

UMP Medical Preferred Drug List

The UMP Medical Preferred Drug List (PDL) helps you understand preferred and non-preferred drugs for certain drug classes and disease states. Medications may be selected as preferred options due to effectiveness or cost. The UMP Medical Preferred Drug List identifies these preferred options when they exist.

Preferred status does not change benefit structure, copays/coinsurance, or pre-authorization requirements for coverage. When noted, pre-authorization is still required prior to coverage. In addition, only medical medications are included in this PDL. Medications solely covered by the pharmacy benefit have not been included.
