Washington State Opioid Response

Opioid Treatment Network

MONTHLY SUMMARY REPORT
January 2019 - June 2019

July 22, 2019

About this Report

This report is intended for program monitoring of the State Opioid Response (SOR) Opioid Treatment Networks (OTNs). The OTNs are funded under the SOR grant through contracts with the Health Care Authority's Division of Behavioral Health and Recovery. Each OTN is obligated to enroll a targeted number of patients per month with medication treatment for opioid use disorder. This report describes the demographics of all persons enrolled in the OTN program and total enrollment by OTN. Note that this report summarizes SOR-funded treatment and does not represent all efforts to treat opioid use disorder with medications supported by Washington State.

Washington State Opioid Response

Opioid Treatment Network Monthly Summary Report

UNDERSTANDING THE REPORT

CONTENTS

Q What is an Opioid Treatment Network?

Opioid Treatment Networks (OTN) were developed to increase the identification of opioid use disorder (OUD) in emergency departments, jails, and community agencies (syringe service programs, shelters, or fire departments). OTNs initiate medication treatment for OUD (MOUD) with identified individuals and make referrals to community providers for ongoing care. OTNs can offer all FDA-approved MOUDs (Buprenorphine, Methadone, and Naltrexone).

DEFINITIONS

- **Events**
  Total number of MOUD events (episodes) initiated by the OTN. Single episodes are marked by receipt of MOUD (buprenorphine, methadone, or naltrexone). Individuals who discharge and return will have more than one event.

- **Clients**
  Total number of unique clients/patients with an MOUD episode by the OTN. Each client is only counted once.

- **Discharges**
  Discharges are recorded when a client is no longer receiving MOUD from the OTN.

- **Monthly Target**
  OTNs have a monthly contracted event target. The grey line (Figure 1) shows the OTN monthly target (10), and the blue bar displays the number of events in that reporting month (12).

- **Enrollments Over Time**
  Based on the monthly target, this graph (Figure 2) shows the cumulative events in relation to the target. The grey line is the cumulative target (18) and the blue line is cumulative OTN events (32).

- **Percentage Still Enrolled**
  Out of all clients served, this is the percent of individuals that are currently receiving MOUD. This is not a retention in treatment measure.

- **Medication at Induction**
 For all events, the type of MOUD initially prescribed.
