

Social Service .dat Batch Upload Format Specification Table

Column Name	Required Field for Upload	Data Type	Maximum Size	String Format	Development Notes
Provider ID	Y	string-9	9 digits	Numeric	9-digit Provider ID (This is ProviderOne ID + Location Code)
Client ID	Y	string – up to 20	20 characters	Alphanumeric	Client ID (This is the client's ProviderOne ID)
Authorization Number	Y	string – 10	10 digits	Numeric	Authorization Number
Service Date From	Y	string – 8	8 digits	Date (mmddyyyy)	Service Date From
Service Date To	Y	string – 8	8 digits	Date(mmddyyyy)	Service Date To
Service code	Y	string – 5	5 characters	Alphanumeric	Service code
Modifier 1	N	string – 2	2 characters	Alphanumeric	Modifier 1
Modifier 2	N	string – 2	2 characters	Alphanumeric	Modifier 2
Modifier 3	N	string – 2	2 characters	Alphanumeric	Modifier 3
Modifier 4	N	string – 2	2 characters	Alphanumeric	Modifier 4
Units	Y	string – up to 16	16 digits	Numeric	Units (use whole numbers/not decimals)
Patient Account Number	N	string – up to 13	13 characters	Alphanumeric	“Optional” Patient Account Number
SS Servicing Only ProviderOne ID	N	string-9	9 digits	Numeric	SS Servicing Only ProviderOne (SSSOP) ID
Service Start Time	N	string-6	6 digits	Numeric (hhmmss)	Service Start Time (24-hour format)
Service End Time	N	string-6	6 digits	Numeric (hhmmss)	Service End Time (24-hour format)
Service Start Time Geo-Data Latitude	N	string-9	6 or 7 digits with Sign and a decimal	Numeric	Service Start Time Geo-Data Latitude This will contain Sign. Example: “-12.99999” The system accepts either 4 or 5 digits after the decimal.
Service Start Time Geo-Data Longitude	N	string-10	7 or 8 digits with Sign and a decimal	Numeric	Service Start Time Geo-Data Longitude This will contain Sign. Example: “-122.99999” The system accepts either 4 or 5 digits after the decimal.
Service End Time Geo-Data Latitude	N	string-9	6 or 7 digits with Sign and a decimal	Numeric	Service End Time Geo-Data Latitude This will contain Sign. Example: “-12.99999” The system accepts either 4 or 5 digits after the decimal.
Service End Time Geo-Data Longitude	N	string-10	7 or 8 digits with Sign and a decimal	Numeric	Service End Time Geo-Data Longitude This will contain Sign. Example: “-122.99999” The system accepts either 4 or 5 digits after the decimal.
Client-Provider Proximity for Start Time	N	string – 1	1 character	Alphanumeric	Client-Provider Proximity for Start Time
Client-Provider Proximity for End Time	N	string – 1	1 character	Alphanumeric	Client-Provider Proximity for End Time
Client Verification for End Time	N	string – 1	1 character	Alphanumeric	Client Verification for End Time

Social Service .dat Batch Upload Format Specification Table

Column Name	Required Field (Y / N)	Data Type	Maximum Size	String Format	Development Notes
Claim Frequency Type	Y	string – 1	1 digit	Numeric	Values can be: 1 = Original Claim 7 = Adjustment 8 = Void
Parent TCN	N	string – 18	18 digits	Numeric	18-digit TCN (claim #)
Policy Number (1)	N	string – 15	15 characters	Alphanumeric	Policy Number. This is 13 Characters in ProviderOne.
Payer/Organization Name (1)	N	string – 50	50 characters	Alphanumeric	Payer / Organization Name. ALL CAPITAL LETTERS.
Amount (1)	N	string – 17	13 digits with Sign and two decimals	Floating Number	TPL Amount by the Payer/Org Example: 1000.00 -900.00 100.00
Adjustment Reason Code (1)	N	string – 3	3 characters	Alphanumeric	Adjustment Reason Code
Policy Number (2)	N	string – 15	15 characters	Alphanumeric	Policy Number. This is 13 Characters in ProviderOne.
Payer/Organization Name (2)	N	string – 50	50 characters	Alphanumeric	Payer / Organization Name. ALL CAPITAL LETTERS.
Amount (2)	N	string – 17	13 digits with Sign and two decimals	Floating Number	TPL Amount by the Payer/Org Example: 1000.00 -900.00 100.00
Adjustment Reason Code (2)	N	string – 3	3 characters	Alphanumeric	Adjustment Reason Code
Manual Claims Indicator	N	string – 6	6 characters	Alphanumeric	Valid values include: SPST01 SPET01 SPEV01 EVSF01 CLSD01

Manual Claims Indicator	Description
SPST01	Servicing provider unable/prevented from logging correct start time.
SPET01	Servicing provider unable/prevented from logging correct end time.
SPEV01	Servicing provider unable/prevented from using EVV system.
EVSF01	EVV system failure
CLSD01	Client unable/prevented from electronically verifying service delivery.
