Funded by SAMHSA Grant No. TI080249

What is a Hub and Spoke Network in WA?

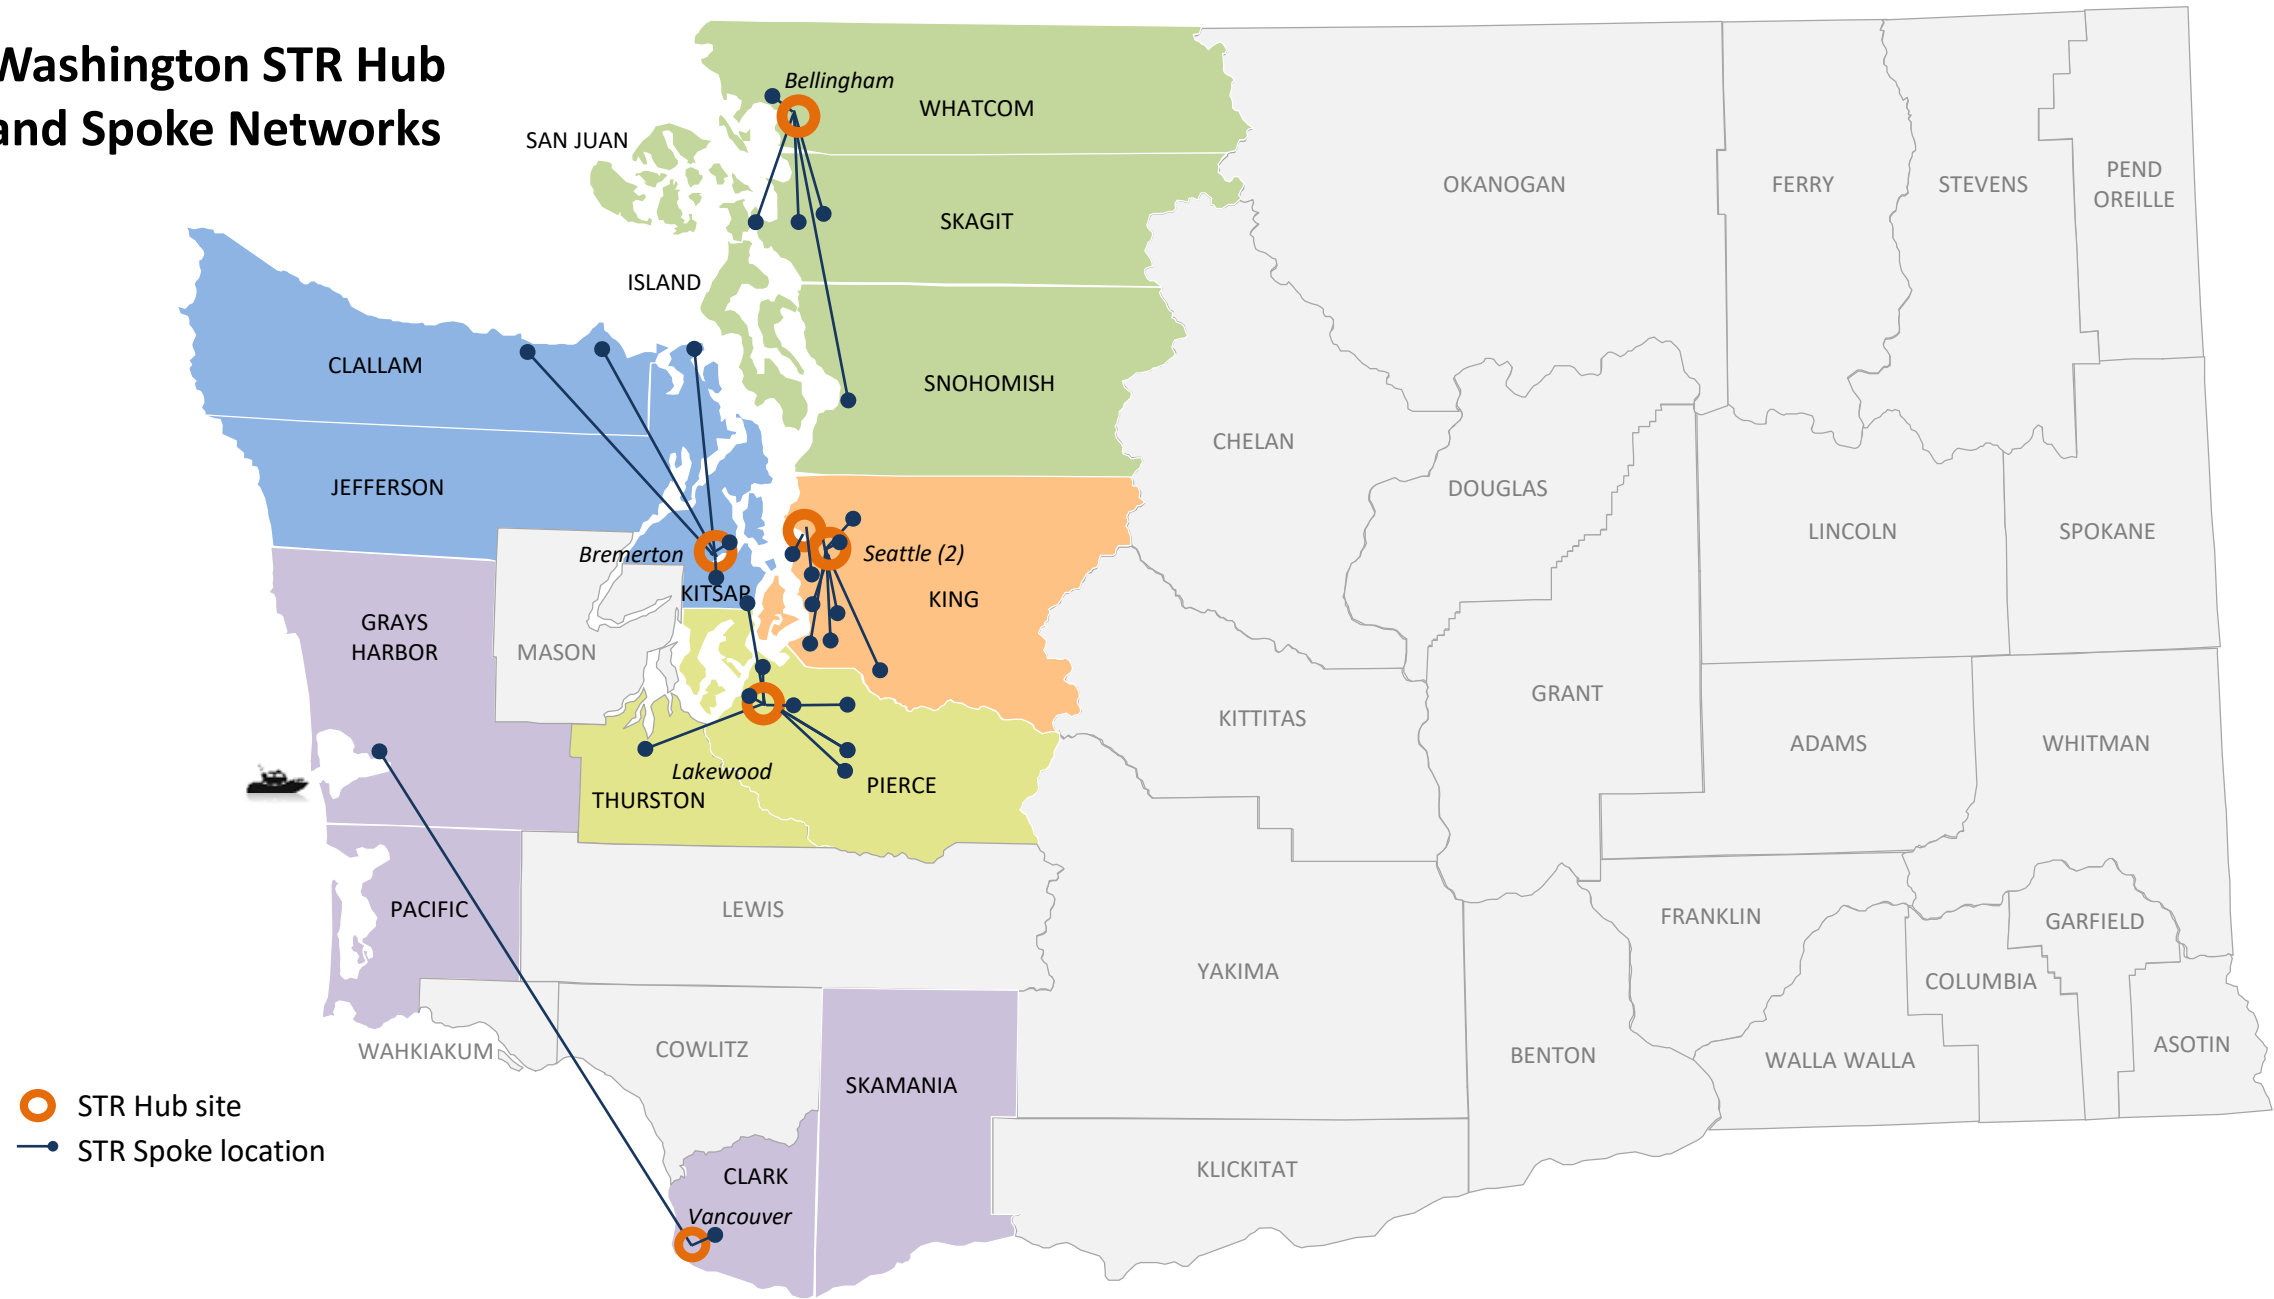

WA-STR funds multiple geographically-based integrated networks of care for Opioid Use Disorder (OUD) treatment (networks).

- WA-STR hybrid approach: borrows from a number of successful MAT service delivery models including
 - Vermont's Hub & Spoke Model;
 - The Collaborative Opioid Prescribing Model (Co-Op); and
 - Massachusetts' Nurse Care Manager (NCM) Model.

What is Hub and Spoke Network in WA?

- The networks support collaborative, tiered levels of psychosocial and medical care to address OUD.
- The networks provide coordinated care within geographic regions led by a *Hub* agency that is supported by five or more contracted behavioral health treatment, primary care, wrap around or referral agencies (*Spokes*).
- The networks receive federal grant funding to employ NCMs and care navigators who assist with ongoing MAT patient management and help patients navigate the treatment network.
 - These staff reduce the administrative and clinical burdens of the physicians prescribing medications for OUD

Washington STR Hub and Spoke Networks

DATA SOURCE: Division of Behavioral Health and Recovery.
NOTES: STR Spoke locations may represent more than one clinic or agency providing MAT services or referrals to the STR Hub site.
