

WISe: Individuals providing Behavioral Health services

Introduction

This information sheet is intended to provide information regarding WISe to, Managed Care Organizations mental health agencies, crisis centers, emergency rooms, ombuds, independent contractors that take Medicaid, mental health providers working in a school setting, psychiatric hospitals, community oversight/staffing teams, intensive case management professionals, community consensus councils, children's councils, and children's resource teams.

What is WISe?

Washington State's Wraparound with Intensive Services (WISe)* provides comprehensive behavioral health services and supports to Apple Health eligible youth, age 20 and under, with complex behavioral health needs. WISe is designed to provide individualized, culturally competent services that strive to keep youth with intense behavioral health needs safe in their own homes and communities, while reducing unnecessary hospitalizations. WISe offers a higher level of care through these core components:

Time and location of services: WISe is community-based. Services are provided in locations and at times that work best for the youth and family, such as in the family home and on evenings and weekends.

Team-based approach: Using a Wraparound approach, WISe relies on the strengths of an entire team to meet the youth and family's needs. Intensive care coordination between all partners and team members is essential in achieving positive outcomes. Each team is individualized and includes the youth, family members, natural supports, a therapist, a youth partner and/or family partner, and members from other child-serving systems when they are involved in a youth's life. Other team members could include family friends, school personnel, a probation officer, a religious leader, a substance use disorder treatment provider, or a coach/teacher. The team creates ONE Cross-System Care Plan that identifies strategies

and supports, using the youth and family's voice and choice to drive their plan.

Help during a crisis: Youth and families have access to crisis services any time of the day, 365 days a year. Youth receive services by individuals who know the youth and family's needs and circumstances, as well as their current crisis plan. Whenever necessary, this includes face-to-face interventions at the location where the crisis occurs.

How does someone access WISe?

A youth must be eligible for Apple Health under WAC 182-505-0210 to receive services.

Referrals for a WISe screen can be made at any time by contacting a WISe provider agency directly. A list of WISe agencies are available:

- Agencies for individuals enrolled in managed care organizations (MCO):
www.hca.wa.gov/assets/program/rolling-update-wise-referral-list.pdf
- Fee-for service agencies for individuals not enrolled in an MCO:
www.hca.wa.gov/assets/free-or-low-cost/wise-ffs-referral-list-by-county.pdf

When should I refer youth for a WISe screen?

A WISe screen is required when:

- Youth and families self-refer, by requesting a screen for WISe.
- There has been a request for out-of-home treatment or placement substantially related to unmet mental health needs.
- There has been a step-down request from institutional or group home care.
- There has been crisis intervention and the youth presents with past or current functional indicators* of need for intensive mental health services.

** Functional indicators include: an inpatient mental health stay; multiple out of home placement stays; Juvenile Rehabilitation services or adjudication; use of multiple psychotropic medications; anorexia/bulimia; substance use disorder; and suicide attempt or self-injury.*

You should consider referring youth for a WISE screening if the youth who, *primarily due to a suspected or identified mental health difficulty:*

- Eligible for Apple Health Behavioral Health services, but has needs at a higher-than-average severity
- Presenting with serious behavioral health issues
- Having a high-level of parent-child or family conflict due to a mental health difficulty
- Involved in with multiple systems (i.e., child welfare, juvenile justice, substance use disorder treatment)
- At risk of out-of-home placements, such as foster/group care, Children's Long Term Inpatient Program (CLIP) or acute hospitalization
- In Special Education and/or has a 504 Plan, with multiple school suspensions for mental health and/or behavioral issues
- At risk based on a history of running away or disengaging from care due to mental health difficulties.

What information is needed for the referral?

When making a referral, please have as much of the following information available as possible:

- Youth's name and date of birth
- Youth's Provider One Identification Number
- Caregiver's name and relationship
- Any known child-serving system involvement (legal/ justice involvement)
- Risk factors (i.e., suicide risk, danger to self or others, runaway, medication management)
- Knowledge of the youth's personal life (i.e., living situation, school functioning, physical health)
- Known arrests and number of convictions
- Number of hospital emergency room visits (any for mental health or substance abuse)

- Any psychiatric prescription medications taken (currently or in the past)
- Reported diagnoses
- Name of current insurance plan (managed care or Fee-For- Service)
- Need for spoken language or American Sign Language interpreter services

What happens once I make a referral?

When working with a youth who is not currently receiving but is eligible for Medicaid-funded mental health services:

- Youth and family are educated about WISE and its benefits and agree to participate.
- Youth are referred to a screening entity.
- A screen is completed by a designated provider to determine whether a youth's needs appear to rise to the WISE level of care. They use the administration of the Washington Child and Adolescent Needs and Strengths (CANS) tool to make this initial screening determination. This screening tool can be completed over the phone or in-person.
- When the screening tool shows that WISE services could potentially benefit a youth, youth are referred to a WISE agency so that an intake evaluation can be completed.
- The intake process is used to determine whether services are medically necessary. Determining whether a youth meets medical necessity is required to provide any Medicaid mental health service to a person. Eligibility for WISE services is also determined at this time.
- When it is determined that a youth does not meet the WISE level of care, they are referred to other mental health services, as appropriate, to have their needs addressed.

When working with a youth who is currently receiving Medicaid-funded mental health services:

- Youth and family are educated about WISE and its benefits and agree to participate.

- Referral to a WISE service provider can be done through coordination with the youth's current clinician, or by making a referral to a screening entity.

As a key partner, what is my role?

You may be invited to participate on a youth's Child and Family Team, to strategize and support the team in meeting the team's mission. Child-serving system partners are critical for achieving successful outcomes.
