The top two charts, **Referral Sources for WISe Screen**, display the referral sources for screens based on BHAS data. Referral sources are mutually exclusive (only one per screen). The bottom two charts, **Services 12 Months Before Screen**, show service utilization in the year prior to the screen primarily from administrative records (not mutually exclusive). The left two charts display all available quarters of data (cumulative), and the right two charts display the most recent four quarters available (last 12 months).

NOTES: Counts of screens (not unduplicated; a child may have more than one in each time period) from WISe screening data (BHAS). Counts of clients (unduplicated; at most one in each time period at the state level) from administrative data (ProviderOne). Due to data lag, service data not available as recently as screening data. Service data may be incomplete in the last quarter shown. Regions reflect HCA managed care regions as of January 2019. [1]In order to protect the privacy of individuals, cells in this data product that represent 10 or fewer persons are not displayed. [2]Some additional cells with n>10 have been suppressed to ensure that cells with small numbers cannot be recalculated.

NOTES: Due to a longer data lag for administrative data relative to screening data, time periods are defined differently for the upper and lower tables. [1]In order to protect the privacy of individuals, cells in this data product that represent 10 or fewer persons are not displayed. [2]Some additional cells with n>10 have been suppressed to ensure that cells with small numbers cannot be recalculated. [3]Due to data completeness issues for administrative CLIP data at the time this report was run, CLIP services in the 12 months before screen may be underestimated.
