

Washington State Opioid Treatment Network (OTN) and OTN Hub and Spoke Directory

Opioid Treatment Network (OTN) and OTN Hub and Spoke

What is an OTN and OTN Hub and Spoke?

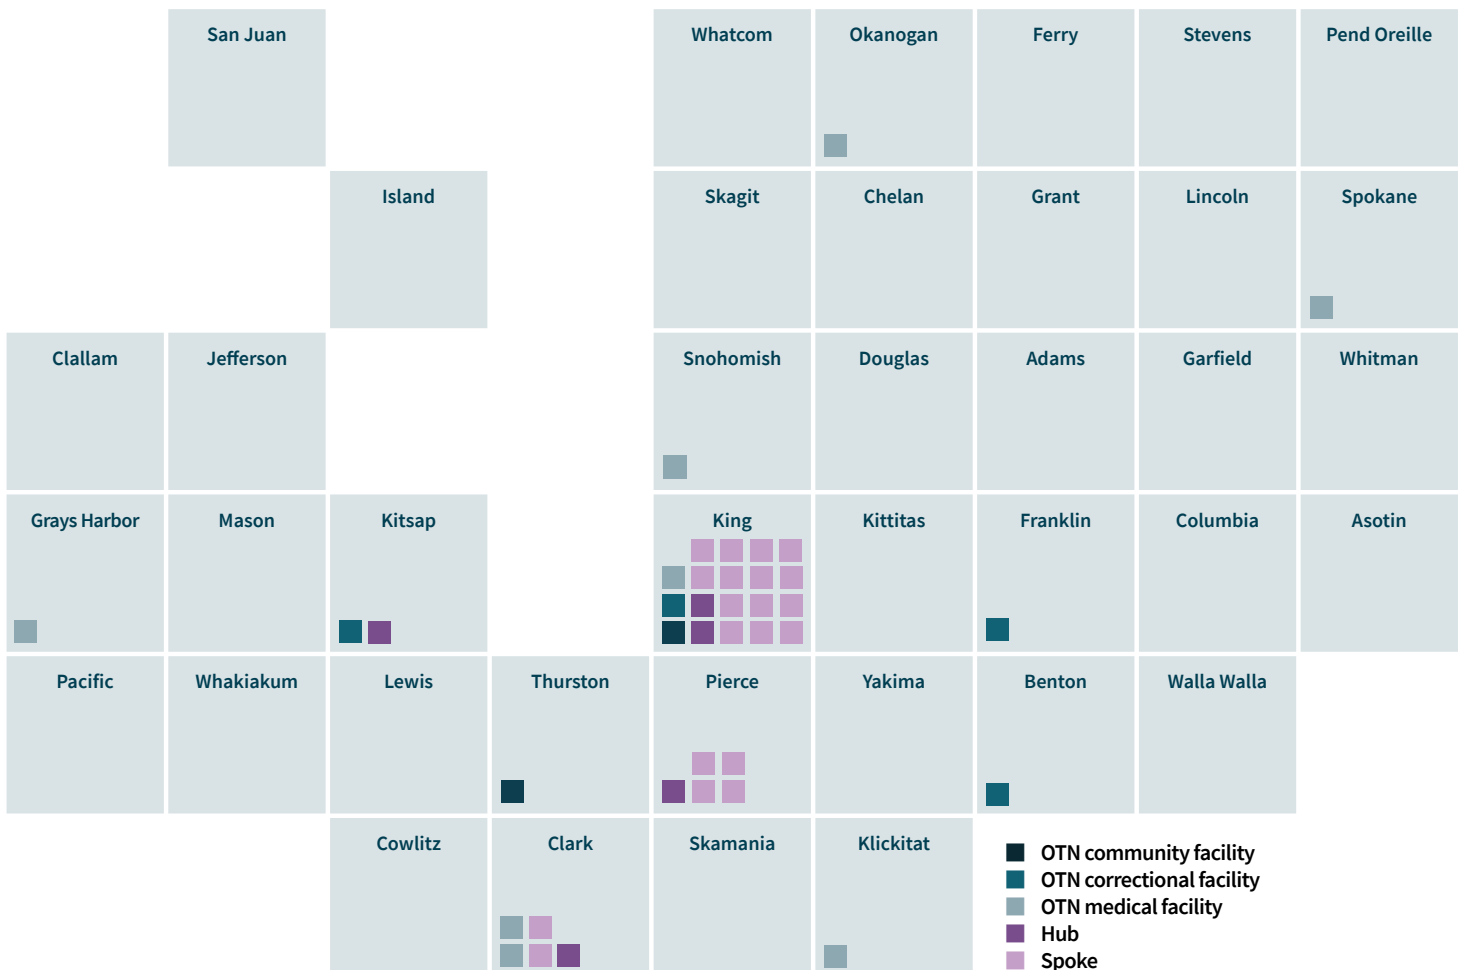

Health Care Authority's Division of Behavioral Health and Recovery (DBHR) was awarded the State Opioid Response (SOR) grant from SAMHSA to contract with community providers to create the SOR Opioid Treatment Networks (OTN) and SOR OTN Hub and Spoke models.

Hubs identify, collaborate, and subcontract with spoke sites to provide integrated care, regardless of how individuals enter the system.

Spokes are facilities that provide opioid use disorder treatment, behavioral health treatment, primary healthcare services, wraparound services, and referrals. This includes syringe service programs and programs that intersect with the criminal legal system, including jails.

Opioid Treatment Networks (OTNs) are second-generation Hub and Spoke treatment sites that serve individuals with opioid use disorder (OUD). OTNs are positioned to provide low barrier Medication for Opioid Use Disorder (MOUD) in non-traditional treatment settings. Each OTN is responsible for providing individuals with their initial induction onto MOUD, referrals to local MOUD treatment provider and community-based harm reduction.
