

|   | A   | B                       | C            | D               | E  | F                         | G                         | H  | I          | J              | K             | L        | M   |
|---|---|-------------------------|--------------|-----------------|--|---------------------------|---------------------------|--|------------|----------------|---------------|----------|---|
| 1 | Measure Name  | Category                | NQF-Endorsed | Measure Steward | Description  | Data Required for Measure | Data Source in Washington | Recommended Unit(s) of Analysis for Public Reporting |            |                |               |          | Notes   |
| 2 |   |                         |              |                 |  |                           |                           | State  | County/ACH | Health Plan    | Medical Group | Hospital |   |
| 3 | <b>Mental Health Service Penetration (Broad Version)</b>                      | Access to Care          | NO           | DSHS            | Percentage of Medicaid members with an identified mental health need who received mental health services in the reporting period through DSHS-, HCA- or Medicare-funded health care delivery systems.  | Claims and Encounters     | Health Plans*             |  |            | X              |               |          | <p>DSHS originally developed this measure for the Medicaid population.</p> <p>*Recommend measuring for Medicaid-insured and commercially-insured population in WA state.</p> <p>Mixed support from commercial health plans – responses not received from everyone.</p> <p>DSHS willing to modify the measure criteria to define mental health service need by primary, secondary or tertiary MI diagnosis.</p> <p>DSHS will translate for ICD-10 coding for implementation in 2016.</p> |
| 4 | <b>Substance Use Disorder Treatment Penetration</b>                           | Access to Care          | NO           | DSHS            | Percentage of Medicaid members with an identified substance use disorder treatment need who received substance use disorder treatment services in the reporting period through DSHS-, HCA-, or Medicare-funded health care delivery systems. | Claims and Encounters     | Health Plans              | Medicaid only?                                       |            | Medicaid only? |               |          | <p><b>MEASURE SPECS NOT YET AVAILABLE TO EVALUATE</b></p> <p>DSHS is developing this measure and it is still being vetted through the 5732/1519 workgroup process. Measure specifications to be available in October per Dave Mancuso. Not clear this will be doable on the commercial side given small N?</p>  |
| 5 | <b>Youth Suicide Attempts</b>   | Prevention              | NO           | DOH             | Percentage of youth who report having attempted suicide in the past year.  | Patient-Reported Survey   | DOH                       | X  | ?          |                |               |          | <p>Healthy Youth Survey, deployed every two years (even years). Data available at state level and possibly ACH level (small N). Workgroup very interested in having at least one measure pertaining to youth.</p>   |
| 6 | <b>Alcohol Screening and Follow-up for People with Serious Mental Illness</b> | Screening/ Intervention | YES 2599     | NCQA            | Percentage of patients 18 years and older with a serious mental illness, who were screened for unhealthy alcohol use and received brief counseling or other follow-up care if identified as an unhealthy alcohol user                        | Claims and Clinical       | Medicaid Only             | X  | ?          |                |               |          | <p><b>DOUBTFUL THAT WE WILL HAVE ACCESS TO DATA TO MEASURE FOR COMMERCIALY INSURED POPULATION.</b></p> <p>Requires access to clinical data to determine screening and counseling. Small N for public reporting.</p> <p>Serious mental illness defined as schizophrenia, bipolar I disorder, major depression.</p>   |

Current "MAYBE" List for Further Refinement, Behavioral Health Measures 09 30 2015

|    | A   | B                  | C                | D                  | E  | F                            | G                            | H  | I              | J           | K                | L        | M   |
|----|---|--------------------|------------------|--------------------|--|------------------------------|------------------------------|--|----------------|-------------|------------------|----------|---|
| 1  | Measure Name  | Category           | NQF-<br>Endorsed | Measure<br>Steward | Description  | Data Required<br>for Measure | Data Source in<br>Washington | Recommended Unit(s) of Analysis for Public Reporting |                |             |                  |          | Notes   |
| 2  |   |                    |                  |                    |  |                              |                              | State  | County/<br>ACH | Health Plan | Medical<br>Group | Hospital |   |
| 7  | <b>Diabetes Screening for People With Schizophrenia or Bipolar Disorder Who Are Using Antipsychotic Medications (SSD)</b> | Chronic Disease    | YES<br>1932      | NCQA               | The percentage of patients 18 – 64 years of age with schizophrenia or bipolar disorder, who were dispensed an antipsychotic medication and had a diabetes screening test during the measurement year.  | Claims (inc Pharmacy)        | Health Plans                 | X  | ?              | ?           |                  |          | Possible to do with available data. Concerns regarding condition specific measure and very small N for public reporting.  |
| 8  | <b>Follow-up after Discharge from the Emergency Department for Mental Health or Alcohol or Other Drug Dependence</b>      | Continuity of Care | YES<br>2605      | NCQA               | Percentage of discharges for patients 18 years of age and older who had a visit to the emergency department with a primary diagnosis of mental health or alcohol or other drug dependence during the measurement year AND who had a follow-up visit with any provider with a corresponding primary diagnosis of mental health or alcohol or other drug dependence within 7 and 30 days of discharge (two rates). | Claims                       | Health Plans*                | X  |                | X           |                  |          | *Recommend measuring for Medicaid-insured and commercially-insured population in WA state.<br><br>Workgroup expressed preference to alter measure to also include age group of 13-17. This would impact availability of national benchmarks and would modify a HEDIS measure which is not recommended.<br><br>Measure not currently in HEDIS measure set required for plan accreditation, so likely not in use by health plans. |
| 9  | <b>Initiation and Engagement of Alcohol and Other Drug Dependence Treatment</b>   | Continuity of Care | YES<br>0004      | NCQA               | Percentage of adolescents and adult patients with a new episode of alcohol or other drug dependence who received the following: (1) Initiation of Treatment - inpatient admission, outpatient visit, intensive outpatient encounter or partial hospitalization within 14 days of diagnosis; (2) Engagement of Treatment - two or more additional services within 30 days of the initiation visit.                | Claims                       | Health Plans*                | X  |                | X           |                  |          | *Recommend measuring for Medicaid-insured and commercially-insured population in WA state. Measure not currently in HEDIS measure set required for plan accreditation, so likely not in use by health plans.<br><br>Concern regarding "new episode" restriction as it eliminates important population from measure.   |
| 10 | <b>Adherence to Antipsychotic Medications for Individuals with Schizophrenia</b>  | Safety             | YES<br>1879      | CMS                | Percentage of individuals at least 18 years of age as of the beginning of the measurement period with schizophrenia or schizoaffective disorder who had at least two prescription drug claims for antipsychotic medications and had a Proportion of Days Covered (PDC) of at least 0.8 for antipsychotic medications during the measurement period (12 consecutive months).                                      | Claims (inc Pharmacy)        | Health Plans                 | X -<br>Medicaid<br>Only                              | ?              |             |                  |          | Possible to do with available data. Concerns regarding condition specific measure and very small N for public reporting.<br>Measure ties to psych inpatient readmissions.   |
