

P&T Archived Drug Classes Motion

Drug Classes	Motion	Date Reviewed	Decision
Diabetes-Long-acting Insulins	<p>After considering the topic brief presented today, I move to archive the following drug class from further regular review by the P&T Committee:</p> <p>Diabetes-Long-acting Insulins 10/20/2021* *(date = last motion)</p> <p>The drug class will remain on the PDL and the committee's last motion will remain in effect until changed by the committee. The agencies may conduct updated cost analyses of this drug class without additional committee approval so long as any resulting changes in the preferred status of a drug remains consistent with the committee's last motion for that drug class.</p> <p>The committee may review the archive status of a drug class upon its own initiative, or by request of the participating agencies at any time.</p> <p>Motion: Lee 2nd: Brown</p>	10/20/2021	Passed unanimous
