

Washington State Health Care Authority

Medicaid Provider Guide

Respiratory Care

[Refer to Chapter 182-552 WAC]

Washington State
Health Care Authority

A Billing Instruction

About this Guide

This guide supersedes all previous *Respiratory Care Medicaid Provider Guides* published by the Health Care Authority (Agency).

What Has Changed?

Reason for Change	Effective Date	Page No.	Subject	Change
January code changes	Jan.1, 2013	Pages 27 through 71	Coverage table	Deleted codes K0741 and K0742 in Oxygen and Oxygen Equipment , and E0571 in Nebulizers and Accessories .
Provider Notice 12-101				Added new codes E0457 and E0459 in Oxygen and Oxygen Equipment, and E0605 in Continuous Positive Airway Pressure System (CPAP) .
				Deleted Professional Services codes in the coverage table as an update, reflecting current practice.
				Added prior authorization (PA) to code S8189, Tracheostomy supply not otherwise classified, in Tracheostomy Care Supplies .
				Replaced the # symbol with NC (service is not covered) in various sections of the coverage table to clarify respiratory coverage policy.

Definitions & Abbreviations

[Refer to [WAC 182-552-0005](#)]

This section defines terms and abbreviations, including acronyms, used in these billing instructions. Please refer to the Agency's online [Medical Assistance Glossary](#) for a more complete list of definitions.

Adult Family Home – A residential home licensed to care for up to six residents that provides rooms, meals, laundry, supervision, assistance with activities of daily living, and personal care. In addition to these services, some homes provide nursing or other special care and services.

Apnea – The cessation of airflow for at least ten seconds.

Apnea-hypopnea index (AHI) – The average number of episodes of apnea and hypopnea per hour of sleep without the use of a positive airway pressure device. For purposes of this chapter, respiratory effort related arousals (RERAs) are not included in the calculation.

Arterial PaO₂ – Measurement of partial pressure of arterial oxygen.

Authorized prescriber – A health care practitioner authorized by law or rule in the state of Washington to prescribe oxygen and respiratory care equipment, supplies, and services.

Bi-level respiratory assist device (RAD) with backup rate – A device that allows independent setting of inspiratory and expiratory pressures to deliver positive airway pressure (within a single respiratory cycle) by way of tubing and a noninvasive interface (such as a nasal or oral facial mask) to assist spontaneous respiratory efforts and supplement the volume of

inspired air into the lungs. In addition, these devices have a timed backup feature to deliver this air pressure whenever sufficient spontaneous inspiratory efforts fail to occur.

Bi-level respiratory assist device (RAD) without backup rate – A device that allows independent setting of inspiratory and expiratory pressures to deliver positive airway pressure (within a single respiratory cycle) by way of tubing and a noninvasive interface (such as a nasal, oral, or facial mask) to assist spontaneous respiratory efforts and supplement the volume of inspired air into the lungs.

Blood gas study – For this guide, either an oximetry test or an arterial blood gas test.

Boarding Home – Adult residential care (ARC) facility, enhanced adult residential care (EARC) facility, or assisted living (AL) facility.

By Report – A method of payment in which the Agency determines the amount it will pay for a service when the rate for that service is not included in the Agency's published fee schedules. The provider must submit a "report" which describes the nature, extent, time, effort and/or equipment necessary to deliver the service. (See [WAC 182-500-0015](#).)

Capped rental – Applies to certain oxygen equipment for in-home medical assistance clients. After 36 months of rental by the provider, the equipment is considered

capped (not reimbursed) for the next 24 months. (See [Capped Rental Oxygen Systems and Contents](#).)

Central sleep apnea (CSA) – Is defined as meeting all the following criteria:

- An apnea-hypopnea index (AHI) greater than or equal to 5.
- Central apneas/hypopneas greater than 50% of the total apneas/hypopneas.
- Central apneas or hypopneas greater than or equal to 5 times per hour.
- Symptoms of either excessive sleepiness or disrupted sleep.

Chronic Obstructive Pulmonary Disease (COPD) – Any disorder that persistently obstructs bronchial airflow. COPD mainly involves two related diseases—chronic bronchitis and emphysema. Both cause chronic obstruction of air flowing through the airways and in and out of the lungs. The obstruction is generally permanent and worsens over time.

Complex Sleep Apnea (CompSA) – A form of central apnea specifically identified by the persistence or emergence of central apneas or hypopneas, upon exposure to CPAP or a bi-level respiratory assist device without a back-up rate feature, when obstructive events have disappeared. These clients have predominantly obstructive or mixed apneas . during the diagnostic sleep study occurring at greater than or equal to five times per hour. With use of a CPAP or bi-level respiratory assist device without a back-up rate feature, the client shows a pattern of apneas and hypopneas that meets the definition of central sleep apnea (CSA).

Compressor – A pump driven appliance that mechanically condenses atmospheric air into a smaller volume under pressure. In respiratory care therapy, it is used to forcefully nebulize liquid solutions or

emulsions into a vapor state, or mist for inhalation.

Concentrator – A device that increases the concentration of oxygen from the air.

Continuous Positive Airway Pressure (CPAP) – A single-level device that delivers a constant level of positive air pressure (within a single respiratory cycle) by way of tubing and an interface to assist spontaneous respiratory efforts and supplement the volume of inspired air into the lungs.

Dependent Edema – Fluid in the tissues, usually ankles, wrists, and the arms.

Emergency Oxygen – The immediate, short-term administration of oxygen to a client who normally does not receive oxygen, but is experiencing an acute episode that requires oxygen.

EPA– Expedited Prior Authorization.

Erythrocythemia – More hematocrit (red blood cells) than normal, making it very difficult to oxygenate those cells.

FIO₂ – The fractional concentration of oxygen delivered to the client for inspiration. For the purpose of this policy, the client's prescribed FIO₂ refers to the oxygen concentration the client normally breathes when not undergoing testing to qualify for coverage of a Respiratory Assist Device (RAD). That is, if the client does not normally use supplemental oxygen, their prescribed FIO₂ is that found in room air.

FEV₁ – The forced expired volume in 1 second.

FVC – The forced vital capacity.

Group I – Clinical criteria, set by Medicare, to identify chronic oxygen clients with obvious respiratory challenges as evidenced

by low oxygen saturation. (For specific clinical criteria, see [Coverage Criteria for Oxygen](#).)

Group II – Clinical criteria, set by Medicare, to identify borderline oxygen clients. Their blood saturation levels seem to be within the normal range, but additional extenuating issues suggest a need for oxygen. (For specific clinical criteria, see [Coverage Criteria for Oxygen](#).)

Home and Community Residential Settings – In-home, adult family home, or boarding home.

Hypopnea – A temporary reduction of airflow lasting at least ten seconds and accompanied with a 30% reduction in thoracoabdominal movement or airflow as compared to baseline, and with at least a 4% decrease in oxygen saturation. The AHI is the average number of episodes of apnea and hypopnea per hour of sleep without the use of a positive airway pressure device.

Hypoxemia – Less than normal level of oxygen in the blood.

MCO – An Agency-contracted managed care organization.

Month – For the purposes of this guide, means 30 days.

Nebulizer – A medical device that administers drugs for inhalation therapy for clients with respiratory conditions such as asthma or emphysema.

Obstructive sleep apnea (OSA) – This syndrome refers to the interruption of breathing during sleep, due to obstructive tissue in the upper airway that collapses into the air passage with respiration. This may occur several hundred times a night and is

thought to cause many symptoms, such as depression, irritability, sexual dysfunction, learning and memory difficulties, and the frequent complaint of excessive daytime sleepiness.

Oxygen – Medical grade liquid oxygen or compressed gas.

Oxygen Concentrator – A medical device that removes nitrogen from room air and retains almost pure oxygen (87–95%) for delivery to a client.

Oxygen System – All equipment necessary to provide oxygen to a client.

PA – Prior Authorization

Portable Oxygen System – A system that allows the client to be independent of the stationary system for several hours, thereby providing mobility for the client.

Pulmonary hypertension – High blood pressure in the vessels that feed through the lungs, causing the right side of the heart to work harder to oxygenate blood.

RAD – Respiratory assist device

Reasonable Useful Lifetime (RUL) – Refers to the 36-month capped rental oxygen equipment; the RUL is 5 years. The RUL is not based on the chronological age of the equipment. It starts on the initial date of service and runs for 5 years from that date.

Respiratory Care The care of a client with respiratory needs and all related equipment, oxygen, services and supplies.

Respiratory Care Practitioner – A person licensed by the Department of Health according to [chapter 18.89 RCW](#) and [chapter 246-928 WAC](#) as a respiratory

therapist (RT) or respiratory care practitioner (RCP).

Respiratory Effort Related Arousals (RERA) – These occur when there is a sequence of breaths that lasts at least ten seconds, characterized by increasing respiratory effort or flattening of the nasal pressure waveform, which lead to an arousal from sleep. However, they do not meet the criteria of an apnea or hypopnea. The degree to which RERAs are associated with the same sequelae as apneas and hypopneas is unknown, although clients with only RERAs can be symptomatic in terms of excessive daytime sleepiness.

Restrictive Thoracic Disorders – This refers to a variety of neuromuscular and anatomical anomalies of the chest/rib cage area that may result in hypoventilation, particularly while the client sleeps at night. Nocturnal hypoventilation is associated with a host of health hazards and also can significantly impact the quality of life for these clients. The use of noninvasive positive pressure respiratory assist devices has been found helpful in reducing the episodes of nocturnal hypoventilation and the associated complications for a significant number of those clients who are able to use the device.

RUL – *Also called* Reasonable Useful Lifetime.

Stationary Oxygen System – Equipment designed to be used in one location, generally for the purpose of continuous use or frequent intermittent use.

Ventilator – A device to provide breathing assistance to clients with neuromuscular diseases, thoracic restrictive diseases, or chronic respiratory failure consequent to chronic obstructive pulmonary disease. It includes both positive and negative pressure devices.

About the Program

[Refer to [WAC 182-552-0001](#)]

What Is the Purpose of the Respiratory Care Program?

The purpose of the respiratory care program is to provide medically necessary respiratory care equipment, services, and supplies to eligible Medicaid clients who are not enrolled in a managed care plan and reside in:

- A home
- A community residential setting
- A skilled nursing facility

When Does the Agency Pay for Respiratory Care?

The Agency pays for respiratory care when it is:

- Covered.
- Within the scope of the eligible client's medical care program.
- Medically necessary, as defined under [WAC 182-500-0070](#).
- Prescribed by a physician, advanced registered nurse practitioner (ARNP), or physician assistant certified (PAC) within the scope of his or her licensure.
- Authorized, as required within chapters [182-501](#), [182-502](#), and [182-552](#) WAC, and these billing instructions.
- Billed according to these billing instructions.
- Provided and used within accepted medical or respiratory care community standards of practice.

The respiratory care services, equipment, and supplies described in this guide are considered part of the Agency's durable medical equipment (DME) benefit.

Client Eligibility

Who Is Eligible?

[Refer to [WAC 182-552-0100](#) (1) through (4)]

- Clients in any of the following medical assistance programs are eligible for respiratory care:
 - ✓ Categorically needy program (CN)
 - ✓ Children’s healthcare programs as defined in [WAC 182-505-0210](#)
 - ✓ Medically needy program (MN)
 - ✓ Medical care services as described in [WAC 182-500-0070](#)
 - ✓ Alien emergency medical programs when the medical services are necessary to treat a qualifying emergency medical condition, as described in WACs [182-507-0110 through -0125](#).
- Eligible clients residing in skilled nursing facilities, boarding homes, and adult family homes may receive medically necessary respiratory care equipment and supplies for chronic use.

However, the Agency does *not* pay separately for emergency oxygen equipment and supplies and licensed respiratory care staff for these clients. (See [WAC 182-552-0150](#).)
- Clients enrolled in an Agency-contracted managed care organization (MCO) must arrange for all respiratory care directly through his or her MCO and must use one of the MCO’s participating providers. (Refer to [WAC 182-552-1400](#).)
- For clients who are eligible for Medicare and Medicaid, see [Reimbursement](#) and [Billing and Claim Forms](#) in this guide.

For instructions on how to verify a client’s eligibility, refer to the Agency’s [ProviderOne Billing and Resource Guide](#).

For an up-to-date listing of Benefit Packages, refer to the [Scope of Healthcare Services Table](#) web page

Are Clients Enrolled in Managed Care Eligible?

[Refer to [WAC 182-552-0100](#) (2)]

Yes! Respiratory care services, equipment and supplies are covered under the Agency-contracted managed care organization (MCO) when the services are medically necessary. All services must be requested directly through the client's MCO.

Providers can verify a client's managed care enrollment through the ProviderOne Client Benefit Inquiry screen.

Clients may contact their MCO by calling the telephone number provided to them.

The MCO is responsible for:

- Payment of covered services.
- Payment of services referred by a provider participating with the plan to an outside provider.

Note: To prevent billing denials, please check the client's eligibility **prior** to scheduling services and at the **time of the service** and make sure proper authorization or referral is obtained from the plan. See the Agency's [ProviderOne Billing and Resource Guide](#) for instructions on how to verify a client's eligibility.

Provider Requirements

What Are the General Responsibilities of a Respiratory Care Provider?

[Refer to [WAC 182-552-0200](#)]

This section includes general responsibilities for respiratory care providers. More specific requirements are described in different sections of this guide.

Providers must meet the general provider requirements in chapters [182-502](#) and [182-552](#) WAC and these billing instructions.

Licensed Healthcare Professionals

Respiratory care providers must have a licensed healthcare professional whose scope of practice allows providing respiratory care, including:

- Checking equipment to meet the client’s initial and ongoing needs.
- Communicating with the client’s authorized prescriber about any concerns or recommendations.

(See WAC [182-552-0200](#)[1] and Department of Health’s [licensing requirements](#).)

Clients’ Coverage

- Providers must verify the client’s eligibility in ProviderOne before providing services.
- If ProviderOne indicates the client is enrolled in a managed care plan, contact his or her MCO for all coverage conditions and limits on services. (Also, see [Client Eligibility](#) in this guide.)
- Bill the Agency the usual and customary fee for clients not in managed care and residing at home, skilled nursing facility or in a community residential setting.

Note: Also, see [What Are Clients’ Rights for Healthcare Decisions?](#)

Prescriptions

Respiratory care providers must:

- Keep initial and subsequent prescriptions in the client's record.
- Verify that the client has a valid prescription. (See WACs [182-552-0200](#) and [182-552-0800](#)).

To be valid, a prescription must:

- ✓ Be written, signed, and dated by a Medicaid-enrolled physician, advanced registered nurse practitioner (ARNP), or physician's assistant certified (PAC).
- ✓ State the specific items or services requested, including the quantity, frequency, and duration/length of need.

Note: Prescriptions that state only "as needed" or "PRN" are not sufficient.

- ✓ For an initial prescription, not be older than three months from the date the prescriber signed the prescription.
- ✓ For subsequent prescriptions, not be older than one year from the date the prescriber signs the prescription.

(For more details about *oxygen* prescriptions, see [Requirements for Valid Oxygen Prescriptions](#).)

Respiratory Care Equipment and Supplies

Respiratory care providers must:

- Obtain prior authorization from the Agency, if required, before delivering respiratory care equipment and supplies to the client and billing the Agency.
- Make regular deliveries of medically necessary oxygen to the client's home, skilled nursing facility, community residential facility.
- Provide instructions to the client and/or caregiver on the safe and proper use of the equipment provided.
- Maintain all rental equipment in good working condition on a continuous (24 hours a day, 7 days a week) basis.
- Furnish proof of direct delivery of equipment to a client or a client's authorized representative when requested by the Agency. Proof of delivery must include:

- ✓ The client's name.
- ✓ Detailed description of the item(s) delivered, including the quantity, brand name, and serial number.
- ✓ A signature and date by the client (or client's authorized representative) when the item was received.

(See [WAC 182-552-0250](#).)

- Provide a minimum warranty period of one year for all client-owned medical equipment (excluding disposable/non-reusable supplies).
- Keep a copy of all warranties in the client's file—including date of purchase, applicable serial number, model number or other unique identifier of equipment, and warranty period—and provide them to the Agency upon request. If the warranty expires, information must include the date of purchase and the warranty period. (See [WAC 182-552-1400](#).)

Note: Under [WAC 182-552-0200](#), the Agency does not pay for respiratory care equipment and/or supplies when the authorized prescriber providing a client's evaluation or an item's medical justification also has a financial relationship with the provider, including employment or a contract.

What Are Clients' Rights to Health Care Decisions?

[Refer to [42 CFR § 489.102](#)]

All Medicare-Medicaid certified hospitals, nursing facilities, home health agencies, personal care service agencies, hospices, and managed health care organizations are federally mandated to give **all adult clients** written information about their rights, under state law, to make their own health care decisions.

Clients have the right to:

- Accept or refuse medical treatment.
- Make decisions concerning their own medical care.
- Prepare an advance directive, such as a living will or durable power of attorney, for their health care.

Coverage Criteria

This section describes general clinical criteria and policies for respiratory care services, equipment and supplies.

Inhalation drugs and solutions are included in the Medicaid prescription drug program (see [Chapter 182-530 WAC](#)).

Note: Requests do not require prior authorization (PA) when meeting the clinical criteria for covered respiratory care for Medicaid clients. When requests do *not* meet the clinical criteria, as specified in this guide— including those associated with expedited prior authorization—PA *is* required. The Agency evaluates requests requiring PA on a case-by-case basis to determine whether they are medically necessary. (See [WAC 182-552-0001](#)[4] and [5] and WAC 182-552-0325.) For more details about PA requests, including expedited prior authorization and limitation extension, see [Authorization](#) in this guide.

For details about specific items, see the [Respiratory Care Coverage Table](#) following this section. The coverage table lists equipment and supplies with:

- Associated codes
- Any authorization requirements (prior authorization and expedited prior authorization)
- Any limits and specific comments per code

Airway Clearance Devices

[Refer to [WAC 182-552-0600](#)]

Chest physiotherapy (CPT), also known as percussion and postural drainage (P/PD), is traditionally seen as the standard of care of secretion clearance methods. However, there are client instances when conventional manual CPT is unavailable, ineffective, or not tolerated.

The Agency then covers the following types of airway clearance devices when medically necessary for an individual with a diagnosis characterized by excessive mucus production and difficulty clearing secretions:

- Mechanical percussors
- Oscillatory positive expiratory pressure devices
- Positive expiratory pressure devices

- Cough stimulating devices, alternating positive and negative airway pressure
- High frequency chest wall oscillation air-pulse generator system

For specific details about items covered, see [Miscellaneous](#) in the Coverage Table.

Apnea Monitors

[Refer to [WAC 182-552-0300](#)]

The Agency covers, without prior authorization, the rental of an apnea monitor with recording feature for a maximum of six months when:

- The vendor has a licensed clinician who:
 - ✓ Is competent in pediatric respiratory care.
 - ✓ Is responsible for managing the client's apnea monitoring.
- The client is less than one year of age and meets at least one of the following clinical criteria:
 - ✓ Born less than 37-weeks gestation, and the infant is not more than 43 weeks corrected gestational age.
 - ✓ Had an apparent life-threatening apneic event (defined as requiring mouth-to-mouth resuscitation or vigorous stimulation).
 - ✓ Has been diagnosed with bradycardia and is being treated with caffeine, theophylline, or other stimulating agents.
 - ✓ Has documented gastro-esophageal reflux, which results in apnea, bradycardia, or oxygen desaturation.
 - ✓ Has documented apnea greater than 20 seconds in duration.
 - ✓ Has apnea for periods less than 20 seconds in duration and accompanied by bradycardia, cyanosis, or pallor.
 - ✓ Has bradycardia (defined as heart rate less than 100 beats per minute).
 - ✓ Has oxygen desaturation below 90%.
 - ✓ Has neurologic/anatomic/metabolic or respiratory diseases affecting respiratory drive.

- ✓ Is a subsequent sibling of an infant who died of sudden infant death syndrome (SIDS) until the client is one month older than the age at which the earlier sibling died, and the client remains event-free.

For each subsequent rental period:

- The client must continue to meet the clinical criteria for apnea monitors.
- The vendor must obtain prior authorization from the Agency.

The vendor must document the results of the use of the apnea monitor in the client's records.

For specific details about items covered, see [Apnea Monitor and Supplies](#) in the Coverage Table.

Bi-Level Respiratory Assist Devices (RADs)

[Refer to [WAC 182-552-0500](#)]

General Clinical Criteria

The Agency covers, without prior authorization, one bi-level respiratory assist device (RAD), with or without a back-up rate feature, per client every five years as long as the following criteria are met:

- The bi-level device has a data card.
- The client has *one* of the following conditions and meets the specific clinical criteria specified in this section.
 - ✓ Restrictive thoracic disorders (such as neuromuscular diseases or severe thoracic cage abnormalities).
 - ✓ Severe chronic obstructive pulmonary disease (COPD).
 - ✓ Central or complex sleep apnea.
 - ✓ Hypoventilation syndrome.

Prior authorization is required for Bi-Level RADs if either:

- The client does not meet the required clinical criteria.
- The Agency has purchased a CPAP device or other respiratory assist device for the client within the last five years.

Bi-Level RAD without the Back-Up Rate Feature

For a bi-level RAD without the back-up rate feature, the Agency:

- Pays for rental of the device during an initial three-month period.

The treating authorized prescriber must:

- ✓ Conduct a face-to-face clinical re-evaluation of the client between day 31 and day 91 of the rental period.
- ✓ Document the following in the client's file to continue rental:
 - The progress of the client's relevant symptoms.
 - The client's compliance with using the device.
- Purchases the device after the requirements for the rental are met.

Bi-Level RAD with the Back-Up Rate Feature

For a bi-level RAD with the back-up rate feature used with an invasive interface, the Agency pays for the rental only.

For a bi-level RAD with the back-up rate feature used with a noninvasive interface, the Agency:

- Pays for rental of the device during an initial three-month period.
- The treating authorized prescriber must:
- ✓ Conduct a face-to-face clinical re-evaluation of the client between 31 and 91 days of the rental period.
 - ✓ Document the following in the client's file for continuing rental:
 - The progress of the client's relevant symptoms.
 - The client's compliance with using the device.
 - Purchases after a total of 13 months of rental.

Required Clinical Criteria for Using RADs with Specific Types of Respiratory Disorders

Type of Respiratory Disorder	Type of Device Paid by Agency	Prior Authorization	Required Clinical Criteria
Restrictive Thoracic Disorders	Bi-level RAD device <i>with or without</i> back-up rate feature	No—when all clinical criteria are met	<ul style="list-style-type: none"> • The client has been diagnosed with a neuromuscular disease, such as amyotrophic lateral sclerosis (ALS) or a severe thoracic cage abnormality (for example, post-thoracoplasty for tuberculosis). • Chronic obstructive pulmonary disease (COPD) does not contribute significantly to the individual's pulmonary limitation. • The client also meets one or more of these clinical criteria: <ul style="list-style-type: none"> ✓ An arterial blood gas PaCO₂, done while awake and breathing the client's prescribed FIO₂ (fractionated inspired oxygen concentration) is ≥ 45 mm Hg. ✓ Sleep oximetry demonstrates an oxygen saturation ≤ 88% for ≥ 5 minutes of nocturnal recording time (minimum record time of 2 hours), done while breathing the client's prescribed recommended FIO₂. ✓ For a neuromuscular disease (only), either: <ul style="list-style-type: none"> ➤ Maximal inspiratory pressure is < 60 cm H₂O. ➤ Forced vital capacity is ≤ 50% predicted.
Severe Chronic Obstructive Pulmonary Disease (COPD)	Bi-level RAD device <i>without</i> back-up rate feature	No—when all clinical criteria are met	<p>The client meets <i>all</i> these clinical criteria:</p> <ul style="list-style-type: none"> • An arterial blood gas PaCO₂, done while awake and breathing the client's prescribed FIO₂, is ≥ 52 mm Hg. • Sleep oximetry demonstrates oxygen saturation ≤ 88% for ≥ 5 minutes of nocturnal recording time (minimum recording time of 2 hours), done while breathing oxygen at 2 LPM or the client's prescribed FIO₂ (whichever is higher). • Before initiating therapy, obstructive sleep apnea and treatment with CPAP has been considered and ruled out.

Respiratory Care

Type of Respiratory Disorder	Type of Device Paid by Agency	Prior Authorization	Required Clinical Criteria
COPD (cont.)	Bi-level RAD device <i>with</i> the back-up rate feature	No—when all clinical criteria are met	<p>Started any time <i>after the initial use of the bi-level RAD without the backup rate feature</i> when both these clinical criteria are met:</p> <ul style="list-style-type: none"> • An arterial blood gas PaCO₂, done while awake and breathing, the client’s prescribed FIO₂ shows that the client’s PaCO₂, worsens ≥ 7 mm Hg compared to the original result from using the bi-level RAD without the back-up rate feature. • A facility-based PSG demonstrates oxygen saturation $\leq 88\%$ for ≥ 5 minutes of nocturnal recording time (minimum recording time of 2 hrs) while using a bi-level RAD without the back-up feature. (Not caused by obstructive upper airway events—that is, AHI less than 5). <p style="text-align: center;">-OR-</p> <p>Started at a time no sooner than 61 days <i>after initial use of the bi-level RAD without the back-up rate feature</i> when both these clinical criteria are met:</p> <ul style="list-style-type: none"> • An arterial blood gas PaCO₂, done while awake and breathing, the client’s prescribed FIO₂ still remains ≥ 52 mm Hg; and • Sleep oximetry while breathing with the bi-level RAD without the back-up rate demonstrates oxygen saturation $\leq 88\%$ for ≥ 5 minutes of nocturnal recording time (minimum recording time of 2 hrs), done while breathing oxygen at 2 LPM or the client’s prescribed FIO₂, whichever is higher.
Central or Complex Sleep Apnea (not due to airway obstruction)	Bi-level RAD device <i>with or without</i> the back-up rate feature	No—when the client’s polysomnogram test meets clinical criteria	<p>The client’s polysomnogram test reveals both:</p> <ul style="list-style-type: none"> • The diagnosis of central sleep apnea (CSA) or complex sleep apnea (CompSA). • Significant improvement of the sleep-associated hypoventilation with the use of a bi-level RAD device with or without the back-up rate feature on the settings that will be prescribed for initial use at home, while breathing the client’s usual FIO₂.

Respiratory Care

Type of Respiratory Disorder	Type of Device Paid by Agency	Prior Authorization	Required Clinical Criteria
Obstructive Sleep Apnea (OSA)	Bi-level RAD device <i>without</i> the back-up rate feature	No—when all clinical criteria are met	<p>The client meets the clinical criteria for a CPAP. However, the CPAP has been tried and proven ineffective.</p> <p>Ineffective in this case, is defined as documented failure to meet therapeutic goals using a CPAP during either:</p> <ul style="list-style-type: none"> • The titration portion of a facility-based study. • During home use despite optimal therapy (that is, proper mask selection and fitting and appropriate pressure setting).
Hypoventilation Syndrome	Bi-level RAD device <i>without</i> the back-up rate feature	No—when all the clinical criteria are met.	<p>The client meets one of these three sets of clinical criteria:</p> <ul style="list-style-type: none"> • An initial arterial blood gas PaCO₂, done while awake and breathing the client's prescribed FIO₂, \geq to 45 mm Hg; and • Spirometry shows an FEV₁/FVC \geq to 70% and an FEV₁ \geq 50% of predicted. <p style="text-align: center;">-OR-</p> <ul style="list-style-type: none"> • An arterial blood gas PaCO₂, done during sleep or immediately upon awakening, and breathing the client's prescribed FIO₂, shows the client's PaCO₂ worsened \geq to 7 mm Hg compared to the original result. <p style="text-align: center;">-OR-</p> <ul style="list-style-type: none"> • A facility-based PSG demonstrates oxygen saturation \leq 88% for \geq to 5 continuous minutes of nocturnal recording time (minimum recording time of 2 hours) that is not caused by obstructive upper airway events—that is, AHI less than 5.

Type of Respiratory Disorder	Type of Device Paid by Agency	Prior Authorization	Required Clinical Criteria
Hypoventilation Syndrome (cont.)	Bi-level RAD device <i>with</i> the back-up rate feature	No- when all the clinical criteria are met.	<p>The client meets both of these clinical criteria:</p> <ul style="list-style-type: none"> • A covered bi-level RAD without the back-up rate feature is being used. • Spirometry shows an FEV1/FVC \geq 70% and an FEV1 \geq 50% of predicted. <p>The client <i>also</i> meets one of these clinical criteria:</p> <ul style="list-style-type: none"> • An arterial blood gas PaCO₂, done while awake and breathing the client's prescribed FIO₂, shows that the client's PaCO₂ worsens \geq 7 mm Hg compared to the ABG result performed to qualify the client for the bi-level RAD without the back-up rate feature. <p style="text-align: center;">-OR-</p> <ul style="list-style-type: none"> • A facility-based PSG demonstrates oxygen saturation \leq to 88% percent for \geq 5 continuous minutes of nocturnal recording time (minimum recording time of 2 hours) that is not caused by obstructive upper airway events—that is, AHI less than 5 while using a bi-level RAD without the back-up rate feature.

Replacement of Bi-Level RAD Equipment and Supplies

- Prior authorization is required for the replacement of a bi-level RAD device if the client has had the device for less than five years.
- After five years, the client's authorized prescriber must conduct a face-to-face evaluation documenting that the client continues to use and benefit from the bi-level RAD device. A new PSG (sleep test), trial period, or prior authorization is not required.
- The Agency pays for replacement supplies for a bi-level RAD device, as identified in the Coverage Table.

For specific details about items covered, see [Continuous Positive Airway Pressure System and Ventilators and Related Respiratory Equipment](#) in the Coverage Table.

The Agency does not cover accessories/services not specifically identified in this guide.

Continuous Positive Airway Pressure (CPAP) and Supplies

[Refer to [WAC 182-552-0400](#)]

Clinical Criteria

The Agency covers, without prior authorization, one continuous positive airway pressure (CPAP) device including related supplies, per client, every five years as long as all the following criteria are met:

- The client is diagnosed with obstructive sleep apnea using a clinical evaluation and a positive attended polysomnogram (PSG) performed in a sleep laboratory.

Notes: Unattended home sleep studies do not meet the clinical criteria for reimbursement. The Agency does not pay for a CPAP device when the client is diagnosed with upper airway resistance syndrome (UARS).

- CPAP is the least costly, most effective treatment modality.
- The CPAP device has a data card and is FDA approved.
- The item requested is not included in any other reimbursement methodology such as the diagnosis-related group (DRG).

Additional Criteria for Clients 13 years of age and older

- The client's polysomnogram demonstrates an apnea-hypopnea index (AHI) ≥ 15 events per hour with a minimum of 30 events; or
- The client's polysomnogram demonstrates the AHI is ≥ 5 and ≤ 14 events per hour with a minimum of 10 events and clinical documentation of:
 - ✓ Excessive daytime sleepiness, impaired cognition, mood disorders, or insomnia; or
 - ✓ Hypertension, ischemic heart disease, or history of stroke.

Additional Criteria for Clients 12 years of age and younger

Clinical criteria must include:

- A documented diagnosis of obstructive sleep apnea (OSA).
- A polysomnography that demonstrates an apnea index (AI) or apnea-hypopnea index (AHI) ≥ 1 and one of the following:

- ✓ Adenotonsillectomy has been unsuccessful in relieving OSA.
- ✓ Adenotonsillar tissue is minimal.
- ✓ Adenotonsillectomy is inappropriate based on OSA being attributable to another underlying cause (such as craniofacial anomaly or obesity) or adenotonsillectomy is contraindicated.
- ✓ The client's family does not wish to pursue surgical intervention.

Note: The AHI is calculated on the average number of events per hour. If the AHI is calculated based on less than two hours of sleep or recording time, the total number of recorded events used to calculate the AHI must be at least the number of events that would have been required in a two-hour period (that is, must reach at least 30 events without symptoms or at least 10 events with symptoms).

Use of Respiratory Assist Device Instead of CPAP

If a client meets the criteria for CPAP, but a CPAP device has been tried and proven ineffective, the Agency will cover a bi-level respiratory assist device (RAD) without the back-up rate.

Ineffective, in this case, means documented failure to meet therapeutic goals using a CPAP during either:

- The titration portion of a facility-based study.
- Home use despite optimal therapy (that is, proper mask selection and fitting and appropriate pressure setting).

CPAP Prior Authorization

Prior authorization is required for CPAP devices if either:

- The client does not meet the required clinical criteria.
- The Agency has purchased either a CPAP or a bi-level RAD device for the client within the last five years.

Rental and Purchase of a CPAP

After the initial three-month rental period for a CPAP device, the Agency will purchase this device when the following documentation of clinical benefit is recorded in the client's file:

- A face-to-face clinical re-evaluation of the client by the authorized prescriber, which documents that symptoms of obstructive sleep apnea are improved.
- A review of objective evidence by the authorized prescriber of the client's adherence to use of the CPAP device.

Note: Adherence is defined as use of the CPAP device \geq 4 hours per night on 70% of nights during a consecutive 30-day period anytime during the first 3 months of initial usage.

For specific details about CPAP related covered items, see [Continuous Positive Airway Pressure System](#) in the Coverage Table.

Replacement of CPAP Equipment and Supplies

- Prior authorization is required for the replacement of a CPAP device if the client has had the device for less than five years.
- After five years, the client's treating authorized prescriber must conduct a face-to-face evaluation documenting that the client continues to use and benefit from the CPAP device. A new PSG (sleep test), trial period, or prior authorization is not required.
- The Agency pays for replacement supplies for a CPAP device, as identified in [Continuous Positive Airway Pressure System](#) in the Coverage Table.

Nebulizer and Related Compressors

[Refer to [WAC 182-552-0650](#)]

The Agency covers, without prior authorization, the purchase of a nebulizer and related compressor, with limits, when the following clinical criteria are met.

- The *small* volume nebulizer and related compressor for administering inhalation drugs for one of the following:
 - ✓ The management of obstructive pulmonary disease.
 - ✓ A client with cystic fibrosis or bronchiectasis.
 - ✓ A client with HIV, pneumocystosis, or complications of organ transplants.
 - ✓ Persistent, thick, or tenacious pulmonary secretions.
- The *large* volume nebulizer and related compressor to deliver humidity to a client who has thick, tenacious secretions and has one or more of the following:

- ✓ Cystic fibrosis
 - ✓ Bronchiectasis
 - ✓ A tracheostomy
 - ✓ A tracheobronchial stent
- The filtered nebulizer when necessary to administer pentamidine to clients with HIV, pneumocystosis, or complications of organ transplants.

The Agency does not pay for a large volume nebulizer, related compressor/generator, and water or saline when used predominantly to provide room humidification.

For specific details about items covered, see [Nebulizer and Accessories](#) in the Coverage Table.

Oximeters

[Refer to [WAC 182-552-0900](#)]

Clinical Criteria for Standard Oximeters

- The Agency covers the purchase of standard oximeters, without prior authorization, for clients 17 years of age or younger in the home when the client meets one of the following clinical criteria:
 - ✓ Has chronic lung disease and is on supplemental oxygen.
 - ✓ Has a compromised or artificial airway.
 - ✓ Has chronic lung disease requiring a ventilator or a bi-level Respiratory Assist Device (RAD).
- Prior authorization is needed for purchasing standard oximeters for clients 18 years or older.

Clinical Criteria for Enhanced Oximeters

- The Agency covers the purchase of enhanced oximeters, without prior authorization, for clients 17 years of age or younger in the home when both:
 - The criteria for a standard oximeter are met.
 - The expedited prior authorization (EPA) criteria are met.

Note: See [EPA Criteria](#) in this guide for more details.

- The Agency covers the purchase of enhanced oximeters, with prior authorization, for:

- ✓ Clients 18 years of age and older
- ✓ Clients 17 years of age and younger who do not meet clinical criteria.

For specific details about items covered, see [Miscellaneous](#) in the Coverage Table.

Oxygen

[Refer to WACs [182-552-0200](#) and [182-552-0800](#)]

The Agency covers oxygen, without prior authorization, when the clinical criteria are met.

Requirements for Valid Oxygen Prescriptions

[Refer to [WAC 182-552-0200](#)]

- The Agency requires a valid prescription for oxygen under [WAC 182-552-0200](#).
- When prescribing oxygen, follow these requirements:
 - ✓ Include the flow rate of oxygen, estimated length of need, frequency and duration of oxygen use, and the client's oxygen saturation level on the prescription. Prescriptions that state only "as needed" or "PRN" are not sufficient.
 - ✓ Recertify clients who meet Group I clinical criteria one year after initial certification.
 - ✓ Recertify clients who meet Group II clinical criteria three months after initial certification.
 - ✓ Use the client's oxygen saturation or laboratory values to meet recertification requirements.
- The Agency requires that documentation be kept in the client's record for oxygen saturation and lab values to verify the medical necessity of continued oxygen.
 - ✓ The provider may perform the oxygen saturation measurements.
 - ✓ The Agency does **not** accept lifetime certificates of medical need (CMNs). (See [WAC 182-552-0800](#).)

Coverage Criteria for Oxygen

	Criteria	Initial Prescription	Renew Prescription	Documented Verification by Provider
<p>For Group I clients</p> <p>(chronic oxygen clients with obvious respiratory challenges as evidenced by low oxygen saturation)</p>	<p><i>Any</i> of the following:</p> <ul style="list-style-type: none"> • An arterial PaO₂ at or below 55mm Hg or an arterial oxygen saturation (SaO₂) at or below 88% taken at rest (awake). • An arterial PaO₂ at or below 55 mm Hg, or an arterial oxygen saturation at or below 88% for at least 5 minutes, taken during sleep for a client who demonstrates an arterial PaO₂ at or above 56 mm Hg or an arterial oxygen saturation at or above 89% while awake. • A decrease in arterial PaO₂ more than ten mm Hg, or a decrease in arterial oxygen saturation more than 5% from baseline saturation for at least five minutes taken during sleep associated with symptoms (for example, impairment of cognitive processes and nocturnal restlessness or insomnia) or signs (for example, cor pulmonale, “P” pulmonale on EKG, documented pulmonary hypertension and erythrocytosis) reasonably attributable to hypoxemia. • An arterial PaO₂ at or below 55 mm Hg or an arterial oxygen saturation at or below 88%, taken during exercise for a client who demonstrates an arterial PaO₂ at or above 56 mm Hg or an arterial oxygen saturation at or above 89% during the day while at rest. In this case, oxygen is provided during exercise if it is documented that the use of oxygen improves the hypoxemia that was demonstrated during exercise when the client was breathing room air. 	12 months or length of need specified by authorized prescriber, whichever is shorter	A least every 12 months thereafter, provided that clinical criteria continue to be met	<p>For both the initial and renewal prescriptions, document how the client specifically meets the criteria.</p> <p>For ongoing coverage, the provider may perform the oxygen saturation measurements.</p>

	Criteria	Initial Prescription	Renew Prescription	Documented Verification by Provider
<p>For Group II clients</p> <p>(borderline oxygen clients—their blood saturation levels seem to be within the normal range, but additional extenuating issues suggest a need for oxygen)</p>	<ul style="list-style-type: none"> • The presence of an arterial PaO₂ of 56-59 mm Hg or an arterial blood oxygen saturation of 89% at rest (awake), during sleep for at least five minutes, or during exercise (as described under Group I criteria). <p style="text-align: center;">AND</p> <ul style="list-style-type: none"> • Any of the following: <ul style="list-style-type: none"> ✓ Dependent edema suggesting congestive heart failure. ✓ Pulmonary hypertension or cor pulmonale, determined by measurement of pulmonary artery pressure, gated blood pool scan, echocardiogram, or “P” pulmonale on EKG (P wave greater than 3 mm in standard leads II, III, or AVF). ✓ Erythrocythemia with a hematocrit greater than 56%. 	<p>3 months or length of need specified by authorized prescriber, whichever is shorter</p>	<p>3 months after initial prescription and annually thereafter, provided that clinical criteria continue to be met</p>	<p>For both the initial and renewal prescriptions, document how the client specifically meets the criteria.</p> <p>For ongoing coverage, the provider may perform the oxygen saturation measurements.</p>

Capped Rental Oxygen Systems and Contents

[Refer to [WAC 182-552-0800](#)]

Capped rental applies *only* to in-home oxygen use by medical assistance clients. Oxygen systems are considered *capped rental* (provider continues to own the equipment) after 36 months.

- The Agency makes only 36 rental payments for stationary oxygen system and/or portable oxygen system equipment.

During the rental period, the Agency’s payment includes any supplies, accessories, oxygen contents, delivery and associated costs, instructions, maintenance, servicing, and repairs.

- Throughout the 36-month capped rental period, the supplier who provides the oxygen equipment for the first month must continue to provide any necessary oxygen equipment and related items and services.

Respiratory Care

The supplier (provider) must continue to provide the client with properly functioning oxygen equipment (including maintenance and repair), and associated supplies for the remaining 24 months of the equipment's reasonable useful lifetime (RUL).

During the remaining 24 months, the supplier may bill the Agency for only:

- ✓ Oxygen contents
 - ✓ Disposable supplies
 - ✓ Maintenance fees, which are limited to one every six months
- The provider may replace the equipment any time after the end of the five-year RUL, thus beginning a new 36-month rental period.
 - Using the *expedited prior authorization* process, providers may restart a 36-month rental period in any of the following situations:
 - ✓ The initial provider is no longer providing oxygen equipment or services.
 - ✓ The initial provider's Core Provider Agreement with the Agency is terminated or expires.
 - ✓ The client moves to an area that is not part of the provider's service area. (This applies to Medicaid-only clients.)
 - ✓ The client moves into a permanent residential setting.
 - ✓ A pediatric client is transferred to an adult provider.
 - Once a provider requests and receives prior authorization, the Agency may authorize a restart of the 36-month rental period when:
 - ✓ Extenuating circumstances occur, resulting in a loss or destruction of oxygen equipment (for example, fire, or flood). (See WAC [182-501-0050\(7\)](#)); and
 - ✓ The client was exercising reasonable care.

Note: For further details, see the EPA criteria table in this section and the EPA process in the Authorization section.

Stationary and Portable Oxygen Systems and Contents

[Refer to [WAC 182-552-0800](#)]

- Stationary oxygen systems are:
 - ✓ Compressed gaseous oxygen
 - ✓ Stationary liquid oxygen
 - ✓ A concentrator
- A portable oxygen system can be either gas or liquid.

For specific details about items covered, see [Oxygen and Oxygen Equipment](#) in the Coverage Table.

Rental

- The Agency pays a maximum of one rental payment every 30 days per client for stationary or portable oxygen systems, including oxygen contents.
- The rental of a stationary oxygen system and/or a portable oxygen system is covered without prior authorization for clients who are:
 - ✓ Twenty years of age and younger, when prescribed by the client's treating practitioner.
 - ✓ Twenty-one years of age and older, when prescribed by a practitioner and the client meets Group I or Group II clinical criteria.
- Prior authorization is required for clients, 21 years of age and older who do not meet clinical criteria for rental of a stationary oxygen system and/or a portable oxygen system.

Contents

The Agency pays a maximum of one payment for oxygen contents, per client, every 30 days when the client owns the oxygen system or the capped rental period is met.

Maintenance

The Agency pays one maintenance fee every six months for an oxygen concentrator and oxygen transfilling equipment only when the capped rental period is met or the client owns the oxygen concentrator.

The maintenance fee is 50% of the monthly rental rate.

Services, Equipment, and Supplies Not Paid

- The Agency does not pay for oxygen therapy and related services, equipment or supplies for *clients 21 years of age and older*, with, but not limited to, any one of the following conditions:
 - ✓ Angina pectoris in the absence of hypoxemia.
 - ✓ Dyspnea without cor pulmonale or evidence of hypoxemia
 - ✓ Severe peripheral vascular disease resulting in clinically evident desaturation in one or more extremities but in the absence of systemic hypoxemia.
- The Agency does not pay separately for:
 - ✓ Accessories, such as humidifiers, necessary for the effective use of oxygen equipment. These are included in the monthly rental payment.
 - ✓ Spare tanks of oxygen and related supplies as back-up or for travel.

Suction Pumps and Supplies

[Refer to [WAC 182-552-1100](#)]

The Agency:

- Covers suction pumps and supplies when medically necessary for airway clearance or tracheostomy suctioning.
- Pays for a maximum of two suction devices per client in a five-year period as follows:
 - ✓ The Agency rents one primary suction device (stationary or portable) per client for use in the home and one secondary suction device per client for back-up or portability.
 - ✓ The Agency considers the suction devices purchased after 12 months' rental.

For specific details about items covered, see [Suction Pumps/Supplies](#) in the Coverage Table.

Ventilator Equipment and Supplies

[Refer to [WAC 182-552-1000](#)]

Primary Ventilator

- The Agency covers the rental of a ventilator, equipment, and related disposable supplies when the ventilator is for the treatment of chronic respiratory failure (chronic carbon dioxide retention).
- The Agency covers medically necessary ventilator equipment rental and related disposable supplies when **all** of the following apply:
 - ✓ There is a prescription for the ventilator.
 - ✓ The ventilator is to be used exclusively by the client for whom it is requested.
 - ✓ The ventilator is FDA-approved.
 - ✓ The item requested is not included in any other reimbursement methodology such as, but not limited to, diagnosis-related group (DRG).
- The Agency's monthly rental rate includes ventilator maintenance and accessories, including but not limited to:
 - ✓ Humidifiers
 - ✓ Nebulizers
 - ✓ Alarms
 - ✓ Temperature probes
 - ✓ Batteries
 - ✓ Cables
 - ✓ Chargers
 - ✓ Adapters
 - ✓ Connectors
 - ✓ Fittings
 - ✓ Tubing
 - ✓ Circuits, and filters

Note: The Agency does not pay separately for ventilator accessories unless the client owns the ventilator system.

Secondary (Back-Up) Ventilator

The Agency covers a secondary (back-up) ventilator at 50% of the monthly rental rate when one or more of the following clinical criteria are met:

- The client cannot maintain spontaneous ventilations for four or more consecutive hours.
- The client lives in an area where a replacement ventilator cannot be provided within two hours.
- The client requires mechanical ventilation during mobility as prescribed in their plan of care.

Pressure Support Ventilators

- For clients 18 years of age and older, the Agency requires prior authorization.
- For clients 17 years of age and younger, the Agency requires expedited prior authorization (EPA) provided that all following criteria are met:
 - ✓ The client is currently using a pressure support ventilator.
 - ✓ The client must be able to take spontaneous breaths.
 - ✓ There must be an authorized prescriber's order for the pressure support setting.
 - ✓ The client must be using the ventilator in the pressure support mode.

The EPA is valid for either 6 or 12 months. If the client has no clinical potential for weaning, the Agency's EPA is valid for 12 months. If the client has the potential to be weaned, the Agency's EPA is valid for 6 months.

- To continue using the EPA after the 6-or 12-month period, a vendor must update the client's file to:
 - ✓ Address the client's weaning potential for either 6 or 12 months of continued EPA use.
 - ✓ Document how the client continues to meet the criteria.

For specific details about items covered, see [Ventilators and Related Respiratory Equipment](#) in the Coverage Table.

Respiratory Care Coverage Table

Bill With:	Taxonomy 332BX2000X.
Do Not Bill With:	Any procedure code listed in the “Do Not Bill With” column of the fee schedule is AT NO TIME allowed in combination with the primary code located in the “HCPCS Code” column.
Maximum Allowance:	Rentals are calculated on a 30-day basis unless otherwise indicated. In those instances where rental is required prior to purchase, the rental price is applied towards the purchase price.
Rentals:	From and to dates are required on all rental billings. (1 month equals 30 days.)

Notes: Providers must monitor the amount of supplies and accessories a client is actually using and assure the client has nearly exhausted the supply on hand before dispensing any additional items.

For *policy requirements*, including clinical criteria, for different types of equipment and supplies, see [Coverage Criteria](#) in this guide. For an *explanation of prior authorization* (PA), including expedited prior authorization and limitation extension, see [Authorization](#).

Apnea Monitor and Supplies

Code Status Indicator	HCPCS Code	Modifier	Description	Do Not Bill With	EPA/PA?	Policy/Comments
NC	E0618		Apnea monitor, without recording feature			
	E0619	RR	Apnea monitor, with recording feature		PA	Maximum of 6 months rental without PA if criteria are met. (For more about criteria, see Apnea Monitors in Coverage Criteria.) Prior authorization required after the initial 6 months.
	A4556	NU	Electrodes (e.g., Apnea monitor), per pair	A4558		Purchase only. For use only when client is unable to tolerate carbon patch electrodes. Limit: 15 pairs every 30 days.
NC	A4557		Lead Wires, e.g. apnea monitor per pair			
NC	A4558	NU	Conductive paste or gel	A4556		Purchase only.

Authorization

[Refer to [WAC 182-552-1300](#)]

- The Agency requires providers to obtain authorization for covered respiratory care as required in:
 - ✓ Chapters [182-552](#), [182-501](#) and [182-502](#) WAC;
 - ✓ Published Agency Medicaid provider guides; or
 - ✓ Situations where the required clinical criteria are not met.
- When a service requires authorization, the provider must properly request authorization, under the Agency's rules and billing instructions.
 - ✓ When authorization is not properly requested, the Agency rejects and returns the request to the provider for further action.
 - ✓ The Agency does not consider the rejection of a request to be a denial of service.
- The Agency's authorization of service(s) does not necessarily guarantee payment.
- The Agency evaluates requests for authorization of covered respiratory care equipment and supplies that exceed limitations in this chapter on a case-by-case basis under [WAC 182-501-0169](#).
- The Agency may recoup any payment made to a provider if the Agency later determines that the service was not properly authorized, or did not meet the EPA criteria. (See [WAC 182-502-0100](#)[1][c].)

Notes: For submitting claims with authorization numbers, see [Billing with Authorization](#) in this guide. For more detailed information on requesting authorization, see the Agency's [ProviderOne Billing and Resource Guide](#).

What Is Prior Authorization (PA)?

[Refer to WACs [182-552-1300](#) and [182-552-1325](#)]

Prior authorization (PA) is the Agency's approval for certain medical services, equipment, or supplies *before* being provided to clients (except when the items and services are covered by a third-party payer.) PA is a precondition for provider reimbursement. The item or service must be delivered to the client *before* the provider bills the Agency.

PA Criteria

- With prior authorization, the Agency may consider covering new respiratory care items that do not have assigned healthcare common procedure coding system (HCPCS) codes, and are not listed in the Agency's published issuances.

For these, the provider must furnish all of the following information to the Agency to establish medical necessity:

- ✓ A detailed description of the item(s) or service(s) to be provided.
 - ✓ The cost or charge for the item(s).
 - ✓ A copy of the manufacturer's invoice, price list or catalog with the product description for the item(s) being provided.
 - ✓ A detailed explanation of how the requested item(s) differs from an already existing code description.
- In addition, for PA requests, the Agency requires the prescribing provider to furnish *client-specific* justification for respiratory care.

The Agency does not accept general standards of care or industry standards for generalized equipment as justification.

- When the Agency receives the initial request for prior authorization, the prescription(s) for those items or services must *not* be older than three months from the date the Agency receives the request.
- The Agency does not pay for the purchase, rental, or repair of respiratory care equipment that duplicates equipment clients already own or rent.

If providers believe the purchase, rental or repair of respiratory care equipment is not duplicative, they may request prior authorization by submitting the following to the Agency:

- ✓ Reasons the existing equipment no longer meets the client's medical needs.
- ✓ Reasons the existing equipment could not be repaired or modified to meet the client's medical needs.
- ✓ Upon request, documentation showing how the client's condition meets the criteria for PA.

- A provider may resubmit a request for prior authorization for an item or service that the department has denied. The Agency requires the provider to include new documentation that is relevant to the request

The PA Process

For prior authorization (PA), a provider must submit a written request to the Agency.

- Providers make written prior authorization requests by submitting:
 - ✓ A completed “General Information for Authorization” form ([HCA 13-835](#))
 - ✓ A completed “Oxygen and Respiratory Authorization Request” form ([HCA 15-298](#))
 - ✓ A prescription
 - ✓ Any other required documentation
- To prior authorize the purchase or rental of equipment, providers also must provide the information that includes, but is not limited to:
 - ✓ The manufacturer’s name.
 - ✓ The equipment model and serial number.
 - ✓ A detailed description of the item.
 - ✓ Any modifications required, including the product or accessory number as shown in the manufacturer’s catalog.

(Also, refer to WAC [182-501-0165](#).)

Repairs for client-owned equipment

To be paid for a repair of client-owned equipment, the provider must submit a prior authorization request for repairs with all the following:

- A manufacturer pricing sheet showing manufacturer’s list or suggested retail price (MSRP); or a manufacturer invoice showing the acquisition cost (AC) of the repair, identifying and itemizing the parts.
- A completed “General Information for Authorization” form ([HCA 13-835](#)) showing, by line, the HCPCS codes being requested with corresponding billed charges.
- A statement on company letterhead indicating that the equipment or parts are no longer covered by warranty.

- The serial number of the equipment being repaired.

If the equipment did not come with a serial number or the number is no longer legible or on the equipment, the provider must:

- ✓ Assign a new number.
 - ✓ Attach it to the equipment.
 - ✓ Include this information on company letterhead.
- Specific respiratory care labor code (K0740).
 - Actual labor time used for repairs.

What Is Expedited Prior Authorization (EPA)?

[Refer to WACs [182-552-1300](#) and [182-552-1375](#)]

The expedited prior authorization process (EPA) eliminates the need for written requests for prior authorization of selected respiratory care procedure codes. Services requiring EPA are identified in the EPA Criteria Table.

EPA Criteria

- For EPA, a provider must document how the EPA criteria are met and have supporting medical documentation. The provider must include all documentation in the client's file, available to the Agency on request.
- The provider must use the appropriate EPA number and process when billing the Agency.
- When a situation does not meet the EPA criteria for selected respiratory care procedure codes, a written request for prior authorization is required.
- The Agency may recoup any payment made to a provider if the provider did not follow the expedited authorization criteria and process.

The EPA Process

- Providers must create a 9-digit EPA number for selected respiratory care procedure codes:
 - ✓ The first five or six digits of the EPA number must be **870000**.
 - ✓ The last three or four digits must be the code assigned to the diagnostic condition, procedure, or service that meets the EPA criteria. (See the [EPA Criteria Table](#).)

Example: In billing E0570 for a **Nebulizer** when the client is two years old and has been diagnosed with acute bronchiolitis, the EPA number would be **870000900**. (**870000** = first six digits of all expedited prior authorization numbers; **900** = last three digits of an EPA number, indicating the clinical criteria and the equipment you are billing.)

Note: When the client's situation does not meet published criteria, authorization is necessary.

What is a Limitation Extension?

[Refer to [WAC 182-552-1300](#) and [182-552-1350](#)]

The Agency limits the amount, frequency, or duration of certain covered respiratory care, and pays up to the stated limit without requiring prior authorization. (Limits are based on what is normally considered medically necessary, for quantities sufficient for a 30-day supply for one client.) A limitation extension (LE) is the Agency's method for the provider to furnish more units than are typically allowed.

LE Criteria

- The provider must request prior authorization for a limitation extension (LE) to exceed the stated limits for respiratory care equipment and supplies using the required process.
- The provider must provide justification that the additional units of service are medically necessary.
- The Agency evaluates LE requests on a case-by-case basis under [WAC 182-501-0169](#).

Note: Limitation Extensions do not override the client's eligibility or program limitations. Not all categories of eligibility can receive all services. For example: Kidney dialysis is excluded under the Family Planning Only Program.

The LE process

The provider requests an LE by using a written/fax authorization process. All prior authorization requests must be accompanied by:

- A completed “General Information for Authorization” form ([HCA 13-835](#))
- A completed “Oxygen and Respiratory Authorization Request” form ([HCA 15-298](#))
- A prescription
- Any other required documentation

Noncovered

[Refer to [WAC 182-552-1200](#)]

- In addition to the noncovered services found in [WAC 182-501-0070](#), the Agency does not cover:
 - ✓ Emergency or stand-by oxygen systems, including oxygen as needed
 - ✓ Portable nebulizer
 - ✓ Kits and concentrates for use in cleaning respiratory equipment
 - ✓ Intrapulmonary percussive ventilation system and related accessories
 - ✓ Battery for a CPAP
 - ✓ An item or service which primarily serves as a convenience for the client or caregiver
 - ✓ Oximetry checks
 - ✓ Loaner equipment.
- The Agency evaluates a request for respiratory care that is listed as noncovered in this guide under the provisions of [WAC 182-501-0160](#).

Reimbursement

General Payment for Respiratory Care

[[WAC 182-552-1400](#)]

The Agency pays qualified providers for covered respiratory care services, equipment, and supplies on a fee-for-service (FFS) basis.

Agency-enrolled durable medical equipment (DME) providers, pharmacies, and home health agencies are paid under their national provider identifier (NPI) numbers according to:

- [Chapter 182-552 WAC](#) and these billing instructions.
- Healthcare common procedure coding system (HCPCS) guidelines.

Note: The Agency is the payor of last resort for clients with Medicare or third-party insurance.

Maximum Allowable Fees

[Refer to [WAC 182-552-1400](#)]

The Agency updates the maximum allowable fees at least once per year, unless otherwise directed by the legislature or considered necessary by the Agency.

The Agency sets, evaluates, and updates the maximum allowable fees for respiratory care services, equipment and supplies using available published information, including but not limited to:

- Commercial databases
- Manufacturer's catalogs
- Medicare fee schedules
- Wholesale prices.

The Agency may adopt policies, procedure codes, and/or rates that are inconsistent with those set by Medicare if the Agency determines that such actions are necessary.

The maximum payment is either of the following, whichever is less:

- Providers' usual and customary charges.
- Established rates, except those provided in [WAC 182-502-0110\(3\)](#).

Reimbursement Rates

[Refer to [WAC 182-552-1400](#) (8)]

The Agency's reimbursement rates for respiratory care include the following:

- Any adjustments or modifications to the equipment that are either required within three months of the delivery date; or are covered under the manufacturer's warranty.
- Pick-up, delivery, or associated costs such as mileage, travel time, or gas.
- Telephone calls.
- Shipping, handling, and/or postage.
- Fitting and/or setting up.
- Instructions to the client or client's caregiver about the use of the oxygen or respiratory care equipment and supplies.

Respiratory Care Not Paid for by the Agency

[Refer to [WAC 182-552-1400](#)]

- The dispensing provider who furnishes respiratory care equipment or supplies to a client is responsible for any costs incurred to have a *different* provider repair the equipment when:
 - ✓ Any equipment or supply that the Agency considers purchased requires repair during the applicable warranty period;
 - ✓ The provider refuses or is unable to fulfill the warranty; and
 - ✓ The respiratory care equipment or supply continues to be medically necessary.
- The Agency does not pay for respiratory care equipment and supplies, or related repairs and labor charges under fee-for-service (FFS) when the client is:
 - ✓ An inpatient hospital client;
 - ✓ Terminally ill and receiving hospice care; or
 - ✓ An enrollee in a risk-based MCO that includes coverage for such items and/or services.

- The Agency rescinds any purchase order for a prescribed item if the equipment or supply was not provided to the client before the client:
 - ✓ Dies.
 - ✓ Loses medical eligibility.
 - ✓ Becomes covered by a hospice agency.
 - ✓ Becomes covered by an MCO.

Rented or Purchased Equipment

[Refer to [WAC 182-552-1500](#)]

- The Agency bases its decision to rent or purchase respiratory care equipment and supplies on the cost and length of time the client needs the equipment.
- A provider must not bill the Agency for the rental or purchase of equipment supplied to the provider at no cost by suppliers/manufacturers.
- The Agency purchases *new* respiratory equipment only.
 - ✓ A new respiratory item that is placed with a client initially as a rental item is considered a new item by the Agency at the time of purchase.
 - ✓ A used respiratory item that is placed with a client initially as a rental item must be replaced by the supplier with a new item prior to purchase by the Agency.
- The Agency requires a dispensing provider to ensure that the respiratory equipment rented to a client meets both of the following:
 - ✓ Is in good working order.
 - ✓ Is comparable to equipment the provider rents to clients with similar medical equipment needs who are either private pay clients or who have other third-party coverage.
- The Agency's minimum rental period for covered respiratory care equipment and supplies is one day.
- The Agency's reimbursement for rented respiratory care equipment and supplies includes all of the following:
 - ✓ A full service warranty.
 - ✓ Cost of delivery to, or pick-up from, the client's residence and, when appropriate, to and from the room in which the equipment will be used.

- ✓ Fitting, set-up, adjustments, and modifications.
 - ✓ Maintenance, repair and/or replacement, and cleaning of the equipment.
 - ✓ Instructions to the client and/or client's caregiver for safe and proper use of the equipment.
 - ✓ All medically necessary accessories, contents, and disposable supplies, unless separately billable according to these billing instructions.
- The Agency considers some rented equipment to be purchased after 12 months' rental, unless the equipment is restricted as rental only, or is otherwise defined in this guide.
 - Respiratory care equipment and related services purchased by the Agency for a client are the client's property, unless identified as capped rental items by the Agency. Capped rental items are considered the property of the provider.
 - In the event of a client's ineligibility, death, or discontinued use of equipment, rental fees end on the last day of eligibility, life, or medically necessary usage. Reimbursement will be prorated in these cases.
 - For a client who is eligible for both Medicare and Medicaid, the Agency discontinues paying the client's coinsurance and deductible for rental equipment when either of the following applies:
 - ✓ The reimbursement amount reaches Medicare's reimbursement cap for the equipment.
 - ✓ Medicare considers the equipment purchased.

Replacement of Rental Equipment and Supplies

[\[WAC 182-552-1400\(12\)\]](#)

- If rental respiratory equipment or supplies must be replaced during the warranty period, the Agency recoups 50% of the total amount previously paid toward the rental costs and eventual purchase of the respiratory equipment or supply if:
 - ✓ The provider is unwilling or unable to fulfill the warranty; and
 - ✓ The respiratory care equipment or supply continues to be medically necessary.

Rental Equipment Not Paid for by the Agency

[Refer to WAC [182-552-1500](#)(11) and (12)]

The Agency does not pay for the following:

- Insurance coverage against liability, loss and/or damage to rental equipment that a provider supplies to a client.
- Defective equipment.
- The cost of materials covered under the manufacturer's warranty or administrative fees charged by the manufacturer to perform warranty or repair work.
- Repair or replacement of equipment as a result of the client's carelessness, negligence, recklessness, or misuse in accordance with [WAC 182-501-0050](#)(7). (The Agency may request documentation, such as a police report, for equipment repair or replacement at its discretion.)

Purchased Equipment Paid for by the Agency

[Refer to [WAC 182-552-1500](#)]

The Agency pays for equipment that is new at the time of purchase. This may be the same equipment that is provided to the client during the initial rental.

Note: If the equipment was not new at the time of the initial rental, the supplier must replace it with new equipment before the Agency purchases it.

- Purchased equipment becomes the property of the client, unless identified as capped rental items by the Agency. Capped rental items are considered the property of the provider.
- The provider must make warranty information, including date of purchase, applicable serial number, model number or other unique equipment identifier, and warranty period and warranty period, available to the Agency upon request.
- The Agency does not pay for:
 - ✓ Defective equipment.
 - ✓ The cost of materials (and associated labor) covered under the manufacturer's warranty.

Capped Rental Oxygen Equipment

[Refer to [WAC 182-552-1500](#) (13)]

Capped rental oxygen equipment is considered to have a reasonable useful lifetime of five years. The Agency will pay for new equipment on capped rental items for eligible clients after five years of continuous use, at which point the capped rental period of 36 months will start again.

Client-Owned Equipment

[Refer to [WAC 182-552-1500](#) (13)]

- Equipment is considered to be client-owned if:
 - ✓ It is not identified as a capped rental item in these billing instructions; and
 - ✓ The Agency has reached the maximum reimbursement for the item.
- The Agency pays for the repair (parts and labor) of client-owned respiratory equipment with prior authorization.
 - ✓ The Agency's bases the decision to pay for repairs to client-owned equipment on cost and length of time the client needs the equipment.
 - ✓ The Agency considers the age of the equipment.
 - ✓ In addition, all these criteria must be met:
 - All warranties are expired.
 - The cost of the repair is less than 50% of the cost of a new item and the provider has supporting documentation.
 - The repair has a warranty for a minimum of 90 days.

Note: If a provider does not obtain prior authorization, the Agency will deny the billing, and the client must not be held financially responsible for the service.

- The reimbursement rate for client-owned equipment includes, **but is not limited to:**
 - ✓ A manufacturer's warranty for a minimum warranty period of one year for medical equipment, not including disposable/nonreusable supplies.
 - ✓ Instructions to the client and/or caregiver for safe and proper usage of the equipment.
 - ✓ The cost of delivery to the client's residence or skilled nursing facility and, when appropriate, to the room in which the equipment will be used.

Payment Methodology for Respiratory Care

[Refer to [WAC 182-552-1600\(1\)-\(3\)](#)]

The Agency sets, evaluates and updates the maximum allowable fees for purchased respiratory care equipment at least once yearly using one or more of the following:

- The current Medicare rate, as established by the federal Centers for Medicare and Medicaid Services (CMS), for a new purchase if a Medicare rate is available.
- A pricing cluster.
- On a by-report basis.

Establishing payment rates for purchased respiratory care equipment based on pricing clusters.

- A pricing cluster is based on specific HCPCS code.
- The Agency's pricing cluster is made up of all the brands/models for which the Agency obtains pricing information. However, the Agency may limit the number of brands/models included in the pricing cluster. The Agency considers all of the following when establishing the pricing cluster:
 - ✓ A client's medical needs
 - ✓ Product quality
 - ✓ Introduction, substitution or discontinuation of certain brands/models
 - ✓ Cost
- When establishing the fee for respiratory care equipment items in a pricing cluster, the maximum allowable fee is the median amount of available manufacturers' list prices for all brands/models as noted in the pricing cluster.

The Agency evaluates a by- report (BR) item, procedure, or service for its medical necessity, appropriateness and payment value on a case-by-case basis. The Agency calculates the payment rate for these items at 80% of the manufacturer's list price.

Monthly Rental Reimbursement Rates for Respiratory Care

[Refer to [WAC 182-552-1600\(4\)](#)]

The Agency's maximum allowable fee for monthly rental is established using one of the following:

- For items with a monthly rental rate on the current Medicare fee schedule, as established by the federal Centers for Medicare and Medicaid Services (CMS), the Agency equates its maximum allowable fee for monthly rental to the current Medicare monthly rental rate.

- For items that have a new purchase rate but no monthly rental rate on the current Medicare fee schedule, as established CMS, the Agency sets the maximum allowable fee for monthly rental at 1/10 of the new purchase price of the current Medicare rate.
- For items not included in the current Medicare fee schedule, as established by CMS, the Agency considers the maximum allowable monthly payment rate as By Report. The Agency calculates the monthly payment rate for these items at 1/10 of 80% of the manufacturer's list price.

Daily Rental Payment Rates for Respiratory Care

[Refer to [WAC 182-552-1600\(5\)](#)]

The Agency's maximum allowable fee for daily rental is established using one of the following:

- For items with a daily rental rate on the current Medicare fee schedule, as established by the federal Centers for Medicare and Medicaid Services (CMS), the Agency equates its maximum allowable fee for daily rental to the current Medicare daily rental rate.
- For items that have a new purchase rate but no daily rental rate on the current Medicare fee schedule, as established CMS, the Agency sets the maximum allowable fee for daily rental at 1/300 of the new purchase price of the current Medicare rate.
- For items not included in the current Medicare fee schedule, as established by CMS, the Agency considers the maximum allowable daily payment rate as By Report. The Agency calculates the daily payment rate for these items at 1/300 of 80% of the manufacturer's list price.

Reimbursement Rates for Repairs of Client-Owned Equipment

[Refer to [WAC 182-552-1600\(6\)](#)]

For reimbursement, the Agency requires providers to submit prior authorization for repairs of client-owned equipment.

The provider must use assigned HCPCS codes for parts in the repair. For parts without an assigned HCPCS code, the Agency evaluates those parts as By-Report items. The provider must submit a manufacturer pricing sheet or manufacturer invoice to the Agency for reimbursement.

- The reimbursement for by-report parts used in a repair is either:
 - ✓ Eighty percent of the manufacturer's list or suggested retail price as of October 31 of the base year.
 - ✓ The cost from the manufacturer's invoice.
- Reimbursement for actual labor charges are made according to the Agency's current fee schedule.

The provider must follow HCPCS coding guidelines and submit an authorization request with actual labor units identified and supported by documentation.

Note: Base labor charges or other administrative-like fees will *not* be reimbursed.

The Agency does *not* cover:

- Repairs (parts or labor) to equipment under warranty.

This includes equipment that was rented and subsequently considered client-owned by the Agency, but still under warranty.
- A "base" or minimum labor fee that is added to the charges for the actual labor in doing the repair.
- Equipment, when there is evidence of malicious damage, culpable neglect, or wrongful disposition.

The Agency does *not* reimburse *separately* for troubleshooting, telephone calls, delivery or mileage, or travel time. These services are included in the reimbursement for other equipment and/or services. (See [WAC 182-552-1400](#).)

Fee Schedule

You may view the Agency's online [Oxygen Program Fee Schedule](#)

Billing and Claim Forms

What Are the General Billing Requirements?

Providers must follow the Agency's [ProviderOne Billing and Resource Guide](#). These billing requirements include:

- What time limits exist for submitting and resubmitting claims and adjustments.
- When providers may bill a client.
- How to bill for services provided to primary care case management (PCCM) clients.
- How to bill for clients eligible for both Medicare and Medicaid.
- How to handle third-party liability claims.
- What standards to use for record keeping.

Billing with Authorization

- If billing electronically, refer to the EDI Companion Guide.
- If billing with an authorization number on a CMS-1500 Claim Form, providers must list the authorization number in field 23 of the claim form.
- With HIPAA implementation, multiple authorization (prior or expedited) numbers may be submitted on a claim when billing electronically. The authorization number must be placed in the correct data field of the claim. *Do not put authorization numbers in the comment field, as they cannot be processed.*

Billing for Clients Eligible for Both Medicare and Medicaid

For more information on billing Medicare/Medicaid crossover claims, see the Agency's [ProviderOne Billing and Resource Guide](#).

Note: When Medicare has paid as primary insurance and you are billing the Agency as the secondary payer, the Agency does not require PA for services.

Handling Third-Party Liability Coverage

If the client has third-party liability (TPL) coverage for a service requiring authorization by the Agency, and the TPL payer denies payment for that service, authorization must be obtained through the Agency. A denial from the TPL payer must be submitted with the request.

If the TPL payer is paying for the service, no authorization through the Agency is required.

(For more information, see [Authorization](#) in this guide. For more information on TPL coverage, refer to the Agency [ProviderOne Billing and Resource Guide](#).)

How Are the CMS-1500 Claim Forms Completed for Respiratory Care?

Note: Refer to the Agency's [ProviderOne Billing and Resource Guide](#) for general instructions on completing the CMS-1500 Claim Form.

The following CMS-1500 Claim Form instructions relate to Respiratory Care:

Field No.	Name	Entry														
23	Prior Authorization Number	When applicable. If the service or hardware being billed requires prior authorization, enter the assigned number.														
24B	Facility Type	<p>These are the only appropriate codes for this program:</p> <table border="0"> <thead> <tr> <th style="text-align: left;">Facility Type</th> <th style="text-align: left;">To Be Used For</th> </tr> </thead> <tbody> <tr> <td>12</td> <td>Home (client's residence)</td> </tr> <tr> <td>13</td> <td>Assisted living facility</td> </tr> <tr> <td>14</td> <td>Group home</td> </tr> <tr> <td>31</td> <td>Skilled nursing facility</td> </tr> <tr> <td>32</td> <td>Nursing facility</td> </tr> <tr> <td>99</td> <td>Other</td> </tr> </tbody> </table>	Facility Type	To Be Used For	12	Home (client's residence)	13	Assisted living facility	14	Group home	31	Skilled nursing facility	32	Nursing facility	99	Other
Facility Type	To Be Used For															
12	Home (client's residence)															
13	Assisted living facility															
14	Group home															
31	Skilled nursing facility															
32	Nursing facility															
99	Other															
24G	Days or Units	For multiple quantities of supplies, enter the number of items dispensed and all of the dates or dates spanned that the supplies were used. Unless the procedure code description specifically indicates pack, cans, bottles, or other quantity, the "each" is each single item.														

Billing Dates

When a provider bills for supplies that are limited to a specific number per day, the provider needs to bill a span of dates that matches the number of units billed. For example, if a supply has a limit of three per day, and the provider wants to bill for a 10-day supply, they would need to bill for a span of dates that covers 10 days and the units billed should be 30.

- When a provider bills for a monthly rental, the provider must bill 30 days at a time unless any of these situations occur:
 - ✓ It is a short-term rental (less than a month).
 - ✓ There is a break in service, or eligibility for the client.
 - ✓ It is the last month the provider supplies the equipment to the client, and the client did not have the equipment for 30 days.

Examples of correcting billing are:

- The first month and day the client gets service is February 1, and the provider will be continuing to bill for the rental. The provider should bill for February, 2/1/2011 – 3/2/2011 (non-leap year); and then for March, 3/3/2011 – 4/1/2011; for April, 4/2/2011 – 5/1/2011; and for May, 5/2/2011 – 5/31/2011.
 - The first month and day the client gets service is October 15 and the provider will be continuing to bill for the rental. The provider should bill for October, 10/15/2011 – 11/13/11; and then for November, 11/14/11 – 12/13/11.
- When a provider bills for supplies that have no limit or are limited to a specific number of units in a month, the provider should bill using just the date the supplies were provided.
