

## Follow-up after emergency department visit for mental illness

### Metric Information

**Metric description:** The percentage of emergency department (ED) visits for eligible Medicaid beneficiaries 6 years of age and older with a principal diagnosis of mental illness or intentional self-harm, who had a follow-up visit for mental illness. Two submetrics are reported:

1. The percentage of ED visits for which the Medicaid beneficiary received follow-up within 7 days of the ED visit (8 total days).
2. The percentage of ED visits for which the Medicaid beneficiary received follow-up within 30 days of the ED visit (31 total days).

**Metric specification version:** HEDIS® 2019 Technical Specifications for Health Plans, NCQA.

**Data collection method:** Administrative only.

**Data source:** ProviderOne Medicaid claims/encounter and enrollment data.

**Claim status:** Include only final paid claims or accepted encounters in metric calculation.

**Identification window:** Measurement year.

**Direction of quality improvement:** Higher is better.

**URL of specifications:** [www.ncqa.org/hedis/measures](http://www.ncqa.org/hedis/measures)

### DSRIP Program Summary

**Metric utility:** ACH Project P4P  ACH High Performance  DSRIP statewide accountability

**ACH Project P4P – Metric results used for achievement value:** Submetrics reported for: follow-up within 7 days of the ED visit and follow-up within 30 days of the ED visit. Each submetric contributes equal weight in the final AV calculation for the overall metric.

**ACH Project P4P – improvement target methodology:** improvement over self (1.9% improvement over reference baseline performance).

**ACH regional attribution:** Residence in the ACH region for 11 out of 12 months in the measurement year.

### DSRIP Metric Details

Eligible Population	
Age	6 years and older at the time of the emergency department visit.
Gender	N/A

## Follow-up after emergency department visit for mental illness

Minimum Medicaid enrollment	Date of the emergency department visit through 30 days after the ED visit (31 total days). Enrollment must be continuous.
Allowable gap in Medicaid enrollment	No gaps in enrollment allowed.
Medicaid enrollment anchor date	Date of emergency department visit.
Medicaid benefit and eligibility	Includes Medicaid beneficiaries with comprehensive medical benefits. Excludes beneficiaries that are eligible for both Medicare and Medicaid and beneficiaries with primary insurance other than Medicaid.

### Denominator (for both submetrics):

The denominator for this metric is based on ED visits, not on Medicaid beneficiaries. If an eligible Medicaid beneficiary has more than one ED visit, all eligible ED visits between January 1 and December 1 of the measurement year are identified and more than one visit per 31-day period are not included.

If a Medicaid beneficiary has more than one ED visit in a 31-day period, only the first eligible ED visit is included. For example, if a Medicaid beneficiary has an ED visit on January 1, then the January 1 visit is included and ED visits that occur on or between January 2 and January 31 are not included. Then, if applicable, the next ED visit that occurs on or after February 1 is included. Visits are identified chronologically including only one per 31-day period.

*Data elements required for denominator:* An ED visit (ED Value Set) with a principal diagnosis of mental illness (Mental Illness Value Set) or intentional self-harm (Intentional Self-Harm Value Set) on or between January 1 and December 1 of the measurement year where the Medicaid beneficiary was 6 years or older on the date of the visit. See below for required exclusions.

### *Value sets required for denominator.*

Name	Value Set
ED Value Set	See HEDIS®
Mental Illness Value Set	See HEDIS®
Intentional Self-Harm Value Set	See HEDIS®
Inpatient Stay Value Set	See HEDIS®

### *Required exclusions for denominator.*

- Eligible population exclusions are listed in the eligible population table above.
- Metric specific exclusions:
  - o Beneficiaries in hospice care.
  - o ED visits followed by an admission to an acute or non-acute inpatient care setting (Inpatient Stay Value Set) on the date of the ED visit or within the 30 days after the ED

## Follow-up after emergency department visit for mental illness

visit, regardless of principal diagnosis for the admission. See HEDIS® for specific instructions.

An ED visit billed on the same claim as an inpatient stay is considered a visit that resulted in an inpatient stay. These events are excluded from the metric because admission to an acute or non-acute inpatient setting may prevent an outpatient follow-up visit from taking place.

*Deviations from cited specifications for denominator.*

- None.

### **Numerator (different for the two submetrics reported):**

Beneficiaries must qualify for inclusion in the denominator to be eligible for inclusion in the numerator.

*Data elements required for 7-day follow-up numerator:* A follow-up visit with any practitioner, with a principal diagnosis of a mental health disorder or with a principle diagnosis of intentional self-harm and any diagnosis of a mental health disorder within 7 days after the ED visit (8 total days). Include visits that occur on the date of the ED visit. See HEDIS® for specific instructions on identifying follow-up visits and mental illness diagnosis.

*Data elements required for 30-day follow-up numerator:* A follow-up visit with any practitioner, with a principal diagnosis of a mental health disorder or with a principle diagnosis of intentional self-harm and any diagnosis of a mental health disorder within 30 days after the ED visit (31 total days). Include visits that occur on the date of the ED visit. See HEDIS® for specific instructions on identifying follow-up visits and mental illness diagnosis.

*Value sets required for numerator:*

Name	Value Set
Visit Setting Unspecified Value Set	See HEDIS®
Outpatient POS Value Set	See HEDIS®
Mental Health Diagnosis Value Set	See HEDIS®
Telehealth Modifier Value Set	See HEDIS®
BH Outpatient Value Set	See HEDIS®
Partial Hospitalization POS Value Set	See HEDIS®
Partial Hospitalization/Intensive Outpatient Value Set	See HEDIS®
Community Mental Health Center POS Value Set	See HEDIS®
Electroconvulsive Therapy Value Set	See HEDIS®
Ambulatory Surgical Center POS Value Set	See HEDIS®

Outpatient POS Value Set	See HEDIS®
Telehealth POS Value Set	See HEDIS®
Observation Value Set	See HEDIS®
Intentional Self-Harm Value Set	See HEDIS®

*Required exclusions for numerator.*

- None

*Deviations from cited specifications for numerator.*

- None

### Version Control

**July 2018 release:** The specification was updated to HEDIS® 2018 specifications.

**January 2019 update:** Minor formatting updates were made to the metric specification sheet. This includes updating the URL of the source specification and changing HEDIS™ to HEDIS®. No substantive changes were made to the specification.

**August 2019 update:** The specification sheet has been updated to reflect the current version of the HEDIS® technical specification (from HEDIS® 2018 to HEDIS® 2019). Substantial changes have been made to this metric including expansion of the eligible population to include intentional self-harm and to include telehealth. See HEDIS® for specific instructions.
