Mid-year hires anticipated to work 630 hours in the next school year (SEBB 2018-32)

A school employee who is not anticipated to work 630 hours in the current school year because of when they are hired, but is anticipated to work at least 630 hours the next school year, establishes eligibility for the employer contribution toward SEBB benefits as of their first working day if they are:

- A 9- to 10-month school employee anticipated to be compensated for at least 17.5 hours a week in six of the last eight weeks counting backwards from the week that contains the last day of school; or
- A 12-month school employee anticipated to be compensated for at least 17.5 hours a week in six of the last eight weeks counting backwards from the week that contains August 31, the last day of the school year.

Eligibility presumed based on hours worked the previous two school years (SEBB 2018-36)

A school employee is presumed eligible if they:

- Worked at least 630 hours in each of the previous two school years; and
- Are returning to the same type of position (teacher, paraeducator, food service worker, custodian, etc.) or combination of positions with the same SEBB organization.

A SEBB organization rebuts this presumption by notifying the school employee, in writing, of the specific reasons why the employee is not anticipated to work at least 630 hours in the current school year and how to appeal the eligibility determination.
