

Lower your risk for diabetes

One in three adults has prediabetes, yet 81 percent don't know it.¹

Prediabetes is a serious condition in which blood sugar levels are higher than normal, increasing the risk of developing type 2 diabetes, heart disease, and stroke.

With the diabetes prevention program powered by Omada®, you get one-on-one support to help you take control and reduce the risk of type 2 diabetes.

Risks for prediabetes

- ✓ **Being 45 years old or older.**
Risk increases as you age, but healthy habits can help.
- ✓ **Family history of type 2 diabetes.**
Knowing this can help you take preventive steps.
- Less physical activity.**
- ✓ Regular movement three times a week can go a long way toward lowering your risk.

The SEBB program offers a diabetes prevention program powered by Omada.

You get:

- A dedicated care team with a health coach.
- A personalized care plan tailored to your lifestyle.
- Smart devices and app to help monitor your progress 24/7.
