Adult Access to Preventive/Ambulatory Health Services

Denominator:
Data elements required for denominator: Medicaid beneficiaries who meet the above eligibility criteria.

Required exclusions for denominator.
- Eligible population exclusions are listed in the eligible population table above.
- Metric specific exclusions:
  o Beneficiaries in hospice care.

Deviations from cited specifications for denominator.
- HEDIS® specifications require no more than one gap in continuous enrollment of up to 45 days during each year of continuous enrollment. To determine continuous enrollment for a Medicaid beneficiary for whom enrollment is verified monthly, as is the case for the ProviderOne data source, the Medicaid beneficiary may not have more than a 1-month gap in coverage (i.e., a Medicaid beneficiary whose coverage lapses for 2 months [60 days] is not considered continuously enrolled).

Numerator:
Beneficiaries must qualify for inclusion in the denominator to be eligible for inclusion in the numerator.

Data elements required for numerator: One or more ambulatory or preventive care visits during the measurement year. Ambulatory or preventive care visits are defined by the value sets listed below. See HEDIS® for specific instructions.

Value sets required for numerator.

Required exclusions for numerator.
- None

Deviations from cited specifications for numerator.
- None
Adult Access to Preventive/Ambulatory Health Services

October 2018 Healthier Washington Dashboard release: The specification was updated to HEDIS™ 2018 specifications.

August 2019 update: The specification sheet has been updated to reflect the current version of the HEDIS® technical specification (from HEDIS® 2018 to HEDIS® 2019). No substantive changes were made to the DSRIP Metric Details. Note that while some of the names of the value sets included in the specifications have not changed, the underlying values may have been updated. See HEDIS® for specific instructions.

August 2020 update: The specification sheet has been updated to reflect the current version of the HEDIS® technical specification (from HEDIS® 2019 to HEDIS® 2020). Per HEDIS® General Guideline 43, unless specifically excluded, HEDIS® metrics include telehealth by default and do not require the use of a specific value set to identify relevant CPT and HCPCS place of service modifiers. Note that while the names of the value sets included in the specifications have not changed, the underlying values may have been updated. See HEDIS® for specific instructions.
