

Washington State EHR Incentive Program
WHITE PAPER #10: Security Risk Analysis Tool

Updated May 2018

You are required to upload your clinic's Security Risk Analysis each year. The date span showing on the analysis must be during your attestation year, but are permitted to run the report after that year if needed. The date span must show on the document you provide. Many times your EHR Vendor will supply your SRA (Security Risk Analysis), but there are tools available below if you need another resource.

FREE SRA TOOL BY HEALTH AND HUMAN SERVICES

The video tutorials is very helpful and would be the best way to get started with the tool. We recommend watching the videos prior to using the tool.

Main Page:

<https://www.healthit.gov/providers-professionals/security-risk-assessment>

Please use the most current version. If you are having problems, or have questions about this tool, please contact Health and Human Services (HSS) directly: <https://www.hhs.gov/about/contact-us/index.html>

** This tool is only to be used if your EHR is not able to produce a SRA.
