Agenda

• 2019 Health IT Operational Plan: Update

• 2020 Health IT Operational Plan: Overview
  – SUD HIT Plan and PMP Enhancements
  – Mental Health IMD Waiver Health IT items
  – Medicaid Managed Care Organization Contracts
  – Master Person Index/Provider Directory
  – Continuing Health IT Projects
2019 Health IT Plan update
2019 HIT Operational Plan Updates

- Advanced work with CDR, including deploying PAMI+ report
- Prioritized development of an Enterprise Master Person Index
- Recruited a provider to pilot implementation of a query-based function for CDR
- Continued coordination with nine ACHs and Medicaid Managed Care Organizations to support Medicaid transformation activities using health IT
- Added language to Medicaid MCO contracts to support use of health IT/HIE
- Began implementation of Sec. 1003 Support Act Grant: Roadmap to Recovery which includes a HIT focus
- Participated in Gravity Project to make interoperable key SDOH data elements and support their exchange.
SUD HIT Plan and PMP Enhancements
2019 HIT Operational Plan Updates

• DoH has connected the PMP to both national, interstate sharing hubs (PMP interconnect and RxCheck).
  – DoH is actively sharing data with 30 other states and DC, Puerto Rico and Military Health System.

• DoH has begun a security review of OneHealthPort Single Sign-on to determine if it can be used by PMP and other programs
2020 HIT Operational Plan
Planned Activities

• Leveraging results of the assessments undertaken in 2019 assessment of the enablers and barriers to integration of PMP information into EHRs, DoH leadership will:
  – consider the feasibility of the use of HIE-only vs HIE plus other 3rd party integrators to support PMP/EHR integration; and
  – continue to partner with Comagine (via UW) to help clinics integrate PMP data into their workflows.

• DoH and Better Prescribing and Better Treatment are collaborating to refine metrics for provider feedback reports and begin dissemination of these reports
DoH will begin development of an RFP for the PMP system. The RFP will require integration with the state HIE using updated standards and interstate data sharing.

In the interim, DoH will:

(i) enhance the PMP through an upgrade to the AWARxE platform; and

(ii) make available information on AWARxE system enhancements to system users.
MH IMD Waiver
1115 MH IMD Waiver Background

• Federal rules prohibit the use of Medicaid funds for services to individuals who reside in an Institution for Mental Disease (IMD) for more than 15 days during a calendar month.

• In 2017 Washington State was granted an 1115 waiver amendment for SUD IMD facilities. The amendment application required the state to make changes to its SUD treatment system.

• A 2018 executive order allows 1115 waivers for MH IMD facilities.

• The Legislature directed HCA to pursue a MH IMD waiver.

• HCA anticipates submitting the application in time for a July 1 approval and implementation date.
2020 HIT Operational Plan Activities

MH IMD Waiver Health IT tasks:

- Closed loop referrals and e-referrals
- Create and use electronic care plans that are interoperable
- Medical records transitions
- E-Consent for sharing sensitive health care information consistent with applicable law and regulations
- Interoperable Intake, Assessment, and Screening tools: data is interoperable with the rest of the HIT ecosystem
- Telehealth
- Linking health care information to the correct patient
- Identity management
Medicaid Managed Care Contracts
2020 HIT Operational Plan Activities Medicaid MCO Contract Requirements

• MMCO will participate in workgroups to:
  – consider availability and adequacy of needed tools, and feasibility to implement geo-coding for clinical and administrative decision making for and service delivery to targeted populations
  – identify how plans define: service/care coordination, care/complex care management; and gaps in an interoperable HIT infrastructure to support these services, including e-care plans and closed loop referrals.

• HCA will review MMCO Population Health Management Plans (PHMP) regarding Plans’: (i) data and analytic infrastructure, (ii) HIT /HIE infrastructure and tools, and (iii) other resources used/ needed to support PHM activities

• MCOs will provide semi annual reports on provider HIT/HIE technical assistance/ education
Master Person Index and Provider Directory
MPI and Provider Directory

- Begin a proof of concept for MPI
- Draft provider directory white paper and implementation plan
- Time and distance standards for provider networks
Continuing Health IT Projects
Continuing Health IT Projects

- Providing technical assistance to the Tribes regarding HIT/HIE
- Incorporating HIT requirements into alternative payment models (value-based payment models)
- CDR onboarding
- Improved reporting features in the CDR
- Deploy query functionality in the CDR
- Develop Standardized discharge summaries
- Patient Access to electronic health information
Bi-Monthly HIT Operational Plan Meetings

• 4th Tues. of every other month.

• Next meeting: March 24

• Same webinar, phone number, meeting room. Available at:
  https://attendee.gotowebinar.com/register/6533460124218503425
Questions?

More Information:

We anticipate that bi-monthly updates will be posted on HCA Transformation website.
