

# Apple Health PDL Drug Class Motions

# Antihyperlipidemics

---

- ▶ Microsomal Triglyceride Transfer Protein (MTP)
- ▶ PCSK-9 Inhibitors

# Antihyperlipidemics

---

## ▶ Recommendation:

- ▶ All products listed on slide 2 are considered safe and efficacious for their medically accepted indications and are eligible for preferred status and grandfathering at the discretion of HCA.
- ▶ Products in this class may require prior authorization to determine medical necessity.
- ▶ All non-preferred products require a trial of at least two preferred products with the same indication before a non-preferred drug will be authorized unless contraindicated, not clinically appropriate, or only one product is preferred.

# Antihyperlipidemics

---

**Motion:** I move that all products in the drug classes listed on slide 2 are considered safe and efficacious for their medically accepted indications and are eligible for preferred status and grandfathering at the discretion of HCA. Products in this class may require prior authorization to determine medical necessity. All non-preferred products require a trial of at least two preferred products with the same indication before a non-preferred drug will be authorized unless contraindicated, not clinically appropriate, or only one product is preferred.

- ▶ **Motion: Schwilke**
- ▶ **2<sup>nd</sup>: Chawla**

# Antivirals : Influenza Agents

---

## ▶ Recommendation:

- ▶ All products in the Antivirals : Influenza Agents drug class are considered safe and efficacious for their medically accepted indications and are eligible for preferred status and grandfathering at the discretion of HCA.
- ▶ Products in this class may require prior authorization to determine medical necessity.
- ▶ All non-preferred products require a trial of at least two preferred products with the same indication before a non-preferred drug will be authorized unless contraindicated, not clinically appropriate, or only one product is preferred.

# Antivirals : Influenza Agents

---

- ▶ **Motion:** I move that all products in the Antivirals : Influenza Agents drug class are considered safe and efficacious for their medically accepted indications and are eligible for preferred status and grandfathering at the discretion of HCA. Products in this class may require prior authorization to determine medical necessity. All non-preferred products require a trial of at least two preferred products with the same indication before a non-preferred drug will be authorized unless contraindicated, not clinically appropriate, or only one product is preferred.
- ▶ **Motion: Park**
- ▶ **2<sup>nd</sup>: Buccola**

# Cardiovascular Agents : Sinus Node Inhibitors

---

## ▶ Recommendation:

- ▶ All products in the Cardiovascular Agents : Sinus Node Inhibitors drug class are considered safe and efficacious for their medically accepted indications and are eligible for preferred status and grandfathering at the discretion of HCA.
- ▶ Products in this class may require prior authorization to determine medical necessity.
- ▶ All non-preferred products require a trial of at least two preferred products with the same indication before a non-preferred drug will be authorized unless contraindicated, not clinically appropriate, or only one product is preferred.

# Cardiovascular Agents : Sinus Node Inhibitors

---

- ▶ **Motion:** I move that all products in the Cardiovascular Agents : Sinus Node Inhibitors drug class are considered safe and efficacious for their medically accepted indications and are eligible for preferred status and grandfathering at the discretion of HCA. Products in this class may require prior authorization to determine medical necessity. All non-preferred products require a trial of at least two preferred products with the same indication before a non-preferred drug will be authorized unless contraindicated, not clinically appropriate, or only one product is preferred.
- ▶ **Motion: Chawla**
- ▶ **2<sup>nd</sup>: Schwilke**

# Endocrine And Metabolic Agents : Pituitary Suppressants

---

## ▶ Recommendation:

- ▶ All products in the Endocrine And Metabolic Agents : Pituitary Suppressants drug class are considered safe and efficacious for their medically accepted indications and are eligible for preferred status and grandfathering at the discretion of HCA.
- ▶ Products in this class may require prior authorization to determine medical necessity.
- ▶ All non-preferred products require a trial of at least two preferred products with the same indication before a non-preferred drug will be authorized unless contraindicated, not clinically appropriate, or only one product is preferred.

# Endocrine And Metabolic Agents : Pituitary Suppressants

---

- ▶ **Motion:** I move that all products in the Endocrine And Metabolic Agents : Pituitary Suppressants drug class are considered safe and efficacious for their medically accepted indications and are eligible for preferred status and grandfathering at the discretion of HCA. Products in this class may require prior authorization to determine medical necessity. All non-preferred products require a trial of at least two preferred products with the same indication before a non-preferred drug will be authorized unless contraindicated, not clinically appropriate, or only one product is preferred.
- ▶ **Motion: Buccola**
- ▶ **2<sup>nd</sup>: Corsilles**

# Oncology Agents : LHRH Analogs – Injectable

---

## ▶ Recommendation:

- ▶ All products in the Oncology Agents : LHRH Analogs – Injectable drug class are considered safe and efficacious for their medically accepted indications and are eligible for preferred status and grandfathering at the discretion of HCA.
- ▶ Products in this class may require prior authorization to determine medical necessity.
- ▶ All non-preferred products require a trial of at least two preferred products with the same indication before a non-preferred drug will be authorized unless contraindicated, not clinically appropriate, or only one product is preferred.

# Oncology Agents : LHRH Analogs – Injectable

---

- ▶ **Motion:** I move that all products in the Oncology Agents : LHRH Analogs – Injectable drug class are considered safe and efficacious for their medically accepted indications and are eligible for preferred status and grandfathering at the discretion of HCA. Products in this class may require prior authorization to determine medical necessity. All non-preferred products require a trial of at least two preferred products with the same indication before a non-preferred drug will be authorized unless contraindicated, not clinically appropriate, or only one product is preferred.
- ▶ **Motion: Corsilles**
- ▶ **2<sup>nd</sup>: Park**

# Gastrointestinal Agents : Inflammatory Bowel Agents

---

## ▶ Recommendation:

- ▶ All products in the Gastrointestinal Agents : Inflammatory Bowel Agents drug class are considered safe and efficacious for their medically accepted indications and are eligible for preferred status and grandfathering at the discretion of HCA.
- ▶ Products in this class may require prior authorization to determine medical necessity.
- ▶ All non-preferred products require a trial of at least two preferred products with the same indication before a non-preferred drug will be authorized unless contraindicated, not clinically appropriate, or only one product is preferred.

# Gastrointestinal Agents : Inflammatory Bowel Agents

---

- ▶ **Motion:** I move that all products in the Gastrointestinal Agents : Inflammatory Bowel Agents drug class are considered safe and efficacious for their medically accepted indications and are eligible for preferred status and grandfathering at the discretion of HCA. Products in this class may require prior authorization to determine medical necessity. All non-preferred products require a trial of at least two preferred products with the same indication before a non-preferred drug will be authorized unless contraindicated, not clinically appropriate, or only one product is preferred.
- ▶ **Motion: Flatebo**
- ▶ **2<sup>nd</sup>: Schwilke**

# Gastrointestinal Agents : Irritable Bowel Syndrome (IBS) Agents / GI Motility

---

## ▶ Recommendation:

- ▶ All products in the Gastrointestinal Agents : Irritable Bowel Syndrome (IBS) Agents / GI Motility drug class are considered safe and efficacious for their medically accepted indications and are eligible for preferred status and grandfathering at the discretion of HCA.
- ▶ Products in this class may require prior authorization to determine medical necessity.
- ▶ All non-preferred products require a trial of at least two preferred products with the same indication before a non-preferred drug will be authorized unless contraindicated, not clinically appropriate, or only one product is preferred.

# Gastrointestinal Agents : Irritable Bowel Syndrome (IBS) Agents / GI Motility

---

- ▶ **Motion:** I move that all products in the Gastrointestinal Agents : Irritable Bowel Syndrome (IBS) Agents / GI Motility drug class are considered safe and efficacious for their medically accepted indications and are eligible for preferred status and grandfathering at the discretion of HCA. Products in this class may require prior authorization to determine medical necessity. All non-preferred products require a trial of at least two preferred products with the same indication before a non-preferred drug will be authorized unless contraindicated, not clinically appropriate, or only one product is preferred.
- ▶ **Motion: Chawla**
- ▶ **2<sup>nd</sup>: MacKay**

# Gastrointestinal Agents : Phosphate Binder Agents

---

## ▶ Recommendation:

- ▶ All products in the Gastrointestinal Agents : Phosphate Binder Agents drug class are considered safe and efficacious for their medically accepted indications and are eligible for preferred status and grandfathering at the discretion of HCA.
- ▶ Products in this class may require prior authorization to determine medical necessity.
- ▶ All non-preferred products require a trial of at least two preferred products with the same indication before a non-preferred drug will be authorized unless contraindicated, not clinically appropriate, or only one product is preferred.

# Gastrointestinal Agents : Phosphate Binder Agents

---

- ▶ **Motion:** I move that all products in the Gastrointestinal Agents : Phosphate Binder Agents drug class are considered safe and efficacious for their medically accepted indications and are eligible for preferred status and grandfathering at the discretion of HCA. Products in this class may require prior authorization to determine medical necessity. All non-preferred products require a trial of at least two preferred products with the same indication before a non-preferred drug will be authorized unless contraindicated, not clinically appropriate, or only one product is preferred.
- ▶ **Motion: MacKay**
- ▶ **2<sup>nd</sup>: Flatebo**

# Genitourinary Agents : Overactive Bladder Agents

---

## ▶ Recommendation:

- ▶ All products in the Genitourinary Agents : Overactive Bladder Agents drug class are considered safe and efficacious for their medically accepted indications and are eligible for preferred status and grandfathering at the discretion of HCA.
- ▶ Products in this class may require prior authorization to determine medical necessity.
- ▶ All non-preferred products require a trial of at least two preferred products with the same indication before a non-preferred drug will be authorized unless contraindicated, not clinically appropriate, or only one product is preferred.

# Genitourinary Agents : Overactive Bladder Agents

---

- ▶ **Motion:** I move that all products in the Genitourinary Agents : Overactive Bladder Agents drug class are considered safe and efficacious for their medically accepted indications and are eligible for preferred status and grandfathering at the discretion of HCA. Products in this class may require prior authorization to determine medical necessity. All non-preferred products require a trial of at least two preferred products with the same indication before a non-preferred drug will be authorized unless contraindicated, not clinically appropriate, or only one product is preferred.
- ▶ **Motion: Schwilke**
- ▶ **2<sup>nd</sup>: Marcotte**

# Hematological Agents : Hereditary Angioedema Agents

---

## ▶ Recommendation:

- ▶ All products in the Hematological Agents : Hereditary Angioedema Agents drug class are considered safe and efficacious for their medically accepted indications and are eligible for preferred status and grandfathering at the discretion of HCA.
- ▶ Products in this class may require prior authorization to determine medical necessity.
- ▶ All non-preferred products require a trial of at least two preferred products with the same indication before a non-preferred drug will be authorized unless contraindicated, not clinically appropriate, or only one product is preferred.

# Hematological Agents : Hereditary Angioedema Agents

---

- ▶ **Motion:** I move that all products in the Hematological Agents : Hereditary Angioedema Agents drug class are considered safe and efficacious for their medically accepted indications and are eligible for preferred status and grandfathering at the discretion of HCA. Products in this class may require prior authorization to determine medical necessity. All non-preferred products require a trial of at least two preferred products with the same indication before a non-preferred drug will be authorized unless contraindicated, not clinically appropriate, or only one product is preferred.
- ▶ **Motion: MacKay**
- ▶ **2<sup>nd</sup>: Corsilles**

# Miscellaneous Therapeutic Classes : Potassium Removing Agents

---

## ▶ Recommendation:

- ▶ All products in the Miscellaneous Therapeutic Classes : Potassium Removing Agents drug class are considered safe and efficacious for their medically accepted indications and are eligible for preferred status and grandfathering at the discretion of HCA.
- ▶ Products in this class may require prior authorization to determine medical necessity.
- ▶ All non-preferred products require a trial of at least two preferred products with the same indication before a non-preferred drug will be authorized unless contraindicated, not clinically appropriate, or only one product is preferred.

# Miscellaneous Therapeutic Classes : Potassium Removing Agents

---

- ▶ **Motion:** I move that all products in the Miscellaneous Therapeutic Classes : Potassium Removing Agents drug class are considered safe and efficacious for their medically accepted indications and are eligible for preferred status and grandfathering at the discretion of HCA. Products in this class may require prior authorization to determine medical necessity. All non-preferred products require a trial of at least two preferred products with the same indication before a non-preferred drug will be authorized unless contraindicated, not clinically appropriate, or only one product is preferred.
- ▶ **Motion: Marcotte**
- ▶ **2<sup>nd</sup>: Schwilke**

# Multiple Sclerosis Agents :

---

## ▶ Recommendation:

- ▶ All products in the Multiple Sclerosis Agents : class are considered safe and efficacious for their medically accepted indications and are eligible for preferred status and grandfathering at the discretion of HCA.
- ▶ Products in this class may require prior authorization to determine medical necessity.
- ▶ All non-preferred products require a trial of at least two preferred products with the same indication before a non-preferred drug will be authorized unless contraindicated, not clinically appropriate, or only one product is preferred.

# Multiple Sclerosis Agents :

---

- ▶ **Motion:** I move that all products in the Multiple Sclerosis Agents : drug class are considered safe and efficacious for their medically accepted indications and are eligible for preferred status and grandfathering at the discretion of HCA. Products in this class may require prior authorization to determine medical necessity. All non-preferred products require a trial of at least two preferred products with the same indication before a non-preferred drug will be authorized unless contraindicated, not clinically appropriate, or only one product is preferred.
- ▶ **Motion: Buccola**
- ▶ **2<sup>nd</sup>: Flatebo**

# Substance Use Disorder

---

- ▶ Agents For Opioid Withdrawal
- ▶ Opioid Antagonists
- ▶ Opioid Partial Agonists – Subcutaneous
- ▶ Opioid Partial Agonists – Transmucosal

# Substance Use Disorder

---

## ▶ Recommendation:

- ▶ All products listed on slide 27 are considered safe and efficacious for their medically accepted indications and are eligible for preferred status and grandfathering at the discretion of HCA.
- ▶ Products in this class may require prior authorization to determine medical necessity.
- ▶ All non-preferred products require a trial of at least two preferred products with the same indication before a non-preferred drug will be authorized unless contraindicated, not clinically appropriate, or only one product is preferred.

# Substance Use Disorder

---

**Motion:** I move that all products in the drug classes listed on slide 27 are considered safe and efficacious for their medically accepted indications and are eligible for preferred status and grandfathering at the discretion of HCA. Products in this class may require prior authorization to determine medical necessity. All non-preferred products require a trial of at least two preferred products with the same indication before a non-preferred drug will be authorized unless contraindicated, not clinically appropriate, or only one product is preferred.

▶ **Motion: Buccola**

▶ **2<sup>nd</sup>: Park**

# ADHD / Anti-Narcolepsy

---

- ▶ Dopamine And Norepinephrine Reuptake Inhibitors (DNRIS)
- ▶ Histamine H3-Receptor Antagonist / Inverse Agonist
- ▶ Non-Stimulants
- ▶ Stimulants - Long Acting
- ▶ Stimulants - Misc
- ▶ Stimulants - Short Acting

# ADHD / Anti-Narcolepsy

---

## ▶ Recommendation:

- ▶ All products listed on slide 30 are considered safe and efficacious for their medically accepted indications and are eligible for preferred status and grandfathering at the discretion of HCA.
- ▶ Products in this class may require prior authorization to determine medical necessity.
- ▶ All non-preferred products require a trial of at least two preferred products with the same indication before a non-preferred drug will be authorized unless contraindicated, not clinically appropriate, or only one product is preferred.

# ADHD / Anti-Narcolepsy

---

**Motion:** I move that all products in the drug classes listed on slide 30 are considered safe and efficacious for their medically accepted indications and are eligible for preferred status and grandfathering at the discretion of HCA. Products in this class may require prior authorization to determine medical necessity. All non-preferred products require a trial of at least two preferred products with the same indication before a non-preferred drug will be authorized unless contraindicated, not clinically appropriate, or only one product is preferred.

▶ **Motion: Flatebo**

▶ **2<sup>nd</sup>: Marcotte**

# Allergy : Allergenic Extracts / Biologicals - Oral

---

## ▶ Recommendation:

- ▶ All products in the Allergy : Allergenic Extracts / Biologicals – Oral drug class are considered safe and efficacious for their medically accepted indications and are eligible for preferred status and grandfathering at the discretion of HCA.
- ▶ Products in this class may require prior authorization to determine medical necessity.
- ▶ All non-preferred products require a trial of at least two preferred products with the same indication before a non-preferred drug will be authorized unless contraindicated, not clinically appropriate, or only one product is preferred.

# Allergy : Allergenic Extracts / Biologicals - Oral

---

- ▶ **Motion:** I move that all products in the Allergy : Allergenic Extracts / Biologicals – Oral drug class are considered safe and efficacious for their medically accepted indications and are eligible for preferred status and grandfathering at the discretion of HCA. Products in this class may require prior authorization to determine medical necessity. All non-preferred products require a trial of at least two preferred products with the same indication before a non-preferred drug will be authorized unless contraindicated, not clinically appropriate, or only one product is preferred.
- ▶ **Motion: Corsilles**
- ▶ **2<sup>nd</sup>: MacKay**

# Antipsychotics / Antimanic Agents

---

- ▶ Antipsychotics - 2nd Generation
- ▶ Antipsychotics - Combinations
- ▶ Parkinsons Psychotic Disorder

# Antipsychotics / Antimanic Agents

---

## ▶ Recommendation:

- ▶ All products listed on slide 35 are considered safe and efficacious for their medically accepted indications and are eligible for preferred status and grandfathering at the discretion of HCA.
- ▶ Products in this class may require prior authorization to determine medical necessity.
- ▶ All non-preferred products require a trial of at least two preferred products with the same indication before a non-preferred drug will be authorized unless contraindicated, not clinically appropriate, or only one product is preferred.

# Antipsychotics / Antimanic Agents

---

**Motion:** I move that all products in the drug classes listed on slide 35 are considered safe and efficacious for their medically accepted indications and are eligible for preferred status and grandfathering at the discretion of HCA. Products in this class may require prior authorization to determine medical necessity. All non-preferred products require a trial of at least two preferred products with the same indication before a non-preferred drug will be authorized unless contraindicated, not clinically appropriate, or only one product is preferred.

▶ **Motion: Schwilke**

▶ **2<sup>nd</sup>: Flatebo**

# Movement Disorder Agents

---

## ▶ Recommendation:

- ▶ All products in the Movement Disorder Agents drug class are considered safe and efficacious for their medically accepted indications and are eligible for preferred status and grandfathering at the discretion of HCA.
- ▶ Products in this class may require prior authorization to determine medical necessity.
- ▶ All non-preferred products require a trial of at least two preferred products with the same indication before a non-preferred drug will be authorized unless contraindicated, not clinically appropriate, or only one product is preferred.

# Movement Disorder Agents

---

- ▶ **Motion:** I move that all products in the Movement Disorder Agents drug class are considered safe and efficacious for their medically accepted indications and are eligible for preferred status and grandfathering at the discretion of HCA. Products in this class may require prior authorization to determine medical necessity. All non-preferred products require a trial of at least two preferred products with the same indication before a non-preferred drug will be authorized unless contraindicated, not clinically appropriate, or only one product is preferred.
- ▶ **Motion: Chawla**
- ▶ **2<sup>nd</sup>: Buccola**

# Glaucoma Agents

---

- ▶ Adrenergic Agents
- ▶ Adrenergic Agents Combinations
- ▶ Beta - Blockers
- ▶ Beta - Blockers Combinations
- ▶ Carbonic Anhydrase Inhibitors
- ▶ Kinase Inhibitors
- ▶ Miotics
- ▶ Prostaglandins

# Glaucoma Agents

---

## ▶ Recommendation:

- ▶ All products listed on slide 40 are considered safe and efficacious for their medically accepted indications and are eligible for preferred status and grandfathering at the discretion of HCA.
- ▶ Products in this class may require prior authorization to determine medical necessity.
- ▶ All non-preferred products require a trial of at least two preferred products with the same indication before a non-preferred drug will be authorized unless contraindicated, not clinically appropriate, or only one product is preferred.

# Glaucoma Agents

---

**Motion:** I move that all products in the drug classes listed on slide 40 are considered safe and efficacious for their medically accepted indications and are eligible for preferred status and grandfathering at the discretion of HCA. Products in this class may require prior authorization to determine medical necessity. All non-preferred products require a trial of at least two preferred products with the same indication before a non-preferred drug will be authorized unless contraindicated, not clinically appropriate, or only one product is preferred.

- ▶ **Motion: Park**
- ▶ **2<sup>nd</sup>: Corsilles**

# Ophthalmic Agents : Immunomodulators

---

## ▶ Recommendation:

- ▶ All products in the Ophthalmic Agents : Immunomodulators drug class are considered safe and efficacious for their medically accepted indications and are eligible for preferred status and grandfathering at the discretion of HCA.
- ▶ Products in this class may require prior authorization to determine medical necessity.
- ▶ All non-preferred products require a trial of at least two preferred products with the same indication before a non-preferred drug will be authorized unless contraindicated, not clinically appropriate, or only one product is preferred.

# Ophthalmic Agents : Immunomodulators

---

- ▶ **Motion:** I move that all products in the Ophthalmic Agents : Immunomodulators drug class are considered safe and efficacious for their medically accepted indications and are eligible for preferred status and grandfathering at the discretion of HCA. Products in this class may require prior authorization to determine medical necessity. All non-preferred products require a trial of at least two preferred products with the same indication before a non-preferred drug will be authorized unless contraindicated, not clinically appropriate, or only one product is preferred.
- ▶ **Motion: MacKay**
- ▶ **2<sup>nd</sup>: Schwilke**

# Respiratory Agents : Pulmonary Fibrosing Agents

---

## ▶ Recommendation:

- ▶ All products in the Respiratory Agents : Pulmonary Fibrosing Agents drug class are considered safe and efficacious for their medically accepted indications and are eligible for preferred status and grandfathering at the discretion of HCA.
- ▶ Products in this class may require prior authorization to determine medical necessity.
- ▶ All non-preferred products require a trial of at least two preferred products with the same indication before a non-preferred drug will be authorized unless contraindicated, not clinically appropriate, or only one product is preferred.

# Respiratory Agents : Pulmonary Fibrosing Agents

---

- ▶ **Motion:** I move that all products in the Respiratory Agents : Pulmonary Fibrosing Agents drug class are considered safe and efficacious for their medically accepted indications and are eligible for preferred status and grandfathering at the discretion of HCA. Products in this class may require prior authorization to determine medical necessity. All non-preferred products require a trial of at least two preferred products with the same indication before a non-preferred drug will be authorized unless contraindicated, not clinically appropriate, or only one product is preferred.
- ▶ **Motion: Flatebo**
- ▶ **2<sup>nd</sup>: MacKay**

# Smoking Deterrents : Misc - Other

---

## ▶ Recommendation:

- ▶ All products in the Smoking Deterrents : Misc – Other drug class are considered safe and efficacious for their medically accepted indications and are eligible for preferred status and grandfathering at the discretion of HCA.
- ▶ Products in this class may require prior authorization to determine medical necessity.
- ▶ All non-preferred products require a trial of at least two preferred products with the same indication before a non-preferred drug will be authorized unless contraindicated, not clinically appropriate, or only one product is preferred.

# Smoking Deterrents : Misc - Other

---

- ▶ **Motion:** I move that all products in the Smoking Deterrents : Misc – Other drug class are considered safe and efficacious for their medically accepted indications and are eligible for preferred status and grandfathering at the discretion of HCA. Products in this class may require prior authorization to determine medical necessity. All non-preferred products require a trial of at least two preferred products with the same indication before a non-preferred drug will be authorized unless contraindicated, not clinically appropriate, or only one product is preferred.
- ▶ **Motion: Marcotte**
- ▶ **2<sup>nd</sup>: Chawla**

# Oncology Agents

---

- ▶ Androgen Biosynthesis Inhibitors – Oral
- ▶ Antiandrogens – Oral
- ▶ Antineoplastics - Misc Combinations – Oral
- ▶ BRAF Kinase Inhibitors – Oral
- ▶ Cyclin Dependent Kinases (CDK) Inhibitors – Oral
- ▶ FGFR Kinase Inhibitors – Oral
- ▶ Hedgehog Pathway Inhibitors – Oral
- ▶ MEK Inhibitors – Oral

# Oncology Agents

---

- ▶ MTOR Kinase Inhibitors – Oral
- ▶ Multikinase Inhibitors – Oral
- ▶ Poly (ADP-Ribose) Polymerase (PARP) Inhibitors – Oral
- ▶ Retinoids – Oral
- ▶ Topoisomerase Inhibitors – Oral
- ▶ Tropomyosin Receptor Kinase Inhibitors – Oral
- ▶ Tyrosine Kinase Inhibitors – Oral

# Oncology Agents

---

## ▶ Recommendation:

- ▶ All products listed on slides 49 and 50 are considered safe and efficacious for their medically accepted indications and are eligible for preferred status and grandfathering at the discretion of HCA.
- ▶ Products in this class may require prior authorization to determine medical necessity.
- ▶ All non-preferred products require a trial of at least two preferred products with the same indication before a non-preferred drug will be authorized unless contraindicated, not clinically appropriate, or only one product is preferred.

# Oncology Agents

---

**Motion:** I move that all products in the drug classes listed on slides 49 and 50 are considered safe and efficacious for their medically accepted indications and are eligible for preferred status and grandfathering at the discretion of HCA. Products in this class may require prior authorization to determine medical necessity.
