RNP team worked with a client that was desperate for help. She was using multiple substances, had nowhere to live, and did not have her three children. We were able to get her a bed date treatment facility in Sumner WA. We transported her there. While she was in treatment we worked with our in-house housing specialists to find her sober living when she graduated. She is currently staying in a sober house. She has her three children with her. We are continuing to support her while she is participating in her IOP and looks for gainful employment.

Peer enrolled into services with RNP on stating he was homeless drug user and needed employment. Upon enrollment client stated he had no days of sobriety of fentanyl. 2 week of being enrolled into the program the peer has moved into perement supportive housing and has been able to maintain his newly found sobriety with the help of medicated assisted treatment provider that has partnered with the RNP.

Deputy Mayor of Auburn requested we make contact with motorhome encampment in Auburn. When we went to the location, we found the encampment had been moved. We ended up running into Street level and was able to partner with them, doing some outreach, and because of this we were able to outreach 7 individuals and exchange contact info with 2 individuals and refer them to Peer Kent.

After collaborating and making contact with many other outside community businesses and stakeholders we were able to make some great connections and provide Narcan training. We have received numerous calls and referrals from many individuals including Renew, Health Department-needle exchange, Oxford House, and the Housing Authority and have been able to get numerous individuals established with our program who have now been able to find a new way of life including housing, employment, inpatient and other warm hand offs.

K started with RNP having been quite dependent on her parents for support and navigating simple self-care daily tasks. With the help of our RNP peer counselor K made it a goal to create more connections in the community along with obtaining a their own peer counselor license. K has been active in the community with going to the Recovery Café, attending bible studies, making friends, and started a new position of a peer support through the local family resource center. K has successfully completed the peer counselor training and is excited to start working within in this new role.

Our engagement coordinator has made a push to partnering with local food businesses to support our meals we provide our clients. She also coordinated an ongoing partnership with the Puyallup Public library to set up a community hot cocoa event to pass on information about our program and meet clients.

We had a participant who made the decision to go into long term treatment, since completing that program the participant is fully active in aftercare treatment services and is housed in recovery housing. When we first met this participant several months ago, they were feeling hopeless and spoke of not having anything to live for. They were in a place of despair and spoke of there being no help for them. When they came in to talk to us and thank us, we could see that life had been breathed back into them. They were so thankful and full of gratitude for the support that they received through the WSTC Kitsap R.E.A.L Team.

This participant has been houseless for over 1yr and law enforcement has been having "issues" with him such as trespassing. The RNPs received a call from law enforcement on 11/07/22 because this person was wanting resources. We were able to get him a hotel voucher for 3 days and during that time ,connected to The Recovery Café, an SUD assessment at CSNW. We were able to get him into recovery housing and within 1 week ,he was admitted into inpatient treatment and is due to graduate on 12/14/22.

An individual released from jail came directly to the Pend Oreille County Recovery Navigator Program office after leaving jail and immediately enrolled in the Recovery Navigator Program. The client was searching for housing services since they became homeless with housing due to a court order. The Pend Oreille County Recovery Navigator Program case manager accompanied the client to multiple court proceedings, they also assisted the client in enrolling into counseling services, and the court order was dropped. The client has returned home and is continuing counseling services. The client recently had a job interview and is waiting to hear a decision.

Father with teen daughter living in their car – working but ‘working poor’ so didn’t qualify for many services, had been getting hopeless about finding housing. At the end of November, they were able find an apartment, moved in, and are doing well. Father is now able to work full time.
