The Medicare Pharmacy Landscape
Part D Plans are Insulated from Rising Drug Costs

• Pharmaceutical industry shifting to specialty drugs
  – Often unmet medical need
  – FDA allows fast-track or accelerated review and approval
  – Set prices at what the market will bear
• UMP (not a Part D plan) absorbs the full impact of rising drug costs as the only payer for UMP Classic Medicare pharmacy costs
• In contrast, Medicare Part D and MA-PD plans are better insulated from rising drug costs by supplementary sources of revenue
  – Part D Re-Insurance
  – Manufacturer Drug Discounts
  – Etc.
Standard Part D plans do not typically include full coverage in the “Coverage Gap Phase,” resulting in member out-of-pocket costs into the Catastrophic Coverage Phase ($10,048 in total Drug Spend).

The UHC Employer Group MA-PD plans were customized for PEBB Members to provide coverage in the “Coverage Gap phase,” resulting in no member out-of-pocket costs above the maximum out-of-pocket limit (MOOP) of $2,000 for both plans.

UMP pays for 100% of costs over and above a member’s out-of-pocket limit ($2,000).

Catastrophic Coverage and Part D

Spending for Catastrophic Coverage ("Reinsurance") Now Accounts for Close to Half (45%) of Total Medicare Part D Spending, up from 14% in 2006

UMP is not Insulated from Rising Drug Costs

- UMP absorbs the full impact of rising drug costs as the only payer for UMP Classic Medicare pharmacy costs.
- Newer efforts to contain costs, such as the Value Formulary, are decreasing the rate at which the Pharmacy trend increases, but the general trend will remain positive as drug costs continue to rise.
- UMP members realize the full value of the Medicare Explicit Subsidy ($183), any increase in plan cost is fully passed on into the Subscriber’s premium.
