one specific laboratory by DBHR, not through the agency.

**Buprenorphine when used for pain control**

The agency pays for drug screens when both of the following apply:

- They are medically necessary and ordered by a physician as part of a medical evaluation.

- The drug and/or alcohol screens are required to assess suitability for medical tests or treatment being provided by the physician.

See the agency’s [Physician-related fee schedule](#) for covered drug screening codes.
Enhanced reimbursement rate for Medication Assisted Treatment (MAT)

The agency pays an enhanced reimbursement using the Medicare rate when Medication Assisted Treatment (MAT) is part of the visit for selected evaluation and management (E/M) codes.

The purpose of this enhanced reimbursement is to encourage providers to obtain and use a Drug Addiction Treatment Act of 2000 Waiver (DATA 2000 Waiver) to increase patient access to evidence-based treatment using medications for opioid use disorder.

To receive this enhancement, providers must:

- Have a DATA 2000 Waiver.
- Currently use the waiver to prescribe MAT to clients with opioid use disorder.
- Bill for treating a client with a qualifying diagnosis for opioid use disorder.
- Provide opioid-related counseling during the visit.
- Bill with EPA # 870001537.

The agency pays one enhanced reimbursement per client per day. The agency does not pay the enhanced reimbursement if the client receives services for opioid use disorder through an opioid treatment program facility licensed by the Department of Health.

Providers are subject to post-pay review to ensure the EPA criteria for the rate enhancement are met. If the requirements are not met at the time of service, recoupment of payment may occur.

To view the MAT fee schedule, see the agency’s Provider billing guides and fee schedules webpage.

Immunology

HIV testing

The agency pays providers for HIV testing as recommended in the CDC guidelines.
Targeted TB testing with interferon-gamma release assays

Targeted TB testing with interferon-gamma release assays may be considered medically necessary for **clients age 5 and older** for one of the following conditions:

- History of positive tuberculin skin test or previous treatment for TB disease
- History of vaccination with BCG (Bacille Calmette-Guerin)
- Recent immigrants (within 5 years) from countries that have a high prevalence of tuberculosis
- Residents and employees of high-risk congregate settings (homeless shelters, correctional facilities, substance abuse treatment facilities)
- Clients with an abnormal chest X-ray (CXR) consistent with old or active TB
- Clients undergoing evaluation or receiving TNF alpha antagonist treatment for rheumatoid arthritis, psoriatic arthritis, or inflammatory bowel disease
- Exposure less than 2 years before the evaluation **AND** client agrees to remain compliant with treatment for latent tuberculosis infection if found to have a positive test

The tuberculin skin test is the preferred method of testing for children under the age of 5.

<table>
<thead>
<tr>

</thead>
<tbody>
<tr>
<td>86480</td>
<td>Tb test cell immun measure</td>
</tr>
<tr>
<td>86481</td>
<td>Tb ag response t-cell susp</td>
</tr>
</tbody>
</table>

Providers must follow the agency’s expedited prior authorization (EPA) process to receive payment for targeted TB testing. See EPA **#870001325** in EPA Criteria Coding List.

Molecular Pathology Tests

Genetic testing may be considered as medically necessary to establish a molecular diagnosis of an inheritable disease when all of the following are met:

- The client displays clinical features, or is at direct risk of inheriting the mutation in question (pre-symptomatic) based on family history, an analysis of genetic relationships and medical history in the family.
- Diagnostic results from physical examination, pedigree analysis, and conventional testing are inconclusive.
• The clinical utility of the test is documented in the authorization request, including how the test results will guide decisions concerning disease treatment, management, or prevention; AND these treatment decisions could not otherwise be made in the absence of the genetic test results.

• Clients receive pre- and post-test genetic counseling from a qualified professional when testing is performed to diagnose or predict susceptibility for inherited diseases.

Genetic testing is considered not medically necessary if any of the above criteria are not met. Refer to the fee schedule for agency coverage of Tier 1 and Tier 2 molecular pathology procedures.

**Genomic microarray**

**Genomic microarray is considered medically necessary under the conditions outlined below.**

The agency requires *prior authorization (PA)* when using CPT codes 81228 and 81229 for genomic microarray to diagnose genetic abnormalities in children for any one of the following:

- Significant dysmorphic features or congenital anomalies
- Global developmental delay or clinical diagnosis of intellectual disability
- Clinical diagnosis of autism spectrum disorder

AND all of the following:

- Targeted genetic testing, if indicated, is negative
- Clinical presentation is not specific to a well-delineated genetic syndrome
- The results of testing could impact the clinical management
Note: The agency uses the following definitions:

Clients younger than age 5:

**Global developmental delay (GDD)** is usually used for children age 5 or younger. The American Academy of Pediatrics defines children with GDD as having significant delay in two or more developmental domains, including gross or fine motor skills, speech/language, cognitive, social/personal, and activities of daily living.

Clients older than age 5:

**Intellectual disability (ID)** is a life-long disability diagnosed at or after age 5 when intelligence quotient (IQ) testing is considered valid and reliable. The *Diagnostic and Statistical Manual of Mental Disorders (DSM-V)* defines patients with ID as having an IQ of less than 70 onset during childhood, and impairment in more than two areas of adaptive behavior.

**Companion diagnostic tests**

The agency considers companion diagnostic and certain pharmacogenetic tests to be medically necessary and may require prior authorization.

The agency does not consider pharmacogenetic testing for patients treated with oral anticoagulants to be medically necessary.

The agency does **not cover** pharmaceutical tests (with CPT codes 81225, 81226, 81227, and 81291) when the primary diagnosis is one of the following:

- Depression
- Mood disorders
- Psychosis
- Anxiety
- Attention deficit hyperactivity disorder (ADHD)
- Substance use disorder
Organ and disease-oriented panels

Automated multi-channel tests - payment

For individual automated multi-channel tests, providers are paid on the basis of the total number of individual automated multi-channel tests performed for the same client, on the same day, by the same laboratory.

- When all the tests in a panel are not performed, each test must be billed as a separate line item on the claim.
- When there are additional automated multi-channel tests not included in a panel, each additional test must be billed as a separate line item on the claim.
- Bill any other individual tests as a separate line item on the claim.

Payment calculation for individual automated laboratory tests is based on the total number of automated multichannel tests performed per day, per patient. Payment for each test is based on Medicare’s fees multiplied by the agency’s fiscal year laboratory conversion factor.

For example:

If five individual automated tests are billed, the payment is equal to the internal code’s maximum allowable fee.

If five individual automated tests and a panel are billed, the agency pays providers separately for the panel at the panel’s maximum allowable. Payment for the individual automated tests, less any duplicates, is equal to the internal code’s maximum allowable fee.

If one automated multi-channel test is billed, payment is at the individual procedure code or internal code’s maximum allowable fee, whichever is lower. The same applies if the same automated multi-channel test is performed with modifier 91.

Disease organ panel - nonautomated multi-channel

Organ and disease panels (CPT codes 80055 and 80074) do not include automated multi-channel tests. If all individual tests in the panel are not performed, payment is the individual procedure code maximum allowable fee or billed charge, whichever is lower.
The nonautomated multi-channel tests are:

**Gene expression**

The agency covers gene expression profile testing with conditions for breast or prostate cancer. See [EPA](#870001386, #870001420, #870001545, #870001546, #870001547, #870001548, #870001549, #870001550, and #870001551) for details. The agency considers only the listed tests as medically necessary.

The agency does not cover gene expression profile testing for multiple myeloma or colon cancer.
Breast and ovarian genetic testing

The agency requires prior authorization (PA) for all breast and ovarian cancer genetic testing. Effective for dates of service on and after October 1, 2019, if the client meets expedited prior authorization (EPA) criteria, providers may use EPA #870001603. If the client does not meet the EPA criteria, providers must follow the full PA process (see Prior Authorization).

Billing

Billing for laboratory services that exceed the lines allowed

- Electronic submitters are allowed 50 lines per claim. Use additional claim forms if the services exceed the lines allowed. Enter the statement “Additional services” in the Claim Note section when billing electronically. Total each claim separately.

- If the agency pays a claim with one or more automated/nonautomated lab tests, providers must bill any additional automated/nonautomated lab tests for the same date of service as an adjusted claim. Refer to Key Step 6 of the “Submit Fee for Service Claims to Medical Assistance” in the ProviderOne Billing and Resource Guide which addresses adjusting paid claims. Currently, providers may adjust claims electronically in ProviderOne. Make sure the claim is adjusted with the paid automated/nonautomated lab tests using the comment "additional services."

Clinical laboratory codes

Some clinical laboratory codes have both a professional component and a technical component. If performing only the technical component, bill with modifier TC. If performing only the professional component bill with modifier 26. Laboratories performing both the professional and the technical components must bill the code without a modifier. See Laboratory physician interpretation codes with both a technical and professional component.

Coding and payment policies

- Pathology and laboratory services must be provided either by a pathologist or by technologists who are under the supervision of a physician.

- The agency expects independent laboratories to bill hospitals for the technical component of anatomic pathology services furnished to hospital inpatients and outpatients. To prevent duplicate payment, the agency will not pay independent laboratories if they bill Medicaid for these services.

- An independent laboratory and/or hospital laboratory must bill using its NPI for any services performed in its facility.
Physicians must bill using their NPI for laboratory services provided by their technicians under their supervision.

The agency pays for one blood draw fee (CPT codes 36415-36416 or 36591) per day.

The agency pays for one catheterization for collection of a urine specimen (HCPCS code P9612) per day.

Complete blood count (CPT code 85025) includes the following CPT codes: 85004, 85007, 85009, 85013, 85014, 85018, 85027, 85032, 85041, 85048, 85049, and G0306. Complete blood count (CPT code 85027) includes the following CPT codes: 85004, 85008, 85013, 85014, 85018, 85032, 85041, 85048, 85049, and G0307.

CPT codes 81001-81003 and 81015 are not allowed in combination with urinalysis procedure 81000.

CPT codes 86812-86822 are limited to a maximum of 15 tests total for human leukocyte antigens (HLA) typing per client, per lifetime. Prior authorization is required for more than 15 tests.

Do not bill with modifier 26 if the description in CPT indicates professional services only.

Payment for lab tests includes handling, packaging and mailing fee. Separate payment is not allowed.

Laboratories must obtain PA from the ordering physician, or agency-approved genetic counselor to be paid for certain genetic testing requiring PA. All genetic testing must be billed with the appropriate genetic testing modifier.

CPT code 83037 [hemoglobin glycosylated (A1C)] does not require PA when performed in a physician’s office; however, it can be billed only once every three months.

Note: Laboratory claims must include the provider’s national provider identifier (NPI) and an appropriate medical diagnosis code and PA if applicable. The ordering provider must give the appropriate medical diagnosis code, prior authorization number, and modifier, if applicable, to the performing laboratory at the time the tests are ordered. The agency does not pay a laboratory for procedures billed using ICD diagnosis codes Z00.00, Z01.812, or Z01.89 as a primary diagnosis. For lab services use the appropriate diagnosis for the service(s) provided.

CPT code 87999 can be used for billing the monogram Trofile test for AIDS patients when physicians are prescribing the drug Selzentry®. The agency pays By Report for CPT code 87999.
• For outpatient hospital laboratory services such as therapeutic blood levels and electrocardiograms and related professional services that are denied by managed care because the services were ordered or referred by a BHO, providers must do both of the following:

  ✓ Put “Referred by the BHO” in the Claim Note section of the claim.
  ✓ Include the managed care denial with their claim when billing the agency.

### Laboratory physician interpretation procedure codes

The following codes are clinical laboratory procedure codes for which separate payment for interpretations by laboratory physicians may be made. The actual performance of the tests is paid for under the Physician-related/professional services fee schedule. Modifier TC must not be used with these procedure codes. The total RVUs for laboratory physician interpretation codes include values for physician work, practice expense, and malpractice expense.

### Laboratory codes requiring modifier and PA clarification

Laboratory claims must include an appropriate medical diagnosis code, modifier, and PA, if applicable. The ordering provider must give the appropriate medical diagnosis code, modifier, and PA number, if applicable, to the performing laboratory at the time the tests are ordered. The agency does not pay for laboratory procedures billed using the appropriate ICD diagnosis codes Z00.00, Z01.812, or Z01.89. For lab services, use the appropriate diagnosis for the service(s) that was provided.

### Laboratory modifiers

**Modifier QP**

Modifier QP indicates documentation is on file showing that the laboratory test(s) was ordered individually or ordered as a CPT-recognized panel. The agency recognizes this modifier as informational only. This modifier is not appropriate to use for billing repeat tests or to indicate the test was not done as a panel.
**Modifier 90**

**Reference (Outside) Laboratory:** When a laboratory sends a specimen to a reference (outside) laboratory, the referring laboratory may bill for the reference laboratory (pass-through billing) by adding modifier 90 to the laboratory procedure code. The reference laboratory NPI must be entered in the *Referring Provider Information* section on the claim.

**Modifier 91**

**Repeat Clinical Laboratory Diagnostic Test**

When it is necessary to repeat the same laboratory test on the same day for the same client to obtain subsequent (multiple) test results, use modifier 91. Otherwise, the claim will be denied as a duplicate.

Do not use this modifier when tests are rerun:

- To confirm initial results.
- Due to testing problems with specimens or equipment.
- For any reason when a normal, one-time, reportable result is all that is required.
- When there are standard procedure codes available that describe the series of results (e.g., glucose tolerance test, evocative/suppression testing, etc.).

**Laboratory services referred by CMHC or DBHR-contracted providers**

When a community mental health center (CMHC) or DBHR-contracted providers refer clients enrolled in an agency managed care plan for laboratory services, the laboratory **must bill the agency directly**. All of the following conditions apply:

- The laboratory service is medically necessary.
- The laboratory service is directly related to the client's mental health or alcohol and substance abuse.
- The laboratory service is referred by a CMHC or DBHR-contracted provider who has a core provider agreement with the agency.
- The laboratory must bill with a mental health, substance abuse, or alcohol abuse diagnosis.
To bill for laboratory services, laboratories must put the CMHC or DBHR-contracted referring provider National Provider Identifier (NPI) number in the “Referring Provider Information” section of the claim. CMHC and DBHR-contracted services are excluded from the agency’s managed care contracts.

**STAT laboratory charges**

When the laboratory tests listed on the following page are performed on a STAT basis, the provider may bill **HCPCS code S3600** (STAT laboratory request).

- Payment is limited to one STAT charge per episode (not once per test).
- Tests must be ordered STAT and payment is limited to only those that are needed to manage the client in a true emergency.
- The laboratory report must contain the name of the provider who requested the STAT.
- The medical record must reflect the medical necessity and urgency of the service.

**Note:** "STAT" must be clearly indicated by the provider and must be documented in the laboratory report and the client’s record. Tests generated from the emergency room do not automatically justify a STAT order. Use **HCPCS code S3600** with the procedure codes on the following page.

The STAT charge is paid only with the following tests:

Allergen and clinical immunology

Allergen immunotherapy

(WAC 182-531-0950(10))

Subcutaneous allergen immunotherapy may be medically necessary for the following conditions in children and adults:

- Allergic rhinitis, conjunctivitis, or allergic asthma
- History of systemic reaction to Hymenoptera

And the client:

- Has symptoms of allergic rhinitis and/or asthma after natural exposure to the allergen OR
- Has life-threatening allergy to insect stings AND
- Has a skin test and/or serologic evidence of IgE-mediated antibody to the allergen AND
- Must have tried/failed attempt at allergen avoidance and pharmacologic therapy, or the client has unacceptable side effects with pharmacologic therapy

And:

- The prescribing physician must be a board certified allergist AND
- Immunotherapy injections must be administered in a setting that permits the prompt recognition and management of adverse reactions, particularly anaphylaxis AND
- If clinical improvement is not apparent after 12 months of maintenance therapy, immunotherapy should be discontinued

The agency will pay for 50 units (CPT® 95165) per client, per year. The agency allows 30 unit to be billed per date of service.

Prior authorization is required for amounts greater than 50 units per client, per year.

Payment for antigen/antigen preparation (CPT codes 95145-95149, 95165, and 95170) is per dose.
<table>
<thead>
<tr>
<th>Service Provided</th>
<th>What should I bill?</th>
</tr>
</thead>
<tbody>
<tr>
<td>Injection and antigen/antigen preparation for allergen immunotherapy</td>
<td>✓ One injection (CPT code 95115 or 95117); and</td>
</tr>
<tr>
<td></td>

</tr>
<tr>
<td>Allergist prepared the extract to be injected by another physician</td>
<td>✓ CPT code 95144</td>
</tr>
<tr>
<td>Allergists who billed the complete services (CPT codes 95120-95134) and used treatment boards</td>
<td>✓ One antigen/antigen preparation (CPT codes 95145-95149, 95165, and 95170); and</td>
</tr>
<tr>
<td></td>
<td>✓ One injection (CPT code 95115 or 95117).</td>
</tr>
<tr>
<td>Physician injects one dose of a multiple dose vial</td>
<td>✓ Bill for the total number of doses in the vial and an injection code</td>
</tr>
<tr>
<td>Physician or another physician injects the remaining doses at subsequent times</td>
<td>✓ Bill only the injection service</td>
</tr>
</tbody>
</table>

For an allergist billing both an injection and either CPT code 95144 or 95165, payment is the injection fee plus the fee of CPT code 95165, regardless of whether CPT code 95144 or 95165 is billed. The allergist may bill an Evaluation and Management (E/M) procedure code for conditions not related to allergen immunotherapy.

**Audiology** *(WAC 182-531-0375)*

The agency may pay for audiology program services for conditions that are the result of medically recognized diseases and defects.

**Who is eligible to provide audiology services?** *(WAC 182-531-0375)*

Audiologists who are appropriately licensed or registered to provide audiology services within their state of residence to agency clients.
What type of equipment must be used?

Audiologists must use annually calibrated electronic equipment, according to RCW 18.35.020.

- For caloric vestibular testing (CPT code 92537), bill one unit per irrigation. If necessary, providers may bill up to four units for each ear.

- For sinusoidal vertical axis rotational testing (CPT code 92546), bill 1 unit per velocity/per direction. If necessary, providers may bill up to 3 units for each direction.

Unilateral (CPT code 69930) and bilateral (CPT code 69930 with modifier 50) cochlear implantation require EPA. See Auditory system.

The agency considers requests for removal or repair of previously implanted bone anchored hearing aids (BAHA) and cochlear devices for clients age 21 and older only when medically necessary. Prior authorization from the agency is required.

Audiology coverage

Please see the Physician-Related Services Fee Schedule for covered services.

Audiology billing

The outpatient rehabilitation benefit limits do not apply to therapy services provided and billed by audiologists. Audiologists (and physicians) must use AF modifier when billing.
Cardiovascular

Catheter ablation
(CPT codes 93653, 93655, 93656, 93657)

The agency covers catheter ablation for adults with the following conditions and for whom drug therapy is either not tolerated or not effective:

- Supraventricular tachyarrhythmia
- Symptomatic atrial fibrillation
- Atrial flutter
- Wolff-Parkinson-White (WPW) syndrome
- Atrioventricular nodal reentrant tachycardia (AVNRT)
- Atrioventricular reentrant tachycardia (AVRT)

Catheter ablation for adults is not covered for other non-reentrant supraventricular tachycardias.

Heart catheterizations

When a physician performs cardiac catheterization in a setting where the physician does not own the equipment (e.g., a hospital or ASC), the agency pays providers for the appropriate procedure code with modifier 26 (professional component) only.

Use cardiac catheterization and angiography to report services individually. It is not appropriate to bill with modifier 51 (multiple procedures) with any of these codes. See the agency’s Physician-related/professional fee schedule for covered codes and status indicators.
Outpatient cardiac rehabilitation

The agency covers outpatient cardiac rehabilitation in a hospital outpatient agency for eligible clients who:

- Are referred by a physician.
- Have coronary artery disease (CAD).
- Do not have specific contraindications to exercise training.
- Have:
  - A recent documented history of acute myocardial infarction (MI) within the preceding 12 months.
  - Had coronary angioplasty (coronary artery bypass grafting [CABG]).
  - Percutaneous transluminal coronary angioplasty (PTCA)).
  - Stable angina.

Bill physician services with CPT code 93797 or 93798 or HCPCS G0422 or G0423 (per session) with one of the following diagnoses:

- Acute myocardial infarction
- Angina pectoris
- Aortocoronary bypass status
- Percutaneous transluminal coronary angioplasty status

**Note:** Cardiac rehabilitation does not require PA, and it is only approved for the above diagnoses.

The outpatient cardiac rehabilitation program hospital facility must have all of the following:

- A physician on the premises at all times, and each client is under a physician’s care
- Cardiopulmonary emergency equipment and therapeutic life-saving equipment available for immediate use
- An area set aside for the program’s exclusive use while it is in session
Physician-Related Services/Health Care Professional Services

- Personnel who are:
  - Trained to conduct the program safely and effectively.
  - Qualified in both basic and advanced life-support techniques and exercise therapy for coronary disease.
  - Under the direct supervision of a physician

- Non physician personnel that are employees of the hospital

- Stress testing:
  - To evaluate a patient’s suitability to participate in the program
  - To evaluate chest pain
  - To develop exercise prescriptions
  - For pre- and postoperative evaluation of coronary artery bypass clients

- Psychological testing or counseling provided if either of the following are true. The client:
  - Exhibits symptoms such as excessive fear or anxiety associated with cardiac disease
  - Has a diagnosed mental, psychoneurotic, or personality disorder

The agency covers up to 24 sessions (usually 3 sessions a week for 4-6 weeks) of cardiac rehabilitation sessions (phase II) per event. The agency covers continued participation in cardiac rehabilitation programs beyond 24 sessions only on a case-by-case basis with prior authorization. Phase II of cardiac rehabilitation is the initial outpatient cardiac rehabilitation program. The goal of phase II is to lower the risk of future heart problems.

Central nervous system assessments/tests

Coverage for developmental screening for delays and surveillance and screening for autism

All children: As a part of routine well child exams for clients age 9 months, 18 months, and 30 months, the agency pays for one developmental screening for primary care providers when performed by a physician, ARNP, or PA. For further information about well child exams, see the agency’s Early and Periodic Screening, Diagnosis and Treatment (EPSDT) Program Billing Guide.

CPT® codes and descriptions only are copyright 2018 American Medical Association
To support timely access to a formal diagnostic evaluation and referral for applied behavioral analysis (ABA) treatment or other medically necessary services, the agency pays for one autism screening for all children at age 18 months, and a second screening before 36 months, when performed by a physician, ARNP, or PA.

See the agency’s Applied Behavior Analysis (ABA) Program Billing Guide for additional information.

*If additional units are necessary, providers must request prior authorization from the agency.

**Chemotherapy**

**Chemotherapy services**

(WAC 182-531-0950(11))

Bill the appropriate chemotherapy administration CPT code for each drug administered.

The agency’s chemotherapy administration policy is as follows:

- Providers may bill chemotherapy administration (CPT codes 96411 or 96417) and bill one administration for each drug given. The administration and drug must be billed on the same claim.

- The agency pays for only one initial drug administration code (CPT code 96409 or 96413) per encounter unless one of the following applies:
  - Protocol requires the use of two separate IV sites.
  - The client comes back for a separately identifiable service on the same day (in this case, bill the second initial service code with modifier -59).

- The agency does not pay for Evaluation and Management (E/M) CPT code 99211 on the same date of service as the following drug administration codes: 96401-96549. If billed in combination with one of these drug administration codes, the agency will deny the E/M code 99211. However, providers may bill other E/M codes on the same date of service using modifier 25 to indicate that a significant and separately identifiable E/M service was provided. If modifier 25 is not used, the agency will deny the E/M code.
• **Items and services not separately payable with drug administration:**

Some items and services are included in the payment for the drug administration service, and the agency does not pay separately for them. These services include, but are not limited to the following:

- The use of local anesthesia
- IV start
- Access to indwelling IV (a subcutaneous catheter or port)
- A flush at conclusion of an infusion
- Standard tubing
- Syringes and supplies

• **Infusion vs. push:**

An intravenous or intra-arterial push is defined as either of the following:

- An injection in which the health care professional who administers the substance or drug is continuously present to administer the injection and observe the patient.

- An infusion of 15 minutes or less.

**Note:** Drug, infusion, and injection codes must be billed on the same claim.

**Irrigation of venous access pump**

CPT code 96523 may be billed as a stand-alone procedure. However, if billed by the same provider/clinic on the same day as an office visit, modifier 25 must be used to report a separately identifiable medical service. If modifier 25 is not used, the agency will deny the E/M code.
Dialysis - end-stage renal disease (ESRD)

Inpatient visits for hemodialysis or outpatient non-ESRD dialysis services
(CPT codes 90935 and 90937)

<table>
<thead>
<tr>
<th>Procedure Codes Billed</th>
<th>Instructions</th>
</tr>
</thead>
<tbody>
<tr>
<td>90935 and 90937</td>
<td>Bill these codes for the hemodialysis procedure with all E/M services related to the client’s renal disease on the day of the hemodialysis procedure. Bill these codes for the following clients:</td>
</tr>
<tr>
<td></td>
<td>• Clients in an inpatient setting with ESRD</td>
</tr>
<tr>
<td></td>
<td>• Clients receiving hemodialysis in an outpatient or inpatient setting who do not have ESRD</td>
</tr>
<tr>
<td></td>
<td>Bill using ICD diagnosis code N18.6 or the appropriate diagnosis code (N17.2–N19, E74.8) for clients requiring dialysis but who do not have ESRD.</td>
</tr>
<tr>
<td>90935</td>
<td>Bill using procedure code 90935 if only one evaluation is required related to the hemodialysis procedure.</td>
</tr>
<tr>
<td>90937</td>
<td>Bill using procedure code 90937 if a re-evaluation(s) is required during a hemodialysis procedure on the same day.</td>
</tr>
</tbody>
</table>

Inpatient visits for dialysis procedures other than hemodialysis
(e.g., peritoneal dialysis, hemofiltration, or continuous renal replacement therapies)
(CPT codes 90945 and 90947)

<table>
<thead>
<tr>
<th>Procedure Codes Billed</th>
<th>Instructions</th>
</tr>
</thead>
<tbody>
<tr>
<td>90945 and 90947</td>
<td>Bill these codes for E/M services related to the client’s renal disease on the day of the procedure that includes peritoneal dialysis, hemofiltration, or continuous renal replacement. Bill using ICD diagnosis code N18.6 or the appropriate diagnosis code (N17.2–N19, E74.8) for clients requiring dialysis but who do not have ESRD.</td>
</tr>
<tr>
<td>90945</td>
<td>Bill using procedure code 90945 if only one evaluation is required related to the procedure.</td>
</tr>
<tr>
<td>90947</td>
<td>Bill using procedure code 90947 if a re-evaluation(s) is required during a procedure on the same day.</td>
</tr>
</tbody>
</table>
If a separately identifiable service is performed on the same day as a dialysis service, any of the following E/M procedures codes may be billed with modifier 25:

- 99201-99205 Office or Other Outpatient Visit: New Patient
- 99211-99215 Office or Other Outpatient Visit: Established Patient
- 99221-99223 Initial Hospital Care: New or Established Patient
- 99238-99239 Hospital Discharge Day Management Services
- 99241-99245 Office or Other Outpatient Consultations: New or Established Patient
- 99291-99292 Critical Care Services

**Endocrinology**

**Continuous glucose monitoring**

The agency pays for the in-home use of professional or diagnostic continuous glucose monitoring (CGM) for a 72-hour monitoring period with Expedited prior authorization (EPA). See EPA #870001312 for coverage criteria.

Effective for dates of service on and after February 1, 2019, for CGM greater than 72 hours, see the agency’s Home Infusion Therapy/Parenteral Nutrition Program Billing Guide for policy.

**Hydration, therapeutic, prophylactic, diagnostic injections, infusions**

**Hydration therapy with chemotherapy**

Intravenous (IV) infusion of saline (CPT codes 96360-96371) is not paid separately when administered at the same time as chemotherapy infusion (CPT codes 96413-96417). If hydration is provided as a secondary or subsequent service after a different initial service (CPT codes 96360, 96365, 96374, 96409, 96413), and it is administered through the same IV access, report with CPT code 96361 for the first hour and again for each additional hour.

**Note:** The CPT codes 96365-96368 are for administration of therapeutic, prophylactic or diagnostic IV infusion or injection (other than hydration).
Therapeutic or diagnostic injections/infusions
(CPT codes 96360-96379) (WAC 182-531-0950)

- If no other service is performed on the same day, a subcutaneous or intramuscular injection code (CPT code 96372) may be billed in addition to an injectable drug code.

- The agency does not pay separately for intravenous infusion (CPT codes 96372-96379) if they are provided in conjunction with IV infusion therapy services (CPT codes 96360-96361 or 96365-96368).

- The agency pays for only one initial intravenous infusion code (CPT codes 96360, 96365, or 96374) per encounter unless either of the following are true:
  - Protocol requires the use of two separate IV sites.
  - The client comes back for a separately identifiable service on the same day. In this case, bill the second initial service code with modifier 59, XE, XS, XP, or XU.

- The agency does not pay for CPT code 99211 on the same date of service as drug administration. If billed in combination, the agency denies the E/M CPT code 99211.

  **Note:** Other E/M codes may be billed on the same date of service using modifier 25 to indicate that a significant and separately identifiable service was provided. If modifier 25 is not used, the agency will deny the E/M code.

Concurrent infusion

The agency pays for concurrent infusion (CPT code +96368) only once per day.

Immune globulins, serum, or recombinant products

Hepatitis B (CPT code 90371)

Reimbursement is based on the number of 1.0 ml syringes used.
Bill each 1.0 ml syringe used as 1 unit.
Immune globulins

Bill the agency for immune globulins using the HCPCS procedure codes listed below. The agency does not reimburse for the CPT codes listed in the Noncovered CPT code column below.

<table>
<thead>
<tr>
<th>Noncovered CPT Code</th>

</tbody>
</table>

Rabies immune globulin (RIG)
(CPT codes 90375-90376)

Medicaid pays for RIG when medically necessary as part of a post-exposure treatment protocol. Use the appropriate administration code in addition to the product CPT code.

**Note:** Rabies post-exposure treatment may require RIG and rabies vaccine (90675-90676).

Medical genetics and genetic counseling services

Genetic counseling and genetic testing

The agency covers genetic counseling for all fee-for-service adults and children when performed by a physician.

- To bill for prenatal genetic counseling, use ICD diagnosis code Z31.5 and the appropriate E/M code
- To bill for genetic counseling other than prenatal, use ICD diagnosis code Z71.83 and the appropriate E/M code.

The agency covers genetic counseling (CPT 96040) when performed by a health care professional appropriately credentialed by the Department of Health (DOH).
Certain genetic testing procedure codes need PA. Providers must obtain PA if required for certain genetic tests and must give both the PA number and the appropriate genetic testing modifier to the laboratory or when the laboratory bills so they can bill correctly. Providers must check the Physician-related services fee schedule for services that require either PA or EPA.

For procedure codes that require PA, use the General Information for Authorization form, 13-835 and Fax/Written Request Basic Information form, 13-756. See Where can I download agency forms?

**Prenatal genetic counseling**
(Chapter 246-680 and 246-825 WAC)

Genetic counselors who meet the requirements in chapter 246-825 WAC are eligible to enroll with the agency to provide and receive payment for providing prenatal genetic counseling services. Genetic counselors must be approved by the Department of Health (DOH) Screening and Genetics Unit and be supervised by a practicing licensed physician.

**Coverage**

The agency covers:

- Face-to-face encounters only, including telemedicine. Telephonic and email encounters are not covered.

- One initial prenatal genetic counseling encounter. This encounter must be billed in 30-minute increments and cannot exceed 90 minutes.

- Two follow-up prenatal genetic counseling encounters per pregnancy. The encounters must occur no later than 11 months after conception. These encounters must be billed in 30-minute increments and cannot exceed 90 minutes.

Prenatal procedures other than genetic counseling, such as laboratory or diagnostic testing, must be requested directly through the client’s primary care provider (PCP) or PCCM.

**Note:** Clients enrolled in an agency-contracted managed care organization (MCO) are covered under the fee-for-service benefit. Provider must bill the agency directly for prenatal genetic counseling provided to MCO clients. Prior authorization is not required.

**Fee Schedule**

See the agency’s Prenatal diagnosis counseling fee schedule.
Billing for prenatal genetic counseling

Providers must follow the billing requirements listed in the agency’s ProviderOne Billing and Resource Guide. The guide explains how to complete the claim.

**Note:** Prenatal genetic clinics are asked to submit billings within 120 days of the date of service to facilitate reconciliation of Department of Health’s accounts.

Enter the following information in the listed fields on the claim:

<table>
<thead>
<tr>
<th>Name</th>
<th>Enter</th>
</tr>
</thead>
<tbody>
<tr>
<td>Place of Service</td>
<td>The appropriate place-of-service code, which must be either: 11 (office), 21 (inpatient hospital), or 22 (outpatient hospital)</td>
</tr>
<tr>
<td>Rendering (Performing) Provider Taxonomy Code</td>
<td>The taxonomy for prenatal genetic counseling: 170300000X</td>
</tr>
<tr>
<td>Rendering (Performing) Provider NPI</td>
<td>The genetic counselor’s NPI number</td>
</tr>
<tr>
<td>Billing Provider NPI</td>
<td>The approved agency’s billing NPI</td>
</tr>
<tr>
<td>Billing Provider Taxonomy Code</td>
<td>The approved agency’s billing taxonomy code, which cannot be 170300000X</td>
</tr>
</tbody>
</table>

**Note:** CPT code 96040 must be billed using taxonomy 170300000X for both the initial visit and the two follow-up visits. To bill for genetic counseling, use an ICD diagnosis code for genetic counseling and the appropriate E/M code. CPT code 96040 is a time-based code and each visit is limited to no more than 3 x 96040 (i.e., no more than 90 minutes per session).
Applying to the agency to become a genetic counseling provider

- To apply to provide services, a genetic counselor must:
  - Complete a Core Provider Agreement (CPA) with the agency.
  - Send all the following to the DOH Screening and Genetics Unit at the address listed below:
    - The completed CPA
    - A DOH ABMG/ABGC certification or a letter verifying the genetic counselor's eligibility to sit for the upcoming examination
    - Each qualified genetic counselor’s National Provider Identification (NPI) number
    - A photocopy of the supervising physician's license

**Send to:**
Debra Lochner Doyle, MS, LCGC
Department of Health, Screening and Genetics Unit
20425 72nd Ave. S. Suite 310, Kent, WA 98032
253-395-6742
Email: debra.lochnerdoyle@doh.wa.gov
DOH Website: Genetic Services
Regional: Washington’s Genetic Clinics

- The DOH Screening and Genetics Unit staff will send copies of the approved forms to the agency. This will serve as a written request to the agency to authorize the facility and provider to bill for genetic counseling.

After receiving the approved forms from DOH, the agency will enroll the provider as an approved genetic counseling provider. After being enrolled as a genetic counseling provider, services provided in accordance with agency policies for clients under WAC 182-502-0150 may be billed to the agency.

**Note:** DOH-approved genetic counselors provide counseling for pregnant women (fee for service and healthy option clients) up to the end of the month containing the 60th day after the pregnancy ends. This service does not require authorization. To locate the nearest DOH-approved genetic counselor call DOH at (253) 395-6742.
Physician-Related Services/Health Care Professional Services

Miscellaneous

After-hours

After-hours office codes are payable in addition to other services only when the provider’s office is not regularly open during the time the service is provided. An after-hours procedure billed for a client treated in a 24-hour facility (e.g., emergency room) is payable only in situations where a provider who is not already on-call is called to the facility to treat a client. These codes are not payable when billed by emergency room physicians, anesthesiologists/anesthetists, radiologists, laboratory clinical staff, or other providers who are scheduled to be on call at the time of service. The client’s file must document the medical necessity and urgency of the service. Only one code for after-hours services will be paid per patient, per day, and a second day may not be billed for a single episode of care that carries over from one calendar day.

For example: If a clinic closes at 5pm and takes a break for dinner, and then opens back up from 6 pm-10 pm, these services are not eligible for after-hours service codes.

Note: This policy does not include radiologists, pathologists, emergency room physicians, or anesthesiologists. The agency does not pay these providers for after-hour service codes.

Neurology and neuromuscular procedures

Needle electromyography (EMGs)

The agency has adopted Medicare-established limits for billing needle EMGs (CPT codes 95860 – 95870) as follows:

<table>
<thead>
<tr>
<th>CPT Code</th>
<th>Short Description</th>
<th>Limits</th>
</tr>
</thead>

### Sleep medicine testing (sleep apnea) *(WAC 182-531-1500)*

See the [Sleep Centers Billing Guide](#).
Ophthalmology – vision care services

Eye examinations and refraction services

The agency covers, without prior authorization (PA), eye examinations and refraction and fitting services with the following limitations:

- Once every 24 months for asymptomatic clients age 21 or older
- Once every 12 months for asymptomatic clients age 20 or younger
- Once every 12 months, regardless of age, for asymptomatic clients of the Developmental Disabilities Administration (DDA)

Coverage for additional examinations and refraction services

The agency covers additional examinations and refraction services outside the limitation described in eye examinations and refraction services when:

- The provider is diagnosing or treating the client for a medical condition that has symptoms of vision problems or disease. Supporting medical documentation must be submitted with the claim.
- The client is on medication that affects vision. Supporting medical documentation must be submitted with the claim.

OR

- The service is necessary due to lost or broken eyeglasses/contacts. In this case:
  - No type of authorization is required for clients age 20 or younger or for clients of the Developmental Disabilities Administration (DDA), regardless of age. Authorization is not required for two or less replacement glasses. More than two pairs of glasses in a 12 month period requires Prior Authorization (PA).
Providers must follow the agency’s expedited prior authorization (EPA) process to receive payment for clients age 21 or older. See EPA #87000610 in Expedited Criteria Coding List. Providers must also document the following in the client's file:

- The eyeglasses or contacts are lost or broken
- The last examination was at least 18 months ago

**Visual field exams**

The agency covers visual field exams for the diagnosis and treatment of abnormal signs, symptoms, or injuries. Providers must document all of the following in the client's record:

- The extent of the testing
- Why the testing was reasonable and necessary for the client
- The medical basis for the frequency of testing

**Vision therapy**

The agency covers orthoptics and vision therapy which involves a range of treatment modalities including the following:

- Lenses
- Prisms
- Filters
- Occlusion or patching
- Orthoptic/pleoptic training which is used for eye movement and fixation training

**Note:** The agency requires PA for eye exercises/vision training/orthoptics/pleoptics. The agency requires expedited prior authorization (EPA) for orthoptics/pleoptic training (CPT code 97110, 97112, or 97530) when there is a secondary diagnosis of traumatic brain injury (TBI). See EPA #87001371, #87001372, and #87001373.
Ocular prosthetics

The agency covers ocular prosthetics when provided by any of the following:

- An ophthalmologist
- An ocularist
- An optometrist who specializes in prosthetics

See the agency’s Prosthetic and Orthotic Devices Billing Guide for more information on coverage for ocular prosthetics.

Eye surgery

Cataract surgery

The agency covers cataract surgery, without PA, when either of the following clinical criteria are met:

- Correctable visual acuity in the affected eye is at 20/50 or worse, as measured on the Snellen test chart
- One or more of the following conditions exist:
  - Dislocated or subluxated lens
  - Intraocular foreign body
  - Ocular trauma
  - Phacogenic glaucoma
  - Phacogenic uveitis
  - Phacoanaphylactic endophthalmitis
  - Increased ocular pressure in a person who is blind and is experiencing ocular pain

The agency does not cover the following procedure codes:

<table>
<thead>
<tr>
<th>Procedure Code</th>
<th>Short Description</th>
<th>Policy/Comments</th>
</tr>
</thead>
<tbody>
<tr>
<td>C1840</td>
<td>Telescopic intraocular lens</td>
<td>Not Covered</td>
</tr>
</tbody>
</table>
Strabismus surgery

The agency covers strabismus surgery as follows:

<table>
<thead>
<tr>
<th>Clients</th>
<th>Policy</th>
</tr>
</thead>
<tbody>
<tr>
<td>Age 17 or younger</td>
<td>The provider must clearly document the need in the client's record. The agency does not require authorization.</td>
</tr>
<tr>
<td>Age 18 or older</td>
<td>Covered when the clinical criteria are met. To receive payment, providers must follow the expedited prior authorization (EPA) process. The clinical criteria are:</td>
</tr>
<tr>
<td></td>
<td>• The client has double vision.</td>
</tr>
<tr>
<td></td>
<td>• The surgery is not being performed for cosmetic reasons.</td>
</tr>
</tbody>
</table>

To receive payment for clients age 18 or older, providers must use the agency’s EPA process.

Blepharoplasty or blepharoptosis surgery

The agency covers blepharoplasty or blepharoptosis surgery when all of the clinical criteria are met. To receive payment, providers must follow the agency’s EPA process. The following clinical criteria must be met:

- The client's excess upper eyelid skin is blocking the superior visual field.
- The blocked vision is within 10 degrees of central fixation using a central visual field test.

Implantable miniature telescope

The implantable miniature telescope, CPT code 66999, is used in clients with untreated, end stage, age related macular degeneration. It is a visual aid for clients with low vision, and like the other adult low vision aids, is considered vision hardware. Like all vision hardware, this is not included in the clients’ benefit package for clients age 21 and older.
Vision coverage table

Due to its licensing agreement with the American Medical Association, the agency publishes only the official CPT procedure code short descriptions. To view the long description, refer to a current CPT book.

Manipulative therapy
(CPT codes 98925-98929) (WAC 182-531-1050)

The agency covers:

- Ten (10) manipulative therapy treatments per client, per calendar year.

- Manipulative therapy services only when provided by either an osteopathic physician licensed under chapter 18.71 RCW or a naturopathic physician licensed under chapter 18.36A RCW.

- Manipulative therapy services by body regions. Body regions are defined as:
  - abdomen and viscera
  - cervical
  - head
  - lower extremities
  - lumbar
  - pelvic
  - rib cage
  - sacral
  - thoracic
  - upper extremities

- One manipulative therapy procedure code in the range 98925-98929 per client, per day. Bill using the CPT code that describes the number of body regions involved. For example, if three body regions are manipulated, bill one unit of CPT code 98926.

- An E/M service (billed with modifier 25) in addition to the manipulative therapy service, under one of the following circumstances:
  - When a provider diagnoses the condition requiring manipulative therapy and provides the therapy during the same visit
  - When the existing condition fails to respond to manipulative therapy or significantly changes, requiring E/M services beyond those considered included in the manipulation codes
  - When the provider treats the client for a condition unrelated to the manipulative therapy during the same encounter

Justification for the E/M and manipulative therapy services must be documented and kept in the client’s record for review.

**Note:** The agency does not cover physical therapy services performed by osteopathic physicians or naturopathic physicians unless they are also physiatrists.
Other services and procedures

Hyperbaric oxygen therapy
(CPT code 99183 and HCPCS G0277)

Hyperbaric oxygen therapy may be considered medically necessary for treatment of the following conditions in the inpatient or outpatient hospital setting:

- Decompression sickness
- Acute carbon monoxide poisoning
- Acute cyanide poisoning
- Acute gas or air embolism
- Gas gangrene (clostridial myositis and myonecrosis)
- Progressive necrotizing soft tissue infections
- Acute traumatic ischemia secondary to crush injuries
  - For prevention of loss of function or for limb salvage
  - Used in combination with standard medical and surgical management
- Late radiation tissue injury
- Prevention of osteoradionecrosis following tooth extraction in a previously radiated field
- Refractory osteomyelitis
  - Unresponsive to standard medical and surgical management
- Compromised flaps and skin grafts
  - For prevention of loss of function or for limb salvage
- Non-healing diabetic wounds of the lower extremities
  - Patient has type 1 or type 2 diabetes and has a lower extremity wound that is due to diabetes
  - Patient has a wound classified as Wagner grade 3 or higher
  - Patient has failed an adequate course of standard wound therapy
Physician-Related Services/Health Care Professional Services

The following are considered not medically necessary:

- Thermal burns
- Acute and chronic sensorineural hearing loss
- Cluster and migraine headaches
- Multiple sclerosis
- Cerebral palsy
- Traumatic and chronic brain injury
- Arterial, venous or pressure ulcers

<table>
<thead>
<tr>
<th>Procedure Code</th>
<th>Short Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>99183</td>
<td>Hyperbaric oxygen therapy</td>
</tr>
<tr>
<td>G0277</td>
<td>Hyperbaric oxygen</td>
</tr>
</tbody>
</table>

Hyperbaric oxygen therapy requires EPA. See Expedited Prior Authorization Criteria Coding List, EPA #870000425. If the client does not meet the EPA criteria, prior authorization (PA) is required (see Prior authorization). When requesting PA, provide the number of sessions being requested and the amount of time requested per session. For example: If the client is receiving a 90-minute session of hyperbaric oxygen therapy, the provider would request 1 unit of 99183 and 3 units of G0277.

**Testosterone testing**
(CPT 84402, 84403, and 84410)

The agency covers medically necessary testosterone testing for any eligible client. See the following table for cases in which prior authorization is required:

<table>
<thead>
<tr>
<th>Client</th>
<th>Prior authorization required?</th>
</tr>
</thead>
<tbody>
<tr>
<td>Female, any age</td>
<td>No</td>
</tr>
<tr>
<td>Male, age 18 and younger</td>
<td>No</td>
</tr>
<tr>
<td>Male, age 19 and older</td>
<td>Yes. When the client meets the coverage criteria, you may use EPA #870001368.</td>
</tr>
<tr>
<td>Male or female, any age, being treated for gender dysphoria</td>
<td>Yes. When the client meets the coverage criteria, you may use EPA #870001368.</td>
</tr>
</tbody>
</table>
Transient elastography

The agency pays for a transient elastography such as a FibroScan® only for determining if qualifying criteria measures are met for immune modulators and anti-viral medication treatment of chronic Hepatitis C virus (HCV) infection. Transient elastography requires EPA. See Expedited Prior Authorization Criteria Coding List, EPA #870001350.

Psychiatry

Clozaril - case management

- Physicians, psychiatrists, and ARNPs must bill for Clozaril case management using the applicable E&M code for drug monitoring.
- For Pharmacist billing, see the agency’s Prescription Drug Program Billing Guide.
- Put “Clozaril Case Management” in the claim notes field on the claim.
- The agency reimburses providers for one unit of Clozaril case management per week.
  ✓ The agency reimburses providers for Clozaril case management when billed with the appropriate ICD diagnosis codes.
  ✓ Routine venipuncture (CPT code 36415) and a blood count (CBC) may be billed in combination when providing Clozaril case management.
- The agency does not pay for Clozaril case management when billed on the same day as any other psychiatric-related procedures.

For additional information, see the agency’s Mental Health Services Billing Guide.

Pulmonary

Extracorporeal membrane oxygenation therapy (ECMO)

See extracorporeal membrane oxygenation therapy (ECMO). ECMO is for both cardiovascular and pulmonary services.
Ventilator management

Evaluation and Management (E/M) services are not allowed in combination with CPT codes 94002-94004, 94660, and 94662 for ventilator management on the same day, by the same provider/clinic. However, E/M services may be billed for on the same date of service using modifier 25 to indicate that a significant and separately identifiable service was provided. If modifier 25 is not used, the agency will deny the E/M code.

Special dermatological services

Ultraviolet phototherapy

The agency does not cover ultraviolet phototherapy (CPT code 96910) when billed with ICD diagnosis code L80 (vitiligo). The agency considers this a cosmetic procedure.

Special services

Group clinical visits for clients with diabetes or asthma

Overview of the program

The intent of the Diabetes and Asthma Group Clinical Visits program is to provide clinical services and educational counseling to agency clients who have been diagnosed with diabetes or asthma. These visits are limited to groups of two or more clients and are payable only to physicians or advanced registered nurse practitioners (ARNPs). However, participation from other professional staff, including physician assistants, physical therapists, nurses, and nutritionists, is encouraged.

Program requirements

- Prior to a group clinical visit, the provider must perform an assessment of individual client medical information and document the proposed treatment plan for each client.

- The group clinical visit must be led by a physician or ARNP, but may include other staff as well.
Physician-Related Services/Health Care Professional Services

- The group clinical visit must last at least one hour and include:
  - A group discussion on clinical issues to promote long-term disease control and self-management. This discussion should include at least one of the following topics:
    - Prevention of exacerbation or complications
    - Proper use of medications and other therapeutic techniques (spacers, peak flow meter use; glucose measurement, foot care, eye exams, etc.)
    - Living with a chronic illness
  - A question and answer period
  - The collection of prevention-based care data needed to monitor chronic illness (e.g., weight and blood pressure)
  - Short (approximately 5-10 minutes per client) one-on-one visits to gather needed data and establish an individual management plan with the client
- The following must be documented in the medical record:
  - Individual management plan, including self-management capacity
  - Data collected, including physical exam and lab findings
  - Patient participation
  - Beginning and ending time of the visit

Billing and reimbursement

Providers must use the following CPT code when billing for diabetes or asthma group counseling visits, subject to the limitations in the table below. Providers must bill visits in increments of one-hour units (one hour = one unit). Multiple units may be billed on the same day.

<table>
<thead>
<tr>
<th>CPT Code</th>
<th>Restricted to Diagnoses</th>
<th>Visit Limitations</th>
</tr>
</thead>
<tbody>
<tr>
<td>99078</td>
<td>Diabetes and asthma.</td>
<td>Limited to four (4) one-hour units per calendar year, per client, per condition</td>
</tr>
</tbody>
</table>

Note: The agency pays only for the time that a client spends in the group clinical visit.
Other limitations

The agency does not reimburse a diabetes or asthma group clinical visit in conjunction with an office visit or other outpatient evaluation and management (E/M) codes for the same client, same provider, and same condition on the same day.

A diabetes group clinical visit may be billed on the same day as a Department of Health (DOH) - approved diabetes education core module as long as the times documented in the medical record indicate two separate sessions.

Therapies (physical, occupational, and speech therapy)

Physicians, Podiatrists, Advanced Registered Nurse Practitioners (ARNP), Physician Assistants Certified (PA-C), and Wound Care Center Specialty Physicians - Billing

The outpatient rehabilitation benefit limits do not apply to therapy services provided and billed by physicians, podiatrists, ARNPs, PA-Cs, and wound care center specialty physicians.

Modifier required when billing

Physicians, podiatrists, ARNPs, and PA-Cs, and wound care center specialty physicians must use the following modifier when billing for PT/OT/ST services:

<table>
<thead>
<tr>
<th>Modality</th>
<th>Modifiers</th>
</tr>
</thead>
<tbody>
<tr>
<td>PT/OT/ST</td>
<td>AF</td>
</tr>
</tbody>
</table>

Note: For additional information, see the agency’s Outpatient Rehabilitation Billing Guide.
Treatment of chronic migraines and chronic tension-type headaches

The agency requires prior authorization for OnabotulinumtoxinA (Botox) injections through a medical necessity review by Comagine Health.

For treatment of chronic migraine (as defined by the International Headache Society), the agency covers OnabotulinumtoxinA when the following criteria are met:

- The client has not responded to at least three prior pharmacological prophylaxis therapies from two different classes of drugs.
- The condition is appropriately managed for medication overuse.

OnabotulinumtoxinA injections must be discontinued when the condition has shown inadequate response to treatment (defined as less than a 50% reduction in headache days per month after two treatment cycles).

A maximum of five treatment cycles is allowed in a 12 month period. The agency evaluates requests for additional treatment cycles on a case-by-case basis.

Treatment of chronic migraine or chronic tension-type headache with acupuncture, massage, trigger point injections, transcranial magnetic stimulation, or manipulation/manual therapy is not a covered benefit.

Vaccines/toxoids (immunizations)

The agency covers vaccines administered according to the current Centers for Disease Control (CDC) Advisory Committee on Immunization Practices (ACIP) immunization schedule for adults and children in the United States, including make-up schedules. There is detailed guidance on vaccines at the CDC website. Refer to the Professional administered drugs fee schedule for the list of covered vaccines by CPT code.

The agency covers only those vaccines listed on the CDC immunization schedule for adults and children in the United States. The agency does not cover vaccines recommended or required for the sole purpose of international travel (such as yellow fever, typhoid, Japanese encephalitis, etc.).

Note: In the case of rabies vaccines, the agency does not cover pre-exposure immunization for rabies. Medicaid pays for the rabies vaccine when medically necessary as part of the post-exposure treatment protocol.
Clients from birth through age 18

DOH supplies free vaccines for children 0-18 years only. For clients 18 years of age and younger, see the agency’s Early and Periodic Screening, Diagnosis and Treatment (EPSDT) Program Billing Guide.

Clients age 19 and older

The agency covers vaccines recommended by the CDC. The agency covers vaccines needed throughout the client’s lifetime based on age, health conditions, or other factors.

Routine adult immunizations include an annual flu shot as well tetanus (Td or Tdap) shots at intervals determined by healthcare professionals.

Health care providers should regularly review client immunization histories and offer any vaccine indicated for their adult clients. The agency covers these vaccines as necessary.

Clients enrolled in the Family Planning Only – Pregnancy Related, Family Planning Only (formerly referred to as TAKE CHARGE), and Alien Emergency Medicine programs are not eligible for the vaccine program.

How to bill the agency for adult immunizations

- The claim must include the CPT code for each vaccine product given.

- Include the appropriate vaccine administration CPT codes on the same claim form:
  - 90471 if only one vaccine is injected
  - 90472 for each additional vaccine injected at the visit
  - 90473 if one vaccine is administered via the oral or intranasal route
  - 90474 for each additional vaccine administered by the oral or intranasal route

- The agency reimburses providers for the vaccine product using the agency’s maximum allowable fee schedule.

If an immunization is the only service provided, bill only for the vaccine and for the administration of the vaccine.
Billing with an E/M code

Do not bill an E/M code unless a significant and separately identifiable condition exists and is reflected by the diagnosis.

When a significant and separately identifiable condition exists, bill the appropriate E/M code with modifier 25. If the E/M code is billed without modifier 25 on the same date of service as a vaccine administration, the agency will deny the E/M code. **Exception:** The E/M code 99211 may not be billed with a vaccine or the vaccine administration code.
Maternity Care and Delivery

Policies and resources regarding maternity care

- For information regarding family planning services, including immediate postpartum long-acting reversible contraceptive (LARC) insertion, see the Family Planning Billing Guide.

- For information regarding support services covered during and post pregnancy see the Maternity Support Services/Infant Case Management Billing Guide. Maternity Support Services/Infant Case Management (MSS/ICM) are services provided through the First Steps program. Services are designed to help pregnant women and their newborns gain access to medical, social, educational and other services. Services are provided in the home or clinic throughout pregnancy and up to the infant’s first birthday.

- For information regarding childbirth education see the Childbirth Education Billing Guide.

- To bill for anesthesia during delivery, see Anesthesia for maternity.

- For deliveries in a birthing center, see the agency’s Planned Home Births and Births in Birthing Centers Billing Guide.

- For deliveries in a home birth setting, see the agency’s Planned Home Births and Births in Birthing Centers Billing Guide.

- For information on treating substance use in pregnancy:
  - See the Chemical-Using Pregnant (CUP) Women Program Billing Guide for detoxification services.
  - See Drug screening for medication assisted treatment (MAT) regarding drug screening.
Confirmation of pregnancy

If a client presents with signs or symptoms of pregnancy and the purpose of the client’s visit is to confirm the pregnancy and:

- The obstetrical (OB) record is not initiated, bill this visit using the appropriate level E/M code. Bill using the diagnosis code(s) for the signs and/or symptoms the client is having [e.g. suppressed menstruation (ICD diagnosis code N92.5 or N93.8)]. Do not bill using the pregnancy diagnosis codes (e.g. Z33.1, Z34.00, Z34.80, or Z34.90).

- The OB record is initiated at this visit-the visit is considered part of the global OB package and must not be billed separately. The pregnancy diagnosis codes (e.g. Z33.1, Z34.00, Z34.80, or Z34.90) are used when billing the global OB package. (See below)

If some other source has confirmed the pregnancy and the provider wants to do his/her own confirmation, bill this visit using the appropriate level E/M code if the OB record is not initiated. If the OB record is initiated at this visit, the visit is considered part of the global OB package and must not be billed separately.

Diagnostic testing to confirm pregnancy and gestational age:

- See the Physician-related/professional services fee schedule and clinical laboratory codes for coverage of urine and blood testing for confirmation of pregnancy.

- See obstetrical ultrasounds in this guide.

Problem visits during pregnancy

If a client is seen for reasons other than routine antepartum or postpartum care, providers must bill using the appropriate Evaluation and Management (E/M) procedure code with a medical diagnosis code as the primary diagnosis. Claims with diagnosis codes Z33.1, Z34.00, Z34.80, or Z34.90 will be denied if listed as the principal diagnosis.

For those clients who have non-maternity-related issues and diagnosis(es), the provider should use the appropriate E&M code with the modifier GB.
HIV/AIDS counseling/testing

(WAC 182-531-0600)

See HIV/AIDS counseling/testing for coverage policy.

Exceptions for pregnancy: The agency pays for counseling visits when billed with an E/M service on the same day when either of the following is true:

- The client is being seen for a medical problem and modifier 25 is billed.
- The client is being seen for an antepartum visit and modifier TH is used.

The agency does not pay for a counseling visit if the client is being seen only to confirm pregnancy and an office visit is billed, because the counseling is considered part of the office visit.

The agency covers HIV testing (86701-86703) for pregnant women when billed with the following appropriate diagnosis codes: Z33.1, Z34.00, Z34.80, Z34.90 or Z36.

Tobacco cessation for pregnant clients

See tobacco cessation coverage and billing policies and resources.

Early pregnancy loss and abortion services

- Maternity services include the assessment, management, treatment of pregnancy loss, and voluntary terminations. This includes spontaneous, incomplete, missed, induced, and elective abortions.

- Providers must bill using the appropriate diagnosis codes for the type of abortion – elective, induced, spontaneous, incomplete, or missed. An elective termination of pregnancy requires the ICD diagnosis code Z33.2.

- Office visits, laboratory tests, and diagnostic tests performed for the purpose of confirming pregnancy, gestational age, and successful treatment are covered.

- Rho(D) immune globulin must be billed using the appropriate HCPCS codes when it is given. See Physician-related/professional services fee schedule and Drugs professionally administered.

- Clients enrolled in an agency managed care organization (MCO) may self-refer outside the MCO for induced abortions.
Clients on the Family Planning Only – Pregnancy Related program or Family Planning Only program (formerly referred to as TAKE CHARGE) are not covered for maternity care including induced abortions. They will need to apply for pregnancy medical coverage.

**Medical abortions:**

- The agency pays for medication treated abortions administered in an office or outpatient setting.
- The agency covers the following drugs used according to nationally accepted guidelines.
  - Methotrexate sodium, 50 mg (HCPCS J9260)
  - Mifepristone, oral, 200 mcg (HCPCS S0190)
  - Misoprostol, oral, 200 mcg (HCPCS S0191)
- Medical services (Rho(D) immune globulin, laboratory, history/physical, ultrasound, etc.) performed at the time of the drug administration for a medically induced abortion must be billed on the same claim as the abortion drugs if dispensed by the same provider.

**Surgical abortions:**

- The agency pays for surgical abortions that occur in an ambulatory surgical center (ASC), hospital, or agency approved and contracted non-hospital based center (abortion center).
- ASCs and hospitals should bill for surgical services according to their billing guides. See the [Ambulatory Surgery Centers Billing Guide](#), the [Inpatient Hospital Services Billing Guide](#), and the [Outpatient Hospital Services Billing Guide](#).
- Abortion center:
  - Abortion centers must be approved by and contracted with the agency to bill for facility fee payments for a surgical abortion. To become an approved abortion center, mail a request to womenshealth@hca.wa.gov.
  - Abortion centers are paid facility fees only for surgical abortions. Abortion centers are not paid a facility fee for drug-induced abortions not requiring surgical intervention.
The agency contracted abortion center facility fee payment includes all room charges, equipment, supplies, drugs (including anti-anxiety, antibiotics, pain medications, and miscellaneous drugs required for the procedure), anesthesia, and injections and blood draws associated with the procedure.

The agency contracted abortion center facility fee does not include professional services, lab charges, ultrasound and other X-rays, and Rho(D) immune globulin which may be billed separately.

Payment is limited to one agency contracted abortion center facility fee per client, per abortion. The facility fee is not payable per visit, even though a particular procedure or case may take several days or visits to complete.

Global (total) obstetrical (OB) care

Global OB care (CPT codes 59400, 59510, 59610, or 59618) includes all the following:

- Routine antepartum care in any trimester
- Delivery
- Postpartum care

If the provider furnishes all of the client’s antepartum care, performs the delivery, and provides the postpartum care, the provider must bill using one of the global OB procedure codes.

Use HCPCS code 0500F along with the appropriate billing code on the first prenatal visit. The agency is tracking the date a client begins receiving obstetrical care (date the OB record is initiated). Note this date by entering HCPCS code 0500F with the appropriate ICD diagnosis codes Z33.1, Z34.00, Z34.80, or Z34.90 on the claim.

**Note:** When billing global Obstetrical Services, the place of service code must correspond with the place where the child was born (for example: 25).

When more than one provider in the same clinic (same group NPI) sees the same client for global maternity care, the agency pays only one provider for the global (total) obstetrical care.

Providers who are in the same clinic who do not have the same group NPI must not bill the agency the global (total) obstetrical care procedure codes. In this case, the OB services must be unbundled and the antepartum, delivery, or postpartum care must be billed separately.

**Note:** Do not bill the agency for maternity services until all care is completed.
Unbundling obstetrical care

In the situations described below, providers may not be able to bill the agency for global OB care as the agency may have paid another provider for some of the client’s OB care, or a provider may have been paid by another insurance carrier for some of the client’s OB care. In these cases, it may be necessary to unbundle the OB services and bill the antepartum, delivery, and postpartum care separately.

When a client transfers to a practice late in the pregnancy

- If the client has had antepartum care elsewhere, the subsequent provider must not bill the global OB package. Bill the antepartum care, delivery, and postpartum care separately. The provider that had been providing the antepartum care bills for the services that he/she performed. Therefore, if the subsequent provider bills the global OB package, that provider is billing for some antepartum care that another provider has claimed.

- OR –

- If the client did not receive any antepartum care prior to coming to the provider’s office, bill the global OB package.

In this case, the provider may actually perform all of the components of the global OB package in a short time. The agency does not require this provider to perform a specific number of antepartum visits in order to bill for the global OB package.

If a client transfers to another provider (not associated with the providers practice), moves out of the area prior to delivery, or loses the pregnancy…

When provider A has seen the client for part of the antepartum care and has transferred the client to provider B for care, and provider B is billing separately for the antepartum care being delivered, provider B enters “transfer of care” in the Claim Note section of the electronic claim. Provider B bills only those services actually provided to these clients.

If a client changes insurance during pregnancy…

Sometimes, a client is fee-for-service at the beginning of pregnancy and enrolled in an agency managed care organization (MCO for the remainder of the pregnancy. The agency is responsible for paying only those services provided to the client while the client is on fee-for-service. The MCO pays for services provided after the client is enrolled with the plan.

The agency encourages early prenatal care and is actively enrolling new clients into managed care. If a client is on fee-for-service and is not yet enrolled in an MCO plan at the beginning of her pregnancy, consider billing the first visit as a secondary confirmation of pregnancy using ICD diagnosis code N92.5 or N93.8 with the appropriate level of office visit as described under the Confirmation of Pregnancy section.
When a client changes from one plan to another, bill those services that were provided while the client was enrolled with the original plan to the original carrier, and those services that were provided under the new coverage to the new plan. The provider must unbundle the services and bill the antepartum, delivery, and postpartum care separately. For clients who move in and out of managed care and fee for service, use TH and CG modifiers to unbundle the codes.

**Antepartum care**

Per CPT guidelines, the agency considers routine antepartum care for a normal, uncomplicated pregnancy to consist of:

- Monthly visits up to 28 weeks gestation.
- Biweekly visits to 36 weeks gestation.
- Weekly visits until delivery.

Antepartum care includes:

- Initial and subsequent history.
- Physical examination.
- Recording of weight and blood pressure.
- Recording of fetal heart tones.
- Routine chemical urinalysis.
- Maternity counseling, such as risk factor assessment and referrals.

Necessary prenatal monitoring, diagnostic, and laboratory tests may be billed in addition to antepartum care, except for the following tests (CPT codes 81000, 81001, 81002, 81003, and 81007).

**Coding for antepartum care only**

If it is necessary to unbundle the OB package and bill separately for antepartum care, bill as follows:

- If the client had a total of one to three antepartum visits, bill the appropriate level of E/M service with modifier TH for each visit, with the date of service the visit occurred and the appropriate diagnosis.

- If the client had a total of four to six antepartum visits, bill using CPT code 59425 with a "1" in the units box. Bill the agency using the date of the last antepartum visit in the to and from fields.
• If the client had a total of seven or more visits, bill using CPT code 59426 with a "1" in the units box. Bill the agency using the date of the last antepartum visit in the to and from fields.

Do not bill antepartum care only codes in addition to other procedure codes that include antepartum care (i.e. global OB codes).

Do not bill using CPT E/M codes for the first three visits, then CPT code 59425 for visits four through six, and then CPT code 59426 for visits seven and on. These CPT codes are used to bill only the total number of times the client was seen for all antepartum care during her pregnancy, and may not be billed in combination with each other during the entire pregnancy period.

**Note: Do not** bill the agency until all antepartum services are complete. Hospital care for pregnant women can be billed concurrently.

### Coding for deliveries without antepartum care

If it is necessary to unbundle the OB package and bill for the delivery only, bill the agency using one of the following CPT codes:

- 59409 (vaginal delivery only)
- 59514 (cesarean delivery only)
- 59612 [vaginal delivery only, after previous cesarean delivery (VBAC)]
- 59620 [cesarean delivery only, after attempted vaginal delivery after previous cesarean delivery (attempted VBAC)]

If a provider does not furnish antepartum care, but performs the delivery and provides postpartum care, bill the agency using one of the following CPT codes:

- 59410 (vaginal delivery, including postpartum care)
- 59515 (cesarean delivery, including postpartum care)
- 59614 (VBAC, including postpartum care)
- 59622 (attempted VBAC, including postpartum care)

### Coding for postpartum care only

If it is necessary to unbundle the OB package and bill for postpartum care only, bill the agency using CPT code 59430 (postpartum care only).

If a provider furnishes all of the antepartum and postpartum care, but does not perform the delivery, bill the agency for the antepartum care using the antepartum care only codes, along with CPT code 59430 (postpartum care only).
Do not bill CPT code 59430 (postpartum care only) in addition to any procedure codes that include postpartum care. (i.e. global OB codes)

Postpartum care includes office visits for the six week period after the delivery and includes family planning counseling and contraceptive management.

**Additional monitoring for high-risk conditions**

When providing additional monitoring for high-risk conditions in excess of the CPT guidelines for normal antepartum visits, bill using E/M codes 99211-99215 with modifier UA. The office visits may be billed in addition to the global fee only after exceeding the CPT guidelines for normal antepartum care. Providers must bill with a primary diagnosis that identifies that the high risk condition is pregnancy related.

A condition that is classifiable as high-risk alone does not entitle the provider to additional payment. Per CPT guidelines, it must be medically necessary to see the client more often than what is considered routine antepartum care in order to qualify for additional payments. The additional payments are intended to cover additional costs incurred by the provider as a result of more frequent visits. For example:

Client A is scheduled to see her provider for her antepartum visits on January 4, February 5, March 3, and April 7. The client attends her January and February visits, as scheduled. However, during her scheduled February visit, the provider discovers the client’s blood pressure is slightly high and wants her to come in on February 12 to be checked again. At the February 12 visit, the provider discovers her blood pressure is still slightly high and asks to see her again on February 18. The February 12 and February 18 visits are outside of her regularly scheduled antepartum visits and outside of the CPT guidelines for routine antepartum care since she is being seen more often than once per month. The February 12 and February 18 visits may be billed separately from the global antepartum visits using the appropriate E/M codes with modifier UA, and the diagnosis must represent the medical necessity for billing additional visits. A normal pregnancy diagnosis (i.e. Z33.1, Z34.00, Z34.80, or Z34.90) will be denied outside of the global antepartum care. It is not necessary to wait until all services included in the routine antepartum care are performed to bill the extra visits, as long as the extra visits are outside of the regularly scheduled visits.
Assessment and treatment of high risk conditions:

Preterm labor and birth:

- The agency does not pay separately for CerviLenz. It is considered bundled into the practice expense.
- See fetal fibronectin in this guide.
- See Alpha hydroxyprogesterone (17P) and Makena in this guide.

Diagnostic and monitoring tests:

- See obstetrical ultrasounds in this guide.

Consultations

If another provider refers a client during her pregnancy for a consultation, bill the agency using consultation CPT codes 99241-99245. If an inpatient consultation is necessary, bill using CPT codes 99251 – 99255 or for a follow-up bill using CPT codes 99231-99233. The referring physician’s name and NPI must be listed in the Referring Physician field on the claim.

If the consultation results in the decision to perform surgery (i.e. a cesarean section), the agency pays the consulting physician for the consultation as follows:

- If the consulting physician does not perform the cesarean section, bill the agency the appropriate consultation code.
- If the consulting physician performs the cesarean section and does the consultation two or more days prior to the date of surgery, bill the agency the appropriate consultation code with modifier 57 (e.g. 99241-57).

The agency does not pay the consulting physician if the following applies:

- If the consulting physician performs the cesarean section and does the consultation the day before or the day of the cesarean section, the consultation is bundled within payment for the surgery. Do not bill the agency for the consultation in this situation.

Bill the agency for consultations using an appropriate ICD diagnosis code. The medical necessity (i.e. sign, symptom, or condition) must be demonstrated. The agency does not pay providers for a consultation with a normal pregnancy diagnosis code (e.g. Z33.1, Z34.00, Z34.80, or Z34.90).

The agency pays consulting OB/GYN providers for an external cephalic version (CPT code 59412) and a consultation when performed on the same day.
Elective deliveries

The agency does not reimburse for early elective deliveries. An early elective delivery is defined in WAC 182-500-0030 as any nonmedically necessary induction or cesarean section before 39 weeks gestation.

An early elective delivery is considered medically necessary if the mother or fetus has a diagnosis listed in the Joint Commission’s current table of Conditions possibly justifying elective delivery prior to 39 weeks gestation (WAC 182-533-0400). If the client meets the medical necessity criteria, bill using EPA #870001375. This EPA also needs to be used for clients who deliver naturally prior to 39 weeks.

If the early elective delivery does not meet medical necessity criteria, the agency will pay only for the antepartum and postpartum professional services. When billing, these services must be unbundled. The agency will not pay for the delivery services.

For all deliveries for a client equal to or over 39 weeks gestation, bill using EPA #870001378. This applies to both elective and natural deliveries for clients equal to or over 39 weeks gestation.

Labor management

Providers may bill for labor management only when a provider outside of the first provider’s group practice performs the delivery. If a provider or clinic where a group NPI is used performed all of the client’s antepartum care, admitted the client to the hospital during labor, delivered the baby, and performed the postpartum care, do not bill the agency for the hospital admission or for labor management. These services are included in the global OB package.

If, however, a provider performed all of the client’s antepartum care and admitted the client to the hospital during labor, but another provider (outside of the first provider’s group practice) takes over delivery, the global OB package must be unbundled and the providers must bill separately for antepartum care, the hospital admission, and the time spent managing the client’s labor. The client must be in active labor and admitted to a hospital when the referral to the delivering provider is made.

To bill for labor management in the situation described above, bill the agency for one of the hospital admission CPT codes 99221-99223 with modifier TH.

In addition to the hospital admission, the agency pays providers for up to three hours of labor management using prolonged services CPT codes 99356-99357 with modifier TH.
Payment for prolonged services is limited to three hours per client, per pregnancy, regardless of the number of calendar days a client is in labor, or the number of providers who provide labor management.

Labor management may not be billed by the delivering provider, or by any provider within the delivering provider’s group practice even if the group practice does not have a group NPI.

**Note:**

1. The agency pays for prolonged services CPT codes for labor management only when the provider performs the hospital admission and labor management services on the same day.

2. The hospital admission code and prolonged services code(s) must be billed on the same claim with the same dates of services.

**High-risk deliveries**

Delivery includes management of uncomplicated labor and vaginal delivery (with or without episiotomy, with or without forceps) or cesarean section. If a complication occurs during delivery resulting in an unusually complicated, high-risk delivery, the agency pays providers an additional add-on fee. Bill the high-risk add-on fee by adding modifier TG to the delivery code (e.g. 59400 TG or 59409 TG).

The ICD diagnosis code must clearly demonstrate the medical necessity for the high-risk delivery add-on (e.g. a diagnosis of fetal distress). A normal delivery diagnosis is not paid an additional high-risk add-on fee, even if the mother had a high-risk condition during the antepartum period. **For example:** For cesarean delivery, the primary diagnosis is the condition that was responsible for the client’s admission. If a particular condition resulted in the admission and the cesarean procedure, list that condition’s ICD diagnosis code first on the claim.

**Bill only ONE line of service (e.g. 59400 TG) to receive payment for BOTH the delivery and the high-risk add-on. DO NOT bill the delivery code (e.g. 59400) on one line of the claim and the high-risk add-on (e.g. 59400 TG) on a second line of the claim.**

A physician who provides stand-by attendance for high-risk delivery can bill CPT code 99360 and resuscitation CPT code 99465, when appropriate.

**Note:** The agency does not pay an assistant surgeon, RNFA, or co-surgeon for a high-risk delivery add-on. Payment is limited to one per client, per pregnancy (even in the case of multiple births).

---

2 The agency follows the American College of Obstetricians and Gynecologists (ACOG) guidelines on diagnosis when billing a high-risk delivery.
Additional delivery payment policies and limitations

- The agency pays a multiple vaginal delivery (for twins, triplets, etc.) at 100% for the first baby. When billing for the second or third baby, bill using the delivery-only code (CPT code 59409 or 59612) for each additional baby. Payment for each additional baby will be 50% of the delivery-only code's maximum allowance. Bill each baby's delivery on a separate line.

- The agency pays for multiple births by cesarean delivery at 100% for the first baby. No additional payment will be made for additional babies.

- Physician assistants-certified (PA-C) must bill for assisting during a C-section on their own claim using modifier 80, 81, or 82 to the delivery-only code (e.g. 59514-80). The claim must be billed using the PA-C’s NPI.

- Physician assistants (PA) must bill for an assist by adding modifier 80, 81, or 82 to the delivery-only code (e.g. 59514-80).

- RNFA assisting at C-sections may only bill using CPT code 59514 or 59620 with modifier 80.

The following tables summarize billing the agency for maternity-related services.

Medical Supplies and Equipment

Physician signature requirement
(HCPCS code G0454)

To comply with federal regulations, medical supplies and equipment must be cosigned by a physician, if ordered by a nonphysician provider. If the physician is cosigning the order (that was written by a nonphysician practitioner) for medical equipment, the physician may bill using HCPCS code G0454. For all other information regarding medical equipment, see the agency’s Medical Equipment and Supplies Billing Guide.

The following drug-related and respiratory supplies do not require a physician signature/co-signature when being ordered:

- Supplies and equipment necessary for or ancillary to the administration of pharmaceuticals or monitoring their effectiveness including glucose monitors, glucose test strips, lancets, insulin pens, needles, syringes, inhalation masks, nebulizers and spacers may be ordered by non-physician practitioners (e.g., advanced registered nurse practitioners, physician assistants, etc.) within their scope of practice without a physician signature/co-signature.

  This applies to orders and prescriptions signed before February 1, 2019, and to future orders and prescriptions.

- All respiratory supplies and equipment necessary for or ancillary to the administration or monitoring of medications, including oxygen, such as inhalation masks, spacers, nebulizers, vents, positive airway pressure machines and associated supplies may be ordered by non-physician practitioners (e.g., advanced registered nurse practitioners, physician assistants, etc.) within their scope of practice without a physician signature/co-signature.

  This applies to orders and prescriptions signed before February 1, 2019, and to future orders and prescriptions.
General payment policies

- The agency pays providers for certain medical supplies and equipment (MSE) dispensed from their offices when these items are considered prosthetics and are used for a client’s permanent condition (see Supplies included in an office call-bundled supplies).

- Most MSE used to treat a client’s temporary or acute condition are considered incidental to a provider’s professional services and are bundled in the office visit payment (see Supplies included in an office call-bundled supplies). The agency pays providers separately for only those MSE listed (see Supplies included in an office call-bundled supplies).

- The agency does not pay providers separately for surgical trays, as these are bundled within the appropriate surgical procedure. The fees for these procedures include the cost of the surgical trays.

- Procedure codes for MSE that do not have a maximum allowable fee and cost less than $50.00 are paid at acquisition cost. A manufacturer’s invoice must be maintained in the client’s records for MSE under $50.00 and made available to the agency upon request. **DO NOT send in an invoice with a claim** for MSE under $50.00 unless requested by the agency.

- Procedure codes for MSE that do not have a maximum allowable fee and cost $50.00 or more are paid at acquisition cost. **A copy of the manufacturer’s invoice must be attached** to the claim for MSE costing $50.00 or more.

**Note:** Refer to the agency’s Billers and providers webpage for information on prior authorization.

Supplies included in an office call (bundled supplies)

Items with an asterisk (*) in the following list are considered prosthetics when used for a client’s permanent condition. The agency pays providers for these supplies when they are provided in the office for permanent conditions only. They are not considered prosthetics if the condition is acute or temporary. Providers must indicate “prosthetic for permanent condition” in the Claim Note section of the electronic claim.
For example, if a patient has an indwelling Foley catheter for permanent incontinence and a problem develops for which the physician is required to replace the catheter, it is considered a prosthetic and is paid separately. The Foley catheter used to obtain a urine specimen, used after surgery, or used to treat an acute obstruction is not paid separately because it is treating a temporary problem.

Alcohol and Substance Misuse Counseling

The agency covers alcohol and substance misuse counseling through screening, brief interventions, and referral to treatment (SBIRT) services when provided by, or under the supervision of, a certified physician or other certified licensed health care professional within the scope of their practice.

SBIRT is a comprehensive, evidenced-based public health practice designed to identify people who are at risk for or have some level of substance use disorder which can lead to illness, injury, or other long-term morbidity or mortality. SBIRT services are provided in a wide variety of medical and community health care settings such as primary care centers, hospital emergency rooms, and trauma centers (see list of SBIRT places of service).

What is included in SBIRT?

Screening. With just a few questions on a questionnaire or in an interview, practitioners can identify patients who have alcohol or other drug (substance) use problems and determine how severe those problems already are. Three of the most widely used screening tools are the Alcohol Use Disorders Identification Test (AUDIT), the Alcohol, Smoking, and Substance Involvement Screening Test (ASSIST) and the Drug Abuse Screening Test (DAST).

Brief intervention. If screening results indicate at risk behavior, individuals receive brief interventions. The intervention educates them about their substance use, alerts them to possible consequences and motivates them to change their behavior.

Referral to treatment. Individuals whose screening indicates a severe problem or dependence should be referred to a licensed and certified behavioral health agency for assessment and treatment of a substance use disorder (SUD).
What is covered?

SBIRT services are covered for determining risk factors that are related to alcohol and other drug use disorders, providing interventions to enhance patient motivation to change, and making appropriate referrals as needed.

SBIRT screening may occur during an E/M exam or the client may complete the questionnaire and give it to the provider during the E/M exam. The screening form may be scored by a trained staff member who is supervised by a certified SBIRT provider. If the screening is positive, scoring time may be factored into the time requirement of the SBIRT CPT code. The provider is then able to provide the brief intervention. An SBIRT CPT code may be billed in addition to the E/M code.

Brief interventions are limited to four sessions per patient, per provider, per calendar year. Providers may submit a limitation extension (LE) request to the agency for more sessions. Include with the LE request any information that describes the medical necessity of the extra sessions.

SBIRT services will be covered by the agency when all of the following are met:

- The billing provider and servicing provider have submitted their SBIRT certification to the agency.
- The billing provider has an appropriate taxonomy to bill for SBIRT.
- The diagnosis code is Z71.41 or Z71.51.
- The treatment or brief intervention does not exceed the limit of four (4) encounters per client, per provider, per year.
Who is eligible to become a certified SBIRT provider?

The following categories of licensed or certified health care professionals are eligible to become certified to provide or supervise staff that provides SBIRT services.

- Advanced registered nurse practitioners, in accordance with chapter 18.79 RCW and chapter 246-840 WAC
- Chemical dependency professionals, in accordance with chapter 18.205 RCW and chapter 246-811 WAC
- Licensed practical nurse, in accordance with chapter 18.79 RCW and chapter 246-840 WAC
- Mental health counselor, in accordance with chapter 18.225 RCW and chapter 246-809 WAC
- Marriage and family therapist, in accordance with chapter 18.225 RCW and chapter 246-809 WAC
- Independent and advanced social worker, in accordance with chapter 18.225 RCW and chapter 246-809 WAC
- Physician, any specialty, in accordance with chapter 18.71 RCW and chapter 246-919 WAC
- Physician assistant, in accordance with chapter 18.71A RCW and chapter 246-918 WAC
- Psychologist, in accordance with chapter 18.83 RCW and chapter 246-924 WAC
- Registered nurse, in accordance with chapter 18.79 RCW and chapter 246-840 WAC
- Dentist, in accordance with chapter 18.260 and chapter 246-817 WAC
- Dental hygienists, in accordance with chapter 18.29 and chapter 246-815 WAC
What are the requirements to be a certified SBIRT provider?

SBIRT services must be provided by or under the supervision of a certified physician or other certified licensed health care professional. SBIRT services may be provided by a certified health care professional under supervision of and as recommended by a certified physician or licensed health care professional within the scope of their practice.

Required training

All licensed health care professionals must be trained in order to provide or supervise individuals providing SBIRT services. Licensed health care professionals must complete SBIRT training approved by the agency. This requirement is waived if a provider has an addiction specialist certification. The provider must submit proof of this certification to the agency by mail or fax.

Training is available through a variety of entities. Distance learning is industry-recognized education obtained through sources such as internet course work, satellite downlink resources, or online courses. Agency-approved training is available through the following:

- Substance Abuse and Mental Health Services Administration (SAMHSA)
- An education program that includes SBIRT training that the practitioner has completed and the provider has documentation showing the training was included

All health care professionals must document successful training of an approved course of training in order to bill for services. This documentation will be used to identify the health care professional through his/her National Provider Identifier (NPI) number for billing services. Providers who are already enrolled and have completed the training must update their provider profile in ProviderOne with the training certificate or other proof of completion.

Mail or fax certificate to:

Provider Enrollment
PO Box 45562, Olympia, WA 98504-5562
Fax: 360-725-2144

Health care professionals who are not enrolled with the agency, but who are licensed and have completed the training, may enroll as a Washington Apple Health (Medicaid) provider to offer this service.
Who can bill for SBIRT services?

The following is a list of providers who can bill for SBIRT services when properly certified:

- Advanced registered nurse practitioners
- Mental health counselors
- Marriage and family therapists
- Independent and advanced social workers
- Physicians (any specialty)
- Psychologists
- Dentists
- Dental hygienists
Alcohol and Substance Abuse Treatment Services

Medical services for clients in residential chemical dependency treatment

The agency will pay medical professionals (within their scope of practice) for the following services when the practitioner provides services at a Residential Chemical Dependency Treatment Center (place of service 55).

<table>

</table>

Clients requiring additional nonemergency medical services such as wound care must go to the provider’s office or another medical setting.

Detoxification services

The agency covers detoxification services for clients receiving alcohol and/or drug detoxification services in a Division of Behavioral Health and Recovery (DBHR)-enrolled hospital-based detoxification center or in an acute care hospital when the following conditions are met:

- The stay meets the intensity of service and severity of illness standards necessary to qualify for an inpatient hospital stay.
- The care is provided in a medical unit.
- The client is not participating in the agency’s Chemical-Using Pregnant (CUP) Women program.
Physician-Related Services/Health Care Professional Services

- Inpatient psychiatric care is not medically necessary and an approval from the Behavioral Health Organization (BHO) is not appropriate.

- Nonhospital-based detoxification is not medically appropriate.

**Note:** Physicians must indicate the hospital’s NPI in the Claim Note section when billed electronically. If the hospital’s NPI is not indicated on the claim, the claim will be denied.

When the conditions above are met, providers must bill as follows:

<table>

</tr>
</tbody>
</table>

**Note:** Managed care clients who are receiving detoxification services in a detoxification hospital that has a detoxification-specific taxonomy can be billed directly to the agency.
Blood, blood products, and related services

Whole blood and components (red cells, plasma, platelets, cryoprecipitate) are used in the treatment of a wide variety of conditions.

Blood products are therapeutic substances derived from human blood or plasma and produced by a manufacturing process. Blood products are also used to treat a wide variety of conditions. Examples of blood products are plasma derivatives such as:

- Albumin
- Coagulation factors
- Immunoglobulins

Payment for blood and blood products

- The agency does not pay for blood or blood products that are donated.

- The agency pays for the covered service charges necessary in handling and processing blood and blood products.

- For managed care clients, hemophilia products are reimbursed through fee-for-service. Contact the agency-contracted managed care organization for case management and service coordination.

Fee schedule

To view the fee schedules, see the agency’s:

- [Physician-related/professional health care services fee schedule](#)
- [Professional administered drugs fee schedule](#)
Centers of Excellence

(WAC 182-531-0650)

Note: When private insurance or Medicare has paid as primary insurance and the provider is billing the agency as secondary insurance, the agency does not require PA or that the transplant, or sleep study be done in a Center of Excellence or agency-approved hospital.

List of approved Centers of Excellence (COEs)

See the agency’s approved COEs for sleep centers, and transplants.

Services which must be performed in a COE

Hemophilia treatment COEs

(WAC 182-531-1625)

(For administration in the home only)

To be paid by the agency for hemophilia and von Willebrand-related products for administration to Apple Health clients in the home, the products must be provided through an approved hemophilia treatment Center of Excellence (COE). Center of Excellence is defined in WAC 182-531-0050.

Note: The agency does not require the use of an approved hemophilia treatment COE to obtain hemophilia and von Willebrand-related products when one of the following applies:

- The agency is not the primary payer
- The client receives the product in an outpatient hospital or clinic setting for nonroutine or urgent care needs
- The product is provided by a hemophilia treatment center (HTC) for nonroutine pediatric care and other urgent care needs
A hemophilia treatment COE uses a comprehensive care model to provide care for persons with bleeding disorders. The comprehensive care model includes specialized prevention, diagnostic, and treatment programs designed to provide family-centered education, state-of-the-art treatment, research, and support services for individuals and families living with bleeding disorders.

### Qualified Centers of Excellence (COE) For Hemophilia Treatment are:

<table>
<thead>
<tr>
<th>Washington Center for Bleeding Disorders at Bloodworks NW (formerly known as Puget Sound Blood Center) – Seattle</th>
</tr>
</thead>
<tbody>
<tr>
<td>Hemophilia Center at Oregon Health Science University (OHSU) – Portland</td>
</tr>
</tbody>
</table>

For managed care clients, hemophilia products are reimbursed through fee-for-service. Contact the agency-contracted managed care organization for case management and service coordination.

### What criteria must be met to qualify as a COE for hemophilia treatment?

To qualify as a COE, a hemophilia treatment center must meet all of the following:

- Have a Core Provider Agreement with the agency
- Be a federally-approved HTC as defined in [WAC 182-531-0050](https://app.leg.wa.gov/laws/codemetastate/2023/chapter341/constant182-531-0050)
- Participate in the public health service 340b provider drug discount program and be listed in the [Medicaid exclusion files](https://www.hrsa.gov/pha/) maintained by the federal Health Resources and Services Administration (HRSA) Office of Pharmacy Affairs (OPA)
- Submit a written request to the agency to be a qualified hemophilia treatment COE and include proof of the following:
  - U.S. Center for Disease Control (CDC) and prevention surveillance site identification number
  - Listing in the [Hemophilia Treatment Center (HTC) directory](https://www.hrsa.gov/pha/)
- Submit requests to:

  Hemophilia Treatment COE  
  Health Care Authority–Health Care Services  
  PO Box 45506  
  Olympia WA 98504-5506
• Receive written approval including conditions of payment and billing procedures from the agency

What documentation is required to continue as a qualified COE for hemophilia treatment?

The HTC must annually submit to the agency:

• Copies of grant documents and reports submitted to the Maternal and Child Health Bureau/Human Resources and Services Administration/Department of Health and Human Services or to their designated subcontractors.

• Proof of continued federal funding by the National Hemophilia Program and listing with the Regional Hemophilia Network and the CDC.

Are managed care clients required to receive their hemophilia or von Willebrand-related products from a qualified COE?

Clients enrolled in a managed care plan must contact their plans for information.

### Sleep studies

**WAC 182-531-1500**

#### Becoming an agency-approved sleep center

To become an agency-approved COE, a sleep center must send the following documentation to the Health Care Authority, Provider Enrollment, PO Box 45510, Olympia, WA 98504-5510:

- A completed Core Provider Agreement
- Copies of the following:
  - The sleep center's current accreditation certificate by AASM
  - Either of the following certifications for at least one physician on staff:
    - Current certification in sleep medicine by the American Board of Sleep Medicine (ABSM)
    - Current subspecialty certification in sleep medicine by a member of the American Board of Medical Specialties (ABMS)
  - The certification of an RPSGT who is employed by the sleep center

**Note:** Sleep centers must request reaccreditation from AASM in time to avoid expiration of COE status with the agency.

At least one physician on staff at the sleep center must be board certified in sleep medicine. If the only physician on staff who is board certified in sleep medicine resigns, the sleep center must ensure another physician on staff at the sleep center obtains board certification or another board-certified physician is hired. The sleep center must then send provider enrollment a copy of the physician's board certification.

If a certified medical director leaves a COE, the COE status does not transfer with the medical
director to another sleep center.

The COE must maintain a record of the physician's order for the sleep study.

For further information, see sleep medicine testing.

**Transplants**

(WAC 182-550-1900)

**Who is eligible for transplants?**

The agency pays for medically necessary transplant procedures only for eligible agency clients who are not otherwise subject to a managed care organization (MCO) plan.

**Who is not eligible for transplants?**

Clients eligible under the Alien Emergency Medical (AEM) program are not eligible for transplant coverage.

**Which transplant procedures are covered?**

The agency covers the following transplant procedures when the transplant procedures are performed in a hospital designated by the agency as a Center of Excellence for transplant procedures and meet that hospital's criteria for establishing appropriateness and the medical necessity of the procedures:

- Solid organs involving the heart, kidney, liver, lung, heart-lung, pancreas, kidney-pancreas and small bowel
  
  The agency pays for a solid organ transplant procedure only once per a client's lifetime, except in cases of organ rejection by the client's immune system during the original hospital stay.

- Nonsolid organs include bone marrow and peripheral stem cell transplants

**Does the agency pay for skin grafts and corneal transplants?**

The agency pays for skin grafts and corneal transplants to any qualified hospital when medically necessary.
Does the agency pay for organ procedure fees and donor searches?

The agency pays for organ procurement fees and donor searches. For donor searches, CPT codes 86812-86822 are limited to a maximum of 15 tests total for human leukocyte antigens (HLA) typing per client, per lifetime. The agency requires PA for more than 15 tests.

To bill for donor services:

- Use the client’s ProviderOne Client ID.
- Use the appropriate Z52 series diagnosis code as the principal diagnosis code.

For example, if billing a radiological exam on a potential donor for a kidney transplant, bill Z52.4 for the kidney donor and use Z00.5 or Z00.8 as a secondary diagnosis-examination of a potential donor. Refer to WAC 182-531-1750, 182-550-1900, 182-550-2100, and 182-550-2200.

Note: Use of Z00.5 or Z00.8 as a principal diagnosis will cause the line to be denied.

Does the agency pay for experimental transplant procedures?

The agency does not pay for experimental transplant procedures. In addition, the agency considers as experimental those services including, but not limited to, the following:

- Transplants of three or more different organs during the same hospital stay.
- Solid organ and bone marrow transplants from animals to humans.
- Transplant procedures used in treating certain medical conditions for which use of the procedure has not been generally accepted by the medical community or for which its efficacy has not been documented in peer-reviewed medical publications.
Drugs Professionally Administered

(WAC 182-530-2000(1))

The agency covers outpatient drugs, including over-the-counter drugs listed on the agency’s Covered over-the-counter product list, as defined in WAC 182-530-1050, subject to the limitations and requirements in this section, when:

- The drug is approved by the Food and Drug Administration (FDA).
- The drug is for a medically accepted indication as defined in WAC 182-530-1050.
- The drug is not excluded from coverage (see WAC 182-530-2000 Covered – Outpatient drugs, devices, and drug related supplies).
- The manufacturer has a signed drug rebate agreement with the federal Department of Health and Human Services (DHHS). Exceptions to the drug rebate requirement are described in WAC 182-530-7500 which describes the drug rebate program.

For more information, see the agency’s Prescription Drug Program Billing Guide.

**Note:** The agency requires prior authorization (PA) for all drugs new to market until reviewed and evaluated by the agency’s clinical team according to WAC 182-530-3100. This applies to all products billed under miscellaneous codes or product specific procedure codes. View the list of Drugs billed under miscellaneous HCPCS codes for drugs that require authorization.

The agency’s fees for injectable drug codes are the maximum allowances used to pay covered drugs and biologicals administered in a provider’s office only.

**Invoice requirements**

A copy of the manufacturer’s invoice showing the actual acquisition cost of the drug relevant to the date of service must be attached to the claim for drug reimbursed by report (BR) or when billing for compounded drugs. If needed, the agency will request any other necessary documentation after receipt of the claim.

A copy of any manufacturer’s invoices for all drugs (regardless of billed charges) must be maintained in the client’s record and made available to the agency upon request.
Drug pricing

The agency follows Medicare’s drug pricing methodology of 106% of the Average Sales Price (ASP). The agency updates the rates each time Medicare’s rate is updated, up to once per quarter. If a Medicare fee is unavailable for a particular drug, the agency prices the drug at the Point-of-Sale (POS) Actual Acquisition Cost (AAC). Unlike Medicare, the agency effective dates are based on dates of service, not the date the claim is received.

National drug code format

All providers are required to use the 11-digit National Drug Code (NDC) when billing the agency for drugs administered in the provider’s office.

• National Drug Code (NDC) – The 11-digit number the manufacturer or labeler assigns to a pharmaceutical product and attaches to the product container at the time of packaging. The 11-digit NDC is composed of a 5-4-2 grouping. The first 5 digits comprise the labeler code assigned to the manufacturer by the Federal Drug Administration (FDA). The second grouping of 4 digits is assigned by the manufacturer to describe the ingredients, dose form, and strength. The last grouping of 2 digits describes the package size. (WAC 182-530-1050)

• The NDC must contain 11-digits in order to be recognized as a valid NDC. It is not uncommon for the label attached to a drug’s vial to be missing leading zeros.

For example: The label may list the NDC as 123456789 when, in fact, the correct NDC is 01234056789. Make sure that the NDC is listed as an 11-digit number, inserting any leading zeros missing from the 5-4-2 groupings, as necessary. The agency will deny claims for drugs billed without a valid 11-digit NDC.

Electronic Claim Billing Requirements

Providers must continue to identify the drug given by reporting the drug’s CPT or HCPCS code in the Procedure Code field and the corresponding 11-digit NDC in the National Drug Code field. In addition, the units reported in the Units field must continue to correspond to the description of the CPT or HCPCS code.

If the 11-digit NDC is missing, incomplete, or invalid, the claim line for the drug or supply will be denied.
Physicians billing for compound drugs

To bill for compounding of drugs, enter J3490 as the procedure code. Enter the NDC for the main ingredient in the compound on the line level. Put compound in the notes field. Attach an invoice showing all of the products with NDCs and quantities used in the compound. Claims are manually priced per the invoice.

Drugs requiring prior authorization

Drugs requiring prior authorization are noted in the fee schedule with a PA next to them. For information on how to request prior authorization, refer to Prior authorization.

The agency requires prior authorization for all new drugs to market until reviewed and evaluated by the agency’s clinical team according to WAC 182-530-3100. This applies to all products billed under miscellaneous codes or product specific procedure codes.

View the list of Drugs billed under miscellaneous HCPCS codes for drugs that require authorization.

Contraceptives

See the Family Planning Billing Guide for information on coverage for contraceptives dispensed, injected, or inserted in an office/clinic setting, and additional instructions on billing.
Injectable drugs - limitations

Limitations on coverage for certain injectable drugs are listed below, all other diagnoses are noncovered without prior authorization:

</table>
Billing for injectable drugs and biologicals

When billing for injectable drugs and biologicals, providers must use the description of the procedure code to determine the units, and include the correct number of units on the claim to be paid the appropriate amount. For drugs priced at acquisition cost, providers must do one of the following:

- Include a copy of the manufacturer’s invoice for each line item in which billed charges exceed $1,100.00
- Retain a copy of the manufacturer’s invoice in the client’s record for each line item in which billed charges are equal to or less than $1,100.00

Do not bill using unclassified or unspecified drug codes unless there is no specific code for the drug being administered. The National Drug Code (NDC) and dosage given to the client must be included with the unclassified or unspecified drug code for coverage and payment consideration.

HCPCS codes J8499 and J8999 for oral prescription drugs are not covered.

Injectable drugs can be injected subcutaneously, intramuscularly, or intravenously. Indicate that the injectable drugs came from the provider's office supply. The name, strength, and dosage of the drug must be documented and kept in the client’s record.

Chemotherapy drugs
(J9000-J9999)

The following payment guidelines apply to chemotherapy drugs (HCPCS codes J9000-J9999):

- The agency’s maximum allowable fee per unit is based on the HCPCS description of the chemotherapy drug.
- The agency follows Medicare’s drug pricing methodology of 106% of the Average Sales Price (ASP). If a Medicare fee is unavailable for a particular drug, the agency continues to price the drug at 84% of the Average Wholesale Price (AWP).
- Preparation of the chemotherapy drug is included in the payment for the administration of the drug.
- Bill number of units used based on the description of the drug code. For example, if 250 mg of Cisplatin (J9062) is given to the client, the correct number of units is five (5).
Billing for single-dose vials

For single-dose vials, bill for the total amount of the drug contained in the vial(s). Based on the unit definition for the HCPCS code, the agency pays providers for the total number of units contained in the vial. **For example:**

If a total of 150 mg of Etoposide is required for the therapy, and two 100 mg single dose vials are used to obtain the total dosage, then the total of the two 100 mg vials is paid. In this case, the drug is billed using HCPCS code J9181 (Etoposide, 10 mg). If the agency’s maximum allowable fee is $4.38 per 10 mg unit, the total allowable is $87.60 (200 mg divided by 10 = 20 units x $4.38).

The agency pays for justified waste when billed with the JW modifier, for Medicare crossover bills only.

For agency requirements for splitting single dose vials, see *Billing for single dose vials (SDV)* in the Prescription Drug Program Billing Guide.

Billing for multiple dose vials

For multiple dose vials, bill **only** the amount of the drug administered to the client. Based on the unit definition (rounded up to the nearest whole unit) of the HCPCS code, the agency pays providers for only the amount of drug administered to the client. **For example:**

If a total of 750 mg of Cytarabine is required for the therapy, and is taken from a 2,000 mg multiple dose vial, then only the 750 mg administered to the client is paid. In this case, the drug is billed using HCPCS code J9110 (Cytarabine, 500 mg). If the agency’s maximum allowable fee is $23.75 per 500 mg unit, the total allowable is $47.50 [750 mg divided by 500 = 2 (1.5 rounded) units x $23.75].
Billing for oral anti-emetic drugs when part of a chemotherapy regimen

In order to bill the agency for oral anti-emetic drugs (HCPCS codes Q0162-Q0181), the drug must be:

- Part of a chemotherapy regimen.
- Administered or prescribed for use immediately before, during, or within 48 hours after administration of the chemotherapy drug.
- Billed using the appropriate ICD cancer diagnoses.
- Submitted on the same claim with one of the chemotherapy drug codes (HCPCS codes J8530-J9999).

Rounding of units

The following guidelines should be used to round the dosage given to the client to the appropriate number of units for billing purposes:

I. Single-Dose Vials:

For single-dose vials, bill for the total amount of the drug contained in the vial(s). Based on the unit definition of the HCPCS code, the agency pays providers for the total number of units contained in the vial. For example:

If a total of 150 mg of Etoposide is required for the therapy and two 100 mg single dose vials are used to obtain the total dosage, the total of the two 100 mg vials is paid. In this case, the drug is billed using HCPCS code J9181 (Etoposide, 10 mg). If the agency’s maximum allowable fee is $4.38 per 10 mg unit, the total allowable is $87.60 (200 mg divided by 10 = 20 units x $4.38).
II. Billing for Multiple Dose Vials:

For multiple dose vials, bill only the amount of the drug administered to the client. Based on the unit definition (rounded up to the nearest whole unit) of the HCPCS code, the agency pays providers for only the amount of drug administered to the client. **For example:**

If a total of 750 mg of Cytarabine is required for the therapy and is taken from a 2,000 mg multiple dose vial, only the 750 mg administered to the client is paid. In this case, the drug is billed using HCPCS code J9110 (Cytarabine, 500 mg). If the agency’s maximum allowable fee is $23.75 per 500 mg unit, the total allowable is $47.50 [750 mg divided by 500 = 2 (1.5 rounded) units x $23.75].

### Unlisted drugs

(HPHC J3490, J3590, and J9999)

**When it is necessary to bill the agency for a drug using an unlisted drug code, providers must report the National Drug Code (NDC) of the drug administered to the client.** The agency uses the NDC when unlisted drug codes are billed to appropriately price the claim. To be reimbursed:

- Claims must include:
  - The dosage (amount) of the drug administered to the client.
  - The 11-digit NDC of the office-administered drug.
  - One unit of service.
- The drug must be approved by the Food and Drug Administration (FDA).
- The drug must be for a medically accepted indication as defined in WAC 182-530-1050 (see WAC 182-530-2000 Covered – Outpatient drugs, devices, and drug related supplies).
- The drug must not be excluded from coverage.
- For claims billed using an electronic professional claim, list the required information in the *Claim Note* section of the claim.

See [Vaccines/toxoids (immunizations)] for more detailed information on NDC billing.
Note: If there is an assigned HCPCS code for the administered drug, providers must bill the agency using the appropriate HCPCS code. Do not bill using an unlisted drug code for a drug that has an assigned HCPCS code. The agency will recoup payment for drugs paid using an unlisted drug code if an assigned HCPCS code exists for the administered drug.

The list of all injectable drug codes and maximum allowable fees are listed in the Professional administered drugs fee schedule.

**Botulinum toxin injections (Botox)**

The agency requires prior authorization for all Botox injections regardless of the diagnosis.

**Prior authorization for Botox for chronic headaches and chronic tension-type headaches:**
Must be submitted to Comagine Health for a medical necessity review. For more information, see [How do I submit a request to Comagine Health?](#)

**Prior authorization for other Botox treatments:**
Must be submitted to the Agency. Submission of an authorization request must be typed and submitted on the General Information for Authorization (13-835) form along with a completed Botulinum Toxin Provider Questionnaire (13-003) form. See [Where can I download agency forms?](#)

**Collagenase injections**
(HCPCS code J0775, CPT codes 20527 and 26341)

The agency requires prior authorization for HCPCS code J0775, CPT codes 20527 and 26341.

**Hyaluronic acid/viscosupplementation**

The agency covers hyaluronic acid/viscosupplementation for the treatment of pain associated with osteoarthritis of the knee (OA), as follows:

- Restricted to clients who have a documented medical contraindication to other forms of non-surgical care including all of the following: NSAIDS, corticosteroid injections and physical therapy/exercise
- Performed by an orthopedic surgeon, rheumatologist, or physiatrist only
- Limited to two courses per year with at least four months between courses
- Documented evidence of clinical benefit in terms of pain and function from the prior course of treatment is required for subsequent treatment courses

Bill for the injectable drug after all injections are completed.

</tr>
</tbody>
</table>

- The injectable drugs must be billed after all injections are completed.
- Bill CPT injection code 20610 or 20611 each time an injection is given, up to a maximum of 5 per knee, per course of treatment.
- Bill both the injection CPT code and HCPCS drug code on the same claim.

**Alpha Hydroxyprogesterone (17P)**

The agency will cover the use of Alpha Hydroxyprogesterone (17P) as one strategy to reduce the incidence of premature births. The American College of Obstetricians and Gynecologists (ACOG) has indicated that 17P may be of benefit to pregnant women with:

- A singleton gestation.
- A history of prior spontaneous preterm delivery (between 20 weeks gestation and 36 weeks, 6 days gestation) which was either:
  - Due to preterm labor.
  - A spontaneous delivery due to unknown etiology.

The agency will reimburse administering providers (with the exception of hospitals) without prior authorization for 17P and its administration as follows:

- 17P must be purchased by the provider from a sterile compounding pharmacy
- The compound is individually produced on a client-by-client basis
- One dose per week is covered during week 16 through week 36 of pregnancy
How to bill for Alpha Hydroxyprogesterone (17P)

When billing for 17P (HCPCS code J3490), enter the following information on the claim:

- The NDC for the main ingredient in the compound on the line level
- The word *Compound* in the *Notes* field

Attach to the claim the invoice from the pharmacy showing all of the products with NDCs and quantities used in the compound.

Makena®

Makena® (HCPCS code J1726) is the commercially marketed form of 17P. Makena® is covered for clients age 10 and older who have a history of pre-term labor and receive pregnancy supervision. Makena® can be dispensed and billed by a retail pharmacy for administration by a physician, or Makena® can be billed by the physician’s office.

Prolia/Xgeva

The agency covers denosumab injection (Prolia® and Xgeva®) as follows:

- Prior authorization is required
- Providers bill the agency using HCPCS code J0897

When submitting the *General Information for Authorization* (13-835) form to request PA, field 15 must contain the brand name (Prolia® or Xgeva®) of the requested product. See *Where can I download agency forms?* The agency will reject requests for J0897 without this information. Providers must complete all other required fields.

Spinraza™

See *Outpatient Hospital Services Billing Guide* for information.
Synagis®

What are the requirements for administration and authorization of Synagis®?
(CPT code 90378)

The agency requires providers to follow the guidelines and standards as published in *The Official Journal of the American Academy of Pediatrics, Updated guidance for Palivizumab Prophylaxis among infants and young children at increased risk of hospitalization for respiratory syncytial virus infection* for clients considered for Synagis® prophylaxis during the RSV season.

**Note:** This information relates only to those clients NOT enrolled in an agency-contracted managed care organization (MCO). For clients enrolled in an agency-contracted MCO, refer to the coverage guidelines in the enrollee’s plan.

Respiratory syncytial virus (RSV) Season

The agency has established the RSV season as December through April. The agency monitors RSV incidence as reported by laboratories throughout the state and may change the dates based on the data collected. Unless otherwise notified by the agency, these dates are firm.

Criteria for the administration of Synagis® to agency clients

The agency requires that the following guidelines and standards of care be applied to clients considered for Synagis® prophylaxis during the RSV season. The agency established these guidelines and standards as published in *The Official Journal of the American Academy of Pediatrics, “Updated guidance for Palivizumab Prophylaxis among infants and young children at increased risk of hospitalization for respiratory syncytial virus infection.”*

Are there other considerations when administering Synagis®?

Administer the first dose of Synagis® 48 to 72 hours before discharge or promptly after discharge to infants who qualify for prophylaxis during the RSV season.

If an infant or child who is receiving Synagis® immunoprophylaxis experiences a breakthrough RSV infection, continue administering monthly prophylaxis for the maximum allowed doses as above.

**Note:** The agency does not authorize Synagis® for children with cystic fibrosis.
What are the authorization and billing procedures for Synagis®?

Direct questions or concerns regarding billing and authorization of Synagis® to the agency at (800) 562-3022. Fax prior authorization requests on completed agency prior authorization form(s) to (866) 668-1214.

Bill the agency for Synagis® using the following guidelines:

- Synagis® may be dispensed and billed by a retail pharmacy for administration by a physician, or may be billed by the physician’s office.

- Pharmacies bill through standard pharmacy Point-of-Sale electronic claim submission using the appropriate National Drug Code for the product dispensed.

- Physician’s offices billing directly for Synagis® must bill on a professional claim using CPT code 90378.

- To bill for the administration of Synagis® use CPT code 90471 or 90472 if:
  - Dispensed through the pharmacy POS.
  - Administered through the physician’s office.

What is the criteria for coverage or authorization of Synagis®?

Note: Criteria for coverage or authorization vary depending on the patient’s age.

- Children younger than 1 year of age

  The agency requires providers to use and accurately apply the criteria for administration of Synagis® to agency clients. Billing for Synagis® outside of the guidelines mentioned in the Official journal of the American Academy of Pediatrics will be considered an overpayment and will be subject to recoupment.

  The agency will continue to cover Synagis® for clients younger than 1 year of age without authorization, as long as utilization is appropriate. In this case, physicians and pharmacies are not required to submit paperwork or obtain pre-approval for the administration of Synagis®.
Physician-Related Services/Health Care Professional Services

- **Children age 1 and 2**

  Prior authorization is required to administer Synagis® to agency clients age 1 and 2. Request authorization by faxing the *Request for Synagis®* (13-771) form. See [Where can I download agency forms?](#)

- **Children age 3 and older**

  The agency does not pay for administering Synagis® to clients age 3 and older.

**What are the authorization procedures for Synagis®?**

- **Pharmacy billers**
  
  - Pharmacies must submit a request for authorization using the agency’s *Pharmacy Information Authorization* (13-835A) form as the cover sheet. This form must be typed. See [Where can I download agency forms?](#)
  
  - Fax the form to the agency at: (866) 668-1214. If authorized, the agency may approve the 100mg strength, the 50mg strength, or both. However, pharmacies must use **National Drug Code (NDC) 60574-4113-01** in box #21 on *Pharmacy Information Authorization* form (13-835A). After the agency reviews your request, you will receive notification by fax of strengths, quantities, and NDC(s) approved. See [Where can I download agency forms?](#)
  
  - The *Request for Synagis* (13-771) form must accompany a typed *Pharmacy Information Authorization* form (13-835A) as supporting documentation. See [Where can I download agency forms?](#)
  
  - Pharmacies billing for Synagis® through standard pharmacy Point-of-Sale electronic claim submission must use the appropriate National Drug Code for the product dispensed.

- **Physician office billers**
  
  - Physician offices must submit a request for authorization using the agency’s *General Information for Authorization* form (13-835) as the cover sheet. This form must be typed. See [Where can I download agency forms?](#)
  
  - The agency’s *Request for Synagis®* form (13-771) must be submitted as supporting documentation in addition to the *General Information for Authorization* form (13-835). See [Where can I download agency forms?](#)
  
  - Physician offices billing the agency directly for Synagis® must bill on a professional claim using CPT code 90378. After the agency reviews your request, you will receive notification by fax of the total milligrams and NDC(s) approved.
• **Requesting an increase in Synagis® dose**

The quantity of Synagis® authorized for administration is dependent upon the weight of the client at the time of administration. If you obtained authorization for a quantity of Synagis® that no longer covers the client’s need due to weight gain:

- Complete the appropriate ProviderOne Cover Sheet by entering the initial authorization number.
  - Pharmacy billers use the Pharmacy PA Supporting Docs sheet.
  - Physician office billers use *PA (Prior Authorization) Pend Forms* sheet.
- Complete the *Request for Additional MG's of Synagis® Due to Client Weight Increase* (HCA 13-770) form and submit along with the *ProviderOne Cover Sheet*. See *Where can I download agency forms?*

The agency will update the authorization to reflect an appropriate quantity and return a fax to the requestor confirming the increased dosage. See the *Updated guidance for Palivizumab Prophylaxis among infants and young children at increased risk of hospitalization for respiratory syncytial virus infection*.

• **Evaluation of authorization requests for Synagis®**

The agency physicians will evaluate requests for authorization to determine whether the client falls within 2014 AAP guidelines for the administration of Synagis®. The agency will fax an approval or denial to the requestor.

Allow at least five business days for the agency to process the authorization request. You may verify the status of a pending authorization by using the ProviderOne *PA Inquire* feature.

**Verteporfin injection**  
(HCPCS code J3396)

Verteporfin injections are limited to ICD diagnosis codes H35.30 and H35.32.

**Vivitrol**  
(HCPCS J2315)

The agency does not require prior authorization for Vivitrol.
How do providers who participate in the 340B drug pricing program bill for drugs and dispensing fees? (WAC 182-530-7900)

- All provider NPI(s) used for billing 340B drugs to Washington Apple Health managed care or fee for service programs must be accurately reported on the federal Office of Pharmacy Affairs Medicaid Exclusion File (MEF).
- All drugs billed under the 340B participating NPI(s) must be purchased under the 340B program.
- Only the qualified participating Public Health Services-covered entity (CE) may bill 340B drugs to Washington Apple Health managed care or fee for service programs.
- Providers must bill the agency the 340B actual acquisition cost (AAC) for all drugs purchased under the 340B drug discount program—unless billing an outpatient prospective payment system (OPPS) or ambulatory surgery center (ASC) claim paid under a grouper methodology.

Drugs administered to managed care clients but reimbursed through fee-for-service

For clients enrolled in an agency-contracted managed care organization (MCO), the agency reimburses providers through fee-for-service for the following professionally administered drugs:

Foot Care Services

(WAC 182-531-1300)

This section addresses care of the lower extremities (foot and ankle) referred to as foot care and applies to clients age 21 and older.

Note: Care of the lower extremity is defined as foot and ankle care.

Are foot care services covered?

The agency covers foot care services for clients age 21 and older as listed in this section when those services are provided by any of the following health care providers and billed to the agency using procedure codes and diagnosis codes that are within their scope of practice:

- Physicians and surgeons or physician's assistants-certified (PA-C)
- Osteopathic physicians and surgeons, or physician's assistant-certified (PA-C)
- Podiatric physicians and surgeons
- Advanced registered nurse practitioners (ARNP)

The agency covers evaluation and management visits to assess and diagnose conditions of the lower extremities. Once diagnosis is made, the agency covers treatment if the criteria in WAC 182-531-1300 (4)(a) are met.

What foot care services are not covered?

(WAC 182-531-0150 (1)(n))

The agency does not cover:

- Treatment of or follow-up office visits for chronic acquired conditions of the lower extremities. The agency pays for prescriptions using the criteria found in the Prescription Drug Program Billing Guide.

- The following foot care services, unless the client meets criteria and conditions outlined in WAC 182-531-1300:
  - Routine foot care, such as but not limited to:
    - Cutting or removing warts, corns and calluses
    - Treatment of tinea pedis
    - Trimming, cutting, clipping, or debriding of nails
Nonroutine foot care, such as, but not limited to treatment of:

- Adult acquired flatfoot (metatarsus adductus or pes planus)
- Bunions and tailor's bunion (hallux valgus)
- Cavovarus deformity, acquired
- Equinus deformity of foot, acquired
- Flat feet
- High arches (cavus foot)
- Hallux malleus
- Hallux limitus
- Onychomycosis

- Any other service performed in the absence of localized illness, injury, or symptoms involving the foot.

**Note:** Providers may request an exception to rule (ETR) for treatment of those conditions not described in this section. See WAC 182-501-0160 Exception to rule – Request for a noncovered health care service.

### What foot care services does the agency pay for?

The agency considers treatment of the lower extremities to be medically necessary only when there is an acute condition, an exacerbation of a chronic condition, or presence of a systemic condition such as metabolic, neurologic, or peripheral vascular disease and evidence that the treatment will prevent, cure or alleviate a condition in the client that causes pain resulting in inability to perform activities of daily living, acute disability, or threatens to cause the loss of life or limb, unless otherwise specified. ([WAC 182-531-1300 (4)(a)](https://app.leg.wa.gov/coderegister/section.cfm?CodeSection=WAC-182-531-1300&CodeYear=2023&Section=4(a)))

The agency pays for:

1. Treatment of the following conditions:
   a) Acute inflammatory processes such as, but not limited to, tendonitis
   b) Circulatory compromise such as, but not limited to:
      i) Lymphedema
      ii) Raynaud's disease
      iii) Thromboangiitis obliterans
      iv) Phlebitis
   c) Injuries, fractures, sprains, and dislocations
d) Gout

e) Lacerations, ulcerations, wounds, blisters

f) Neuropathies (e.g., reflex sympathetic dystrophy secondary to diabetes and charcot arthropathy

g) Osteomyelitis

h) Postoperative complications

i) Warts, corns, or calluses in the presence of an acute condition such as infection and pain effecting the client’s ability to ambulate as a result of the warts, corns, or calluses and meets the medical necessity criteria found under the heading What foot care services does the agency pay for?

j) Tendonitis

k) Soft tissue conditions, such as, but not limited to:
   
   i) Rashes.
   ii) Infections (fungal, bacterial).
   iii) Gangrene.
   iv) Cellulitis of lower extremities.
   v) Soft tissue tumors.
   vi) Neuroma.

l) Nail bed infections (paronychia).

m) Treatment of tarsal tunnel syndrome.

2) Treatment of diabetic foot ulcers with skin substitutes. See the agency’s Outpatient prospective payment system (OPPS) fee schedule for more information.

3) Trimming and/or debridement of nails to treat, as applicable, conditions found under #1 in this section.

**Note:** The agency pays for one treatment in a 60-day period. The agency covers additional treatments in this period if documented in the client's medical record as being medically necessary.

4) A surgical procedure to treat one of the conditions found under #1 in this section performed on the lower extremities, and performed by a qualified provider.
5) Impression casting to treat one of the conditions found under #1 in this section. The agency includes 90-day follow-up care in the reimbursement.

6) Custom fitted or custom molded, or both, orthotic devices to treat one of the conditions found under #1 in this section.

**Note:** The agency's fee for the orthotic device includes reimbursement for a biomechanical evaluation (an evaluation of the foot that includes various measurements and manipulations necessary for the fitting of an orthotic device).

The agency includes an evaluation and management (E/M) fee reimbursement in addition to an orthotic fee reimbursement if the E/M services are justified and well documented in the client's medical record.

---

### What foot care services does the agency not pay for?

(WAC 182-531-1300 (5))

The agency does not pay:

- For the following radiology services:
  - Bilateral X-rays for a unilateral condition
  - X-rays in excess of three views
  - X-rays that are ordered before the client is examined

- Podiatric physicians or surgeons for X-rays for any part of the body other than the foot or ankle.

### May I bill the client for foot care services which the agency does not pay for?

A waiver is required when clients choose to pay for a foot care service for which the agency does not pay. Requesting an ETR is optional for the client. See WAC 182-502-0160, Billing the Client for details.
How do I bill for foot care services?

The agency will pay for treatment of an acute condition only when the condition is the primary reason for the service. This must be documented in the client’s record. When billing, the diagnosis code for the acute condition must be on the service line for the foot care service being billed.

If the description of the orthotic code indicates the code is for a single orthotic or impression casting of one foot, either modifier RT or LT must be included on the claim. Providers must use an appropriate procedure code with the word "pair" in the description when billing for fabrications, casting, or impressions of both feet.

The agency pays for an Evaluation and Management (E/M) code and an orthotic on the same day if the E/M service performed has a separately identifiable diagnosis and the provider bills using modifier 25 to indicate a significant and separately identifiable condition exists and is reflected by the diagnosis.

If Medicare does not cover orthotics and casting, providers may bill the agency directly for those services without submitting a Medicare denial, unless the client's eligibility check indicates QMB - Medicare only, in which case the orthotics and casting is not covered by the agency. If Medicare does cover the service, bill Medicare first.
Home Health and Hospice

Physician signature requirement for home health services

To comply with federal regulations, home health services must be cosigned by a physician, if ordered by a nonphysician provider. If the physician is cosigning the order (that was written by a nonphysician practitioner) for home health services, the physician may bill the agency using CPT® code 99446. All other information regarding home health services may be found in the agency’s Home Health Services (Acute Care Services) Billing Guide.

Physicians providing service to hospice clients

The agency pays providers who are attending physicians and not employed by the hospice agency:

- For direct physician care services provided to a hospice client
- When the provided services are not related to the terminal illness
- When the client’s provider, including the hospice provider, coordinates the health care provided

Concurrent care for children who are on hospice

(WAC 182-551-1860)

In response to the Patient Protection and Affordable Care Act, clients age 20 and younger who are on hospice service are also allowed to have access to curative services.

Note: The legal authority for these clients’ hospice palliative services is Section 2302 of the Patient Protection and Affordable Care Act of 2010 and Section 1814(a)(7) of the Social Security Act; and for client’s curative services is Title XIX Medicaid and Title XXI Children's Health Insurance Program (CHIP) for treatment of the terminal condition.

Major Trauma Services

Increased payments for major trauma care

The legislature established the Trauma Care Fund (TCF) in 1997 to help offset the cost of operating and maintaining a statewide trauma care system. The Department of Health (DOH) and the Health Care Authority (the agency) receive funding from the TCF to help support provider groups involved in the state’s trauma care system.

The agency uses its TCF funding to draw federal matching funds. The agency makes supplemental payments to designated trauma centers and pays enhanced rates to physicians/clinical providers for trauma cases that meet specified criteria.

The enhanced rates are available for trauma care services provided to a fee-for-service Medical Assistance client with an Injury Severity Score (ISS) of:

(a) 13 or greater for adults.
(b) 9 or greater for pediatric patients (age 14 and younger).
(c) Less than (a) or (b) for a trauma patient received in transfer by a Level I, II, or III trauma center.

Beginning with dates of service on and after July 1, 2012, physicians/clinical providers also receive enhanced rates for qualified trauma care services provided to managed care enrollees who meet trauma program eligibility criteria.

Client eligibility groups included in TCF payments to physicians

Claims for trauma care services provided to the following client groups are eligible for enhanced rates:

- Medicaid (Title XIX)
- CHIP (Title XXI)
- Medical Care Services (Aged, Blind, and Disabled (ABD))
- Apple Health for Kids (Children’s Health)
Client eligibility groups excluded from TCF payments to physicians

Claims for trauma care services provided to the following client groups are not eligible for enhanced rates:

- Refugee Assistance
- Alien Emergency Medical
- Family Planning Only – Pregnancy Related/Family Planning Only (formerly referred to as TAKE CHARGE)

Services excluded from TCF payments to physicians

Claims for the following services are not eligible for enhanced rates:

- Laboratory and pathology services
- Technical Component (TC)-only radiology services
- Services unrelated to a client’s traumatic injury (e.g., treatment for chronic diseases)
- Services provided after discharge from the initial hospital stay, except for inpatient rehabilitation services and/or planned follow-up surgery related to the traumatic injury and provided within six months of the date of the traumatic injury

TCF payments to physicians

Enhanced rates for trauma care
(WAC 182-531-2000)

To receive payments from the TCF, a physician or other clinician must:

- Be on the designated trauma services response team of any Department of Health (DOH)-designated or DOH-recognized trauma service center.
- Submit all information to the TCF that the agency requires to monitor the trauma program.
The agency makes a TCF payment to a physician or clinician:

- When the provider submits an eligible trauma claim with the appropriate trauma indicator within the time frames specified by the agency.
- On a per-claim basis.

Each qualifying trauma service or procedure on the provider's claim is paid at the agency's current fee-for-service rate, multiplied by the appropriate payment enhancement percentage at a rate of 2 ¾ times the agency's current fee-for-service rate for qualified trauma services, or other payment enhancement percentage the agency deems appropriate. Laboratory and pathology services and procedures are not eligible for payments from the TCF and are paid at the agency's current fee-for-service rate.

For an eligible trauma service, payment is currently calculated as follows:

\[
\text{Trauma care payment} = \text{Base rate} \times 275\%
\]

**Criteria for TCF payments to physicians**

Physicians and clinical providers receive TCF payments from the agency:

1) For qualified trauma care services. Qualified trauma care services are those that meet the ISS specified in subsection (3) below. Qualified trauma care services also include inpatient rehabilitation and surgical services provided to Medical Assistance clients within six months of the date of the qualifying injury when the following conditions are met:

   a) The follow-up surgical procedures are directly related to the qualifying traumatic injury.

   b) The follow-up surgical procedures were planned during the initial acute episode of care (inpatient stay).

   c) The plan for the follow-up surgical procedure(s) is clearly documented in the medical record of the client’s initial hospitalization for the traumatic injury.

2) For hospital-based services only, except as specified in (4).

3) Only for trauma cases that meet the ISS of:

   a) Thirteen or greater for an adult trauma patient (a client age 15 or older).

   b) Nine or greater for a pediatric trauma patient (a client younger than age 15).
c) Less than 13 for adults or 9 for pediatric patients for a trauma case received in transfer by a Level I, II, or III trauma service center.

4) On a claim-specific basis. Services must have been provided in a designated trauma service center, except that qualified follow-up surgical care within six months of the initial traumatic injury, as described in subsection (1) above, may be provided in other approved care settings, such as Medicare-certified ambulatory surgery centers.

5) At a rate determined by the agency. The enhanced rates are subject to the following limitations:

   a) Laboratory and pathology charges are not eligible for enhanced payments from the TCF. Laboratory and pathology services are paid at the lesser of the agency’s current FFS rate or the billed amount.

   b) Technical component only (TC) charges for radiology services are not eligible for enhanced rates when billed by physicians. (These are facility charges.)

   c) The rate enhancement percentage is subject to periodic adjustments to ensure that total payments from the TCF for the state fiscal year will not exceed the legislative appropriation for that fiscal year. The agency has the authority to take whatever actions are needed to ensure it stays within its TCF appropriation.

TCF payments to providers in transferred trauma cases

When a trauma case is transferred from one hospital to another, the agency makes TCF payments to providers as follows:

- If the transferred case meets or exceeds the appropriate ISS threshold (ISS of 13 or greater for adults, and 9 or greater for pediatric clients), both transferring and receiving hospitals and physicians/clinicians who furnished qualified trauma care services are eligible for increased payments from the TCF. The transfer must be to a higher level designated trauma service center, and the transferring hospital must be at least a level 3 hospital. Transfers from a higher level to a lower level designated trauma service center are not eligible for the increased payments.

- If the transferred case is below the ISS threshold, only the receiving hospital and the physicians/clinicians at the receiving facility who furnished qualified trauma care services are eligible for increased payments from the TCF. The transferring hospital and clinical team are paid the regular rates for the services they provided to the transferred client with an ISS below the applicable threshold.
Billing for trauma care services

To bill for qualified trauma care services, physicians and clinical providers must add the trauma modifier ST to the appropriate procedure code line. Enter the required ST modifier into the modifier field of the claim to receive the enhanced payment.

**Note:** The ProviderOne system can accommodate up to 4 modifiers on a line, if multiple modifiers are necessary.

Claims for trauma care services provided to a managed care enrollee must be submitted to the client’s managed care plan. Claims for trauma care services provided to a fee-for-service client must be submitted to the agency. The payment for a trauma care service provided to a managed care enrollee will be the same amount for the same service provided to a fee-for-service client.

Adjusting trauma claims

The agency considers a provider’s request to adjust a claim for the purpose of receiving TCF payment (e.g., adding the ST modifier to a previously billed service, or adding a new procedure with the ST modifier to the claim) only when the adjustment request is received within 1 year from the date of service on the initial claim. See WAC 182-502-0150(11).

A claim which included a trauma service may be submitted for adjustment beyond 365 calendar days when the reason for the adjustment request is other than TCF payment (e.g., adding lab procedures, correcting units of service).

**Note:** The agency takes back the original payment when processing an adjustment request. Electronic claims get a Julian date stamp on the date received, including weekends and holidays. When a trauma care service that was billed timely and received the enhanced rate and is included in a claim submitted for adjustment after 365 days, the agency will pay the provider the regular rate for the service when the adjustment is processed, and recoup the original enhanced payment.

All claims and claim adjustments are subject to federal and state audit and review requirements.
Injury severity score (ISS)

**Note:** The current ISS qualifying score is 13 or greater for adults, and 9 or greater for pediatric clients (through age 14 only).

The ISS is a summary severity score for anatomic injuries.

- It is based upon the Abbreviated Injury Scale (AIS) severity scores for six body regions:
  - Head and neck
  - Face
  - Chest
  - Abdominal and pelvic contents
  - Extremities and pelvic girdle
  - External

- The ISS values range from 1 to 75. Generally, a higher ISS indicates more serious injuries.

**Additional Information**

For information on the **statewide trauma system**, designated trauma services, trauma service designation, trauma registry, or trauma care fund (TCF), see the Department of Health’s [Trauma System](#) webpage.

For information on a specific **trauma claim**, contact:

Health Care Authority  
Customer Service Center  
800-562-3022
Physician/clinical provider list

Below is a list of providers eligible to receive enhanced rates for providing major trauma care services to Medical Assistance clients:

- Advanced Registered Nurse Practitioner
- Anesthesiologist
- Cardiologist
- Certified Registered Nurse Anesthetist
- Critical Care Physician
- Emergency Physician
- Family/General Practice Physician
- Gastroenterologist
- General Surgeon
- Gynecologist
- Hand Surgeon
- Hematologist
- Infectious Disease Specialist
- Internal Medicine
- Nephrologist
- Neurologist
- Neurosurgeon
- Obstetrician
- Ophthalmologist
- Oral/Maxillofacial Surgeon
- Orthopedic Surgeon
- Pediatric Surgeon
- Pediatrician
- Physiatrist
- Physician Assistant
- Plastic Surgeon (not cosmetic surgery)
- Pulmonologist
- Radiologist
- Thoracic Surgeon
- Urologist
- Vascular Surgeon

**Note:** Many procedures are not included in the enhanced payment program for major trauma services.

The services of some specialists listed above are eligible for enhanced rates only when provided in the context of major trauma care (e.g., stabilization services by a General Practitioner prior to client’s transfer to a trauma care facility; C-Section performed by obstetrician on pregnant accident victim when fetus is in danger).
Oral Health

Access to Baby and Child Dentistry (ABCD) Program
(WAC 182-535-1245)

What is the purpose of the ABCD program?

The purpose of the ABCD program is to increase access to preventive dental services for infants, toddlers, and preschoolers age five and younger who are eligible for Washington Apple Health (Medicaid). To find out more about the ABCD program, visit Access to Baby & Child Dentistry.

Who may provide ABCD dentistry?

Primary care medical providers (physicians, ARNPs, physician assistants) who are certified through the Arcora (formerly known as The Washington Dental Service Foundation) are eligible for select ABCD program enhanced reimbursement rates.

To become trained and certified to provide the services in the table above, primary care medical providers must complete a class offered by Washington Dental Service Foundation (WDSF). The 1 ½ hour continuing medical education (CME) class is given in-office or in community settings and teaches providers to deliver the following preventive services:

- Links between oral health and total health
- Oral health screening and risk assessment
- Providing oral health education and anticipatory guidance to clients and families
- Application of topical fluoride
- Billing
- Referrals for dental care

Contact Arcora at mcaplow@arcorafoundation.org or 206-473-9542 for questions about current certification or for scheduling certification training.
What ABCD dental services are billable by certified primary care medical providers?

The agency pays enhanced fees to certified participating primary care medical providers for delivering the following services:

- **Periodic oral evaluations.** One periodic evaluation allowed every 6 months, per client, per provider.

- **Topical application of fluoride** (fluoride varnish). Three times within a 12-month period with a minimum of 110 days between applications.

- **Family oral health education.** An oral health education visit must include all of the following:
  - **"Lift Lip" training:** Show the "Lift Lip" flip chart or DVD provided at the certification workshop. Have the parent(s)/guardian(s) practice examining the child using the lap position. Ask if the parent(s)/guardian(s) feel comfortable doing this once per month.
  - **Oral hygiene training:** Demonstrate how to position the child to clean the teeth. Have the parent(s)/guardian(s) actually practice cleaning the teeth. Record the parent/guardian’s response.
  - **Risk assessment for early childhood caries:** Assess the risk of dental disease for the child. Obtain a history of previous dental disease activity for this child and any siblings from the parent(s)/guardian(s). Also note the dental health of the parent(s)/guardian(s).
  - **Dietary counseling:** Talk with the parent(s)/guardian(s) about the need to use a cup, rather than a bottle, when giving the child anything sweet to drink. Note that dietary counseling was delivered.
  - **Discussion of fluoride supplements:** Discuss fluoride supplements with the parent(s)/guardian(s). Let the parent/guardian know fluoride supplements are covered under the agency's Prescription Drug program. Fluoride prescriptions written by the primary care medical provider may be filled at any Medicaid-participating pharmacy. Ensure that the child is not already receiving fluoride supplements.
  - **Documentation:** Record the activities provided and the duration of the oral education visit in the client’s or the client’s designated adult member’s (family member or other responsible adult) file.
Topical fluoride treatment

The agency covers fluoride varnish per client, per provider or clinic as follows:

<table>
<thead>
<tr>

Oral surgery

Services performed by a physician or dentist specializing in oral maxillofacial surgery

(WAC 182-535-1094)

Provider requirements

• An appropriate consent form, if required, signed and dated by the client or the client’s legal representative must be in the client’s record.

• An anesthesiologist providing oral health care under this section must have a current provider’s permit on file with the agency.

• A health care provider providing oral or parenteral conscious sedation, or general anesthesia, must meet all of the following:
  ✓ The provider’s professional organization guidelines
  ✓ The Department of Health (DOH) requirements in chapter 246-817 WAC
  ✓ Any applicable DOH medical, dental, and nursing anesthesia regulations

• Agency-enrolled dental providers who are not specialized to perform oral and maxillofacial surgery must use only the current dental terminology (CDT) codes to bill claims for services that are listed in the Oral surgery coverage table. (See WAC 182-535-1070 (3)). See the agency’s Dental-Related Services Billing Guide.

Note: If it is anticipated that the client will require orthognathic surgery as part of orthodontic treatment, see the agency’s Orthodontic Services Billing Guide.

*Billing evaluation and management (E/M) codes*

Dentists specializing in oral surgery must use CPT codes and follow CPT rules when billing for evaluation and management of clients. When billing for these services, the following must be true:

- Services must be billed on an 837P HIPAA compliant claim.
- Services must be billed using one of the CPT codes above and modifiers must be used if appropriate.
## Prosthetic/Orthotics

### Prosthetic and orthotics for podiatry and orthopedic surgeons

The following codes are payable only to podiatrists and orthopedic surgeons:

(For authorization requirements, follow the [Prosthetic and Orthotic Devices Billing Guide](#).)
Supplies paid separately when dispensed from provider’s office/clinic

Casting materials

Bill the appropriate HCPCS code (Q4001-Q4051) for fiberglass and plaster casting materials limited to one unit per limb per day. Do not bill for the use of a cast room. Use of a cast room is considered part of a provider's practice expense.

Inhalation solutions

Refer to the Professional administered drugs fee schedule for those specific codes for inhalation solutions that are paid separately.

**Note:** L8603, L8604 and/or L8606 must be billed on the facility claim only if the implantation procedure is performed in place of service 21 and 22.
Transgender Health Services

For resources that may be helpful for providing healthcare services to members of the transgender community, go to the Transgender health services program webpage.

What transgender health services are covered?
(WAC 182-531-1675)

In addition to all the other services addressed in this billing guide, Medicaid covers the following service related to transgender health and the treatment of gender dysphoria:

- Hormone replacement therapy (HRT)
- Pre-puberty suppression therapy
- Mental health
- Surgical services
- Anesthesiology
- Labs
- Pathology
- Radiology
- Hospitalization
- Physician services
- Hospitalizations and physician services related to postoperative complications of procedures performed for gender reassignment surgery

Fee-for-service clients

All the services listed in “What transgender health services are covered?” are covered for clients who are enrolled under Medicaid’s fee-for-service program. Some services require prior authorization (PA). See What is prior authorization (PA)?
Managed care clients

Services covered under a managed care organization (MCO): If the client is covered under an agency-contracted MCO, the MCO is responsible for all medical care including hormone and mental health services to treat gender dysphoria. Contact the MCO for requirements for those services. Some clients may meet the access to care standards, therefore these mental health care services may be provided by a community mental health agency under the Behavioral Health Organization (BHO).

Services covered under fee-for-service:

- If the client is covered under an MCO, fee-for-service is responsible for surgical procedures, including electrolysis and post-operative complications if required, to treat gender dysphoria. These services require PA by the Medicaid agency. See What is prior authorization (PA)?

- The agency pays for consultations related to gender reassignment surgery (GRS) and electrolysis or laser hair removal. These consultations are paid for by the agency through fee-for-service. To ensure payment, bill the agency directly for this consultative visit using an expedited prior authorization (EPA) number. See EPA # 870001400 for details.

- The agency pays for surgical procedures related to GRS and electrolysis and postoperative complications through fee-for-service. The MCO is not responsible for surgical procedures related to GRS, including electrolysis and postoperative complications. PA is required from the agency for these procedures. When billing the agency for complications related to GRS, providers must add “SCI=TC” in the Comments field on the claim.
What are the components of transgender health services?

The gender dysphoria treatment program has four components. The MCO’s case managers and the FFS staff coordinate care across the programs. The components described below are not intended to be sequential and may run concurrently to meet the client’s medical needs.

Component 1 – Includes the following:

- Conducting an initial assessment and makes or confirms the diagnosis
- Developing an individualized treatment plan
- Managing referrals to other qualified providers as indicated and
- Assisting with navigation of other program requirements

Component one must be provided by a provider who is a board-certified physician, a psychologist, a board-certified psychiatrist, or a licensed advanced registered nurse practitioner (ARNP). Component one services provided should be consistent with World Professional Association for Transgender Health (WPATH) Standards of Care and WAC 182-531-1675.

Component 2 – Includes mental health and medical services directly related to the pathway to gender reassignment surgery.

- Medical treatment may include androgen suppression, puberty suppression, continuous hormone therapy, and laboratory testing to monitor the safety of hormone therapy.

Providers must list a gender dysphoria (F64.0, F64.1, F64.2 and F64.9) diagnosis on prescriptions for their clients receiving hormone replacement or puberty blocking agents.

- Mental health treatment, provided to the client, client’s spouse, parent, guardian, child, or person with whom the client has a child in common, if the treatment is directly related to the client’s care, is medically necessary and is in accordance with the provisions of WAC 182-531-1400.

These services must be provided by agency-approved providers.
Component 3 – Includes pre-surgical requirements as follows:

- **For top surgery**: A referral to the surgeon from a PCP and a comprehensive evaluation by an agency-approved mental health professional.

- **For bottom surgery**: A referral to the surgeon from a PCP, a comprehensive evaluation by two agency approved mental health professionals and a pre-surgical consultation by an agency-approved surgeon.

Component 4 - Includes surgical interventions and requirements. **Prior authorization is required for this component only (surgical).**

- **Client requirements** - The client must:
  - Be age 18 or older, unless allowed under the Early and Periodic Screening, Diagnosis, and Treatment (EPSDT) program
  - Be competent to give consent for treatment and undergo a comprehensive psychosocial evaluation
  - Have received continuous hormonal therapy as required by the treatment plan to meet treatment objectives
  - Have lived in a gender role congruent with the client's gender identity immediately preceding surgery as required by the treatment plan to meet treatment objectives

**Note for EPSDT:** If gender dysphoria treatment is requested or prescribed for clients age 20 and younger under the Early and Periodic Screening, Diagnosis, and Treatment (EPSDT) program, the agency evaluates it as a covered service under the EPSDT program’s requirement that the service is medically necessary, safe, effective, and not experimental.

- **Prior authorization** (PA) – PA is required for Component 4 only. Providers must fax a completed *General Authorization* form, **HCA 13-835** (See [Where can I download agency forms?](#)), along with any additional documentation required (see the following pages) to the agency at 866-668-1214:
For top surgery

The agency requires referral letters from each of the following:

✓ One mental health provider which addresses all of the following:

➢ Confirm the diagnosis of gender dysphoria using current DSM 5 (Diagnostic and Statistical Manual of Mental Disorders) criteria

➢ Assure the client is a good candidate

➢ Assure the surgery is the next reasonable step in the care

➢ Assure the client has no coexisting behavioral health conditions (substance abuse problems, or mental health illnesses), which could hinder participation in gender dysphoria treatment

➢ Assure any coexisting behavioral health condition is adequately managed

✓ The provider managing the hormonal therapy:

➢ Outcome of clients current hormonal therapy

✓ The surgeon performing surgery:

➢ Written surgical consultation

For bottom surgery

The agency requires referral letters from each of the following:

✓ Two mental health providers which addresses all of the following:

➢ The psychosocial evaluation

➢ Confirm the diagnosis of gender dysphoria using current DSM 5 (Diagnostic and Statistical Manual of Mental Disorders) criteria

➢ Assure the client is a good candidate

➢ Assure the surgery is the next reasonable step in the care

➢ Assure the client has no coexisting behavioral health conditions (substance abuse problems, or mental health illnesses), which could hinder participation in gender dysphoria treatment
Physician-Related Services/Health Care Professional Services

- Assure any coexisting behavioral health condition is adequately manage
- Description of the relationship between the mental health professional and the client and treatment to date

✔ The surgeon performing surgery:
- Written surgical consultation
- Clinical justification for surgery
- Confirmation that the client is able to comply with the postoperative requirements
- Assurance that all surgical criteria has been met or medical necessity is established
- Copy of the signed Sterilization consent form with the clients understanding of the permanent impact on the reproductive system consistent with the requirements of WAC 182-531-1550
- The surgical plan description with listed all planned procedures and timeline

Surgeons must indicate in Comments field 30 on the agency’s General Authorization form (HCA 13-835) the suite of services being requested according to their Core Provider Agreement contract addendum. See Where can I download agency forms?

✔ The provider managing the hormonal therapy:
- A statement regarding the client’s adherence to the medical and mental treatment plan
- Outcome of client’s current hormonal therapy
- Assurance that all the members of the treatment team will be available to coordinate or provide postoperative care as needed

Note: If the client fails to complete all of the requirements above, the agency will require documentation of the clinical decision-making process in the prior authorization submission in order to review for individual consideration.
Covered services – The agency covers the following services in Component 4:

- Blepharoplasty
- Breast reconstruction (male to female)
- Cliteroplasty
- Colovaginoplasty
- Colpectomy
- Genital surgery
- Genital electrolysis as required as part of the genital surgery
- Hysterectomy
- Labiaplasty
- Laryngoplasty
- Mammoplasty with or without chest reconstruction
- Metoidioplasty
- Orchiectomy
- Panniculectomy
- Penectomy
- Phalloplasty
- Placement of testicular prosthesis
- Rhinoplasty
- Salpingo-oophorectomy
- Scrotoplasty
- Urethroplasty
- Vaginectomy
- Vaginoplasty
Physician-Related Services/Health Care Professional Services

- **Noncovered services** – For purposes of this section, the agency will review on a case-by-case basis and may pay for the following noncovered services under exception to rule:
  - Cosmetic procedures and services:
    - Brow lift
    - Calf implants
    - Cheek/malar implants
    - Chin/nose implants
    - Collagen injections
    - Drugs for hair loss or growth
    - Facial or trunk electrolysis, except for the limited electrolysis
    - Facial feminization
    - Face lift
    - Forehead lift
    - Hair transplantation
    - Jaw shortening
    - Lip reduction
    - Liposuction
    - Mastopexy
    - Neck tightening
    - Pectoral implants
    - Reduction thyroid chondroplasty
    - Removal of redundant skin
    - Suction-assisted lipoplasty of the waist
    - Trachea shave
  - Voice modification surgery
  - Voice therapy

**Note:** Requests for any noncovered service listed above are reviewed as an exception to rule under the provisions of WAC 182-501-0160. The justification included in the surgical plan for any of the procedures listed may be recognized by the agency as meeting the documentation requirements of WAC 182-501-0160.

**Who can provide gender dysphoria-related treatment?**

Providers must meet the qualifications outlined in Chapter 182-502 WAC.
Medical Necessity Review by Comagine Health

What is a medical necessity review by Comagine Health?

The agency contracts with Comagine Health to provide web-based access for reviewing medical necessity for:

- Outpatient advanced imaging services
- Select surgical procedures
- Outpatient advanced imaging
- Spinal injections, including diagnostic selective nerve root blocks
- Botox injections (OnabotulinumtoxinA) for the treatment of chronic migraines and chronic tension-type headaches

Comagine Health conducts the review of the request to establish medical necessity, but does not issue authorizations. Comagine Health forwards its recommendations to the agency for final authorization determination. The procedure codes that require review by Comagine Health can be found in the agency’s Physician-related/professional health care services fee schedule.

Note: This process through Comagine Health is for Washington Apple Health (Medicaid) clients enrolled in fee-for-service only. Authorization requests for managed care clients will not be authorized.

Who can request a review?

Only the performing provider or facility (site of service) can request the medical necessity review by Comagine Health. If initiating the request for authorization, the physician must include the name and billing NPI of the facility where the procedure will be performed. If a facility is requesting the authorization, the request must include the name and billing NPI of the physician performing the procedure.

Note: Billing entities such as clearinghouses do not request authorization through Comagine Health or the agency.
How do I register with Comagine Health?

In order to submit requests to Comagine Health, providers must:

- Register as a provider through www.comagine.org.
- Register as a Washington State Medicaid provider.
- Be familiar with the criteria that will be applied to requests.

Comagine Health offers on-line training and a printable WA Medicaid Training Manuals.

**Note:** A username and password is needed for Washington State Medicaid even if a provider is already a registered provider with Washington State Labor and Industries.

Is authorization required for all Washington Apple Health (Medicaid) clients?

No. Authorization through Comagine Health is required only for Washington Apple Health clients who are currently eligible and enrolled in fee-for-service as the primary insurance and Emergency Related Services Only (ERSO) noncitizen program/Alien Medical Program (AMP) clients.

**DO NOT submit a request for a client who has:**
- Medicaid Managed Care.
- Another insurance as primary (Third Party Liability or TPL).
- Medicare as the primary insurance.
- No current eligibility.
- Unmet spenddown.
- Detoxification only coverage.

If one of the above applies, the agency will reject the request for authorization regardless of Comagine Health's medical necessity determination.

For ERSO/AMP clients in the cancer or end stage renal disease (ESRD) program (WAC 182-507-0120), submit all imaging and surgical requests to Comagine Health.

When Medicare is the primary payer and denies a service that is an agency-covered service with a prior authorization requirement, the agency waives the “prior” requirement in this circumstance. Submit a request for authorization. Attach the Explanation of Benefits (EOB) to the request for services denied by Medicare.
Reminder: Check client eligibility before submitting a request! An agency Washington Apple Health (Medicaid) eligibility ID card does not guarantee that a client is currently eligible. To save time, confirm eligibility through ProviderOne before submitting an authorization request. To learn more about confirming client eligibility in ProviderOne, go to the ProviderOne Billing and Resource Guide.

How do I submit a request to Comagine Health?

Requests may be submitted electronically, by fax, or via telephone. Instructions for submitting a medical necessity review request, including how to use OneHealthPort, are available at Comagine Health.

Fax or Telephone Option through Comagine Health

Fax and telephone requests are available only to providers who do not have access to a computer.

Requests initiated by telephone or fax will require supporting documentation to be faxed per the instructions found at Comagine Health. Once supporting documentation is received, Comagine Health will open a case in their system by:

- Entering the information.
- Responding to the provider with a Comagine Health reference number.

Once all necessary clinical information is received (either electronically or via fax), Comagine Health staff will:

- Conduct the medical necessity review.
- Forward a recommendation to the agency.

Comagine Health will process telephone and fax requests during normal business hours. Faxed requests can be sent at any time and Comagine Health will process them the following business day.

Comagine Health provides the following toll-free numbers:

- Washington Apple Health (Medicaid) (phone) 888-213-7513
- Washington Apple Health (Medicaid) (fax) 888-213-7516
**What is the Comagine Health reference number for?**

Upon successful submission of a request through iEXCHANGE® or when a request has been faxed to Comagine Health, a provider will receive a 9-digit Comagine Health reference number starting with the prefix 913 (e.g. 913-xxx-xxx). The Comagine Health reference number provides verification that Comagine Health reviewed the request.

*A Comagine Health reference number is NOT a billable authorization number.*

Providers must not bill for or perform a procedure(s) until a written approval and an agency-issued ProviderOne authorization number is received. The agency approves or denies authorization requests based on recommendations from Comagine Health.

For questions regarding the status of an authorization, need to update an authorization, or have general questions regarding an authorization, contact the agency at 1-800-562-3022, ext. 52018.

**Note:** The agency has 15 calendar days from the time Comagine Health receives a request for authorization to provide a written determination.

**When does the agency consider retroactive authorizations?**

The agency considers retroactive authorization when one of the following applies:

- The client’s eligibility is verifiably approved after the date of service, but retroactive to a date(s) that includes the date that the procedure was performed.

- The primary payer does not pay for the service and payment from Medicaid is being identified as the primary payer.

**Note:** Retroactive authorizations must be submitted to Comagine Health within 5 business days for procedures or advanced imaging performed as *urgent* or *emergency* procedures on the same day.

When requesting retroactive authorization for a required procedure, providers must check authorization requirements for the date of service that the procedure was performed.
What are the authorization requirements for advanced imaging?

For advanced imaging, providers must complete the appropriate questionnaire form. Questionnaires for radiology services are available online from Comagine Health and can be printed out for provider convenience.

Some radiology codes continue to require prior authorization (PA) from the agency, but not from Comagine Health. See the Physician-related/professional services fee schedule.

**Note:** The PA requirement is for diagnostics provided as urgent and scheduled. The agency allows 5 business days to complete authorization for urgent or ordered-the-same-day procedures when the authorization cannot be completed before the procedure is performed. This authorization requirement does not apply to diagnostics done in association with an emergency room visit, an inpatient hospital setting, or when another payer, including Medicare, is the primary payer.

How does the agency’s hierarchy of evidence protocol apply?

The criteria in the online Comagine Health questionnaires represent “B” level of evidence under WAC 182-501-0165. In other words, this represents the clinical/treatment guideline* the agency has adopted to establish medical necessity and make authorization decisions for these advanced imaging procedures. “B” level evidence shows the requested service or equipment has some proven benefit supported by:

- Multiple Type II or III evidence or combinations of Type II, III or IV evidence with generally consistent findings of effectiveness and safety (A "B" rating cannot be based on Type IV evidence alone).

- Singular Type II, III, or IV evidence in combination with agency-recognized:
  - Clinical guidelines*.
  - Treatment pathways*.
  - Other guidelines that use the hierarchy of evidence in establishing the rationale for existing standards.

If the criteria in the questionnaire are not met, the request will be denied.

*Note: In most circumstances, the agency’s program uses the same criteria and questionnaires as Labor and Industries for MRIs and CT scans.*
What are the authorization requirements for surgical procedures?

Requests initiated electronically will require supporting documentation to be included with the electronic submission or faxed per the instructions found at Comagine Health.

Surgical services require agency authorization regardless of place of service or when performed as:

- Urgent.
- An emergency.
- A scheduled surgery.

If the client is age 20 and younger, prior authorization for the surgical procedure may not be required. See the agency’s Physician-related/professional services fee schedule to determine if a procedure is exempt by client's age.

Surgical modifiers

Co-Surgeons, Assistants, Team Surgeries, and other surgical modifiers

When requesting an authorization for any surgical procedure requiring a medical necessity review by Comagine Health, indicate if the authorization request also includes an assistant surgeon, a co-surgeon, or a surgical team. For further information, see the Centers for Medicare and Medicaid’s (CMS) Global surgery booklet or CMS’s Claims processing manual for physicians/nonphysician practitioners.

When submitting an authorization request for a surgical service that requires additional surgeons, include the following on the request:

- The appropriate modifier(s)
- If available, each surgeon’s billing NPI
- Clinical justification for an assistant surgeon, co-surgeon, or surgical team

Enter the information above in the Communication box when the case is either of the following:

- Loaded through Comagine Health iEXCHANGE®
- Submitted by fax, on the Request for Surgical Authorization form
How does the agency’s hierarchy of evidence protocol apply?

Hierarchy of Evidence (See WAC 182-501-0165)

The agency recognizes the criteria described as “B” level of evidence. If the request meets medical necessity criteria, the request will be approved.

What criteria will Comagine Health use to establish medical necessity?

The agency has instructed Comagine Health to use the following surgical procedure criteria to establish medical necessity:

- Health Technology Assessment (HTA) Program*
- Labor and Industries (LNI)
- InterQual criteria

Exceptions: *Washington Apple Health (Medicaid) does not require clients to participate in a structured, intensive, multi-disciplinary program (SIMP) as required in the Health Technology Clinical Committee’s (HTCC’s) decision for spinal fusion and artificial disc replacement surgery.

If there is an applicable HTA criterion, the criterion will serve as the benchmark for the medical necessity review. If there are no HTA criteria available, applicable criteria from Washington State’s Labor & Industries (L&I) Medical treatment guidelines (MTG) will be applied. If L&I does not have available criteria, InterQual criteria will be applied.
Is there a provider appeals process for Comagine Health?

Yes. If the agency denies authorization as a result of a recommendation from Comagine Health, Comagine Health offers providers an appeal process. Request an appeal as follows:

- Prepare a written request for appeal to Comagine Health indicating the Comagine Health reference number (starting with 913…) for which the appeal is requested.

- Fax the request for appeal along with any appropriate clinical notes, laboratory, and imaging reports to be considered with the appeal to Comagine Health at 888-213-7516.

**Note:** If the clinical information that is submitted is NEW (information obtained after the denial was issued), a new review will be initiated by Comagine Health and a new reference number will be assigned. An appeal will be conducted if the information submitted was available at the time of the initial review but not submitted.

Upon receipt of a request for appeal, Comagine Health staff will review the documentation to determine if the appeal meets the medical necessity criteria. If it is determined that the appeal request does not meet the medical necessity criteria, the case will be referred to a physician to make a final determination.

More information about Comagine Health's provider appeal process is available online at [Comagine Health](https://www.comaginehealth.com) (Washington State Medicaid).

If Comagine Health ultimately recommends the authorization be denied and Washington Apple Health (Medicaid) agrees, the client has the right to appeal to the Administrative Hearings Office.
Authorization

Authorization is the agency’s approval for covered services, equipment, or supplies before the services are provided to clients, as a precondition for provider reimbursement. Prior authorization (PA), expedited prior authorization (EPA), and limitation extensions (LE) are forms of authorization.

Prior authorization (PA)

What is prior authorization (PA)?

Prior authorization (PA) is the process the agency uses to authorize a service before it is provided to a client. The PA process applies to covered services and is subject to client eligibility and program limitations. Bariatric surgery is an example of a covered service that requires PA. PA does not guarantee payment.

For psychiatric inpatient authorizations, see the agency’s Inpatient Hospital Services Billing Guide or Mental Health Services Billing Guide.

Note: In addition to receiving PA, the client must be on an eligible program. For example, a client on the Family Planning Only program would not be eligible for bariatric surgery.

How does the agency determine PA?

The agency reviews PA requests in accordance with WAC 182-501-0160. The agency uses evidence-based medicine to evaluate each request. The agency considers and evaluates all available clinical information and credible evidence relevant to the client’s condition. At the time of the request, the provider responsible for the client’s diagnosis or treatment must submit credible evidence specifically related to the client’s condition. Within 15 days of receiving the request from the client’s provider, the agency reviews all evidence submitted and will either:

• Approve the request.
• Deny the request if the requested service is not medically necessary.
Physician-Related Services/Health Care Professional Services

- Request the provider to submit additional justifying information within 30 days. When the additional information is received, the agency will approve or deny the request within 5 business days of the receipt of the additional information. If the additional information is not received within 30 days, the agency will deny the requested service.

When the agency denies all or part of a request for a covered service or equipment, the agency sends the client and the provider written notice within 10 business days of the date the information is received that:

- Includes a statement of the action the agency intends to take.
- Includes the specific factual basis for the intended action.
- Includes references to the specific WAC provision upon which the denial is based.
- Is in sufficient detail to enable the recipient to learn why the agency’s action was taken.
- Is in sufficient detail to determine what additional or different information might be provided to challenge the agency’s determination.
- Includes the client’s administrative hearing rights.
- Includes an explanation of the circumstances under which the denied service is continued or reinstated if a hearing is requested.
- Includes example(s) of lesser cost alternatives that permit the affected party to prepare an appropriate response.

Services requiring PA
(WAC 182-531-0200 (4)-(6))

The agency requires PA for the following:

- Abdominoplasty
- Bariatric surgery
- Eating disorders (diagnosis and treatment for clients age 21 and older)
- Elective surgical procedures (the agency may require a second opinion and/or consultation before authorizing)
• Hysterectomies and other surgeries of the uterus – see fee schedule for codes requiring PA (this policy applies to all ages)

When requesting surgery, also indicate if the request is for assistant or co-surgeon. For further information, see the Centers for Medicare and Medicaid’s (CMS) Global surgery booklet or CMS’s Claims processing manual for physicians/nonphysician practitioners.

• Inpatient hospital stays for acute physical medicine and rehabilitation (PM&R).

• Mometasone sinus implant

• Oncotype DX

• Osseointegrated/bone anchored hearing aids (BAHA) (for clients age 20 and younger)

• Osteopathic manipulative therapy (in excess of the agency's published limits)

• Molecular pathology tests as specified on the agency’s Physician-related services/health care professional services fee schedule

• Panniculectomy

• Removal or repair of previously implanted BAHA or cochlear device for clients age 21 older when medically necessary

• Hematopoietic progenitor cell boost (CPT® code 38243)

• Vagus nerve stimulator insertion

For coverage, vagus nerve stimulator insertion must be performed in an inpatient or outpatient hospital facility and for reimbursement, providers must attach the invoice to the claim.

• Intensity Modulated Radiation Therapy (IMRT)

When requesting IMRT, providers must submit an initial request for treatment planning (CPT code 77301) to the agency. Once a treatment plan is established, the number of treatment units needed must be submitted to the existing prior authorization number using the process below. The agency expedites requests for treatment planning.
To submit additional information to the request for IMRT, use the following instructions:

✓ Use the agency’s *ProviderOne PA pend forms submission cover sheet*.
✓ Type the 9-digit Reference Number from your letter into the "Authorization Reference #" field and hit Enter (this will expand the barcode shown).
✓ Click on the "Print Cover Sheet" button; choose "Yes" if you're asked whether you want to allow the document to print.
✓ Fax the barcode sheet as the FIRST page, (no coversheet) then the supporting documents to 1-866-668-1214 and the documents will be added to this authorization.

Submit a new treatment request only when one of the following:

✓ 6 months has elapsed since the last request
✓ The treatment plan has changed.

- The following surgical procedure codes require medical necessity review by Comagine Health:

<table>
<thead>
<tr>
<th>Procedure Code</th>
<th>Short Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>22899</td>
<td>Spine surgery procedure</td>

When requesting PA for surgical services where co-surgeons, a surgical team, or a surgical assistant are needed, include all the following:

1. The *General Information for Authorization* form, 13-835. See Where can I download agency forms?
2. One PA request per client
3. One *Basic Information* form, 13-756 for each surgeon. See Where can I download agency forms?
4. All appropriate modifier(s)
5. Indicate in box 30 this is for co-surgeon, surgical team, or surgical assistant
6. Each surgeon’s billing NPI on the appropriate forms

CPT® codes and descriptions only are copyright 2018 American Medical Association
## Documentation requirements for PA or LE

### PA Documentation

| How do I obtain PA or an LE? |
|-------------------------------|----------------------------------|
| For all requests for PA or LEs, the following documentation is required: |
| • A completed, TYPED *General Information for Authorization* form, 13-835. This request form MUST be the initial page when of the request. |
| • A completed *Fax/Written Request Basic Information* form, 13-756, if there is not a form specific to the service being requested, and all the documentation is listed on this form with any other medical justification. |

Fax the request to: (866) 668-1214.
See the agency’s [Billers, provider, and partners](#) webpage.
See [Where can I download agency forms?](#)

### Forms Available to Submit PA Requests

- *Botulinum Toxin Provider Questionnaire*, 13-003
- *Application for Chest Wall Oscillator*, 13-841
- *Bariatric Surgery Request* form, 13-785
- *Fax/Written Request Basic Information* form, 13-756
- *Insomnia Referral Worksheet*, 13-850
- *Nucala (mepolizumab SC injection)*, 13-0011
- *Oral Enteral Nutrition Worksheet*, 13-743
- *Out of State Medical Services Request* form, 13-787
## Forms Available to Submit PA Requests for Medication

- Acetaminophen Injection, J0131, use *Basic Information* form, 13-756
- Alglucosidase alfa (lumizyme) 10 mg, J0221, use *Basic Information* form, 13-756
- Belimumab injection, J0490, use *Basic Information* form, 13-756
- *Botulinum Toxin Provider Questionnaire*, use form 13-003
- Cimzia (Certolizumab pegol Inj.), J0717, use *CIMZIA J0717 Request* form, 13-885
- Ceftaroline fosamil injection, J0712, use *Fax/Written Request Basic Information* form, 13-756
- Exondys 51 (eteplirsen), use form 13-0012
- Infliximab (Remicade) Injection, J1745, use form 13-897
- Ipilimumab injection, J9228, use *Fax/Written Request Basic Information* form, 13-756
- IV Iron, use form 13-0013
- Mannitol for inhaler, J7665, use *Fax/Written Request Basic Information* form, 13-756
- Nucala (mepolizumab SC injection), 13-0011
- Oncotype DX, 81519, use form 13-908
- Opdivo (nivolumab), J9299, use form 13-0010
- Pegloticase injection, J2507, use *Fax/Written Request Basic Information* form, 13-756
- Perjeta (pertuzumab), J9306, use form 13-916
- Photofrin (Porfimer Sodium Inj.) 75mg, J9600, use *Fax/Written Request Basic Information* form, 13-756
- Prolia (Denosumab Inj.), J0897, use *Fax/Written Request Basic Information* form, 13-756
- Stelara (Ustekinumab Inj.) J3357, use form 13-898
- Tysabri (Natalizumab Inj.) J2323, use *TYSABRI J2323 Request* form, 13-832
- Xolair (Omalizumab), J2357, use form 13-852a

See [Where can I download agency forms?](#)
Requesting prior authorization (PA)

When a procedure’s EPA criteria has not been met or the covered procedure requires PA, providers must request prior authorization from the agency. Procedures that require PA are listed in the fee schedule. The agency does not retrospectively authorize any health care services that require PA after they have been provided except when a client has delayed certification of eligibility.

Online direct data entry into ProviderOne

Providers may submit a prior authorization request by direct data entry into ProviderOne or by submitting the request in writing (see the agency’s prior authorization webpage for details).

Written or Fax

If providers chose to submit a written or fax PA request, the following must be provided:

- The General Information for Authorization form, HCA 13-835. See Where can I download agency forms? This form must be page one of the mailed/faxed request and must be typed.

- The program form. This form must be attached to the request.

- Charts and justification to support the request for authorization.

Submit written or fax PA requests (with forms and documentation) to:

- **By Fax:** (866) 668-1214

- **By Mail:**
  Authorization Services Office
  PO Box 45535
  Olympia, WA 98504-5535

For a list of forms and where to send them, see Documentation requirements for PA or LE. Be sure to complete all information requested. The agency returns incomplete requests to the provider.

Submission of photos and X-rays for medical and DME PA requests

For submitting photos and X-rays for medical and DME PA requests, use the FastLook™ and FastAttach™ services provided by Vyne Medical.

Register with Vyne Medical through www.vynemedical.com/.
Contact Vyne Medical at 865-293-4111 with any questions.

When this option is chosen, fax the request to the agency and indicate the MEA# in the NEA field (box 18) on the PA Request form. There is an associated cost, which will be explained by the MEA services.

**Note:** See the agency’s ProviderOne Billing and Resource Guide for more information on requesting authorization.

**Limitation extension (LE)**

**What is a limitation extension (LE)?**

A limitation extension (LE) is an authorization of services beyond the designated benefit limit allowed in Washington Administration Code (WAC) and agency billing guides.

**Note:** A request for an LE must be appropriate to the client’s eligibility and/or program limitations. Not all eligibility groups cover all services.

**How do I request an LE authorization?**

Some LE authorizations are obtained by using the EPA process. Refer to the EPA criteria coding list for criteria. If the EPA process is not applicable, an LE must be requested in writing and receive agency approval prior to providing the service.

**The written request must state all of the following:**

1. The name and ProviderOne Client ID of the client
2. The provider’s name, ProviderOne Client ID, and fax number
3. Additional service(s) requested
4. The primary diagnosis code and CPT code
5. Client-specific clinical justification for additional services
Expedited prior authorization (EPA)

What is expedited prior authorization (EPA)?

Expedited prior authorization (EPA) is designed to eliminate the need for written authorization. The agency establishes authorization criteria and identifies the criteria with specific codes, enabling providers to create an EPA number using those codes.

To bill the agency for diagnostic conditions, procedures and services that meet the EPA criteria on the following pages, the provider must use the 9-digit EPA number. The first five or six digits of the EPA number must be 87000 or 870000. The last 3 or 4 digits must be the EPA number assigned to the diagnostic condition, procedure, or service that meets the EPA criteria (see EPA criteria list for numbers). Enter the EPA number on the billing form in the authorization number field, or in the Authorization or Comments section when billing electronically.

Example: The 9-digit authorization number for a client with the following criteria would be 870000421:

Client is age 11 through 55 and is in one of the at-risk groups because the client meets one of the following:

1) Has terminal complement component deficiencies
2) Has anatomic or functional asplenia
3) Is a microbiologist who is routinely exposed to isolates of Neisseria meningitis
4) Is a freshman entering college who will live in a dormitory

The agency denies claims submitted without a required EPA number.

The agency denies claims submitted without the appropriate diagnosis, procedure code, or service as indicated by the last three digits of the EPA number.

The billing provider must document in the client’s file how the EPA criteria were met and make this information available to the agency on request. If the agency determines the documentation does not support the criteria being met, the claim will be denied.

Note: The agency requires written/fax PA when there is no option to create an EPA number.
EPA guidelines

Documentation

The provider must verify medical necessity for the EPA number submitted. The client’s medical record documentation must support the medical necessity and be available upon the agency’s request. If the agency determines the documentation does not support the EPA criteria requirements, the claim will be denied.

Note: For enteral nutrition EPA requirements, refer to the Prior Authorization section in the agency’s Enteral Nutrition Billing Guide.
EPA criteria list

**A complete EPA number is 9 digits.** The first five or six digits of the EPA number must be **87000 or 870000**. The last 3 or 4 digits must be the EPA number assigned to the diagnostic condition, procedure, or service that meets the EPA criteria. If the client does not meet the EPA criteria, prior authorization (PA) is required (see [Prior authorization](#)).

| 870001321 Continuous Glucose Monitoring (CGM) | CPT codes: 95250, 95251 | **Allowed only for clients 18 years of age and younger** for the in-home use of professional or diagnostic CGM for a 72-hour period. The client must:  
  - Have diabetes mellitus (DM).  
  - Be insulin dependent.  
  - Have had one or more severe episodes of hypoglycemia (blood glucose less than or equal to 50 mg/dl) *requiring assistance from another person, or complicated by a hypoglycemia-induced seizure.  
  The CGM must be:  
  - Ordered by a pediatrician.  
  - Provided by an FDA-approved CGM device.  
  Verification with self-monitoring of blood glucose (SMBG) is needed prior to adjusting insulin. Do not use the CGM results to adjust insulin.  
  **Limit**: 2 monitoring periods of 72 hours each, per client, every 12 months.  
  *Requiring assistance* means that the client does not recognize the symptoms of hypoglycemia and/or is unable to respond appropriately. |
<p>| 870001321 Orenicia (abatacept) | HCPCs code: J0129 | Treatment of rheumatoid arthritis when prescribed by a rheumatologist in patients who have tried and failed one or more DMARDs. Dose is subcutaneous injection once weekly. IV dosing is up to 1000mg dose to start, repeated at week 2 and 4, then maintenance up to 1000mg every 4 weeks. |</p>

| 870001325 Targeted TB testing with interferon-gamma release assays | CPT codes: 86480, 86481 | Targeted TB testing with interferon-gamma release assays may be considered medically necessary for clients **5 years of age and older** for any of the following conditions:  
  - History of positive tuberculin skin test or previous treatment for TB disease  
  - History of vaccination with BCG (Bacille Calmette-Guerin)  
  - Recent immigrants (within 5 years) from countries that have a high prevalence of tuberculosis  
  - Residents and employees of high-risk congregate settings (homeless shelters, correctional facilities, substance abuse treatment facilities)  
  - Clients with an abnormal CXR consistent with old or active TB  
  - Clients undergoing evaluation or receiving TNF alpha antagonist treatment for rheumatoid arthritis, psoriatic arthritis, or inflammatory bowel disease  
  - Exposure less than 2 years before the evaluation  
  **AND**  
  - Client in agreement to remain in compliance with treatment for latent tuberculosis infection if found to have a positive test.  

The tuberculin skin test is the preferred method of testing for children under the age of 5.

Modifiers

(WAC 182-531-1850(10) and (11))

CPT/HCPCS

Italicics indicate additional agency language not found in CPT.

22: **Unusual Procedural Services**: When the service(s) provided is greater than that usually required for the listed procedure, it may be identified by adding modifier 22 to the usual procedure code number. This modifier is not to be used to report procedure(s) complicated by adhesion formation, scarring, and/or alteration of normal landmarks due to late effects of prior surgery, irradiation, infection, very low weight or trauma.

For informational purposes only; no extra allowance is allowed.

23: **Unusual Anesthesia**: For informational purposes only; no extra allowance is allowed.

24: **Unrelated Evaluation and Management (E/M) by the Same Physician During a Postoperative Period**: The physician may need to indicate that an evaluation and management service was performed during a postoperative period for a reason(s) unrelated to the original procedure. This circumstance may be reported by adding the modifier 24 to the appropriate level of E/M service. Payment for the E/M service during postoperative period is made when the reason for the E/M service is unrelated to original procedure.

25: **Significant, Separately Identifiable Evaluation and Management Service by the Same Physician on the Day of a Procedure**: The physician may need to indicate that on the day a procedure or service identified by a CPT® code was performed, the client’s condition required a significant, separately identifiable E/M service above and beyond the usual preoperative and postoperative care associated with the procedure that was performed. This circumstance may be reported by adding the modifier 25 to the appropriate level of E/M service. Payment for the E/M service is the billed charge or the agency’s maximum allowable, whichever is less.

26: **Professional Component**: Certain procedures are a combination of professional and technical components. When only the professional component is reported, the service is identified by adding modifier 26 to the procedure code.

TC: **Technical Component**: Certain procedures are a combination of professional and technical components. When only the technical component is reported, the service is identified by adding modifier TC to the procedure code. In order to receive payment, a contract with the agency is required if services are performed in a hospital setting.
32: **Mandated Services**: For informational purposes only; no extra allowance is allowed.

47: **Anesthesia by Surgeon**: Not covered by the agency.

50: **Bilateral Procedure**: Unless otherwise identified in the listing, bilateral procedures that are performed at the same operative session should be identified by adding this modifier to the appropriate five-digit code describing the first procedure.

   For surgical procedures typically performed on both sides of the body, payment for the E/M service is the billed charge or the agency’s maximum allowable, whichever is less.

   For surgical procedures that are typically performed on one side of the body, but performed bilaterally in a specific case, payment is 150% of the global surgery fee for the procedure.

51: **Multiple Procedures**: When multiple surgeries are performed at the same operative session, total payment is equal to the sum of the following: 100% of the highest value procedure; 50% of the global fee for each of the second through fifth procedures. More than five procedures require submission of documentation and individual review to determine the payment amount.

52: **Reduced Services**: Under certain circumstances, a service or procedure is partially reduced at the physician’s discretion. Under these circumstances, the service provided can be identified by its usual procedure number and the addition of the modifier 52, signifying that the service is reduced. This provides a means of reporting reduced services without disturbing the identification of the basic service. Using this modifier does not reduce the allowance to the provider. **Note**: Modifier 52 may be used with computerized tomography procedure codes for a limited study or a follow-up study.

53: **Discontinued Procedure**: Under certain circumstances, the physician may elect to terminate a surgical or diagnostic procedure. Due to extenuating circumstances, or those that threaten the well-being of the patient, it may be necessary to indicate that a surgical or diagnostic procedure was started but discontinued.

   Use of modifier 53 is allowed for all surgical procedures. Modifier 53 is a payment modifier when used with CPT code 45378 and HCPCS codes G0105 and G0121 only. It is information only for all other surgical procedures.

**54, 55, 56 – Providers providing less than the global surgical package should use modifiers 54, 55, & 56.** These modifiers are designed to ensure that the sum of all allowances for all practitioners who furnished parts of the services included in a global surgery fee do not exceed the total amount of the payment that would have been paid to a single practitioner under the global fee for the procedure. The payment policy pays each physician directly for that portion of the global surgery services provided to the client. The breakdown is as follows:
54:  **Surgical Care Only**: When one physician performs a surgical procedure and another provides preoperative and/or postoperative management, surgical services may be identified by adding modifier 54 to the usual procedure number. A specific percentage of the global surgical payment in the fee schedule is made for the surgical procedure only.

55:  **Postoperative Management Only**: When one physician performs the postoperative management and another physician has performed the surgical procedure, the postoperative component may be identified by adding the modifier 55 to the usual procedure number. A specific percentage of the global surgical payment in the fee schedule is made for the surgical procedure only.

56:  **Preoperative Management Only**: When one physician performs the preoperative care and evaluation and another physician performs the surgical procedure, the preoperative component may be identified by adding the modifier 56 to the usual procedure number. A specific percentage of the global surgical payment in the fee schedule is made for the surgical procedure only.

57:  **Decision for Surgery**: An evaluation and management service that resulted in the initial decision to perform the surgery may be identified by adding modifier 57 to the appropriate level of E/M service.

58:  **Staged or Related Procedure or Service by the Same Physician During the Postoperative Period**: The physician may need to indicate that the performance of a procedure or service during the postoperative period was: a) planned prospectively at the time of the original procedure (staged); b) more extensive than the original procedure; or c) for therapy following a diagnostic surgical procedure. This circumstance may be reported by adding the modifier 58 to the staged or related procedure. **Note**: This modifier is not used to report the treatment of a problem that requires a return to the operating room. See modifier 78.

59:  **Distinct Procedural Service**: Modifier 59 should be used only if no other more specific modifier is appropriate. Effective January 1, 2015, use modifiers XE, XS, XP, and XU in lieu of modifier 59 whenever possible. These modifiers were developed by CMS to provide greater reporting specificity in situations where modifier 59 was previously reported. The physician must indicate that a procedure or service was distinct or separate from other services performed on the same day. This may represent a different session or patient encounter, different procedure or surgery, different site, separate lesion, or separate injury (or area of surgery in extensive injuries).

62:  **Two Surgeons**: Under certain circumstances, the skills of two surgeons (usually with different skills) may be required in the management of a specific surgical procedure. Under such circumstances, separate services may be identified by adding modifier 62 to the procedure code used by each surgeon for reporting his/her services. Payment for this modifier is 125% of the global surgical fee in the fee schedule. The payment is divided equally between the two surgeons. Clinical justification must be submitted with the claim. No payment is made for an assistant surgeon.
66: **Team surgery**: For informational purposes only; no extra allowance is allowed.

76: **Repeat Procedure by Same Physician**: The physician may need to indicate that a procedure or service was repeated. This may be reported by adding the modifier 76 to the repeated service.

77: **Repeat Procedure by Another Physician**: For informational purposes only; no extra allowance is allowed.

78: **Return to the Operating Room for a Related Procedure During the Postoperative Period**: The physician may need to indicate that another procedure was performed during the postoperative period of the initial procedure. When this subsequent procedure is related to the first, and requires the use of the operating room, it may be reported by adding the modifier 78 to the related procedure. **When multiple procedures are performed, use modifier 78 on EACH detail line.** Payment for these procedures is the percentage of the global package for the intra-operative services. Assistant surgeons and anesthesiologists must use modifier 99 to indicate an additional operating room procedure.

79: **Unrelated Procedure or Service by the Same Physician During the Postoperative Period**: The physician may need to indicate that the performance of a procedure or service during the postoperative period was unrelated to the original procedure. This circumstance may be reported by using the modifier 79.

80: **Assistant Surgeon**: Surgical assistant and/or physician assistant services must be identified by adding modifier 80 to the usual procedure code(s).

81: **Minimum Assistant Surgeon**: Minimum surgical assistant services are identified by adding the modifier 81 to the usual procedure number. Payment is 20% of the maximum allowance.

82: **Assistant Surgeon (When Qualified Resident Surgeon Not Available)**: The unavailability of a qualified resident surgeon is a prerequisite for use of modifier 82 appended to the usual procedure code number(s). Payment is 20% of the maximum allowance.

90: **Reference (Outside) Laboratory**: When laboratory procedures are performed by a lab other than the referring lab, the procedure must be identified by adding modifier 90 to the procedure code. The reference lab NPI must be entered in the *Rendering (Performing) Provider* section on the electronic professional claim. The reference lab must be CLIA-certified.

91: **Repeat Clinical Diagnostic Laboratory Test** performed on the same day to obtain subsequent report test value(s). Modifier 91 must be used when repeat tests are performed on the same day, by the same provider to obtain reportable test values with separate specimens taken at different times, only when it is necessary to obtain multiple results in the course of treatment. When billing for a repeat test, use modifier 91 with the appropriate procedure code.
Physician-Related Services/Health Care Professional Services

99: **Multiple Modifiers:** The ProviderOne system can read up to four modifiers on a professional transaction. Add modifier 99 only if there are more than four modifiers to be added to the claim line. If there are four or fewer modifiers on a claim line, do not add modifier 99.

AS: Physician assistant, nurse practitioner, or clinical nurse specialist services for assistant at surgery.

CG Policy criteria applied

FP **Family Planning:** Used to identify family planning services. The agency requires this modifier with some procedure codes for proper payment.

GB Claim being resubmitted for payment because it is no longer under a global payment demonstration

HA Child/Adolescent program

LT **Left Side:** Used to identify procedures performed on the left side of the body. The agency requires this modifier with some procedure codes for proper payment.

QP **Documentation is on file showing that the lab test(s) was ordered individually or ordered as a CPT recognized panel other than automated profile codes.** This modifier is now used **FOR INFORMATION ONLY.** Internal control payment methodology for automated multi-channel test is applied. This modifier is **not** appropriate to use when billing for repeat tests or to indicate not as a panel.

Q6 **Physician Services:** Services furnished by a locum tenens physician. For informational purposes only; no extra allowance is allowed.

RT **Right Side:** Used to identify procedures performed on the right side of the body. The agency requires this modifier with some procedure codes for proper payment.

SL **State-Supplied Vaccine:** This modifier must be used with procedure codes for immunization materials obtained from the Department of Health (DOH).

ST Related to Trauma or Injury

TC: **Technical Component:** Certain procedures are a combination of professional and technical components. When only the technical component is reported, the service is identified by adding modifier TC to the procedure code. In order to receive payment, a contract with the agency is required if services are performed in a hospital setting.

TG **Complex/high level of care.**
Physician-Related Services/Health Care Professional Services

TH Obstetrical treatment/services, prenatal or postpartum: Use this modifier for unbundling maternity care for 1-3 visits. See Billing with modifiers for maternity care.

TJ Child/Adolescent Program: To be used for enhancement payment for foster care children screening exams.

TS Follow-up service: To be used with procedures and for selected Applied Behavior Analysis (ABA) services (see the agency’s Applied Behavioral Analysis (ABA) Billing Guide).

UA Medicaid Care Lev 10 State Def.

UN Two patients served: To be used with CPT code R0075.

UP Three patients served: To be used with CPT code R0075.

UQ Four patients served: To be used with CPT code R0075.

UR Five patients served: To be used with CPT code R0075.

US Six or more patients served: To be used with CPT code R0075.

Effective January 1, 2015, use the following modifiers which were developed by CMS to provide greater reporting specificity in situations where modifier 59 was previously reported. Use these modifiers in lieu of modifier 59 whenever possible:

XE Separate encounter: A service that is distinct because it occurred during a separate encounter. This modifier is used only to describe separate encounters on the same date of service.

XS Separate structure: A service that is distinct because it was performed on a separate organ/structure.

XP Separate practitioner: A service that is distinct because it was performed by a different practitioner.

XU Unusual non-overlapping service: A service that is distinct because it does not overlap usual components of the main service.
Anesthesia

AA  Anesthesia services personally furnished by an anesthesiologist. This includes services provided by faculty anesthesiologists involving a physician-in-training (resident). Payment is 100% of the allowed amount. Modifier AA must not be billed in combination with QX.

When supervising, the physician must use one of the modifiers below. Payment for these modifiers is 50% of the allowed amount. Modifier QX must be billed by the Certified Registered Nurse Anesthetist (CRNA).

AD  Medical supervision by a physician for more than four concurrent anesthesia services.

QK  Medical direction of two, three, or four concurrent anesthesia procedures involving qualified individuals.

QS  Monitored anesthesia services.

To bill for monitored anesthesia care services, the following applies:

If the physician personally performs the case, modifier AA must be used and payment is 100% of the allowed amount.

If the physician directs four or fewer concurrent cases and monitored care represents two or more of the case modifiers, modifier QK must be used and payment is 50% of the allowed amount.

QS modifier must be used in the second modifier position in conjunction with a pricing anesthesia modifier in the first modifier position.

QX  CRNA service with medical direction by a physician should be used when under the supervision of a physician. Payment is 50% of the allowed amount. This modifier is payable in combination with Modifiers AD or QK, which is used by the supervising anesthesiologist. Modifier QX must not be billed in combination with AA.

QY  CRNA and anesthesiologist are involved in a single procedure and the physician is performing the medical direction. The physician must use modifier QY and the medically directed CRNA must use modifier QX. The anesthesiologist and CRNA each receive 50% of the allowance that would have been paid had the service been provided by the anesthesiologist or CRNA alone.

QZ  CRNA service without medical direction by a physician. Must be used when practicing independently. Payment is 100% of the allowed amount. This modifier must not be billed in combination with any other modifier.
Site-of-Service Payment Differential

How are fees established for professional services performed in facility and nonfacility settings?

Based on the Resource Based Relative Value Scale (RBRVS) methodology, the agency's fee schedule amounts are established using three relative value unit (RVU) components: work, practice expense, and malpractice expense. The agency uses two levels of practice expense components to determine the fee schedule amounts for reimbursing professional services. This may result in two RBRVS maximum allowable fees for a procedure code. These are:

- **Facility setting maximum allowable fees (FS Fee)** - Paid when the provider performs the services in a facility setting (e.g., a hospital or ambulatory surgery center) and the cost of the resources are the responsibility of the facility.

- **Nonfacility setting maximum allowable fees (NFS Fee)** - Paid when the provider performs the service in a nonfacility setting (e.g., office or clinic) and typically bears the cost of resources, such as labor, medical supplies, and medical equipment associated with the service performed.

Some services, by nature of their description, are performed only in certain settings and have only one maximum allowable fee per code. Examples of these services include:

- Evaluation and management (E/M) codes which specify the site-of-service (SOS) within the description of the procedure codes (e.g., initial hospital care)

- Major surgical procedures that are generally performed only in hospital settings

How does the SOS payment policy affect provider payments?

Providers billing professional services are paid at one of two maximum allowable fees, depending on where the service is performed.
Does the agency pay providers differently for services performed in facility and nonfacility settings?

Yes. When a provider performs a professional service in a facility setting, the agency makes two payments - one to the performing provider and another to the facility. The payment to the provider (FS Fee) includes the provider’s professional services only. A separate payment is made directly to the facility where the service took place, which includes payment for necessary resources. The FS Fee excludes the allowance for resources that are included in the payment to the facility. Paying the lower FS Fee to the performing provider when the facility is also paid eliminates duplicate payment for resources.

When a provider performs a professional service in a nonfacility setting, the agency makes only one payment to the performing provider. The payment to the provider (NFS Fee) includes the provider’s professional services and payment for necessary resources.

When are professional services paid at the facility setting maximum allowable fee?

Providers are paid at the FS Fee when the agency also makes a payment to a facility. In most cases, the agency follows Medicare’s determination for using the FS Fee. Professional services billed with the following place of service codes are paid at the FS Fee:

<table>
<thead>
<tr>
<th>Place of Service Code</th>
<th>Place of Service Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>06</td>
<td>Indian Health Service – provider based</td>
</tr>
<tr>
<td>08</td>
<td>Tribal 638 – provider based</td>
</tr>
<tr>
<td>19</td>
<td>Off Campus-Outpatient Hospital</td>
</tr>
<tr>
<td>21</td>
<td>Inpatient Hospital</td>
</tr>
<tr>
<td>22</td>
<td>Outpatient Hospital</td>
</tr>
<tr>
<td>23</td>
<td>Emergency Room – Hospital</td>
</tr>
<tr>
<td>24</td>
<td>Ambulatory Surgery Center</td>

<tr>
<td>25</td>
<td>Birthing Center</td>
</tr>
<tr>
<td>26</td>
<td>Military Treatment Facility</td>
</tr>
<tr>
<td>31</td>
<td>Skilled Nursing Facility</td>
</tr>
</tbody>
</table>
Due to Medicare’s consolidated billing requirements, the agency does not make a separate payment to providers who perform certain services in hospitals and skilled nursing facilities. The facilities are paid at the NFS Fee. Some therapies, such as physical therapy services are always paid at the NFS Fee.

### When are professional services paid at the nonfacility setting maximum allowable fee?

The NFS Fee is paid when the agency does not make a separate payment to a facility, such as when services are performed in a provider’s office or a client’s home. In most cases, the agency follows Medicare’s determination for using the NFS Fee.

Professional services billed with the following place of service codes are paid at the NFS Fee:

<table>
<thead>
<tr>
<th>Place of Service Code</th>
<th>Place of Service Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>04</td>
<td>Homeless Shelter</td>
</tr>
<tr>
<td>05</td>
<td>Indian Health – Free Standing</td>
</tr>
<tr>
<td>07</td>
<td>Tribal 638 – Free Standing</td>
</tr>
<tr>
<td>11</td>
<td>Office</td>
</tr>
<tr>
<td>12</td>
<td>Home</td>
</tr>
<tr>
<td>13</td>
<td>Assisted Living Facility</td>

</tbody>
</table>

Note: All claims submitted to the agency must include the appropriate Medicare two-digit place of service code. The agency will deny claims with single-digit place of service codes.

Which professional services have a SOS payment differential?

Most of the services with an SOS payment differential are from the surgery, medicine, and E/M ranges of CPT codes. However, some HCPCS, CPT radiology, pathology, and laboratory codes also have an SOS payment differential.
Fee Schedule Information

• Maximum allowable fees for all codes, including CPT® codes and selected HCPCS codes, are listed in the fee schedule.

• In the fee schedule, the agency identifies procedure codes that may require prior authorization. However, this list may not be all-inclusive. Prior authorization, limitations, or requirements detailed in agency billing guides and Washington Administrative Code (WAC) remain applicable.

• The agency’s fee schedules are available for on the agency’s Professional billing guides and fee schedules webpage and the Hospital reimbursement webpage.
Billing

All claims must be submitted electronically to the agency, except under limited circumstances. For more information about this policy change, see Paperless billing at HCA. For providers approved to bill paper claims, see the agency’s Paper claim billing resource.

What are the general billing requirements?

Providers must follow the agency ProviderOne Billing and Resource Guide. These billing requirements include, but are not limited to:

- Time limits for submitting and resubmitting claims and adjustments.
- What fee to bill the agency for eligible clients.
- When providers may bill a client.
- How to bill for services provided to primary care case management (PCCM) clients.
- Billing for clients eligible for both Medicare and Medicaid.
- Third-party liability.
- Record keeping requirements.

Billing for multiple services

If multiples of the same procedures are performed on the same day, providers must bill with the appropriate modifier (if applicable) and must bill all the services on the same claim to be considered for payment.

Billing for outpatient hospital services in hospital-based clinics

The agency requires clinics to bill for outpatient services in one of the following ways:

- If the Department of Health (DOH) has not designated the clinic as a hospital-based entity, the clinic must submit to the agency an electronic professional claim containing both:

  ✓ The facility and the professional fees in the Submitted Charges field.
  ✓ The place of service (POS) 11 (office setting) in the Place of Service field.

Medicare and Medicaid policy prohibit the hospital from billing a facility fee in this circumstance. The agency will reimburse the clinic the nonfacility setting fee. This single claim comprises the total payment for the services rendered.
If DOH has designated the clinic as a hospital-based entity, for the agency to reimburse the clinic and the associated hospital for services provided to clients eligible for Washington Apple Health (Medicaid), the following must happen:

- The clinic must submit to the agency a professional electronic claim containing both:
  - The professional fees in the *Submitted Charges* field.
  - POS 22 (outpatient setting) in the *Place of Service* field.

- The hospital must submit to the agency an electronic institutional claim with the facility fees the *Total Claim Charge* field.

These two billings comprise the total payment for the services rendered.

In the circumstances described above, clinics must follow instructions in this billing guide related to office setting and outpatient services.

**How do I resolve issues with gender indicator when billing for transgender clients?**

**For gender to procedure mismatch: for transgender female with male genitalia**

For a transgender client, providers must include a secondary diagnosis on the claim that indicates the client is transgender (F64.0, F64.1, F64.2 and F64.9). The secondary diagnosis may be in any diagnosis field on the claim. Use of the secondary diagnosis allows the gender-specific procedures to be processed through the agency’s claims system. Without the secondary diagnosis code, the claim may be denied.

**Example situation:**
A client self-identifies as a female but still has male specific body parts. This client then gets a routine prostate exam. This bill would deny for a male-only procedure being billed on a female client. However, if a diagnosis such as gender identity disorder was listed as the secondary diagnosis, the claim would then be processed for payment.

Providers must list the secondary diagnosis (F64.0, F64.1, F64.2 and F64.9) on the claim in these circumstances. If a claim is denied for a gender mismatch, see [How does the provider notify the agency of a date of birth or gender mismatch?](#)
**Note:** Providers should encourage transgender clients to update their gender listed on their Washington Apple Health account by contacting the agency’s Medical Eligibility Determination Services (MEDS) toll free 855-623-9357.

**ProviderOne gender indicator does not match claim gender indicator**

Such as when a client presents as a female but ProviderOne has the male gender indicator in file. The provider should check the client’s gender in ProviderOne when verifying coverage. If a mismatch is found, the provider should encourage the client to update the gender field to their preferred gender. The client can do this by calling the agency’s Medical Eligibility Determination Section toll-free 1-855-623-9357.

**How does the provider notify the agency of a date of birth or gender mismatch?**

If a provider finds that there is a discrepancy with a client’s date of birth or gender, send a secured email to mmishelp@hca.wa.gov. Include the following information in the email:

- TCN #
- A comment that the client is transgender
- ProviderOne client ID
- Client’s name
- Date of birth
- Gender at birth
- Gender identified as at the time service provided

**How does a client update their gender field?**

- Clients who applied through the Healthplanfinder must call the agency’s Medical Eligibility Determination Section toll free 1-855-623-9357.

- Clients who applied through the Community Service Office (CSO) must call toll-free 1-877-501-2233 or report online at Washington Connection.

Any Washington Apple Health client can call and choose a gender. Clients should be aware other state agencies, such as the Department of Licensing, have different requirements.
How does a client update or change their name?

Before making a name change, the client should first obtain a name change with Social Security. If the client’s name does not match the client’s name in Social Security, the system will generate an error and this could affect the client’s coverage.

- Clients who applied through the Healthplanfinder must call toll-free 1-855-623-9357.
- Clients who applied through the Community Service Office (CSO) must call toll-free 1-877-501-2233 or report online at Washington Connection.

If providers have any concerns or question regarding the policy with this benefit, please contact the agency by email at transhealth@hca.wa.gov.

How do I bill claims electronically?

Instructions on how to bill Direct Data Entry (DDE) claims can be found on the agency’s Billers, providers, and partners webpage.

For information about billing Health Insurance Portability and Accountability Act (HIPAA) Electronic Data Interchange (EDI) claims, see the ProviderOne 5010 companion guides on the HIPAA Electronic Data Interchange (EDI) webpage.

Submitting professional services for Medicare crossovers

For services paid for, and/or applied to the deductible, by Medicare:

- Medicare should forward the claim to the agency. If the claim is not received by the agency, please resolve that issue prior to resubmitting the claim.
- Mark “Yes” for the question, “Is this a Medicare Crossover Claim?” in the electronic claim.
- See the ProviderOne Billing and Resource Guide and the Fact Sheets webpage to get more information about submitting Medicare payment information electronically and to find out when paper backup must be attached.
- Do not indicate any payment made by Medicare in the Other Payer Information section of the claim. Enter only payments made by non-Medicare, third-party payers (e.g., Blue Cross) in this section and attach the Explanation of Benefits (EOB).

Note: If Medicare allowed/paid on some services and denied other services, the allowed/paid services must be billed on a different claim than the denied services.
Exception: When billing crossover claims for Indian Health Services, follow the instructions in the agency’s Tribal Health Program Billing Guide.

Requirements for the provider-generated EOMB to process a crossover claim

Header level information on the EOMB must include all the following:

• Medicare as the clearly identified payer
• The Medicare claim paid or process date
• The client’s name (if not in the column level)
• Medicare Reason codes
• Text in font size 12 or greater

Column level labels on the EOMB for the CMS-1500 claim form (version 02/12) must include all the following:

• The client’s name
• Date of service
• Number of service units (whole number) (NOS)
• Procedure Code (PROC)
• Modifiers (MODS)
• Billed amount
• Allowed amount
• Deductible
• Amount paid by Medicare (PROV PD)
• Medicare Adjustment Reason codes and Remark codes
• Text that is font size 12
Utilization review

Utilization Review (UR) is a concurrent, prospective, and/or retrospective (including post-pay and pre-pay) formal evaluation of a client’s documented medical care to assure that the health care services provided are proper and necessary and are of good quality. The review considers the appropriateness of the place of care, level of care, and the duration, frequency, or quantity of health care services provided in relation to the condition(s) being treated.

The agency uses InterQual: Evidence-Based Clinical Criteria as a guideline in the utilization review process.

- Concurrent UR is performed during a client’s course of care.
- Prospective UR is performed prior to the provision of health care services.
- Retrospective UR is performed following the provision of health care services and includes both post-payment and pre-payment review.
- Post-payment retrospective UR is performed after health care services are provided and paid.
- Pre-payment retrospective UR is performed after health care services are provided but prior to payment.
