

**Health Technology Clinical Committee  
 Final Findings and Decision**

**Topic:** Cochlear Implants: Bilateral versus Unilateral  
**Meeting Date:** May 17, 2013  
**Final Adoption:** September 20, 2013

**Number and Coverage Topic:**

20130517A – Cochlear Implants: Bilateral versus Unilateral

**HTCC Coverage Determination:**

Bilateral Cochlear Implants are a **covered benefit with conditions** consistent with the criteria identified in the reimbursement determination.

**HTCC Reimbursement Determination:**

**Limitations of Coverage**

- Age 12 months or older;
- Bilateral severe to profound sensorineural hearing loss;
- Limited or no benefit from hearing aids;
- Cognitive ability and willingness to participate in an extensive auditory rehabilitation program;
- Freedom from middle ear infection, an accessible cochlear lumen that is structurally suited to implantation, and freedom from lesions in the auditory nerve and acoustic areas of the central nervous system;
- No other contraindications for surgery; and
- Device used in accordance with the FDA approved labeling.

**Non-Covered Indicators**

N/A

**Agency Contact Information**

Agency	Phone Number
Labor and Industries	1-800-547-8367
Public Employees Health Plan	1-800-200-1004
Washington State Medicaid	1-800-562-3022

**HTCC Coverage Vote And Formal Action:**

**Committee Decision**

Based on the deliberations of key health outcomes, the committee decided that it had the most complete information: a comprehensive and current evidence report, public comments, and agency

**Final**

and state utilization information. The committee concluded that the current evidence on Bilateral Cochlear Implants demonstrates that there is sufficient evidence to cover with conditions. The committee considered all the evidence and gave greatest weight to the evidence it determined, based on objective factors, to be the most valid and reliable. Based on these findings, the committee voted to cover with conditions Bilateral Cochlear Implants.

**Cochlear Implants: Bilateral versus Unilateral Vote**

<b>HTCC Committee Coverage Determination Vote</b>			
	<b>Not Covered</b>	<b>Covered Unconditionally</b>	<b>Covered Under Certain Conditions</b>
Bilateral Cochlear Implants	0	0	9

**Discussion**

The Chair called for discussion on conditions for use of Bilateral Cochlear Implants due to the majority voting for coverage with conditions. The following conditions were discussed and approved by a majority:

**Limitations of Coverage**

**Covered Conditions**

- Age 12 months or older;
- Bilateral severe to profound sensorineural hearing loss;
- Limited or no benefit from hearing aids;
- Cognitive ability and willingness to participate in an extensive auditory rehabilitation program;
- Freedom from middle ear infection, an accessible cochlear lumen that is structurally suited to implantation, and freedom from lesions in the auditory nerve and acoustic areas of the central nervous system;
- No other contraindications for surgery; and
- Device used in accordance with the FDA approved labeling

**Non-Covered Indicators**

N/A

**Action**

The committee reviewed the evidence report for existing clinical guidelines and Centers for Medicare & Medicaid Services (CMS) decisions. CMS allows coverage of CI for the treatment of bilateral pre- or postlinguistic, sensorineural, moderate-to-profound hearing loss in individuals who demonstrate limited benefit from amplification.

The committee Chair directed HTA staff to prepare a Findings and Decision document on Bilateral Cochlear Implants reflective of the majority vote for final approval at the next public meeting.

### **Health Technology Clinical Committee Authority:**

Washington State’s legislature believes it is important to use a science-based, clinician-centered approach for difficult and important health care benefit decisions. Pursuant to chapter 70.14 RCW, the legislature has directed the Washington State Health Care Authority (HCA), through its Health Technology Assessment (HTA) program, to engage in an evaluation process that gathers and assesses the quality of the latest medical evidence using a scientific research company and that takes public input at all stages.

Pursuant to RCW 70.14.110 a Health Technology Clinical Committee (HTCC) composed of eleven independent health care professionals reviews all the information and renders a decision at an open public meeting. The Washington State HTCC determines how selected health technologies are covered by several state agencies (RCW 70.14.080-140). These technologies may include medical or surgical devices and procedures, medical equipment, and diagnostic tests. HTCC bases its decisions on evidence of the technology’s safety, efficacy, and cost effectiveness. Participating state agencies are required to comply with the decisions of the HTCC. HTCC decisions may be re-reviewed at the determination of the HCA Administrator.
