Tribal Roundtable #1: Substance Abuse Block Grant Renewal

Brief Overview of Biennial Plan and Block Grant Purpose

Brief Overview of Block Grant Biennial Plan and Purpose

- DBHR must submit a biennial plan update to SAMHSA by September 4, 2018.
- The Biennial Plan describes how DBHR uses the SAMHSA Block Grant federal funding to address SUD and MH needs within WA.
- Requesting formal input from Tribes.
- Last tribal consultation on the plan: July, 2017

Block Grant Purpose

Block Grant Programs' Purposes

SAMHSA's MHBG and SABG provide states with the flexibility to design and implement activities and services to address the complex needs of individuals, families, and communities impacted by substance use disorders and for adults with SMI and children with SED. The purposes of the block grant programs support these service needs and are consistent with SAMHSA's vision for a high-quality, self-directed, and satisfying life.

Block Grant Purpose

SAMHSA has indicated that the block grants be used:

- 1. To fund priority treatment and support services for individuals without insurance or for whom coverage is terminated for short periods of time;
- 2. To fund those priority treatment and support services not covered by CHIP, Medicaid, Medicare, or private insurance for low-income individuals and that demonstrate success in improving outcomes and/or supporting recovery;
- 3. For SABG funds, to fund primary prevention: universal, selective, and indicated prevention activities and services for persons not identified as needing SUD treatment; and
- 4. To collect performance and outcome data to determine the ongoing effectiveness of promotion/SUD prevention, treatment and recovery supports and to plan the implementation of new services.
