## Wraparound with Intensive Services

### ANNUAL UPDATE

- Intensive Care Coordination
- Intensive Mental Health Services Provided in Home and Community Settings
- Mobile Crisis Intervention and Stabilization Services

### FEBRUARY 2019

Prepared by Washington State Department of Social and Health Services  
Research and Data Analysis Division  
Olympia, Washington

### CONTACTS

Bridget Pavelle, PhD, Senior Research Manager, DSHS/RDA, 360.902.0741, [bridget.pavelle@dshs.wa.gov](mailto:bridget.pavelle@dshs.wa.gov)  
Barb Lucenko, PhD, Chief, RDA Program Research and Evaluation Section, 360.902.0890, [barbara.lucenko@dshs.wa.gov](mailto:barbara.lucenko@dshs.wa.gov)  
David Mancuso, PhD, Director, DSHS Research and Data Analysis Division (RDA), 360.902.7557, [david.mancuso@dshs.wa.gov](mailto:david.mancuso@dshs.wa.gov)

WISE Implementation Progress

# WISe At-A-Glance

**Number of Youth Served in WISe, by SFY**

**Number of WISe Screens, by SFY**

**Total Average Monthly Service Encounters, SFY 2018**

**Service Encounters by Location, SFY 2018**

**WISe PARTICIPANTS**

**BHO OUTPATIENT**

NOTES: Youth counts unduplicated within SFY. Screen counts duplicated.

**WISe Service Providers as of February 2019**

(Services provided in community settings regardless of office location)

**Service Encounters by Type of Service, SFY 2018**

**WISe PARTICIPANTS**

**BHO OUTPATIENT**

NOTES: WISe participants with BHO services N=3,681. BHO outpatient total N=58,856 (clients age 0-20 with any BHO outpatient mental health services). WISe participants with BHO services are a subset of BHO outpatient. The above numbers present the average number of encounters per service month.

# WISe Screened, Served, and Proxy Populations

July 2014 to June 2018 (cumulative since WISe program began)

<b>TOTAL POPULATION with linked data available</b>	<b>8,837</b>		<b>1,182</b>		<b>571</b>		<b>7,084</b>		<b>6,482</b>		<b>25,090</b>	<b>100%</b>
<b>TOTAL POPULATION</b>	<b>8,876</b>		<b>1,188</b>		<b>577</b>		<b>7,111</b>		<b>6,506</b>		<b>25,090</b>	

DATA SOURCE: List of youth screened and referral outcomes from BHAS data, list of youth receiving WISe and in WISe proxy from administrative data (based on service encounters). Characteristics of all three populations from administrative data. Number of youth receiving WISe services may be underestimated due to data completeness issues.

NOTES: Table presents characteristics of youth screened for WISe and receiving WISe Services in time period identified as well as those in the WISe Proxy in SFY 2015. For youth screened more than once for WISe services, type of services screened into reflects the following hierarchy: (1) WISe; (2) CLIP/BRS; (3) Outpatient/Other. For youth screened for WISe, index month is month of screen (or, in the case of multiple screens, first screen in the date range resulting in that type of WISe services). For youth receiving WISe services, index month is the first month in the date range in which youth received services (even if services began in a prior fiscal year). For youth in WISe proxy, index month is first month of Medicaid eligibility in SFY 2015. Region information is displayed using December 2018 Behavioral Health Organization (BHO) and Integrated Managed Care (IMC) boundaries. Region assignment is based on location of residence in index month for proxy, and region of screening or service for screened and served populations. Due to data lag, a small number of youth screened and/or served could not yet be linked with administrative data. <sup>1</sup>In order to protect the privacy of individuals, cells in this data product that contain small numbers from 1 to 10 are not displayed. <sup>2</sup>Some additional cells with n>10 have been suppressed to ensure that cells with small numbers cannot be recalculated.

DATA SOURCE: Administrative data (BHSS).

NOTES: WISe services include all WISe mental health outpatient service encounters recorded in BHSS data system, including DBHR-paid managed care mental health outpatient services received in a month with at least one "U8" mental health service. Region information is displayed using December 2018 Behavioral Health Organization (BHO) and IMC boundaries. Youth served in more than one region during the report date range have been allocated to the region in which they received the greatest number of WISe "U8" service encounters in the date range. Service months and service encounters for youth served in more than one region during a month have been allocated to the region in which they received the greatest number of WISe "U8" service encounters during the month. The service location summary excludes encounters from Greater Columbia prior to 4/1/2016, as the data is unavailable for that time period. Both the service location and service modality summary exclude data from North Central after 12/31/2017 and Southwest after 3/31/2016, as they are unavailable in the BHSS data system. Because a small number of clients participating in the Address Confidentiality Program are included in statewide totals but not in regional breakdowns, numbers do not sum to statewide totals. Median length of stay shown for episodes of WISe services starting in time period specified.

DATA SOURCE: ADMINISTRATIVE DATA (DBSS).

NOTES: WISe services include all WISe mental health outpatient service encounters recorded in BHSS data system, including DBHR-paid managed care mental health outpatient services received in a month with at least one "U8" mental health service. Region information is displayed using December 2018 Behavioral Health Organization (BHO) and IMC boundaries. Youth served in more than one region during the report date range have been allocated to the region in which they received the greatest number of WISe "U8" service encounters in the date range. Service months and service encounters for youth served in more than one region during a month have been allocated to the region in which they received the greatest number of WISe "U8" service encounters during the month. The service location summary excludes encounters from Greater Columbia prior to 4/1/2016, as the data is unavailable for that time period. Both the service location and service modality summary exclude data from North Central after 12/31/2017 and Southwest after 3/31/2016, as it is unavailable in the BHSS data system. Because a small number of clients participating in the Address Confidentiality Program are included in statewide totals but not in regional breakdowns, numbers do not sum to statewide totals. Median lifetable length of stay shown for episodes of WISe services starting in time period specified. Some medians not available due to a large proportion of censored episodes (episodes for which full length of stay is not yet known).

DATA SOURCE: Behavioral Health Assessment System (BHAS).

NOTES: These statistics reflect change over time in actionable treatment needs and youth strengths as identified on the CANS Full Assessment, conducted at intake and at 6-month follow up, for youth participating in the WISe program. The sample includes youth who completed a CANS initial assessment between 07/1/2014 and 6/30/2018 and whose 6-month reassessment was available in BHAS as of 12/31/2018. Youth served in different regions at the intake and 6-month time point have been allocated to the region in which their 6-month CANS was completed. The table displays the proportion of children with clinically significant treatment needs at each time point, i.e. the clinician rated the item as a 2 ("need for action") or 3 ("need for immediate or intensive action") instead of a 0 ("no current need") or 1 ("watchful waiting/prevention"). The top five treatment needs within each domain, by proportion at intake/initial assessment, are shown. The top five ranking reflects the statewide ranking and may not reflect item rank order for each region. A decline at the time of the 6-month reassessment represents improvement for these measures, i.e., a decrease in the proportion of children and youth with clinically significant treatment needs in these areas. TA (Transition to Adulthood) items are only administered to youth age 15+. The top five strengths, by growth over time, are shown. An increase at the time of the 6-month reassessment represents improvement for these measures, i.e., an increase in the proportion of children and youth with identified strengths that can be used in treatment planning to facilitate recovery. Strengths are identified when the clinician rated a strengths item as a 0 ("significant strength") or 1 ("some strength") instead of a 2 ("potential strength") or 3 ("no strength identified at this time"). <sup>1</sup>In order to protect the privacy of individuals, cells in this data product that contain small numbers from 1 to 10 are not displayed. <sup>2</sup>Some additional cells with n>10 have been suppressed to ensure that cells with small numbers cannot be recalculated.

DATA SOURCE: Behavioral Health Assessment System (BHAS).

NOTES: These statistics reflect change over time in actionable treatment needs and youth strengths as identified on the CANS Full Assessment, conducted at intake and at 6-month follow up, for youth participating in the WISe program. The sample includes youth who completed a CANS initial assessment between 07/01/2017 and 6/30/2018 and whose 6-month reassessment was available in BHAS as of 12/31/2018. Youth served in different regions at the intake and 6-month time point have been allocated to the region in which their 6-month CANS was completed. The table displays the proportion of children with clinically significant treatment needs at each time point, i.e. the clinician rated the item as a 2 ("need for action") or 3 ("need for immediate or intensive action") instead of a 0 ("no current need") or 1 ("watchful waiting/prevention"). The top five treatment needs within each domain, by proportion at intake/initial assessment, are shown. The top five ranking reflects the statewide ranking and may not reflect item rank order for each region. A decline at the time of the 6-month reassessment represents improvement for these measures, i.e., a decrease in the proportion of children and youth with clinically significant treatment needs in these areas. TA (Transition to Adulthood) items are only administered to youth age 15+. The top five strengths, by growth over time, are shown. An increase at the time of the 6-month reassessment represents improvement for these measures, i.e., an increase in the proportion of children and youth with identified strengths that can be used in treatment planning to facilitate recovery. Strengths are identified when the clinician rated a strengths item as a 0 ("significant strength") or 1 ("some strength") instead of a 2 ("potential strength") or 3 ("no strength identified at this time"). <sup>1</sup>In order to protect the privacy of individuals, cells in this data product that contain small numbers from 1 to 10 are not displayed. <sup>2</sup>Some additional cells with n>10 have been suppressed to ensure that cells with small numbers cannot be recalculated.

# WISe Implementation Progress

## Statewide Monthly WISe Client Counts

Most Recent 12 Months of Data

SOURCE: BHO/MCO/agency data systems, as reported to HCA by these entities on a monthly basis.

## WISe Service Package Intensity, Average Outpatient Mental Health Service Encounters Per WISe Service Month
