

Clinical Documentation for PASRR Level 2 Evaluation

	Face sheet / Admission Record
	Hospital discharge summary (SNF-based clinical retrieval)
	History and Physical (hospital-based clinical retrieval)
	Orders/MAR (no more than 7-day MAR)
	Recent lab work
	Most recent PT/OT/SLP notes (discharge note if not currently on service)
	Most recent psychiatry note, if seen
	Two weeks of progress notes
	Last provider note (ARNP, MD, etc)
	PHQ-9, BIMS, MoCA, SLUMS or other assessment scores
	Last Case manager/social worker note (hospital-based clinical retrieval)
	Social services assessment, if applicable (SNF-based clinical retrieval)
	Activities director assessment, if applicable (SNF-based clinical retrieval)

The date range for clinicals is generally a 2-week look-back period starting at the date of the evaluation. If the resident has transitioned to LTC at their SNF and/or is being referred due to recent changes in the PASRR process rather than a recent hospitalization, please send enough records related to their original hospitalization for the PASRR evaluator to understand their initial entry to SNF-level of care, as well as the hospital discharge information from their most recent hospitalization, if applicable.
