

Washington State Opioid Response

Hub and Spokes Treatment Networks

MONTHLY SUMMARY REPORT

May 2019 - September 2020

October 21, 2020

About this Report

This report is intended for program monitoring of the State Opioid Response (SOR) Hub and Spoke (HS) Networks. The HS's are funded under the SOR grant through contracts with the Health Care Authority's Division of Behavioral Health and Recovery. This program was previously funded through the State Targeted Reponse grant from July 2017 to April 2019. Each HS is obligated to enroll 25 patients per month with medication treatment for opioid use disorder (MOUD). This report describes the demographics of all persons enrolled in the HS program and total enrollment by HS. Note that this report summarizes SOR-funded treatment and does not represent all MOUD efforts supported by Washington State.

UNDERSTANDING THE REPORT

Q What is a Hub and Spoke Network?

Hub and Spoke (HS) Networks were developed to increase medication treatment for opioid use disorder (MOUD) capacity in the State. The networks consist of a leading agency or hub, that can be a primary care clinic, opioid treatment program, or behavioral health agency, and several partnering agencies, or spokes, that either provider MOUD or referrals to the HS agencies for MOUD. The HS Networks collaborate to ensure partnering agencies have resources they need to provide the best care for individuals seeking MOUD. HS networks can offer all FDA-approved MOUD (Buprenorphine, Methadone, and Naltrexone).

DEFINITIONS

- Events**
 Total number of MOUD events (episodes) by the HS. Single episodes are marked by receipt of MOUD (buprenorphine, methadone, or naltrexone). Individuals who discharge and return will have more than one event.
- Clients**
 Total number of unique clients/patients with an MOUD episode at the HS. Each client is only counted once.
- Discharges**
 Discharges are recorded when a client is no longer receiving MOUD from the HS.
- Monthly Target**
 HS's have a monthly contracted event target. The grey line (Figure 1) shows the HS monthly target (25), and the blue bar displays the number of events in that reporting month (34).
- Enrollments Over Time**
 Based on the monthly target, this graph (Figure 2) shows the cumulative events in relation to the target. The grey line is the cumulative target (75) and the blue line is cumulative HS events (116).
- Reported Discharges**
 The percent of clients with a reported discharged from the program. Discharges indicate an individual is no longer receiving MOUD through the SOR grant. This is not a retention in treatment measure and relies on clinical reporting.
- Medication at Induction**
 For all events, the type of MOUD initially prescribed.
