\*A client's encounter with a provider, as reflected in Medicaid claims, was designated as a visit if the provider billed one or more units of service on a single day. Provider information is by billing NPI. An organization may have more than one billing unit in a geographic area. Some organizations with claims on multiple NPIs for the same location were assigned to a single NPI. Multiple units of service were counted as one visit if they occurred on the same day and were billed on the same claim. Infant case management visits reflect contact charges from 60 to 365 days postpartum. Claims are to date as of August 2016. Data may change as claims are paid.
